2. Mission station of the Baptist Missionary Society, in the Lower Congo region, West Central Africa. This was the first station of the Society in Central Africa, and was opened in 1879; it has now 2 missionaries, 1 out-station, 33 church-members, 108 day-scholars, 118 Sabbath-schoolers.

3. The capital of Salvador (q.v.), Central America, is an old city (founded 1528), which has often been destroyed by earthquakes and volcanic eruptions. It has 16,327 inhabitants.

**Sanskrit Version**.—The Sanskrit belongs to the Indic branch of the Aryan family of languages, and is the learned language of the Brahmins. The late Dr. Carey utilized this language in the production of a New Testament in the Sanskrit, which was published at Serampore in 1809. The entire Bible was completed at press in 1818. A second edition of the New Testament was published in 1820. A new and more improved translation of the Bible made by Drs. Carey and Yates, and completed by Dr. Wenge, was issued in 1873.

Besides translations into the Sanskrit proper, there were published in (a) *Sanskrit-Bengalee*, i.e., in Bengalee characters, Genesis (1855-60), Proverbs (1855), Luke's Gospel (1855), and the Psalms (1857); (b) *Sanskrit-Devanagari*, i.e., in Sanskrit popularized, the Psalms (1876), Proverbs and the New Testament (1877); (c) *Sanskrit-Uriya*, i.e., in Uriya or Orissa characters, Genesis, Proverbs, and Luke (1855), and the Psalms (1858).

(Specimen verses. John 3: 16.)

ईश्वर इत्थं जगद्वदत यत् स्वमदितोयं  
तनयं प्राददात् यतो यः कश्चित् तस्मिन्  
विश्वसिष्यति सोऽविनाश्यः सन् अनन्तायुः  
प्राप्स्यति ।

(Sanskrit-Uriya.)

ସେହେରୁ ଗାହାକିଂରେ ପ୍ରବେଶ କରି ଶୋଷାବଦାୟ ଯେଉଁ  
କହୁ ନୁହେଁ ଅନନ୍ତ ପରମାତ୍ମ ପାଇବ ଏହିପରି ଭଲେ କରନ୍ତୁ  
ଏହେ ପ୍ରେମ କଲେ ଯେ ସେ ଆପଣା ଅସୁଖରୁ ପୁରୁଷ ଦେଲେ

**San Sebastian**, a city on the Bay of Biscay, Spain, 210 miles north-northeast of Madrid, is the headquarters of the Spanish Mission of the A. B. C. F. M. (q.v.) Population, 10,000, chiefly Spanish Basques. The work is educational and evangelistic, though churches are being organized in various out-stations. At San Sebastian a girls' boarding-school is a

means of much good. The chief strength of Protestantism is found in the many groups of Christians who are found scattered throughout the country, where in small communities their life is more noticed, and makes a stronger protest against the surrounding Papacy. The present (1890) force in San Sebastian is: 1 missionary and wife, 1 female missionary, 1 church, 51 communicants, 41 boarding pupils, 100 pupils. Churches have been organized at each of the 17 out-stations, and there are in all 298 communicants and 504 scholars.

**Santa Barbara**, a town in Southeast Brazil, in the province and near the city of São Paulo. Mission station of the Methodist Episcopal Church (South), which works chiefly among American emigrants—not, however, to the exclusion of native Brazilians.

**Santa Cruz Islands**, a group of Melanesia, lying southeast of the Solomon Islands and north of the New Hebrides, between longitude 165° and 170° east, and latitude 8° and 12° south. Santa Cruz is the largest island. Mission work is carried on by the Melanesian Mission (q.v.).

**Santa Isabel**, mission station of the Primitive Methodists in West Africa, on the island of Fernando Po (q.v.).

**Santaliala**, a name sometimes applied to that portion of Bengal, India, which is inhabited by an aboriginal tribe, the Santals, who speak a distinct language, called Santali. (See Santals under article Bengal.) The Free Church of Scotland has a Santal Mission (1871), with stations at Toondi, Pachamba, and Chakai. The C. M. S. mission to Santalia, commenced in 1860, includes the districts of Taljhari, Barharwa, Hirampur, Bhagaya, and Godda. There is also a Santal district church-council in connection with this mission, which has eight pastors. (See also Bethel Santal Mission.)

**Santali Version**.—The Santali, which belongs to the Kolarian group of the non-Aryan languages, is spoken by the aborigines of Northwest Bengal. A translation of the Gospel of Matthew and of the Psalms was made by the Rev. E. L. Puxley of the Church Missionary Society. The former was published by the Calcutta Auxiliary Bible Society in 1868 (revised edition 1876), the latter in 1875. The character used was the Roman. In 1876 and 1877 the Gospels of Mark, Luke, and John were published, while the Acts were added in 1879. During the year 1880 a Translation and Revision Committee, consisting of three members of the Church Missionary Society, was formed; and in 1881 a revised edition of 1,000 copies of Matthew's Gospel was published by the Calcutta Auxiliary, with the sanction of the British and Foreign Bible Society. The Revision Committee, unable to determine which of the rival terms for *God* and *Holy Ghost* should be exclusively used, printed half the edition with the terms *Cando* and *Sonat*, and half with *Isor* and *Dhurm Atma*, and a note is added to each part explanatory of the terms. A translation of the New Testament was made by the Rev. Skrefsrud, and offered to the British and Foreign Bible Society in 1881, seems not to have been accepted. In 1884 a representative committee was formed to carry out the translation of the New Testament. To meet the demand for the

book until the version now being prepared by the Rev. E. T. Cole and the Santal Revision Committee is ready, the Calcutta Auxiliary published in 1888 for the first time a complete edition of the New Testament, made up of the portion of the New Testament completed by the Revision Committee and Mr. Cole's translation of the rest unrevised by the Committee. The edition consisted of 1,000 copies, and is printed in Roman type. In 1886 the Calcutta Auxiliary published also an edition of 1,000 copies of the Gospel of Luke in Bengali characters, for the benefit of those who know the Santali languages, and only the Bengali character. The transliteration was made by Mr. Cole, one of the Revision Committee, who also edited the same. The demand for the portion was such that a second edition of 5,000 copies had to be published in 1887.

(*Specimen verse*. Matt. 5: 16.)

Nonká báre ápe hon hořko samángre marsál  
gnel ochoitápe jemon unko hon ápcá' bugi kámi  
gnelkáte áperen sernáren janámi: ko sarhaue.

**Santander**, a town in Spain, 95 miles west of San Sebastian (q.v.). Together with Bilbao, Pamplona, Roa, Logrono, Pradejon, etc., it is an out-station of the A. B. C. F. M. mission to Spain. The work is carried on mainly by means of schools, which are attended with great eagerness on the part of the children. Church services have been greatly hindered by the difficulty of securing rooms; the parlors of the Christians were often the only available meeting-places.

**Santiago**, the capital and principal city of Chili, South America, has a beautiful location on a plain 1,830 feet above the sea, between the Andes and a lesser range, distant 115 miles by rail from Valparaiso. The streets are laid out with great regularity, but owing to the frequency of earthquakes the houses are usually of one story. The water-supply is brought in an aqueduct five miles long. The rainfall is not great, and is usually in the summer months. Snow and hail are rarely seen. As many as thirty earthquake shocks have occurred in one year. Population (1885), 200,000. Mission station of the Presbyterian Church (North); 3 missionaries and wives, 6 out-stations, 161 boys attending the *Instituto Internacional*, of whom 50 are boarders.

**Santo Domingo**.—1. A republic which occupies the eastern portion of the island of Haiti, West Indies (q.v.).—2. The capital of the above republic, situated at the mouth of the Ozama River; was founded in 1494, and has 25,000 inhabitants, according to the official statement. Mission station of the African Methodist Episcopal Church, which has the only Protestant church in the city, with a membership of 86 under the care of 1 missionary.

**Santo Espiritu**, the most northerly of the New Hebrides Islands (q.v.), is now (1890) a station of the Canada Presbyterian Church. A missionary and his wife have recently occupied this heretofore neglected island, and the reports from this most difficult field state that the work is encouraging and hopeful, and the mission is already a centre for much good.

**San-ui**, a city, the capital of the district of the same name, in Kwangtung, China, about 40 miles south of Canton and west of Hong Kong. From this and the adjoining districts of Sinning and Hokshan go forth the immigrants to other countries. Many of these returning have been of good service in mission work, and a chapel has been built not far from San-ui City, by contributions from Chinese Christians in America. Mission station of the Wesleyan Methodist Missionary Society; 1 missionary, 1 chapel, 63 church-members. Members of the mission of the Presbyterian Church (North) make tours throughout this whole region, and recently a member of the Canton Mission has been stationed at Macao, from which place he superintends the work in San-ui, where there is a church with 26 communicants.

**São Paulo** (San Paulo), the capital city of a province of the same name in Brazil, is quite an important city, and has developed very much within recent years. It is the centre of the railway system of the province, and is distant only 86 miles from Santos and 220 miles southwest from Rio de Janeiro. Though the streets are narrow, they are well paved, and are lighted with gas. Sewers and water-mains have been constructed. Population (1883), 40,000. Mission station of the Methodist Episcopal Church (South); 2 missionaries. Presbyterian Church (North); 1 missionary, 1 physician, 1 female missionary. South American Missionary Society; 1 missionary. Work is carried on at Santos from this point.

**Sarawak**, a town on the island of Borneo, East Indies, consisting of a native and European town, the former built on each side of two branches of a river; many of the houses are built on piles, and are very respectable in appearance. Trade with Singapore is considerable. Population, 18,000. Mission station of the S. P. G. (1851); 1 missionary.

**Sarawak**, district on northwest coast of Borneo, governed by Rajah Brooke, under the protection of the British; has an area of 35,000 square miles, with a population of about 30,000.

**Sarepta**, a town in Cape Colony, South Africa, near the west coast, south of Durban, northeast of Cape Town. Mission station of the Rhenish Missionary Society; 1 missionary, 2 native workers, 72 school-children, 102 communicants.

**Sargeant, John**, b. Newark, N. J., U. S. A., 1710; graduated at Yale College 1729; was tutor 1731-1734. He was contemporary with David Brainerd, and taught him the Algonquin language. The Commissioners for Indian Affairs having found that the Indians living at Skatekook and Unahktukook, on the Housatonic River, were disposed to receive a missionary, and having learned that Mr. Sargeant, a graduate of Yale, and then a tutor in the college, was willing to devote himself to labor among the Indians after his engagement as tutor had expired, selected him for that post. In October, 1734, he went to inspect the field, and preached his first sermon through an interpreter. Leaving a teacher, he returned to Yale, taking with him two natives, sons of the principal chiefs, to teach them English and to learn their vernacular. In July, 1735, he was

settled as their missionary, and the next month ordained at Deerfield in presence of the governor and council and a large number of English and Indians. Among his first converts were the two sachems and their wives. These Indians, the wandering Mohicans, he collected from three localities at Stockbridge. A township six miles square was laid out for them and incorporated, a church and schoolhouse were erected, and a dwelling for the missionary, at the expense of the province.

Mr. Sargeant acquired the native language with facility, and so well that the people said he spoke it better than themselves. He translated into their language parts of the Old Testament, and all the New except the Book of Revelation. He introduced many of the arts of civilized life, interested them in singing, taught them Biblical history and doctrine, and brought into the mission school many Mohawk and Oneida children from the province of New York. Regarding the education of the youth as essential to his success, he had formed the plan of a manual-labor school, in which the pupils should contribute to their own support. Provision had been made for the education of several boys, land procured, a schoolhouse built, and some boys were collected; but the death of Mr. Sargeant prevented the consummation of the plan. He died July, 1749, aged 39, mourned by the Indians, who loved him as a father and friend. Their improvement through his labors had been great. He found them but 50 in number, living miserably and viciously in wigwams, widely scattered, and roving from place to place. He left them 218 in number, settled in a thriving town, with twenty families in frame houses, and many having farms cultivated, fenced and well stocked. He had baptized 182, and 42 were communicants. At his death Mr. Woodward took charge of the mission, and was succeeded by Jonathan Edwards, afterwards President of Princeton College.

**Sargent, Edwin**, b. Paris, France, 1815; spent the early part of his life at Madras; went in 1835 to Palamcotta, Tinnevely, as a missionary of the Church Missionary Society; in 1839 he went to England, and studied three years in the Church Missionary College at Islington; was ordained in 1842, and the same year returned to his work in Tinnevely. The first eight years he was located at Suvisheshapuram, having charge of a missionary district. In 1850 he was transferred to Palamcotta, and two years later appointed principal of the Preparandi Institution, which had a high character for proficiency while he was at the head of it. More than 500 young men were instructed by him, many of whom are now pastors of native Christian churches in the towns and villages, and many more are catechists and schoolmasters. In 1874 he was nominated a suffragan or coadjutor bishop to the Bishop of Madras, and on March 11th, 1877, consecrated in Calcutta by Bishop Johnson, assisted by the bishops of Madras, Bombay, and Colombo. He had charge of eight of the ten districts into which the Society's Tinnevely Mission was divided. In these districts were 51,000 Christians, 66 native pastors, and many catechists and schoolmasters, all under his care. During the first fifty years of the bishop's missionary service, the number of villages containing Christians in the Church Missionary Society's portion of

Tinnevely rose from 224 to 1,018, the Christians and catechumens from 8,693 to 56,287, and the native clergy from 1 to 68. In the earlier period native Christians did nothing for the support of the gospel among themselves; at the later period their contributions for church work amounted to over 33,000 rupees annually. The affairs of the church are now managed to a very large extent by the Christians themselves, and no native clergyman draws his stipend from the Foreign Missionary Society. The success of church work is due very largely, under God, to the practical wisdom, untiring zeal, and loving labor of Bishop Sargent.

In 1885 his jubilee was celebrated at Palamcottah. It was a day of great joy. A pundal or shed, capable of holding 2,000 persons, was erected adjacent to the bishop's house, adorned with numerous emblems of festivity. At the first service, which was held in the mission church, were upwards of 1,400, including sixty native clergymen, and hundreds more were outside. In the P.M. the pundal was crowded with representatives of all classes of the Christian community from all parts of the province. The native Christians presented to the bishop a beautifully bound English Bible with a suitable inscription. An address also was read reviewing the work of the preceding fifty years. Not the least gratifying part of this service was an address of a Brahmin in behalf of the leading members of the Hindu community in Tinnevely district, in which they acknowledged his invariable courtesy and benevolence, his wise counsel, and his unwearied efforts for the public good, and assured him of the esteem in which he was held by all Hindus who had had the privilege of making his acquaintance.

During his long mission service Dr. Sargent made three visits to England—in 1854, 1872, and the last in 1888, when he went to attend the Lambeth Conference. He was too ill to be present at any of its meetings. He returned to Tinnevely in October, 1888, very much enfeebled, and gradually grew weaker. He bore his long and painful illness with great patience, and died at Palamcottah October 10th, 1889, having been engaged fifty-four years in the mission service. The coffin, covered with flowers, was borne on the shoulders of the mission agents to the Tamil church.

Bishop Sargent had a marvellous knowledge of the vernacular. Mr. E. B. Thomas, of the Madras civil service, knew him well, and says: "I was struck with his untiring energy, kindly sympathy, and earnest love toward his native converts, who had constant and ready access to him at all times. I occasionally heard him preach in Tamil, when the church would be full, the open windows and doors being often thronged with heathen listeners."

The "Madras Mail" thus speaks of him: "He was blessed with a sanguine and cheerful temperament, and an all-embracing benevolence. There was an almost child-like simplicity in the faith that was within him, and which he eloquently preached from the heart to others, and allied with it was a habit of taking broad views of men and things. He loved his work for its own sake, and refused to be discouraged by any alleged slowness in its progress. He had a fine presence, a ready eloquence, a well-cultivated mind, and a retentive memory. He had also a keen sense of humor, and as a *raconteur* of good stories he was always

a welcome guest at the houses of his countrymen."

**Saron**.—1. A small town near the west coast in Cape Colony, Africa, west of Tulbagh and north of Cape Town. Mission station of the Rhenish Missionary Society, with 1 missionary, 12 native helpers, 500 communicants, 345 scholars.

2. A station of the Hermannsburg Missionary Society in Basutoland, South Africa, having 583 members.

**Satara**, a town of Bombay, 56 miles south of Poona, near the confluence of the Kistna and the Yena, among the hills of the Deccan. The town is clean and the streets are broad, but there are few large or ornamental buildings; and though still a large place, it has greatly decreased in importance since occupation of the country by the British. Population, 28,601, Hindus, Moslems, Jains, Parsis, etc. Mission station A. B. C. F. M.; 1 female missionary, 25 native helpers, 7 out-stations.

**Savaii**, an island of the Samoan group, Polynesia, northwest of Tutuila and west of Upolu. Mission station of L. M. S. (1836); 2 ordained missionaries, 41 female missionaries, 67 native preachers, 2 stations, 1,889 church-members, 104 schools, 2,840 scholars.

**Savas**, an island of the East Indies, southwest of Timor Island, southeast of Java; has 15,000 inhabitants, more than half of whom are nominally Christians. They are visited twice a year by the Dutch Government's assistant pastor residing at Kupang, Timor.

**Sawyerpuram**, a mission station of the S. P. G. (1844) in Madras, India, with 4 native pastors, 672 communicants, boys' boarding-school, 153 scholars.

**Schauffler, William Gottlieb**, born in Stuttgart, Germany, August 22d, 1798. In 1804 his father led a colony of Germans to improve their condition, to Odessa, in Russia. There being no schools for Germans, the educational advantages for the son were scanty. His father's clerk taught him the first principles of arithmetic, the reading and writing of German, Scripture selections, and Luther's catechism, while he himself read history, travels, novels, copied pictures and poetry, played the flute, mastering also the French, Italian, and Russian. He also began the study of Latin and English. At the age of fourteen he worked at his father's trade, the turning-lathe. Dancing, billiards, and the theatre were his favorite amusements, but his chief passion was music, especially the flute. At the age of twenty-two he confessed his faith in Christ. He early became interested in foreign missions; and in 1826, meeting the famous missionary Dr. Joseph Wolff, his enthusiasm was further kindled. Finding, however, the plans of Dr. Wolff impracticable, he went to Constantinople and thence to Smyrna, where he met Rev. Jonas King, who induced him to go to America for an education. He entered the Andover Theological Seminary, where he remained five years, studying often fourteen and sixteen hours a day. He says: "Aside from the study of Greek and Hebrew, and general classical reading, I studied the Chaldee, Syriac, Arabic, Samaritan, Rabbinic, Hebrew-German,

Persian, Turkish, and Spanish; and, in order to be somewhat prepared for going to Africa, I extracted and wrote out pretty fully the Ethiopic and Coptic grammars. For some years I read the Syriac New Testament and Psalms for my edification, instead of the German or the English text." He also aided the professors in their translations. He was ordained November 14th, 1831, a missionary of the A. B. C. F. M. to the Jews; studied Arabic and Persian with De Sacy, and Turkish with Prof. Kieffer in Paris, and then went to Constantinople. There he preached in German, Spanish, Turkish, and English. In 1838 he visited Odessa, chiefly on Mrs. Schauf-  
 fler's account, and was much engaged in evangelistic work, resulting in many conversions. He translated the Bible into Hebrew-Spanish, that is, Spanish with a mixture of Hebrew words and written with Hebrew characters, for the Jews in Constantinople, descendants of those who had been driven from Spain. Dr. Schauf-  
 fler, besides being a translator, was an earnest evangelical preacher, his Sunday services in English and German for local residents being greatly blessed. He delivered in Constantinople a series of discourses, which were published in a volume by the American Tract Society, entitled "Meditations on the Last Days of Christ." In 1835 the first Jewish convert, a German whom he had known sixteen years before in Russia, not being allowed by the government to profess Christianity except as a member of the Greek Church, went to Constantinople, and was by him baptized. In 1839 he went to Vienna to superintend the printing of the Hebrew-Spanish Old Testament. There he resided three years, and many striking conversions occurred through his labors. He presented to the emperor in a private interview his printed Bible, on which he had bestowed great labor. The Jews having pronounced a favorable verdict upon it, a second and larger edition was printed. Journeying from Vienna he spent ten days in Pesth, where many of the better class of Jewish families embraced the Christian faith. The Jewish Mission having been relinquished in 1855, he was requested by the Scotch Free Church, to which it had been transferred, to take charge of the work, but he declined. He declined also the proposal to enter the American field. About this time he was appointed by the mission to lay before the Evangelical Alliance, soon to meet at Paris, the "great question of religious liberty in Turkey, including the Mohammedans," and to "urge the Alliance to memorialize the sovereigns of Europe to use their influence with the Sultan to secure the abolition of the death-penalty for Moslem converts to Christianity." The result was seen in the triumph of Sir Stratford Canning. The morning he left Paris the news of Sebastopol's fall was proclaimed on the streets, and in Stuttgart, his native city, he addressed an immense audience on the Crimean war. After this war the way seemed open for missionary work among the Turks, and Dr. Schauf-  
 fler, with the approval of the mission, decided to enter the Islam field. To fit himself for this new work, he applied himself to the Turkish language anew. In 1857 a paper on the Turkish and Bulgarian work, prepared by Drs. Schauf-  
 fler and Hamlin, was sent to the Prudential Committee, and Dr. Schauf-  
 fler was deputed by the mission to present, in America and England, the claims of the new mission to the Turks.

After thirty-one years of absence he set sail for home. His appeals met with a generous response. The Prudential Committee, however, decided, after some years, not to continue the Turkish Mission as a separate work, but to have the Armenian Mission cover the whole field. This decision, and the entrance of the English Propagation Society into Turkey, led Dr. Schauf-  
 fler to resign as a missionary of the Board, but he pursued his Bible translation in the employ of the American and British and Foreign Bible Societies. His great work was the translation of the whole Bible into Osmanli-Turkish, the language of the educated Turks. This occupied him eighteen years. He published an ancient Spanish version of the Old Testament, revised by himself, with the Hebrew original in parallel columns, a popular translation of the Psalms into Spanish, a grammar of the Hebrew language in Spanish, a Hebrew-Spanish Lexicon of the Bible. He contributed also articles in Spanish to a missionary periodical in Salonica. He was a remarkable linguist, able to speak ten languages, and read as many more. His rare scholarship, and especially his translation of the Bible into Osmanli-Turkish led the Universities of Halle and Wittenberg to confer upon him the degrees of D.D. and Ph.D., and Princeton College the degree of Doctor of Laws. For his great services to the German colony of Constantinople the King of Prussia sent him a valuable decoration. He left Constantinople in 1874, and after residing three years with his son Henry, a missionary of the A. B. C. F. M. in Moravia, he went to New York with his wife to live with the two youngest sons. After a brief and painless illness, he passed away, January 26th, 1883, aged 85, having been in active missionary service nearly fifty years.

Dr. Schauf-  
 fler was a man of rare qualities, not only as a missionary and translator, but as a friend. His love of music, in which he was a great proficient, his wonderful memory, and kindly interest in persons made his home a delightful one to visit; and his rich imagination gave a marked vividness to the Bible scenes which, both in his sermons and private conversations, he was very fond of illustrating. It was his habit, as it was that of his friend and associate Dr. Elias Riggs, at morning worship at home to read from the original Hebrew and Greek, and the quaint comments that always attended the reading often brought out the meaning with a force that no one who ever heard them could forget.

**Sheitswa Version.**—The Sheitswa belongs to the languages of Africa, and is spoken by the natives in Gasaland and vicinity, to the number of 200,000 or 300,000 (estimated). Among these people the Rev. B. F. Ousley of the A. B. C. F. M. has labored for many years, and his translation of Matthew, Mark, Luke, and Acts has recently (January, 1890) been accepted by the American Bible Society for publication. The translator is in the United States, and will superintend the printing of his work.

**Schemachi** (Shamaka), a large and important city of Eastern Transcaucasia. Population about 25,000, of whom a large number are Armenians. As a result of the work of the Basle Missionary Society (q.v.), a congregation of evangelical Armenians was started here, which

did not lose its power after the missionaries were obliged to leave. Its leader, Pastor Serkis, received some education at Basle Seminary, and by his rare skill and earnest piety succeeded in keeping his little band together. Notwithstanding the oppressive laws of Russia, they grew in numbers and in strength, until they became one of the most influential communities in that section of the Caucasus. From Schemachi the work spread to Shusha, Nucha, and Baku, in each of which places congregations were formed. Schemachi suffered severely from an earthquake, 1872 (*circa*), and many of the Protestants removed to Baku on the Caspian, where there is now a flourishing church. Foreign pastors are not allowed, but young men of the community have at different times been selected and sent to Basle for education, and then have returned to their homes to do good work.

**Schiali**, a town in the Tanjore district, Madras, India, between the Coleroon River and the coast, northwest of Nangoor and Manikramam. Mission station of the Evangelical Lutheran Society of Leipsic; 1 missionary, 473 communicants, 336 scholars.

**Schietfontein**, a town in Central Cape Colony, Africa, northwest of Victoria. Mission station of the Rhenish Missionary Society; 2 missionaries (1 married), 1 female missionary, 110 scholars, 440 communicants.

**Schiffelin**, a town in Liberia, West Africa, not far from Monrovia. Mission station of the Presbyterian Church (North); 1 female missionary, 35 church-members, 56 school-children.

**Schmelen, John Henry**, missionary of L. M. S. to South Africa 1811–1848. Stationed at Namaqua Mission, Stienkoff, and Pella. While there he was sent to explore the mouth of the Orange River and the Great Namaqua and Damara countries, which occupied three months. In 1814 he was invited by the Namaquas to Bethany, in Great Namaqualand, where he began a new station. In 1824 he visited Cape Town to arrange for the printing of his Namaqua version of the Gospels. In 1825 he spent several months exploring the sea-coast near Koeisy. In 1829 he formed a new station at Komaggas. In 1830 he again visited Cape Town, and having finished the printing of the Namaqua Gospels, he returned in 1831 to his new station. He died at Komaggas July 26th, 1848, aged 71.

**Schmidt, George**, a missionary of the Moravian Brethren to South Africa. See account of South African Mission in article on Moravian Missions.

**Schneider, Benjamin**, b. New Hanover, Penn., U. S. A., January 18th, 1807; graduated at Amherst College 1830; Andover Theological Seminary 1833; ordained October 2d; sailed for Turkey as a missionary of the A. B. C. F. M. December 12th, 1833, though supported by Reformed (German) Churches. He was stationed first at Broosa, where he preached the first evangelical sermon ever preached in the Turkish language. In 1849 he removed to Aintab, where he laid the foundation of two flourishing churches. After the death of his wife in 1856 he visited the United States; returned to Turkey with his second wife in 1858, and was again stationed in Broosa. His health failing, he

made a second visit home in 1872. A call for help in Turkish and Greek work in the theological seminary at Marsovan induced him, though advanced in years and in feeble health, to return, reaching Marsovan March, 1874. But from nervous prostration he was compelled to relinquish the work, and in 1875 he left first for Switzerland, thence for his native land. He died in Boston September 14th, 1877.

Dr. Crane, who was his associate at Aintab from 1850 to 1853, says: "For more than forty years he was connected with the work, laboring in almost every department of missionary service—preaching, translating, preparing young men for the ministry. Few have travelled more extensively as pioneers; few have labored in more places in Turkey; few have more cheerfully endured the privations of the service; few are the native churches in Turkey where his name is not known and revered. Even amid the intense sufferings of the last two years of his life his eye would brighten and glow with delight at the bare mention of the missionary life." He acquired languages with great facility. He spoke German, Greek, and Turkish, "almost as if each were his vernacular, the latter with an ease and fluency seldom equalled by foreigners. Even natives wondered at his marvellous flow of thought in idiomatic phrases, easily understood by all; for he chose simplicity of style, though at home in the higher and more complicated forms of expression. His preaching was almost exclusively extemporaneous, from brief notes, but rarely was he confused in thought, or at a loss for an expression in either language. Words flowed from his lips in those difficult Oriental tongues with a freedom that was the admiration of fellow-missionaries and the delight of native listeners." Mr. Tracy, with whom Dr. Schneider was associated in the theological seminary at Marsovan, says: "He entered at once into the affections of the students and of all the people. No one else so satisfied them as a preacher. His Turkish was almost perfect—simple in style, pure in idiom, and his accent such that no Turk would imagine that the language was not vernacular. In the school his labors were very useful. There seemed to be nothing but good in his example or his talk. He was as child-like as he was wise."

He received the degree of D.D. from Franklin and Marshall College, Lancaster, Penn., 1850.

**Scottish Episcopal Church. Foreign Mission Agency.** Secretary, Rev. C. R. Teape, Findhorn Place, Grange, Edinburgh, Scotland.—Formerly the Scottish Episcopal Church of Scotland collected funds for the Church of England Missionary Societies, but upon the consecration of Bishop Cotterill as Bishop of Edinburgh the contributions of the churches in the seven Scottish dioceses were devoted to missions in India and South Africa through their own Society,—“The Board of Foreign Missions of the Scottish Episcopal Church,” the new form of their “Association for Foreign Missions.” Bishop Cotterill having labored as a missionary of the C. M. S. in India for twelve years, and for another twelve in South Africa,—Kaffraria,—where he had been consecrated bishop, felt a peculiar interest in those two fields of his former efforts, and organized a permanent union with them. In addition to

providing the income of the Bishop of Independent Kaffraria, the Board sends out contributions every year to Kaffraria for the general purposes of the diocese, and also many sums to be devoted to special objects in connection with the various churches and schools there. The Board also provides the funds necessary for the maintenance of the missionary schools at Chanda, in Central India, which are under the direction of the Bishop of Calcutta, and forwards sums entrusted to it for any mission work being carried on by the Church of England, or any church in communion with her.

**Scudder, John**, b. Freehold, N. J., U. S. A., September 13th, 1798; graduated at the College of New Jersey in 1811, and at the College of Physicians and Surgeons of New York City in 1815. While in professional attendance on a lady in New York he took up in the ante-room and read the tract "The Conversion of the World, or Claims of Six Hundred Millions." Deeply impressed, he was led to give his life to the missionary work. He sailed June 8th, 1819, under the A. B. C. F. M., for Ceylon. He was ordained in 1821 by the brethren of the mission, Baptist and Wesleyan missionaries taking part in the service. In 1836 he was transferred to Madras to found a new mission with Dr. Winslow. From 1842 to 1846 he was in the United States. In 1854, his health having failed, he went by medical advice to the Cape of Good Hope. When on the point of returning to Madras he was stricken with apoplexy, and died at Wynberg, South Africa, January 13th, 1855, having been in the missionary work 36 years. He was constant in labors, devoting much time to evangelistic itineracy. In his visit to America in 1843 he addressed a hundred thousand children. Mrs. Scudder died three years previous—a devoted woman, honored and beloved by all. Their eight sons, two grandsons, and two granddaughters have been members of the mission in Arcot.

**Schwartz, Christian Friedrich**, was born in Sonnenburg, Prussia, October 26th, 1726. His mother, dying in his childhood, consecrated him to the Lord. He says that at the age of eight he often, leaving his schoolmates, retired to a solitary place for prayer, and that in prayer to God he found much comfort. At the age of twenty he went to the Halle University, where he became established in the faith of Christ, and resolved to devote himself wholly to Him. Dr. Schultz, who had left India from failure of health, was at this time preparing to print the Bible in Tamil, and advised Schwartz to learn that language in order to assist him. Professor Francke hearing of his great success in acquiring the language, proposed to him to go as a missionary to India. He decided to go, declining an advantageous position in the ministry at home. He was ordained at Copenhagen, with the view of joining the Danish Mission at Tranquebar, where he arrived July 30th, 1750. In four months he preached his first sermon in Tamil in the church of Ziegenbalg. From the first he devoted much time and attention to the religious instruction of the young. In the following year 400 persons, adults and youth, whom he had carefully instructed, were added to the church by baptism. In 1760 he spent three months in Ceylon preaching to heathen and Christians. While

war was at this time raging between England and France, he continued his work around Tranquebar, and so much did the heathen respect him that, of their own accord, they contributed to his support. Two years later he went on foot to Tanjore, and obtained leave to preach in the city and even in the palace. After laboring fifteen years at Tranquebar he was sent to Trichinopoly. So great was his success here that, with the aid of the commandant and the English garrison, a church accommodating two thousand was opened in 1766. During this year the mission was adopted by the "Christian Knowledge Society," and this became his special field of labor. Here, in a room in an old Hindu building just large enough for himself and his bed, having for his "daily fare a dish of boiled rice with a few other vegetables," and "clad in a piece of dark cotton cloth woven and cut after the fashion of the country," he gave himself to his work. To assist him in his extensive labors he employed in 1772 eight of the promising converts as catechists, among whom was Sattianadden, who was afterwards ordained to the ministry, in which he labored with great eloquence and success.

In twelve years Schwartz had baptized 1,238 in the city. He labored also faithfully for the English garrison, for which no religious instruction was provided. The salary of £100 which he received as chaplain of the garrison from the Madras Government he devoted the first year to the building of a mission house and an English Tamil school, and afterwards gave a large part of it in charity.

In 1776 he went to Tanjore to found a new mission, and here he spent the remaining twenty years of his life. Even in this favorite abode of the Hindus, where was the most splendid pagoda of India, he had great success, two churches having been established in 1780. He won the high esteem of the English Government, which employed him in important political transactions with the native princes. When the powerful and haughty Hyder Ali of Mysore refused to receive an embassy from the English, whom he distrusted, he said he would treat with them through Schwartz. "Send me the Christian," meaning Schwartz; "he will not deceive me." Urged by the government, he consented to undertake the mission. Through his intercession Cuddalore was saved from destruction by the savage hordes of the enemy. On his return a present of money was forced upon him by Hyder, which he gave to the English Government, requesting that it be applied to the building of an English orphan asylum in Tanjore. Though a Mohammedan, Hyder's regard for Schwartz was so great that he issued orders to his officers, saying: "Let the venerable padre go about everywhere without hindrance, since he is a holy man, and will not injure me." While Hyder was ravaging the Carnatic with an army of a hundred thousand, and multitudes were fleeing in dismay to Tanjore, Schwartz moved about unmolested. In the famine caused by the war more than 800 starving people came daily to his door. He collected money and distributed provisions to Europeans and Hindus. He also built there a church for the Tamil congregation. The rajah a few hours before his death requested Schwartz to act as guardian to his adopted son Serfogee. The trust was accepted and faithfully discharged.

After a protracted and severe illness, during which he delighted to testify of Christ and to exhort the people, he expired in the arms of two of his native converts. At his funeral the effort to sing a hymn was suppressed by the noise of the wailing of the heathen who thronged the premises. Serfogee lingered, weeping, at the coffin, covered it with a cloth of gold, and accompanied the body to the grave. The small chapel in which he was interred outside of the fort has been demolished, and a large one erected. The grave is behind the pulpit, covered with a marble slab bearing an English inscription—

To the memory of the  
REV. CHRISTIAN FRIEDRICH SCHWARTZ,  
Born Sonnenburg, of Neumark, in the kingdom of Prussia,  
The 28th October, 1726,  
And died at Tanjore the 13th February, 1798,  
In the 72d year of his age.  
Devoted from his early manhood to the office of Missionary in the East,  
The similarity of his situation to that of The first preachers of the gospel  
Produced in him a peculiar resemblance to The simple sanctity of the Apostolic character.  
His natural vivacity won the affection As his unspotted probity and purity of life Alike commanded the reverence of the Christian, Mohammedan, and Hindu;  
For sovereign princes, Hindu and Mohammedan, Selected this humble pastor  
As the medium of political negotiation with The British Government;  
And the very marble that here records his virtues Was raised by  
The liberal affection and esteem of the Rajah of Tanjore, Maha Rajah Serfogee.

Another beautiful monument was erected to his memory by the East India Company in the Church of St. Mary, Madras, part of the inscription on which is as follows:

"On a spot of ground granted to him by the Rajah of Tanjore, two miles east of Tanjore, he built a house for his residence, and made it an Orphan Asylum. Here the last twenty years of his life were spent in the education and religious instruction of children, particularly those of indigent parents—whom he gratuitously maintained and instructed; and here, on the 13th of February, 1798, surrounded by his infant flock, and in the presence of several of his disconsolate brethren, he closed his truly Christian career in the 72d year of his age."

**Seamen, Missions to.**—Rev. John Flavel (England, 1627–91) and English contemporaries (Ryther, Janeway, *et al.*), as also a few clergymen of the English Established Church in the eighteenth century, preached occasional sermons, special and serial, some of which were printed, on behalf of seamen; but the second half of the eighteenth century witnessed the first organized efforts for their evangelization. An association, styled at first "The Bible Society," was organized in London in 1780, to supply English troops in Hyde Park with the Holy Scriptures, whose field of labor was speedily enlarged to embrace seamen in the British Navy. The first ship supplied with Bibles by this Society was "The Royal George," sunk off Spithead, England, August 29th, 1782. The Society's name was soon changed, becoming "The Naval and Military Bible Society." It is still in operation, confines itself to its original specific object—the diffusion of the Word of God, and has been of immense service to the army and navy of Great Britain. This Society had influence in originating the British and

Foreign Bible Society, and the work of the latter led eventually to the formation of the American (U. S. A.) Bible Society. (Cf. art. "Bible Societies," Encyc. Brit., 9th ed., vol. iii. p. 649.)

The need for Christian work among seamen was urgent. Destitute, as a class, of any access to the Bible, to preaching, or to any Christian service, their lives passed, for the most part, without knowledge of the gospel of Christ. "It would be difficult," says a well-informed writer, "to conceive of a deeper moral night than that which, for centuries, had settled upon the sea."

**THEIR BEGINNINGS AND HISTORY IN ENGLAND.**—Early efforts in England, however, to furnish sailors with the gospel met with serious opposition from Christian people, as well as from unchristian officers in the Royal Navy. So late as 1828, the king was petitioned to abrogate an order, then recently issued by the Lord High Admiral, prohibiting the free circulation of tracts in the navy. But in 1814 the pioneers of the movement for this end—Rev. George Charles Smith, a dissenting clergyman, once a sailor, and Zebulon Rogers, a shoemaker, of the Methodist persuasion—established prayer-meetings for seamen on the Thames, at London, the first being held on the brig "Friendship," June 22d of that year, by Mr. Rogers. These were multiplied and sustained upon the shipping in the river. March 23d, 1817, the first Bethel Flag (a white dove on blue ground) was unfurled on the "Zephyr," Captain Hindulph, of South Shields, England.

The Port of London Society was organized March 18th, 1818, to provide for the continuous preaching of the gospel to seamen in London, upon a floating chapel (ship) of three hundred tons burden, and Rev. Mr. Smith ministered upon it with success during the next ensuing year. November 12th, 1819, the Bethel Union Society was formed, at London, which, in addition to the maintenance of religious meetings on the Thames, established correspondence with local Societies that had been organized through Mr. Smith's exertions in various parts of the kingdom. These two Societies were subsequently united to form what is now known as the British and Foreign Sailors' Society.

"The Sailors' Magazine" (London), merged, after publication for seven years by Rev. Mr. Smith, into "The New Sailors' Magazine," also issued by him, was established in 1820. "The Monthly Magazine," now issued by the British and Foreign Sailors' Society, is "Chart and Compass" (pp. 32), established in January, 1879.

In 1825 the London Mariners' Church and Rivermen's Bethel Union was organized, to provide a church for seamen on shore, Rev. Mr. Smith becoming its pastor. This church was for years the centre of an extensive system of Christian labor, including a Sabbath-school, Bethel prayer-meetings, tract and book distribution, magazine publishing, and open-air preaching to seamen on the wharves. Rev. Mr. Smith died at Penzance, Cornwall, England, in January, 1863.

Existing seamen's missionary societies in the empire of Great Britain, distinct from local organizations which limit the prosecution of work to their own ports, are: (1) The British and Foreign Sailors' Society (at Sailors' Institute, Shadwell, London, England), with receipts from April 1st, 1888, to April 18th, 1889, of £14,975

2s. 4d., and expenditures for the same period of £14,519 8s. 0d., which in its seventieth annual report (1887-8) names the ports of Rotterdam, Hamburg, Antwerp, Genoa, Naples and Malta, outside England; and London, Milford-Haven, Falmouth, and Barrow-in-Furness (English), as occupied more or less effectively by persons having entire or partial support from its treasury, and devoting themselves to the spiritual and temporal welfare of seamen. (2) The London Missions to Seamen (Established Church of England), whose operations are, for the most part, carried on afloat. Its chaplains are at fifty-two English and eight foreign seaports. Local English societies for seamen are at Liverpool (formed in 1821), Glasgow, and at other ports.

**MISSIONS WITH HEADQUARTERS IN SCANDINAVIA.**—Evangelical Lutheran missions to seamen are prosecuted by societies with headquarters in Scandinavian countries, whence come in our day the larger number of sailors for the world's mercantile marine. The Norwegian Society,—Foreningen til Evangeliets Forkyndelse for Skandinaviske Sjømand i fremmede Havne (or, in English, The Society for the Gospel's preaching to Scandinavian Seamen in Foreign Harbors), was organized at Bergen, Norway, August 31st, 1864, and now (1890) has stations at Leith, Scotland; North Shields, London, and Cardiff, England; at Antwerp, Belgium; Havre, France; Amsterdam, Holland; New York City, U. S. A.; Quebec, Canada; at Pensacola, Fla., U. S. A.; and at Buenos Ayres, S. A. Mission work is also carried on by this Society at Montrose, Scotland. Its aggregate foreign working force consists of twelve ordained pastors with five or six assistant missionaries, unordained. The Society owns churches at its stations and publishes a monthly paper, "Bud og Hilsen," now in its twenty-fourth year of issue. Its receipts from 1864 to 1889 were 991,566 Kröner,\* expenditures for the same period 963,606 Kröner.

*The Danish Seamen's Mission Society* (Danske Forening til Evangeliets Forkyndelse for Skandinaviske Sjøfolk i fremmede Havne (or, in English, The Danish Society for the Gospel's Preaching to Scandinavian Seamen in Foreign Ports) has stations at Hull and Grimsby, London, Newcastle and Hartlepool, Eng., and at New York City, U. S. A., with an aggregate of four ordained pastors. Three other ordained pastors perform some labor for sailors at Fredericksstadt and Christianstadt, St. Croix, W. I., and at St. Thomas and St. Jan. At Brisbane, Australia, an ordained pastor gives a portion of his time to the interests of Scandinavian sailors in connection with this organization. Its bi-monthly paper is "Havnen," published at Copenhagen, Denmark. In the autumn of 1889 a seamen's pastor was sent from Denmark, by private contribution, to labor at Sydney, Australia. Some Christian labor is also now (1890) performed among Danish seamen, by ordained Danish pastors, at Portland, Me., and at Boston, Mass., U. S. A.

*The Swedish Society for Home and Foreign Missions* (Fosterlands-stiftelsen) has sustained missionary work for seamen since 1869, and has the following stations where such labor is per-

formed by its agents: Constantinople, Turkey; Alexandria, Egypt; Liverpool, Grimsby, and Gloucester, England; Boston, Mass., U. S. A.; Marseilles, France; Hamburg and Lübeck, Germany; and St. Ubes, Portugal,—with six ordained pastors.

The state church in Sweden has four ordained pastors laboring for seamen at London and West Hartlepool, Eng.; at Kiel, Russia; and at Calais, France.

*The Finland Seamen's Mission Society* (Förenningen för Beredande af Själeward at Finska Sjöman i Utlandska Hamnar), organized in 1880, has stations at London, Grimsby, and Hull, Eng., and at New York City, and San Francisco, Cal., U. S. A.

*The Swedish Evangelical Lutheran Augustana Synod in America* has a station for Scandinavian seamen, with one ordained pastor, at Philadelphia, Pa., U. S. A.

*The Synod for the Norwegian Evangelical Lutheran Church in America* has a Seamen's Mission in Australia, with one ordained pastor.

The total of stations occupied by the Scandinavian (Lutheran) Societies is thirty-eight, with thirty-four ordained pastors and seven unordained pastors as laborers.

**AMERICAN MISSIONS FOR SEAMEN.**—No organizations exist in North or South America, outside the United States, for the sole purpose of prosecuting religious labor among seamen, with the exception of the local Society at Halifax, N. S., established in 1887. At Boston, Mass., the first Society for this object was formed in May, 1812, but soon suspended operations. The first religious meeting on behalf of sailors in New York City (N. Y.) is believed to have been held in the summer of 1816, at the corner of Front Street and Old Slip. The Marine Bible Society of New York City was organized March 14th, 1817, to furnish sailors with the Holy Scriptures. The Society for Promoting the Gospel among Seamen in the Port of New York, commonly known as the New York Port Society, a local organization, was formed June 5th, 1818. This Society laid the foundations of the first mariner's church erected in the United States, in Roosevelt Street, near the East River, which was dedicated June 4th, 1820, Rev. Ward Stafford preacher and pastor. In 1823 the New York Port Society set at work in that city the first missionary to seamen, the Rev. Henry Chase. This Society sustains a church at Madison and Catherine Streets, in New York City, and a reading-room for sailors in the same edifice, with meetings during the week, and other evangelistic work, employing in the year ending May 1st, 1889, five missionaries. Receipts for 1888-9 were \$9,073.71; expenditures, \$9,129.98.

*The New York Bethel Union*, for the establishment and maintenance of religious meetings on vessels in the port, organized June 3d, 1821, had but a brief existence.

The movements noted—that at Boston, Mass., resulting in the formation of the earliest Society of its kind in the world—led to similar action for the performance of local work for seamen at Charleston, S. C. (1819); Philadelphia, Pa. (1819); Portland, Me., and New Orleans, La., (1823); at New Bedford, Mass. (1825), and elsewhere. In the latter year there were in the United States seventy Bethel Unions, thirty-three Marine Bible Societies, fifteen churches and floating chapels for seamen. There had

\* A Kröner is about twenty-six cents, United States currency.

been many conversions to Christ among sailors, and their evangelization was recognized as among the most prominent and important of Christian enterprises.

Accordingly, after its formal establishment in the city of New York January 11th, 1826, succeeded by a new organization in its Board of Trustees May 5th, 1828,—from which time its birth is dated,—the American Seamen's Friend Society (76 Wall Street, New York) came into being. Its publications accredit Rev. John Truair as chiefly instrumental as bringing about its organization. Its first President was Hon. Smith Thompson, Secretary of the United States Navy; Rev. C. P. McIlvaine, afterwards Protestant Episcopal Bishop of Ohio, was its Corresponding Secretary; and Rev. Joshua Leavitt its General Agent. Article II. of its Constitution provides: "The object of this Society shall be to improve the social and moral condition of seamen by uniting the efforts of the wise and good in their behalf, by promoting in every port boarding-houses of good character, savings-banks, register-offices, libraries, museums, reading-rooms and schools, and also the ministration of the gospel and other religious blessings."

Its first foreign chaplain was Rev. David Abeel, who reached his field of labor at Whampoa, the anchorage for ships trading at Canton, China, February 16th, 1830. In its fortieth year (1867-68) its laborers, chaplains, and sailor-missionaries were stationed at twenty foreign and thirteen domestic sea-ports as follows: At Caribou Island on the Labrador coast, N. A.; at St. John, N. B.; in Norway, at Christiansand, Kragero, and Porsgrund; in Denmark, at Copenhagen and Odense; in Sweden, at Gottenberg, Warberg and Wedige, Wernersberg, and Stockholm; in Belgium, at Antwerp; in France, at Havre and Marseilles; in the Hawaiian Islands, at Honolulu and Hilo; at the Chincha Islands, in Peru; at Valparaiso and at Buenos Ayres, S. A.; and in the United States, at the following seaports: San Francisco, Cal.; Norfolk and Richmond, Va.; Charleston, S. C.; Mobile, Ala.; Boston and Gloucester, Mass.; and at New York, N. Y. Its missionary work was prosecuted in 1888-89 in the countries of Sweden, Norway, and Denmark; at Hamburg in Germany; at Rotterdam in Holland; at Antwerp in Belgium; at Genoa and Naples in Italy; at Yokohama in Japan; in the Madeira Islands; at Valparaiso, S. A.; at Bombay and Karachi, in India; and in the United States, at Portland and Astoria, Oregon; Tacoma, Seattle, and Port Townsend, W. T.; Galveston, Texas; Mobile, Ala.; Savannah, Ga.; Charleston, S. C.; Wilmington, N. C.; Norfolk, Va.; as well as in the cities of New York; Jersey City, N. J.; and Brooklyn, N. Y.; including the United States Navy Yard, numbering thirty-two laborers at twenty-nine seaports (fifteen foreign and fourteen domestic), supported in whole or in part by the Society.

Its receipts in the first decade of its existence were in round numbers, \$91,000; in the second decade, \$165,000; in the third, \$229,000; in the fourth, \$375,000; in the fifth, \$655,000. Receipts for the year ending March 31st, 1889, with balance from previous year, \$34,004.19; expenditures for same period, \$34,972.05.

*The Church Missionary Society for Seamen in the City of New York*, (Protestant Episcopal)

in its forty-sixth Annual Report (1889-90) states that the Society sustains three chapels and mission-houses, with reading and lecture rooms, oversight being in the hands of clergymen, with the assistance of a colporteur at one station. Its total services for the year were 585; visits to reading-rooms, 30,889; Seamen supplied with Bibles, 343; with Testaments, 533; with the Book of Common Prayer, 343. The Bishop of the Diocese is its president.

Beginning with the year 1888 the Boston, Mass., Seamen's Friend Society (organized in 1828), which had been an auxiliary of the American Seamen's Friend Society from 1865 to that date, has again prosecuted local Christian work for seamen, on an independent basis. Efficient local organizations for the evangelization and befriending of sailors have wrought to good purpose during recent years, at Baltimore, Md.; at Washington, D. C.; and at Cleveland, Ohio; the last Society concerning itself with river-boatmen and sailors on western lakes in the United States.

Methods.—Missionary Force, Sailors' Homes, Loan Libraries, Periodicals, Charitable Aid, Seamen's Savings-banks, Asylums, Rests, etc.

Besides the employment of chaplains resident at seaports, and serving as Christian ministers, of Bible and tract distributors, Scripture-readers, colporteurs and helpers, whose titles declare their functions, the Missionary Societies for Seamen have usually wrought for their welfare by establishing, and in part sustaining (temporarily), Sailors' Homes in various ports. In them are resident missionaries, who besides their services in religious meetings, devote portions of their time to spiritual and charitable visitations among sailors on shipboard and shore, at sailor boarding-houses and in hospitals, and in some cases to such service for the families of seamen. The Wells Street Sailors' Home, at London, Eng., Docks, was established by Mr. George Greene in 1830, was opened in 1835, and enlarged in 1865. In one year it admitted 5,444 boarders, who, besides a home, had evening instruction, the use of a savings-bank, etc. The Liverpool, Eng., Sailors' Homes were opened in 1844. The Sailors' Home at 190 Cherry Street, New York City, U. S. A., is the property and is under the direction of the American Seaman's Friend Society. It was opened in 1842, reconstructed, refurnished, and reopened in 1880, and is probably unsurpassed by any Sailors' Home in the world. During the year 1888-89 it accommodated 1,351 boarders. The whole number of its boarders since the Home was established is 112,677, and the amount saved by it to seamen and their relatives, during the forty-eight years since its establishment, has been reckoned at between \$1,000,000 and \$2,000,000.

The systematic supply of carefully selected libraries, to be loaned to vessels for use by their officers and crews at sea, is now largely counted on by these organizations, especially by the American Seamen's Friend Society. Its shipments of such libraries from 1858-59 to March 31st, 1889, were 9,221, and the reshipments of the same 10,074; the total shipments aggregating 19,295. The number of volumes was 482,800, accessible by original shipment to 350,304 seamen. Of the whole number sent out, 993 libraries, with 35,742 volumes, were placed upon United States naval vessels and in naval hos-

pitals, and were accessible to 114,267 men; 117 libraries were in 117 stations of the United States Life-saving Service, containing 4,220 volumes, accessible to 819 keepers and surf-men.

The "Sailors' Magazine" (monthly, 32 pp.), organ of the American Seamen's Friend Society, is now the oldest of the periodicals issued on behalf of seamen. It was established in September, 1828, is in its sixty-second volume, and of its issues for 1888-89 56,400 copies were distributed. In the same twelve months 20,000 copies of "The Seamen's Friend" (annually, 4 pp.), established in 1858, were issued by the same Society for sailors, and 124,200 copies of the "Life Boat" (monthly, 4 and 8 pp.) for the use of Sabbath-schools.

Varied help is habitually extended to shipwrecked and destitute sailors by all these organizations. The establishment of savings-banks for seamen has ordinarily been due to their influence. The Seamen's Savings-bank in New York City (76 Wall Street) went into operation May 11th, 1829. Sailors' Asylums, Orphanages, and "Rests" (the last being houses of entertainment conducted upon temperance principles, with more or less of religious instruction and service) are open in many seaports, as the fruit of their existence. In January, 1888, the "Sailors' Magazine" (New York) published a list of fifty-seven sailors' "Rests" and "Homes" then accessible to seamen in various seaports throughout the United States, Great Britain, the European continent, Asia, Africa, South America, and on several islands. Miss Agnes Weston has distributed gratis, by voluntary contributions, many thousands of monthly "Blue Books" (8 pp., temperance and religious tracts) in the English tongue, in the British and American navies, which have been regularly translated into Dutch and German for the navies of Holland and Germany.

**GENERAL SUMMARY OF RESULTS.**—It is impracticable to present accurate detailed statistics as to the results of Christian labor for seamen. The best general estimate, however, fixes the number of Christianized sailors as not far from thirty thousand. But to say that during the last sixty years these men have been gathered into the Church of Christ by thousands, and that, as a class, English-speaking and Scandinavian sailors in the naval and largely in the mercantile (sailing) marine of England and America are manifestly being lifted, in our day, from the ignorance and degradation in which they lived at the opening of the nineteenth century, and to attribute these changes in great degree to the exertions of these Societies, is to speak with truthful moderation. The corporate and individual efforts of those connected with them have often originated and made effective beneficial public legislation for sailors, in Great Britain and in the United States.

It is in place to state that, with some exceptions, Seamen's Missionary Societies are administered upon a non-denominational basis, and that, so far as known, all are of the Protestant faith.

**Secunderabad**, a city in the Hyderabad state, Nizam's Dominions, India, 6 miles north of Hyderabad City, 358 miles northwest of Madras. The largest military station in India. Climate during rainy season very unhealthy;

at other times hot, but not insalubrious. Population, 74,124. Mission station of the American Baptist Missionary Union; 2 missionaries and wives, 11 native helpers, 3 out-stations, 1 church, 2 schools, 42 scholars. Methodist Episcopal Church (North); 1 missionary, 28 church-members, 1 Sunday-school, 50 scholars. S. P. G. (1840); 1 missionary, 14 native helpers, 853 members. Wesleyan Methodist Missionary Society; 1 missionary, 3 native helpers, 26 church-members, 1 Sunday-school, 30 scholars, 6 day-schools, 331 scholars.

**Secundra**, a town in Rajputana, India, near Agra and Aligarh. Mission station of the C. M. S.; 1 missionary, 147 communicants, 540 scholars. Large orphanages for girls and boys are located here, and the ladies of the Berlin Ladies Missionary Society assist in the work of the village and zenana schools.

**Seir**, a suburb of the city of Oroomiah, Persia, long occupied by the missionaries of the A. B. C. F. M. and the Presbyterian Church (North) among the Nestorians as a health resort, Oroomiah itself being, especially in summer time, very malarious and unhealthy. It is here that the theological seminary was located for many years. Its distance from the city rendered residence there somewhat difficult, and since the establishment of the college on an advantageous site nearer the city, Seir has not been so continuously occupied.

**Selwyn, George Augustus**, b. Hampstead, England, 1809; studied at Eaton; graduated at Cambridge University 1831; ordained Deacon 1833, and took the curacy of Boveney; ordained Priest 1834, and became curate of Windsor 1839; was consecrated Bishop of New Zealand 1841; received the degree of D.D. the same year from both Cambridge and Oxford; sailed for his see December 26th, 1841. On the voyage he spent much of the time in compiling from the Rarotonga, Tahiti, and New Zealand translations of the New Testament a comparative grammar of these three dialects, and also studied navigation under the captain, in order to be his own master in his visitation voyages. He reached Auckland May 30th, 1842. Besides attending to the spiritual wants of his colonial diocese, he extended his operations to the South Seas, navigating his own vessel, the "Southern Cross." In 1843 he established a Polynesian college for the different branches of the Maori family, scattered over the Pacific. Connected with it was an industrial department, in which all were required to spend a definite portion of time in some occupation. In 1844 a site for the college was selected near Auckland. Three natives from the college were ordained as deacons. In 1854 he visited England, after twelve years' absence. In that period he had made seven voyages through the southern part of Melanesia, and visited 50 islands. From ten of these fifty youths had been received into the college. While at home he preached four remarkable discourses, which did much to increase the interest in foreign missions. In one of his sermons he said to the students: "Offer yourselves to the Archbishop of Canterbury as 1,200 young men have recently offered themselves to the Commander-in-chief for service in the Crimean war." When he preached his

farewell sermon in 1841, John C. Patteson, a youth of fourteen, was present, and was much impressed. When the Bishop re-embarked in 1855, Patteson accompanied him as a missionary, and to him was committed the charge of the college. In 1857 his diocese was divided, and Mr. Patteson was consecrated Bishop of Melanesia. In 1867 Bishop Selwyn again visited England to attend the Lambeth Conference. His talents, character, and services placed him at the head of the colonial bishops, and his views and counsel were highly esteemed. While at home he was offered the bishopric of Lichfield, but declined, preferring to labor in New Zealand. But at the earnest request of the Archbishop he was induced to accept. After a brief visit to the island, he was made Bishop of Lichfield, January 9th, 1868, having spent twenty-seven years among the heathen. In 1871 he visited the United States to attend the Triennial Convention of the Episcopal Church, held at Baltimore. He was very cordially received, and preached at the consecration of Bishop Howe. At the Jubilee meeting of the Board of Missions he delivered an address of great power. In 1874 he again visited America, and was present at the General Convention of the Episcopal Church of the United States, held in New York. He also visited Canada. Returning to England in 1878, he was taken ill, was soon partly paralyzed, and continued to fail until April 11th, when the end came. He died in great peace, saying: "It is all light." He was buried, according to his expressed desire, in a grave dug out of the rock on which the cathedral of St. Chad is built. Five hundred who had held the foremost positions in the state and church followed him to the tomb.

Dr. Inglis, a missionary of the Scotch Church in the New Hebrides, says: "Bishop Selwyn was avowedly a High Churchman, but his heart was largely imbued with the spirit of apostolic love and charity. Had we been missionaries of his own Society he could not have been kinder to us or more attentive. He was a great favorite among the Scotch in New Zealand. As a missionary he was unsurpassed for self-denial, energy, and enterprise. While from his social position, talents, and acquirements he might have commanded the highest ecclesiastical appointments in the national church, he cheerfully resigned these advantages, and chose the obscurity, privations, perils, and drudgery of missionaries to the most degraded savages. His example awakened great enthusiasm among the students of both the two great English Universities."

**Sendai** (Xenday), a town in Japan, near a bay of the same name, on the east coast of Hondo. Population (1884), 55,321. A public moral movement has recently been inaugurated in Sendai. After public debate in the Prefectural Assembly, to which Christian women as well as men were invited, it was resolved to abolish legalized prostitution after three years from that time (1889). The credit of this moral victory belongs to the zeal and courage of the Christians of Japan. Mission station of the American Baptist Missionary Union; 1 missionary and wife, 2 single ladies, 19 native helpers, 7 out-stations, 2 schools, 1 church, 156 church-members. Methodist Episcopal Church (North); 1 native preacher, 63 church-members, 1 Sab-

bath-school, 63 scholars. A. B. C. F. M.; 2 missionaries and wives, 2 female missionaries, 2 churches, 223 church-members. The Reformed (German) Church, U. S. A., also conducts some work here.

**Seneca Version.**—The Seneca, which belongs to the languages of America, is vernacular to the Iroquois, one of six tribes whose original seat was in the province of New York. A translation of the Gospel of Luke was made by the Rev. T. S. Harris, a missionary of the American Board, and published at New York by the American Bible Society in 1830. In 1867 the same Society published the Gospels, and another translation of the Gospels made by the Rev. Ashe Wright, in 1874-75.

(*Specimen verse.* John 3: 16.)

Neh sãh'gh ne' sòh jìh' ha n'òh gwah Na' wën ni yòh' he'yò ãn ja deh, Neh No'a wak neh' sho' kuh sgat ho wi'yã yãh tot gah wãh' ha o' gweh da wiìh heh yò ãn ja deh'; neh neh, Son' dih gwa'nah ot ã o wa'i wagwën ni yòs, tãh ãh' ta ye'i wah dõh', neh gwa', nã yò'i wa da dyeh' ã ya'go yãn dah't' ne' yoh heh'o weh.

**Senegambia** (Senegal and Rivières du Sud), a district on the West Coast of Africa, a French colony, whose boundaries, according to French claims, extend from Cape Blanco in the north to Liberia on the south, with the exception of the English colonies Sierra Leone and Gambia, and the territory belonging to Portugal. The territory inland is claimed as far as the Upper Niger, and south to the limits of the Gold Coast colonies. The limits of the French territory and that of Gambia and Sierra Leone were defined by an arrangement signed at Paris August 10th, 1889. Since January 1st, 1890, a portion of Senegambia has been detached and formed into an autonomous administrative division, called Rivières du Sud. The total area is not definitely known. Including both divisions, the settled portion covers about 140,000 square miles, with a population in Senegal of 181,600, and 43,898 in the Rivières.

The surface is level, and in the north mostly open, low, sandy, and barren; but south of the Gambia there is a rich forest region and luxuriant vegetation. The two principal rivers are the Senegal and the Gambia. The climate is said to be the most continuously hot of any known. The people are Negroes, Moors, and half-breeds of every description. The principal town is St. Louis. Population, 20,000.

The Mohammedan religion prevails, along with Roman Catholicism. Missionary societies: Wesleyan Methodist; (see Sierra Leone, with which is included Gambia.) French Evangelical Missionary Society; stations at St. Louis and Kerbala; 4 missionaries.

**Seoni**, a town in Central Provinces, India, on the road from Nagpur to Jabalpur, half-way between the two places, 30 miles southwest of Hoshangabad. Seoni contains large public gardens, a fine market-place, and a handsome tank. Climate healthy; temperature moderate. Population, 10,203, Hindus, Moslems, Jains, Kabirpanthis, Satnamis, Christians, Parsis, and non-Hindu aboriginal tribes. Mission station of the Original Secession Church of Scotland

(1871), with a mission school and evangelistic work.

**Seoul**, or **Souil**, is the common appellation of the capital of Korea, and is a common noun meaning capital, like the Japanese *miako* or *kio*, or the Chinese *king*. The proper name of the chief city and seat of government is Han-yang, which means China's Sunshine. It was founded in 1392 by the first king and founder of the present ruling dynasty of Korea, who chose the site for the beauty and strength of its situation. Seoul is situated in the central home province, in N. lat. 37° 34' and E. long. 127° 05', on the north side of the Han River, about 35 miles from its mouth as the crow flies, or, as measured by the winding of the current, about 50 miles. The city in shape is an irregular oblong, and lies lengthwise in a valley whose trend is from northeast to southwest. The dimensions of the city are, roughly stated, 3 by 2½ miles. On the north is a succession of magnificent granite hills, culminating in granite peaks 3,500 feet high. On the south side is a chain of hills reaching the height of 1,500 feet. The most striking work of art in the landscape is the city wall, which crosses river, plain, and hills, and climbs the mountains on the south, encircling the whole city proper. At intervals are massive and imposing gates, all appropriately named, and through the largest of which the great high-roads starting from the royal palace run to all parts of the kingdom. In the military system of the country this walled city is the centre of a group of fortresses which, before the days of rifled cannon, were strong and trustworthy. The scenery from the walls of the city, and indeed from many points within the city, is magnificent, and the natural situation is one of the best for health and safety. An affluent of the Han River, with branches that run into nearly every part of the city, traverses Seoul from east to west, and is utilized as a drain and for washing clothes.

To most travellers the aspect of Seoul is uninteresting, shabby, and squalid. Nevertheless, the gay costumes, full of varied color, clean and brilliant with starch, and the peculiar gloss which the Korean women contrive to confer upon the male garments, make the streets in fair weather wear a very bright and animated appearance. The houses are about 8 or 9 feet high, built of stone and mortar, and mostly roofed with tiles. The windows are under the eaves. A long street, about 200 feet wide, divides the city into nearly two equal portions. In the northern half are the walled enclosure containing the king's palace and the more important public buildings. The main entrance gates face the south, and are three in number. From the central and principal gate runs a street 60 feet wide into the main street, intersecting it at right angles, and dividing the northern section of the city into eastern and western quarters. This point of meeting of these two streets is regarded as the centre of the city. Here stands an imposing pavilion, the *Chong-kah*, or belfry, in which is hung a large bell over seven feet in height, which is rung every morning as the signal for opening and shutting the three great gates of the city, at the eastern and western ends of the long main streets, and the Great South Gate. The street leading from the bell to the latter gate is as wide as the main street. It was at the corner of this bell-tower

that the regent in 1866 erected an inscribed stone denouncing as traitors to their country all Koreans who were friendly to European intercourse. Another feature in this centre of the city is the rows of large warehouses, two stories in height, the lower portions of which are divided into small shops opening into a central court, instead of into the streets. These large storehouses are not private property, but are owned by the great trading guilds, which enjoy a notable monopoly. Along most of the main streets there are thousands of pedlers' booths erected, at which most of the retail trade of the city is done. These shabby-looking, temporary structures greatly mar the effect and narrow the space of the great thoroughfares. Outside of the buildings in the royal enclosure there are three palaces—two belonging to the king and one to his father. The dignity of the several mansions is shown in the relative amount of land occupied. The offices of the six ministries, or government departments, are small houses, differing but slightly from the better sort of dwellings. The city gateways are imposing specimens of native architecture. The city gates are shut every evening at 8 o'clock in the winter and 9 o'clock in the summer, at the sound of the city bell. The gates open at 1 A.M. in the morning. Few horses or vehicles are seen, but bulls laden with brushwood for fuel and with country produce are numerous. Since the residence of foreigners in Seoul a number of the native dwellings have been altered into good-looking houses, the Korean house lending itself more easily to the convenience of western people than the Japanese. The Protestant missionaries obtained a foothold in Seoul through a liberal construction of the treaties, in autumn, 1884, and have since steadily resided there. Since the treaty with France, French Roman Catholic missionaries, hitherto in disguise, have openly appeared, and have not only purchased ground, but have erected attractive buildings. Several hundred Japanese, apart from the legation people, and probably a larger number of Chinese, live in Seoul, engaged in commercial pursuits. No other city in Korea has so large a number of natives of the official class, including retainers of the nobles and office-holders. The Japanese legation buildings and the edifices of the missionary societies are in modern western style, more or less adapted to the Korean. China, Japan, Great Britain, the United States, Russia, and France are represented by envoys, and their official residences, and the flags of these nations flying at the mastheads, lend color and variety to the low mass of thatch and tile built up in the dirtiest of cities. The population within and without the walls is variously estimated at from 200,000 to 400,000, the latter figure being probably the nearest to the facts. In the semi-millennium of its history, now nearly completed, Seoul has had many vicissitudes. Laid out at the end of the 14th century, it was here, in the new capital, that the Chinese costume and coiffure of the Ming period (1368-1628) was introduced, and became the still fashionable and national Korean dress. In June, 1592, Seoul was evacuated by the king and court, and occupied during parts of several years by the Japanese during the war from 1592-97. In 1637 the Manchiu Tartars captured Seoul, compelled the king and his ministers to perform *how-tow*, or the nine prostrations, and to have

set up a great memorial stone commemorating the clemency of the Manchu general. In 1653 Hawel and his fellow-Dutchmen visited Seoul as shipwrecked prisoners, finding other Hollanders there. In 1777 Christianity entered Seoul through some members of the embassy to and from Peking; in 1794 the first Chinese Jesuit priest, who was beheaded in 1801; in 1836 the first French priest, Maubant, followed by Bishop Imbert, who in 1839 shepherded 9,000 believers, and was decapitated September 21st. In March, 1866, nine French priests were executed on the river flats in front of the city, and on March 25th from the French war-vessels, "*Déroulède*" and "*Tardif*," piloted by an escaped French bishop and native Christians, the flag of France floated, causing a cessation of all business for several days. The French invasion took place in October, when two native Christians were beheaded and their blood poured into the river over the place of the anchorage of the French ships. The riot and attack on the Japanese Legation July 23d, 1882, the *coup d'état* and battle of the Chinese and Japanese troops December 4th to 7th, 1884, and the funeral of the ex-queen, a spectacle of unprecedented magnificence of the Korean sort, on an autumn day of 1890, are among the notable historic events in Seoul. The addresses of foreigners now resident in Seoul, numbering less than a hundred, are published annually in Meiklejohn's Japan Directory. A map and guide-book of the city, constructed in modern style, are greatly needed.

**Serampur**, a city in Bengal, British India, on the banks of the Hugli, some 13 miles above Calcutta, though on the opposite (west) bank of the river. Population in 1881, 25,559; over 90 per cent Hindus. Serampur was long a Danish station, but in 1845 all the possessions held by the Danes in India were ceded to the East India Company. It was to Serampur that Carey, Marshman, and Ward, the great Baptist missionaries of the early part of this century, retreated; and there, under the Danish flag, they found an asylum from the opposing zeal of the English authorities at Calcutta, who until the new charter was granted to the East India Company by Parliament in 1814, were unwilling that missionaries should find a foothold in their possessions. The new charter contained a clause legalizing the residence in India of missionaries and philanthropists. The Baptist missionaries not only worked diligently in preaching the gospel in Serampur and surrounding towns, but established a press, printed books and tracts, assembled their translators from many parts of India, prepared and published versions of the Bible in the principal languages of Hindustan, and even in Chinese. These versions were afterwards found to be of comparatively small value, owing to the haste with which they were prepared, and the inadequate facilities enjoyed for correct translation into the idiom of the various Indian tongues; but nothing can better illustrate the diligence, zeal, and energy which have made the Baptist Mission at Serampur famous in the annals of modern missions, than the fact that they were made at all. A church, college, schools of lower grade, and a good library were established at Serampur, and the mission is still in active and successful operation. Adoniram Judson and others of the first American missionaries, whom the English au-

thorities would not allow to land at Calcutta, were received for a time by the Serampur missionaries. A newspaper, the "*Friend of India*," was started by the Baptist missionaries many years ago, and for a long time discussed public affairs with ability, and from a lofty standpoint. It had great influence in India. In 1874 it was removed to Calcutta. On the whole the history of Indian missions has few names of greater interest than Serampur.

**Servia**, a kingdom in Europe, bounded by Austria on the north, Roumania (Wallachia) and Bulgaria on the east, Bosnia and Eastern Roumelia (South Bulgaria) on the south, and Bosnia on the west. In general, the surface is mountainous, and covered with dense forests. The Danube and several other large rivers drain the country. Its total area is 18,855 square miles, of which over half is under cultivation. Cereals and grapes are the principal products.

The independence of Servia was secured by the treaty of Berlin (1878), and since January, 1889, the executive power is vested in a king, assisted by a council of eight ministers. The legislative authority is exercised by the king, together with the National Assembly, which is composed of deputies elected by the people, indirectly and by ballot. Personal liberty, liberty of the press and conscience, are guaranteed. Population (1884), 1,937,172, including in round numbers 150,000 Roumanians, 34,000 Gypsies, 3,000 Armenians and Turks, 4,000 Jews, 7,000 Bulgarians, 11,000 other foreigners. The Servians, or Serbs, belong to the most spirited of the Slavonic races, and are noted for the love of freedom and bravery. Poverty is rarely seen, for even the poorest have some sort of freehold property. Thus 97 per cent of the country population are engaged in agriculture. The principal cities, with their population, are: Belgrade, the capital (35,483), Nish (16,178), Leskovatz (10,870), Pozarevatz (9,033). The Greek Church is the state religion of Servia, but according to the census of 1884 there were 8,092 Catholics, 741 Protestants, 4,160 Jews, and 14,569 Mohammedans. Education is conducted in elementary schools, maintained by the municipalities, and various technical schools and schools for higher education, which are supported entirely by the State. Attendance is compulsory, and no fees are required from the pupils. In 1889 there were 52,538 pupils in attendance on the elementary schools, and 7,540 at the various institutions for higher education. The proportion of the population that are able to read and write has increased from 4 per cent in 1874 to 10 per cent in 1884. The only mission work in Servia is that which is carried on by the colporteurs of the B. F. B. S.

**Servians.**—The Servians form an important branch of the Eastern Slavs, or as they are sometimes called, the South Slavs. They inhabit the kingdom of Servia, Bosnia, and Herzegovina, and part of Hungary. They number about 4,000,000, and belong to the Eastern or Orthodox Church, with the exception of about half a million Mohammedan Servians in Bosnia.

The Servians settled in the first half of the 7th century in the Balkan Peninsula, and their settlements spread over an extensive tract of land, comprising the present Servia, Montenegro, Herzegovina, Bosnia, and the Dalmatian coast. These various communities were ruled over by separate independent rulers called

"Cans" or "Zhoopans," who were under the nominal authority of the "Great Zhoopan" residing at Rassa (Novi-Bazar), and all of whom originally were vassals to the Byzantine Emperor. Christianity was first introduced among the Servians by the Roman Church in the middle of the 7th century, but this first introduction did not succeed; and it was only in about 868-870 that the Orthodox Church was established by Greek ecclesiastics sent by the Emperor Basil. The political situation of Servia for a long while was one of dependence upon either the Byzantine emperors or the Bulgarian kings, who found it easy to rule over the Servians owing to the civil dissensions and wars of the various petty Zhoopans. In 1120 the princely authority was assumed by Bela Ouros, who is considered as the progenitor and founder of the Nyemanitch dynasty, that ruled over Servia for more than two centuries. Stephen Nemanya succeeded in uniting the various petty "Zhoopanyas" in one, and thus laid the foundation of a united Servian principality, which after his death became a kingdom. His son Rastko, better known by his monkish name Sava, is one of the most important and famous men in Servian history. Abandoning all worldly goods and honors, he fled to Mount Athos, and there took the vows as a simple monk. Ordained as an archbishop in Nicaea (Asia Minor) by the Greek Patriarch in 1219, he returned to Servia and founded an independent or autocephalous Servian church. By his pious deeds, his zeal for the propagation of the gospel, and the great services he rendered his country in elevating and civilizing it, he has earned the name of "Servia's Enlightener," and is to this day honored as a saint by the Servian church. He died in 1237. Under the reign of King Stephen Dooshan (1336-1355) Servia reached its largest expansion and its greatest glory. Besides its proper territories, Servia comprised Albania, Aetolia, Epirus, Thessaly, and Macedonia, and even Bosnia acknowledged King Dooshan's rule. But after his death all this great kingdom which he had established crumbled to pieces, and internal quarrels and dissensions prepared the way for the final overthrow of Servia's political status. In Dooshan's time the Servian church was raised to the rank of a Patriarchate, with residence at Petch, or Ipek (in Albania), which lasted for more than four centuries (1346-1766). In 1389 took place the famous battle of Kossovo-Polye, between Servians and Turks, in which the latter routed completely the Servian forces, and put an end to Servia's independence. Up to 1459, six years after the capture of Constantinople, Servia was ruled over by princes called "Despots," who acknowledged the supreme authority of the Sultan, paid him tribute, and were obliged to aid the Turks in their wars; but in 1459 Servia lost even this shadow of political independence, and became a province of Turkey. In 1463 Bosnia was conquered, and in 1483 the same fate befell Herzegovina. The country had to suffer terribly from the constant wars of the Turks with Hungary and Austria, and thousands of Servians had to abandon their homes and emigrate to Hungary. In 1690 Patriarch Arseny Tchernoevitch, at the head of 37,000 Servian families, went over to Austria, which gave them lands to settle on, and promised them religious and social rights. Not wishing to have Servia and the Servians under their

rule to be governed by a Patriarch from Austria, the Turks allowed the Servians to elect a new Patriarch, but it was soon after abolished, and all the Servians were subjected to the direct authority of the Greek Patriarch at Constantinople. In the beginning of the present century the Servians rose up against the Sultan to regain their political independence, and after a great many vicissitudes and struggles, they succeeded in establishing a semi-independent principality, under the suzerainty of the Sultan.

In 1882 this principality was raised to the rank of a kingdom, and by the Treaty of Berlin (1878) the territory of Servia was enlarged at the expense of Bulgaria, while Bosnia and Herzegovina were annexed to Austria.

The Servian church is ruled over by a Metropolitan residing at Belgrade, and bearing the title of "Metropolitan of all Servia." He is also the president of the Synod, who act as his counsellors and advisers; but the power of the Metropolitan and the Synod does not extend beyond the limits of the Servian kingdom. Bosnia and Herzegovina are under the jurisdiction of bishops nominated by the Greek Patriarchate, subject to the approval of the Austrian Government. The Servians living in Austria-Hungary, and who also belong to the Orthodox Church, have a Patriarch residing at Carlovitz, who is chosen by a council and approved by the Austrian Government. He bears the title of Patriarch as an honorable title in continuation of the Patriarchs of Ipek, who ruled over the Servians in former days. All the Servians belonging to the Orthodox Church use the Church-Slavonic language in their churches, and the Kyrillitza alphabet in their literature. Their language belongs to the Eastern branch of Slavic languages, and is akin to the Bulgarian, from which it differs, however, considerably in its vocal sounds. Many Turkish, Greek, and Albanian words have entered into the formation of the modern Servian language. Under the influence of their ecclesiastics and their ecclesiastical literature, the Servians in the beginning of the present century used in their literature a language called Slavonico-Servian, a mixture of Church-Slavonic, and Servian, with the elements of the former predominating. But thanks to the genius and efforts of Verk Karadjitch, a self-made man, the Servian alphabet was modified to a certain extent, to suit the pronunciation of the spoken language of the people, which was raised to the dignity of a literary language. In this way the Servian orthography became the most phonetic of all Slavic orthographies, and in spite of the opposition the reforms of Karadjitch met with, they were officially sanctioned by the government in 1868, and accepted by all the Servians who use the Kyrillitza alphabet. Karadjitch translated also the New Testament into the common language of the people, while some years later Danitchitch, a well-known Servian philologist, and a follower of Karadjitch, did the same thing for the Old Testament; and both these versions have been accepted and are used by the British and Foreign Bible Society.

**Servian Version.**—The Servian, which belongs to the Slavonic branch of the Aryan family, is spoken in Servia, Bosnia, Herzegovina, Montenegro, Croatia, Slavonia, Dalmatia, etc., and is more akin to the Russ and Wend than to the Bohemian and Polish languages. It

is rich in vowels, and free from the accumulation of consonants which render the other Slavonic tongues so harsh to the ear of a foreigner. Its sound is very soft, and one of the best Slavic scholars of our age, Prof. Schafarik, in comparing the different dialects of the Slavonic family, makes the following remark: "Servian song resembles the tone of the violin; Old Slavonic that of the organ; Polish that of the guitar. The Old Slavonic in its psalms sounds like the loud rush of the mountain stream; the Polish like the bubbling and sparkling of a fountain; and the Servian like the quiet murmuring of a streamlet in the valley."

A translation of the New Testament into Servian was made by Duc Stephanovitch, and printed at St. Petersburg in 1824. Another version made by Prof. Stoikowitch, which proved more acceptable, was published by the British and Foreign Bible Society at Leipsic in 1830, and republished at different times. In 1865 the same Society published the Psalms, which Prof. Danicij\* had translated. The entire Old Testament, translated by Danicij, was published by the same Society, together with the New Testament in one volume in 1868. Upon the appearance of the Bible, the Bishop of Pakras, in Slavonia, the most talented of the Servian hierarchy, and formerly a strong opponent, wrote to the translator: "I am more pleased with your translation of the Bible than with any other. I only regret that I cannot express my approbation of your generous work as freely as you deserve, and as I wish." The Archbishop of Belgrade, on the other hand, denounced the translation as being corrupt and unfaithful, but his opposition soon made a second edition of the Servian Bible necessary. Indeed a Roman Catholic periodical publicly declared that "it is not worthy of praise that, with so many bishops of both (Greek and Roman) churches, it should have been left to the British and Foreign Bible Society to produce a more popular translation than we have had hitherto. If things are allowed to remain as they are now, no prohibition will be of any avail. The people will grasp at this translation unless an authentic one be provided for them." That the writer in that journal was correct in his anticipation may be seen from the fact that up to March 31st, 1889, 173,385 portions of the Scriptures, as a whole or in parts, have been distributed.

(Specimen verse. John 3 : 16.)

Јер Бору тако омиље свијет да је и  
сина својега јединороднога дао, да ни  
један који га вјерује не погине, него  
да има живот вјечни.

**Seventh Day Adventist Foreign Missionary Society.** Headquarters, Battle Creek, Michigan.—The foreign work of this Society is carried on in the following fields, according to the last report (1890):

**EUROPE.** *Switzerland.*—The centre of the work is in the printing-house at Basle, from which a large amount of literature has been circulated. There are twelve churches with a membership of 370, and an increase in the past

year of 56. After much difficulty the question of holding camp-meetings has been decided favorably, and the success of one in one of the most difficult places in Switzerland gives encouragement for the future.

*France.*—There are four churches and four companies of Sabbath-keepers in France, with a membership of 65. Some colportage work has been done, and two courses of meetings have been held.

*Algeria.*—Some three or four years ago a baker living at Realizani received a copy of the paper published in French, became interested in it, embraced its truths, as he understood them, and began to labor for others. Quite a number of Spaniards accepted the faith, and a society called the Apostolic Seventh Day Adventists was formed.

*Russia.*—The Seventh Day Adventist Church in this empire was organized in the Crimea in 1886, and during the same year labor was begun on the river Volga. One church of seven members was organized north of Saratow, and there are now about 100 Sabbath-keepers in this part of the empire. In the Caucasus there is one church of more than 100 Sabbath-keepers, and another of 17 members. The difficulty of sending books into Russia has been very great, and has hindered the spread of the work not a little.

*Germany.*—From 1876–79 two churches were organized in Rhenish Prussia, but the work then ceased, to be taken up again in 1888, since when eight or ten canvassers have labored in several provinces with good success. Work has also been carried on in Stuttgart, Hamburg, and Barmen.

*Scandinavia.*—A church has been organized with 15 members in Karlsrona, Sweden, and there are now 12 churches with 360 members. In Norway there are 3 churches with 301 Sabbath-keepers. Considerable canvassing has been done along the western border of Norway, and a church school has been opened at Christiania with 50 children. In Denmark there are 5 churches with 265 members.

The tour of P. W. B. Wessels among the mission stations of South Africa has led to the establishment of a community of about 40 in number near Cape Town, and a church is to be built at Kimberly. Two tents have been purchased—one to be used in the eastern district along the coast, the other in the western district.

*Australia.*—The work of the Society has been started in three colonies, namely, South Australia, Tasmania, and in Melbourne. In Adelaide a church of 25 members has been formed. In Hobart Town there are 65 members. The publishing work of the Society has been carried on with great difficulty. The Australian Conference is composed of six churches, with a membership of 362.

*New Zealand.*—During the past year a conference has been formed of three churches, with 155 members; also a Tract Society and a Sabbath-school Association.

**Seventh-Day Baptist Missionary Society.** Headquarters, Westerly, R. I., U. S. A.—The Seventh-Day Baptist Missionary Society, founded in 1842, aims to disseminate the gospel in America and in other parts of the world, and to promote religious and benevolent work. In 1847 its "Mission to

\* Same as Danitchitch of preceding article.

China" was established in Shanghai. There are at present at this station 4 American missionaries, with 6 native assistants, to carry on the preaching, teaching (in boys' and girls' boarding-schools), and medical work of the station. The number of patients at the dispensary in 1889 was 2,822. The Holland Mission, with principal station at Haarlem, is accomplishing great good by means of temperance work and "Midnight Missions." From Haarlem the work is extending throughout Holland and Belgium. The principal work of its "Mission to the Jews" is carried on in Galicia, Austria.

**Seychelles**, a group of islands in the Indian Ocean, are a dependency of the British colony of Mauritius (see, under Africa, West African Islands). Mission work is carried on by the S. P. G. and C. M. S., and not by the Scottish Presbyterian Societies, as stated in the article Africa. The C. M. S. (1875) has a station at Capucin, and has 47 children under instruction. The S. P. G. has 1 missionary resident at Praslin.

**Shaingay**, a town in the Sherbro district, West Africa, which gives name to a mission district of the United Brethren in Christ. Together with the Mendi Mission (q.v.) there are 266 communicants, 13 day-schools, 443 scholars, 11 Sunday-schools, 451 scholars. There is a training-school at Shaingay, whose 8 students assist in itinerating.

**Shahjahanpur**, a city in the Northwest Provinces, India. Population, 77,936. It gives name to a circuit of the M. E. Church (North). In the city are two stations—Shahjahanpur and East Shahjahanpur. The former has one missionary and wife, 152 church-members, 33 day-schools, 450 scholars, 22 Sunday-schools, 1,756 scholars; the latter, 1 missionary and wife, 124 church-members, 7 day-schools, 262 scholars, 8 Sunday-schools, 305 scholars.

**Shan States**, the name given to some of the hill provinces which lie on either side of the boundary between Burma and Siam, and are tributary to the one or to the other. They are inhabited by the Laos and other tribes. (For amount of mission work, see Burma and Siam.)

**Shan Version**.—The Shan belongs to the Tai family of the Indo-China languages, and is spoken by the natives of the Shan States, Burma. The Burma Bible and Tract Society published in 1882, at Rangoon, a translation of the New Testament by Mr. Cushing.

**Shanghai**, the most important emporium in China, and the city which shows more of western civilization than any other settlement of Europeans, except Hong Kong, is in Kiangsu, on the Woosung River, about 12 miles from its junction with the Yangtze-kiang, in lat. 31° 10' N. and long. 121° 30' E. There are two entirely distinct parts to the city: (1) The Native City; (2) The Foreign Settlement.

(1) *The Native City* is very old. The first mention of it is found to be in A.D. 1015. In 1360 it became a district city. The British captured it in June, 1843, and it was the fifth of the treaty ports thrown open to foreign commerce. During the Taiping rebellion it was captured by the insurgents and occupied by them for 17 months, and when they were driven out in 1860 the eastern and southern suburbs were almost entirely de-

stroyed. By virtue of its position it is the outlet for a vast territory. The Wusung and Hwangpu rivers, the latter emptying into the Wusung at Shanghai, give it communication with Su-chow, Sungkiang, and all the region of the Grand Canal; while the Yangtze, only a few miles distant, makes it the outlet for the great Yangtze valley. The city, walled, three miles in circuit, stands in a large and fertile plain. Along the water front are vessels which carry goods to and from the interior. The streets are narrow and paved, the houses built of brick; and shops, eating-houses, and the usual temples and Buddhist shrines common to all Chinese cities are found here in abundance, and none of the public buildings or temples are peculiar to this city any more than to other cities of the empire. The population is estimated at 200,000, but probably the estimate is low. The climate varies greatly—from an intense heat in summer to freezing cold in winter, and great changes of temperature in 24 hours are common in the spring and autumn. The mean temperature, like that of Rome, is 59° (F.). Heavy rainfalls occur in the summer, but from September to May the climate is delightful.

(2) *The Foreign Settlement* is a municipality, and is divided into the English (and American) and French concessions; is governed by municipal officers; and there is a mixed court where cases involving natives and foreigners are tried before both Chinese and English officials. Spacious docks line the river front for three miles. The streets are broad, overhung with trees, lighted with electric light, and nearly all the comforts of modern civilization are to be found. Jinrikshas, together with the native sedan chairs and wheelbarrows, provide abundant means of transportation; and horses and equipages of the latest European style are to be seen on the streets, especially along the Bubbling Well Road—the fashionable drive. Hundreds of native boats ply for hire on the river, and with the shipping, the steam-tugs, and small boats, the water presents a most animated appearance. The land of the concessions belongs really to the Emperor of China, to whom a mere nominal rental is paid. The domestic and foreign mails are handled at seven post-offices,—at the consulates,—in connection with the Chinese customs. Clubs, libraries, museums, in addition to the various mission establishments, present attractions to the visitor. Telephone service is provided. The great northern line of telegraph was connected with the settlement in 1871, and it is now in cable communication with the rest of the world. The first railroad in China was opened in 1876 between this city and Wusung, at the mouth of the river; the Chinese Government bought it the ensuing year, tore it up, and sent the material to Formosa, where it is now rotting.

From this port is carried on the most important trade in China, the value of it having risen from 65,000,000 taels in 1868 to 145,000,000 taels in 1889. It is the centre for the export of tea and silk.

According to the census of 1890, the population of the municipality exclusive of the French concession, was 168,129; on the French concession, 34,722; the foreigners numbered only 4,265, of whom 444 were in the French quarter. The death rate in 1888 was 18.5 per thousand. Such a wide range of nationality is seldom found in any Oriental settlement; while the bulk

of the foreign population is British, American, French, and German, yet twenty-one other nationalities are represented in varying numbers. Together with the estimated population of the native city, the total population of Shanghai is 408,000.

Shanghai is the literary centre of the foreigners in China. Here is published the best English daily paper, together with the majority of the missionary publications. At the Presbyterian Mission Press books are printed in Chinese—not only religious, but scientific; and the Chinese Religious Tract Society issue from here their periodicals in Chinese, and the “Chinese Recorder” and “The Messenger” are published in English. On account of its central location, the beauty of its situation, the hospitality of the foreign community, it has been the place of meeting for the great Missionary Conferences (q.v.).

Its importance as a centre for religious work was early appreciated, and a larger force of missionaries, or representatives of more denominations, are probably not met with elsewhere in China. (See article China for development and history of mission work in Shanghai.) Mission societies now represented at Shanghai, with the last available statistics, are:

London Missionary Society (1843); 1 missionary and wife, 2 female missionaries, 7 out-stations, 5 churches, 250 communicants, 7 preaching places, 6 native preachers, 2 girls' schools, 2 day-schools, 100 scholars.

American Presbyterian Church (North), 1850; 4 missionaries and wives, 1 female missionary, 3 out-stations, 2 churches, 6 preaching places, 4 native preachers, 6 Sabbath-schools, 465 scholars, 6 theological students, 1 girls' school, 30 girls; 23,820,000 pages were issued from the Mission Press in 1889.

Southern Baptist Convention; 2 missionaries and wives, 1 female missionary, 3 churches, 95 members, 30 scholars.

Seventh-Day Baptist Missionary Society; 2 missionaries and wives, 1 medical missionary, 2 female missionaries, 30 communicants, 35 Sabbath-schools, 33 day-schools.

Methodist Episcopal Church (South); 4 missionaries (1 President of Anglo-Chinese College).

Protestant Episcopal Church (U. S. A.); 2 missionaries and wives, 2 missionary physicians and wives, 2 female missionaries, 3 churches, 2 chapels, 1 college, 1 medical school, 1 hospital, 264 communicants, 716 scholars.

C. M. S. (1845); 3 missionaries, 43 communicants, 3 schools, 71 scholars.

United Presbyterian Church of Scotland; Rev. A. Williamson, D.D., was for some time engaged in literary work, but since his death in August, 1890, the Society has no representative in the city.

The British and Foreign Bible Society have at Shanghai a centre for work, and it is the headquarters of the American Bible Society.

**Shanghai Colloquial.**—Into this dialect of the Chinese, which is spoken at Shanghai, the Revs. Medhurst and Milne translated the Gospels of Matthew and John, which were published at Shanghai in 1847. In 1872 the New Testament was published by the American Bible Society, translated by Bishop Boone, Revs. J. S. Roberts, E. H. Thomson, J. M. W. Farnham; in 1880 the same Society published a revised edition of the four Gospels; in 1885,

Genesis, Exodus, and Deuteronomy; in 1886, the Psalms, translated by the Revs. J. W. Lambuth and E. H. Thomson; in 1888, Isaiah and Daniel. In behalf of the British and Foreign Bible Society, the Rev. W. Muirhead of Shanghai is now engaged in translating portions of the Scriptures into this dialect for the untrained people, to whom the literary and even the Mandarin styles are not familiar. He will not adopt a low or commonplace colloquial, but such as would be appreciated by well-read native Christians, and understood by the common people when read to them.

(*Specimen verse.* John 3:16.)

因爲神愛世界上人，造於實蓋，拿伊獨  
養兒子，賞撥伊拉，以致凡係相信兒子个  
人，勿滅脫咗得着永生。

*Roman.*

Idng-wāi Zāng jūē ē s' k'āi lōng k'uk niang,  
lāu, soong' p'eh ye k'uk dōk 'yāng Nie-'ts, s'  
f'eh kiā s'ā' niang, siang-sing' ye m'eh, f'eh  
mih-t'eh lau, t'uk-dzak 'ioong-'yō' w'eh la'.

**Shangpoong**, a district in the Khasia and Jaintia Hills, Assam, which contains seven small governments or Dolloiships, in five of which the gospel, preached by the missionaries of the Welsh Calvinistic Methodist Missionary Society, has already secured a footing. In the district there is 1 missionary, with 17 preaching places, 126 communicants, 751 Sunday-scholars.

**Shaohing**, a city in Chehkiang, China, on the south side of the Bay of Hangchow. Its climate is warm and somewhat malarious. Surrounded by a fertile and prosperous country, with a population of 150,000, it is one of the important cities of Chehkiang. Mission station of the A. B. M. U. (1869); 1 missionary and wife, 2 churches, 55 church-members; theological seminary with 7 students. C. M. S. (1870); 13 communicants, 16 scholars. C. I. M.

(1866); 3 missionaries, 5 out-stations (including Sinchang), 6 churches, 208 communicants.

**Shao-tien-tzee**, a city of Northern China, in the province of Shansi, near Tai-yuen-fu. Mission station of the Baptist Missionary Society; 3 missionaries.

**Shao-wu**, a city in Fuhkien, China. A station of the Foochow Mission of the A. B. C. F. M. Mission houses and a hospital have been built, and the opportunities for medical and evangelistic work are very great. The station has 2 missionaries and wives, 1 medical missionary.

**Sharon**, the first permanent station of the Moravians in Barbadoes, West Indies. It is pleasantly situated on a rising ground 4 miles from Bridgetown. It was opened in 1794, but the labors of the missionaries have met with only a moderate degree of success, and there never has been any great awakening among the Moravian congregations on the Barbadoes, such as has been experienced in other West Indian islands. The work is now in the care of a missionary and his wife.

**Sheik Othman**, a town in the southwest part of Arabia, 10 miles from Aden. Mission station of the Free Church of Scotland, occupied in 1885 by the Keith-Falconer Mission (see Presbyterian Church of Scotland).

**Shella**, a small town of 5,000 people in the Khasia and Jaintia hills, Assam, which gives name to a district of the mission of the Welsh Calvinistic Methodists, under the oversight of 1 missionary. In the district are 25 churches, 196 communicants, 1,037 Sunday-scholars.

**Sherbro**, an island off the southwest coast of Sierra Leone, Africa, opposite the mouth of the Sherbro River; is about 30 miles long and 10 miles broad. Mission field of the former Mendi Mission, now United Brethren of Christ, with stations at Bonthe, Victoria, and Good Hope; also of the Wesleyan Methodists, with headquarters at Bonthe, and 14 preaching places, 1 missionary, 189 church-members, 154 Sabbath-scholars, 215 day-scholars; the Sierra Leone Native Church, in connection with the C. M. S., has 4 pastorates—Bonthe, Bendoo, Victoria, and York Island.

**Sherring, Matthew Atmore**, b. Hasted, Essex, England, September 26th, 1826; studied at University College, London, and Coward College; ordained December 7th, 1852; sailed as a missionary of the L. M. S. the same year for Benares. He took the superintendence of the Central School and soon engaged in vernacular work. A missionary tour which he made in 1853 with some of his brethren served early to introduce him to varied forms of Indian life. In 1856 he married the daughter of Rev. Dr. Cotton Mather, and in November the same year removed to Mirzapore to take charge of the station in the absence of Dr. Mather in England. Mrs. Sherring was active in efforts for native female improvement. In 1861 they returned to Benares, Mr. Sherring taking charge of the Central School, engaging in bazaar preaching and itinerating, Mrs. Sherring conducting the female school. In 1866 he left with his family for England, *via* America; re-embarked for India alone, January 7th, 1869;

resumed charge of the Central School and took the pastorate of the native church. In the absence of Dr. Mather at Almora he supplied his station for nine months. In 1875 he visited the Nilgiri Hills for his health, but not regaining it, he made a second visit to England in 1876. Having recovered his health, he returned to India with Mrs. Sherring in 1878. On Sunday, August 8th, he went through his usual services in Hindustani and English, in apparently good health. At 2 o'clock Monday morning he was attacked with cholera, and on the 10th, 1880, passed gently away. The same evening native Christians carried his body to the grave, among them his first convert, baptized twenty-four years before, a Brahmin, and now vernacular headmaster in the institution at Benares. "Combining high culture and strong common-sense with a gentleness of disposition almost womanly, Mr. Sherring endeared himself to all with whom he came in contact." "I make it my rule," he would say, "to try to please every one if possible." In the twofold work of high-class education and of preaching in the vernacular, which devolved on him at Benares and Mirzapore, he found ample scope for his superior talents.

**Shidzuoka**, a city on the southern coast of Central Japan, 120 miles from Tokyo. Climate pleasant and healthy. Population, 36,838. People industrious, comfortable; the use of liquors and tobacco general, but not excessive. Mission station Methodist Episcopal Church, Canada (1873); 3 missionaries and wives, 2 single ladies, 22 native helpers, 27 out-stations, 9 churches, 720 church-members, 1 school, 50 scholars.

**Shillong**, the administrative headquarters of Assam, India; has a high location, from which there is a beautiful view of the valley of the Bramaputra. It gives name to a district of the Welsh Calvinistic Methodist Mission among the Khasia and Jaintia Hills, and in the town and district there are 13 stations, under the oversight of 1 missionary, with 36 preaching places, 689 communicants, 2,137 Sunday-scholars.

**Shimoga**, a town in Mysore, India. Mission station of the Wesleyan Methodist Missionary Society (1863); 2 missionaries, 34 church-members, 115 Sabbath-scholars, 399 day-scholars.

**Shimonoseki**, a city of Japan, of considerable commercial importance. It is situated on the southwestern extremity of Nippon, on the strait which connects the Inland Sea with the Yellow Sea. Mission station of the A. B. M. U. (1886); 1 missionary and wife, 4 native preachers, 36 church-members.

**Shimshi**, or **Zimshi**.—The Shimshi belongs to the languages of North America, and is used in Metlakatla. A translation of the Gospel of Matthew was published by the Society for Promoting Christian Knowledge in 1885, which was followed by the publication of the Gospels of Mark, Luke, and John in 1886-87.

**Shintoo**.—The origin of Shintoo is involved in more or less obscurity, but the translation of the Kojiki, which may be looked upon as the sacred record and exposition of the system, has thrown much light upon its doctrines. It is an embodiment of the crude superstitions of the

early Japanese, their nature-worship, spirit-worship, ancestor-worship, and hero-worship, in fantastic combination. It is dimly monotheistic in its very earliest references. It presents the idea of one supreme being, from whom all things spring, but of whom nothing beyond this can be known. He was not a real Creator. This mysterious and unrevealed being is known in Shintoo as the "Central and Supreme God of Heaven."

Tradition relates that when the heaven and the earth separated from that confused relation in which they had been intermingled in the original chaos, this supreme God came forth and appeared uplifted between them, but he had existed, though unrevealed, from all eternity. This system also presents the idea of a second and a third deity, subordinate to the first but self-existent. From these deities two emanations proceeded, namely, Isaname (female), and Isanagi (male); from the fecundity of these sprang all things. They were the Adam and Eve of Shintoo. Several other subordinate gods were produced.

The process of creation ascribed to the divine pair was very unique: standing on a bridge of heaven and looking earthward, they stirred the ocean with a long spear. From the end of the spear dropped some fecund substance, from which sprang up the islands of Japan, and in the islands thus composed was the potency of all things; vegetable and animal life sprang up spontaneously. Shintoo does not recognize a real creation out of nothing. It claims only a development. The universe is regarded as eternal. God and man and all things are of one essence. The system, therefore, is in a sense Pantheistic.

The development of the sun myth appears in Japan as in so many other countries. The male and female deities above named produced a daughter of most resplendent beauty, represented by the sun. While this fair maiden was embroidering beautiful textures—thus, perhaps, symbolizing the beautiful work of nature in verdure and in flowers—her churlish brother spoiled her work by covering it with defilement; the brother representing the principle of evil, and thus establishing a dualism which has been found in so many nations. The maiden, thus insulted, is represented as having withdrawn herself in sulkiness to a dark cave, leaving the world in gloom. The legends represent the forlorn inhabitants of the world as having resorted to various expedients to bring her forth from the cave. Three of these appear to have been successful. One was to gather as many cocks together as possible, from all quarters, and place them near the cave's entrance, that at the proper hour of cock-crowing their clamor might excite her womanly curiosity, and bring her out. A second expedient was to institute a dance of beautiful goddesses before the cave. Becoming jealous of the praises which she heard lavished on them, she would certainly come out and reveal her charms.

Another plan, quite as successful, was that of constructing a mirror, which was so placed before the mouth of the cave as to reflect to the goddess her own beautiful form. This three-fold appeal to her curiosity, her jealousy, and her vanity succeeded. She came forth; whereupon means were immediately taken to prevent her return. The sunlight of her presence

again bathed the world, and filled all nature with delight. This sun goddess married at length, and became the mother of the whole line of mikados, and from her to the present incumbent of the throne there has never been a break; the succession for thousands of years is claimed to be complete.

There are imposing ceremonies connected with the worship of this goddess, almost wholly of a cheerful tone; and it may be said in general, that of all races, perhaps the Japanese, before the advent of Buddhism, had the most light-hearted type of faith. In the springtime there are still festivals designed to hail the springing of the fruits and flowers, and ceremonies in imitation of planting and sowing are performed. Here is a vocation for the Shintoo priests, and one far more grateful than offering bloody sacrifices or in any way striving to appease gloomy deities. This sun-goddess, the ancestor of the mikados, is a genial being, and she is symbolized, not by cruelty and death as in the case of Moloch, the fiery sun-god of the Phœnicians, but by all benign influences, and her only sacrifices are offerings of rice and fish and flowers. It is scarcely necessary to say that the original supreme deity, who never revealed himself, and of whom nothing is known, is removed very remotely from the practical interests of life, and that the great mother of the mikados is the really supreme object of worship.

Shintoo can scarcely be called a religion. It has little moral earnestness. As a system, it is a vast Pantheon of demigods. It embraces the modified worship of ancestors and heroes. Its temples are full of heroes of Japanese history, fierce warriors, and successful Shoguns and Daimios, and the number is ever increasing. Even in modern times governmental decrees frequently confer semi-divine honors on dead statesmen and heroes. Every Shintoo temple is a sort of Westminster Abbey, in which the images of honored Shoguns are placed.

The literature of Shintoo is not extensive. Such as it is, it found its source in the fables and folk-lore of the earliest and rudest times. These were preserved by minstrels. In the third century A.D. Chinese legends were introduced, and some of these myths were committed to writing. It was in 712 A.D. that the Kojiki, or "ancient record," was compiled. This is the sacred Bible of Shintoo priests. It is also the earliest Japanese history. It is most unique in its style, resembling nothing else that has ever been published in any land. It is remarkable for the agglutination of long compound names and expressions. But although Shintoo cannot compare with Buddhism in its literature, or in its intellectual influence, yet it does not wholly neglect the instruction of the people. There is more or less preaching on ethical subjects, and the ethics thus presented are pure and salutary. Even this custom may have been borrowed from Buddhism. During the long centuries in which Shintoo and Buddhism have coexisted side by side, or rather have been more or less intermingled, the Buddhist influence has done most to promote the intellectual growth of the people, very little effort having been made by the Shintoo priests to emulate the Buddhist culture. Buddhism has not only proved educa-

tional in its influence: it has inculcated a higher moral feeling, and especially in the direction of benevolence and humanity.

It is difficult to decide whether or not Shintoo is to be regarded as idolatrous: no idols appear in the temples, even of the sun-goddess. Statues of heroes are not invoked in prayer, and yet undoubtedly they receive something akin to worship; and the Japanese temples are never closed against any object which seems even to approach the idea of the supernatural. In every Shintoo temple a mirror is seen, which is supposed to symbolize the divine man that is in us, at the same time that it is a vivid representative of one's conscience and his judge. The thought is that a man within the sacred temple precincts is brought face to face with himself, and that in one sense what it most concerns him to know is himself as he really is. It cannot be denied that this is a forcible conception. Next to the prayer of the Psalmist that the Spirit of God may search the petitioner and try his heart, is that means, whatever it be, which brings a man face to face with himself in the solemn presence of real or supposed deity. Shintoo is a religion in so far as it recognizes the relations of man to a higher power, as is shown in the fact that prayer is a resource constantly resorted to. It is offered to a supreme something, which is supposed to cherish an interest in all creatures. At funerals and elsewhere prayers are offered for the dead as well as for the living. There is in Shintoo a resemblance to the cult of the Aryans, both in its dread of death and of all that belongs to death. A corpse is looked upon as polluting, and one should have as little as possible to do with it; no people except the Zoroastrians carried this matter so far. It is closely connected with sun-worship in both cases.

#### ***Relations of Shintoo to Buddhism.***—

Buddhism entered Japan in the year 552, A.D. The Shintoo levity and thoughtlessness opened the way for a system which was of a more melancholy tone and spirit, and which took a more earnest hold upon the future life. For a thousand years, according to Kodera, there existed a strange partnership between the two religions. By common consent the Shintoo priests officiated at all marriages (with which Buddhist monks were supposed to be little in sympathy), while Buddhist priests took charge of the funerals, from which Shintoo priests were only glad to be exempt. At the present time marriage is a civil rite only. So intimately interwoven did these two systems become, that the Government at length began to dread the influence of Buddhism, which had proved the stronger element. And in order that Shintoo, with its traditions of imperial descent and the prestige which it thus afforded, might not lose its supreme place, a decree was passed declaring it to be the religion of the state; and this is still the theory of the Government. Yet so closely had the two systems been blended, and that for so long a time, that it is said that nine tenths of the people consider themselves as belonging to both. Like other Oriental systems, Shintoo is easy-going, and in a negative sense charitable toward Buddhism; both have long been accustomed to represent their position by the maxim: "Men may ascend Fujiama on any one of many sides, but when once on the summit the same glorious moon is visible to all. So with the religions."

There can be little doubt that the early mythology of Shintoo exerted a disastrous influence upon the morality of the people. The legend which represents the goddess as dancing in an almost nude condition before the cave in which the sun-goddess was hidden has presented a poor example to the generations of Japanese peasants, and one cannot greatly wonder that indecency and vice have known less restraint than in almost any other land. The Japanese have many attractive elements of character, but immorality has, under the influence of Shintoo, been scarcely considered a vice.

The late Dr. S. R. Brown, after years of observation, could scarcely find any element of moral restraint in the system, and was slow to accord to it the name of religion. Rev. Drs. Hepburn and Griffiths have expressed similar opinions.

There can be no doubt that in comparison with this childish system of nature-worship and mere natural impulse Buddhism has been a blessing to Japan. Rev. K. C. Kurahara has summed up the beneficial influences of Buddhism in Japan as follows:

(1) It has taught the people a vivid realization of future rewards and punishments—thus ministering both inspiration and restraint, and giving to life a higher dignity and solemnity.

(2) It has presented a high conception of our common humanity, without caste or slavery.

(3) It has enjoined a higher grade of ethics, and much more of self-restraint.

(4) It taught the people temperance, even prohibition.

(5) It has emphatically enjoined benevolence and pity to all beings.

(6) It has stimulated an intellectual activity not known before. It has introduced philosophy and poetry and all literature.

(7) From the 12th century until the year 1868 Buddhist priests were the only educators. All schools were due to their influence.

(8) The Buddhist doctrines have greatly enkindled the powers of imagination, pathos, and lofty aspiration.

(9) The introduction of Buddhism has led to increased foreign intercourse, and has brought in its train the literatures not only of China, but of India.

(10) Buddhism has given great impulse to architecture, landscaping, gardening, and all ornamental arts. Of this the peerless bronzes, lacquers, and the sweet toned temple bells are proofs.

(11) By its support of a priestly and yet a thoughtful class, Buddhism furnished many men of leisure, who gave themselves to literature and were promoters of a higher national culture. Were the Buddhist element eliminated from Japanese literature there would be but little left.

(12) Although Buddhism weakened the divine autocracy of the Mikado, and thus perhaps facilitated the introduction of the rival power of the Shoguns, yet nevertheless it exerted a powerful restraint upon cruelty and oppression.

(13) It taught rulers the duty of respecting the claims of the people and of promoting their good.

Rev. Mr. Ibuka of the Tokyo Christian College gives credit to Confucianism for imparting to the Japanese nation a higher degree of moral earnestness than either Shintoo or Buddhism. To the ethics of Confucius is due whatever of loyalty to government and to country have been

found in public officials and all the higher classes of men.

A new cultus has now appeared in Japan. The gospel of Jesus Christ has imparted more of noble impulse, secured a greater degree of moral and intellectual advancement, in twenty-five years than all the other religions have realized in the centuries of their dominion.

**Shiu-kwan**, an important station of the Wesleyan Methodist Mission in the Canton, China, district. It is south of Canton City, not far from San-ui, and like it, is in the region whence Chinese emigrants go forth to the United States and other countries. Land has been bought in the city, on which a school, a hospital, and two houses are to be erected. A dispensary in "Great Street" afforded medical treatment to 1,015 new patients during the year. There are 2 local preachers and 294 members.

**Sholapur**, a town in Bombay, India, 200 miles southeast of Bombay, on the Bombay and Madras Railroad. Temperature 50° to 110° F. Population, about 60,000, Hindus, Moslems. Languages, Marathi, Hindustani, Kanarese. Natives poor, degraded. Mission station A. B. C. F. M. (1861); 2 missionaries and wives, 37 native helpers, 13 out-stations, 6 churches, 295 church-members, 18 schools, 355 students.

**Shonai**, a town on the northwest coast of Nippon, Japan. Climate damp, healthy. Population, 20,000. Mission station Foreign Christian Missionary Society (1888); 2 missionaries and wives, 1 native helper, 20 church-members.

**Shurman, John Adam**, b. Westphalia, Germany, 1810; studied at Berlin; sailed for India July 9th, 1833, as a missionary of the L. M. S.; stationed at Benares February 17th, 1834. He devoted himself to the educational and Scripture-translation department. With others he labored in preparing the Urdu and Hindustani versions of the Scriptures. In April, 1842, he went to Calcutta to superintend the printing of the Urdu version of the Old Testament. Returned to Benares in June, 1843, and left in October for England. Re-embarked for India by the way of New York, without his family, in 1844, and reached Benares February 20th, 1846. He died at Benares October 1st, 1852. Mr. Sherring, who was associated with him, says: "He was a distinguished translator of the Bible into Hindustani."

**Shwe-gyin**, a town in Lower Burma, on the Sitang River, south of Toungoo, 100 miles northeast of Rangoon. Climate tropical. Population, 7,519. Race and language, Burmese. Religion, Buddhism. Mission station American Baptist Missionary Union (1853-55); 1 missionary and wife, 4 native helpers, 1 out-station, 1 church, 17 church-members, 1 school, 44 scholars.

**Shweir**, a town in Northern Syria, northeast of Beirut. Mission station of the Free Church of Scotland; 6 out-stations, 1 missionary, 2 churches, 61 communicants. The Lebanon School Society supports the school work.

**Shweybo**, a mission station of the S. P. G. in the Rangoon diocese, Burma, with 2 missionaries 28 communicants among the Burmese of the five surrounding villages, 3 schools, 38 scholars.

**Sialkot**, a town in Punjab, British India, on the Aik River, 72 miles northeast of Lahore.

The town is very extensive, steadily increasing in size and commercial importance; it is very handsome, well built, and clean, containing many shrines, schools, and public buildings worthy of note. Population, 26,000, Moslems, Hindus, Sikhs, Jains, and Christians. Mission station of the U. P. Church of Scotland (1857); 2 missionaries and wives, 3 female missionaries, 18 native helpers, 68 communicants, 42 theological students, 963 scholars. U. P. Church of America (1885); 3 missionaries and wives, 3 female missionaries, 101 communicants, 327 Sabbath-scholars, 544 day-scholars.

**Siam**.—The kingdom of Siam lies at the southeast corner of Asia, occupying the central and principal portion of the peninsula of Indo-China. It has Burma on the west, Cambodia, Cochin-China, and Tonkin on the east. It stretches along the Malay Peninsula to within four degrees of the equator. Its northern boundary lies between the 20th and 21st parallels of north latitude, and separates it from the independent Shan states. It has a total length from north to south of 1,350 miles, a maximum width of 450 miles, and an estimated area of 190,000 square miles,—or about that of New England and the four Middle states.

**Physical Features**.—The physical contour of the country may be best understood by remembering that both its mountain chains and its rivers have a general north and south direction. Of river systems there are two—that of the Mehan in the west, and that of the Mekong in the east. In their lower courses the rivers traverse immense alluvial plains which are to a large extent overflowed during a portion of the year. In the upper country the mountain walls on either side approach each other in some places so closely as to leave only a narrow gorge, while in others they recede, enclosing fertile plains varying in width from 10 to 50 miles. Nearly all the navigable streams are broken by rapids, which render water communication between the lower and upper courses difficult.

**Climate**.—Although Siam lies wholly within the tropics, the climate is not so hot as that of Southern India. The temperature at Bangkok ranges between 57° and 99° F., with a mean annual temperature of 80°.

The periodical monsoons of the Indian Ocean divide the year into two seasons of about equal length—the rainy season extending from May until October, and the dry season covering the rest of the year.

Owing to the tropical heat, the abundant rainfall, and the annual overflow of the rivers, Siam is a very fertile country.

**Vegetable Products**.—The great staple crops are rice, sugar-cane, cotton, and tobacco. Even under the primitive methods of agriculture in vogue, the yield of rice is sufficient to supply the needs of the people and leave large quantities for export to China and Japan. Considerable silk of excellent quality is produced.

Tropical fruits of all kinds grow in great profusion, and need scarcely any cultivation. The cocoa-nut and betel palms are found everywhere, as also the indispensable bamboo. The forests furnish teak-wood, dye-woods, and valuable gums and resins. The export of teak timber for shipbuilding is a large source of revenue to the kingdom.

**Minerals**.—The mineral wealth of Siam is

largely undeveloped. Gold, silver, iron, copper, antimony, and lead are worked to some extent. Limestone is plentiful, and coal is known to exist, but is not mined. Precious stones—notably rubies, sapphires, and emeralds—abound in certain districts.

**Domestic Animals.**—The domestic animals are the elephant, the water-buffalo, and the Indian bullock. The elephant is used for working timber, for journeying, and on ceremonial occasions. The water-buffalo is the dependence for all agricultural operations, and the bullock is the chief means of transporting goods, away from the watercourses.

**Population.**—The population of Siam is variously estimated at from six to twelve millions. The Siamese and their near kinsmen, the Laos, make up three fourths of the whole; the other fourth is composed of Chinese, Malays, Peguans, and Burmese, the first named being the most numerous and important. The Siamese and Laos are alike members of the Shan race, which at one time (14th century A.D.) dominated the greater part of Indo-China. Outside of Siam the principal seat of the Shans at present is in the independent Shan states, which lie between Siam on the south and Yunnan, the southwest province of the Chinese Empire, on the north.

**Physical Characteristics and Disposition.**—The Siamese are a people of medium stature, well formed, with brown skins, straight, black hair, which is worn short, except by the Laos women; and slightly flattened noses. Their eyes are not set obliquely, as in the Chinese and Japanese. In disposition they are gentle, lively, hospitable, kind to children and to the aged, fond of amusements, but lacking in energy, deceitful, unstable, and conceited. The Laos and Independent Shans are superior to the Siamese proper in strength of body and stability of character. The civilization of the Siamese strongly resembles that of China, but is of a lower grade, as they have not the patient industry, the inventive skill, nor the literary taste of the Chinese. Much of the trade of the country falls into the hands of the Chinese and Burmese. The Chinese in many cases marry Siamese women, and the children of such unions make one of the most promising elements in the population, combining the superior energy of the Chinese with the vivacity and quickness of the Siamese.

**Language.**—The Shans have a common language, broken into several local dialects—e.g., the Siamese, the Laos, and the Shan proper.

This tongue is properly a monosyllabic language, and, like the Chinese, has an elaborate system of *tones*, by which words otherwise identical are given different meanings. There are six tones in common use. Thus, for example, the monosyllable *pa* means, according to the tone or inflection given to it, "fish," "jungle," "aunt," "to lead." Words otherwise similar are also distinguished by the value of the initial consonant, whether aspirated or unaspirated. Thus *pha*, with the same inflections as those given in the examples just mentioned, would mean "rock," "to cleave," "cloth," "to unite. Besides the distinction into aspirates and non-aspirates, the mutes and liquids have each two characters assigned to them,—one of which we may call strong, the other weak,—so that the number of consonants is swelled to forty-three. The system of vowels is also

elaborate. The Siamese use a written character entirely distinct from that in use by the Laos. It is thought to have been derived from the Cambodian. The Laos character is of the same type as that used by the Burmese and by the Shans, and in common with them appears to have been derived from the Pali, a dialect of the Sanskrit. Both Siamese and Laos are written from left to right. Vowels are written, some on the line after the consonant, some on the line before the consonant, some under the consonant, and some over it; while some diphthongs, as *au* and *ai*, have one element written before the consonant and one after. Besides the original stock of monosyllables there are many polysyllabic words introduced from the Pali. These are to a large extent *formal* words, used in reference either to religion or to government. Thus the Indian *rajah* appears as *racha*, "royal," in such combinations as *racha-bât*, "king's son," *rachawong*, "king's palace." With reference to its grammar, Siamese may be said to be an uninflected language. There is no distinction of form to represent person, number, mood, or tense. There is no article; its place must be supplied when necessary by *nî*, "this," or *nan*, "that." There is no distinction of singular and plural: *all* or *many* or a numeral must be added to the singular to mark the plural. There is no conjugation of the verb except by auxiliaries, which are also in use as independent words: e.g., *yu*, "to be," "to dwell," present; *dai*, "to have," and *lao*, "finished," past; *ch* or *cha*, "also," future. There is no declension of the noun. The nominative precedes its verb, the objective follows it; the genitive and the adjective follow their noun; the other cases must be expressed by prepositions. There is also a notable lack of connective particles, as of cause, inference, purpose, etc.; even the simple conjunction "and" is but sparingly used. The chief difficulties of the language for the foreigner lie in the recognition and accurate reproduction of the tones. The chief obstacles to be overcome in translation are the lack of connective particles, the native love for multiplying synonyms, and the observance of a proper mean between the simplicity of the vernacular and the stilted style adopted in the sacred books of Buddhism. It should be added that besides the difference in written character between Siamese and Laos dialects, there are also slight but important differences of vocabulary, of tone, and of idiom—e.g., so common a word as "not" is in Siamese *mî*, in Laos *bar*. Missionaries to the Laos have not hitherto been agreed upon the question whether these differences justify a separate Bible for the Laos; but now (1890) type has been prepared in the Laos character, and it is intended to print at least portions of the Word of God in it.

**Social Customs.**—In their social customs the Siamese present several points of interest to the student of missions. The position of woman is high for an Oriental people. No attempt is made to seclude her, but she moves freely among men, engages in business, holds property in her own name, and is in general the equal of man. Monogamy is the rule, except among the nobility; and even among them the principle of monogamy is recognized in the pre-eminence given to one, generally the first wife. Child marriage is not practised; widows may remarry; divorce is easy. The position of woman is due

in part, doubtless, to the beneficent teachings of Buddhism, and in part to the social custom which ordains that a man on marriage shall become a member of his wife's family. Children are kindly treated, and the adoption of children by childless couples is common. Great respect is paid to distinctions of age and rank. There are separate sets of pronouns which must be used with regard to superiors, inferiors, and equals.

**Religions.**—Two religions obtain among the Siamese peoples—Buddhism and the worship of evil spirits. The one is a historic religion, with ancient, sacred books, costly temples, and a numerous priesthood: the other is an unorganized worship, without literature, priesthood, or temples, but in many portions of the country, particularly among the Laos tribes, it rivals, if it does not exceed, Buddhism in its hold upon the popular mind and its influence over the affairs of life.

**BUDDHISM.**—Buddhism, as understood and practised by the Siamese, revolves about a few leading ideas. The first of these is the wretchedness of existence. Human life from the Buddhist point of view is essentially unhappy. Strong emphasis is laid upon the pains, sorrows, failures, disappointments, and unsatisfied longings. The end to be sought is deliverance from these evils. Not holiness, but happiness, is the goal. But because Buddhism knows nothing of God and the satisfaction of the soul in fellowship with God, it looks for nothing more than a negative happiness, to be attained by the extinction of desire. Only when desire in all its forms—even the desire for existence itself—is done away with, can the soul be emancipated from its wretchedness. When desire is quenched, the soul will enter upon that state of existence without self-consciousness which constitutes Nirvāna, the Buddhist heaven. But this must be a slow process—too slow to be attained within the limits of a single lifetime, but requiring an indefinite course of ages. And this brings us to the second great idea in practical Buddhism—the transmigration of the soul. It is true, indeed, that according to theoretical Buddhism there can be no transmigration of the soul, because the soul is not an entity, but only a relation of unity between the various powers and faculties exhibited by man. As it has no separate existence, it cannot survive the death of the body. Death snaps the bond by which the faculties and feelings are held together, and suffers all to fall apart, or rather would do so, but that instantly, in a way entirely obscure, there arises a new set of powers and faculties in connection with a new body, but in character precisely what the old ones would have been had death not intervened. This is the philosophical tenet of *Karma*. It need scarcely be said, however, that this is too subtle for popular comprehension. For the great majority of Siamese Buddhists the truth is expressed by the common doctrine of the transmigration of the soul, according to which the present life is but one in a long series of existences, some past, some still to come. In each past existence the soul has inhabited a different body, sometimes that of a man, sometimes that of some animal; and so must it continue to do in future existences.

And here intervenes a third leading idea—that of merit and demerit. The state of the man in each new existence, the character of the

body of which he will become the inmate, the environment in which he will move, the proportion of pleasure to pain in his experience, will depend upon the amount of merit or demerit resultant from his conduct in previous existences. The constant effort of the Buddhist, therefore, is to acquire merit, and to avoid the incurring of demerit. But it must not be supposed that "merit and demerit" are terms synonymous with "holiness and unholiness," or even with "righteousness and unrighteousness." They are equivalent rather to "profit and loss." Merit is the result of conformity to the precepts of Buddhism, and these are directed, as already noted, not to holiness, but to happiness: not to the overcoming of sin, but to the eradication of the principle of misery—desire. And while in these precepts are included the prohibitions of the second table of the Decalogue, and the command to universal charity, the vast majority of them are of a ceremonial rather than a moral or spiritual character. Merit is to be acquired by kindness, justice, truth, it is true; but far more stress is laid in the popular teaching upon the building, decoration, and maintenance of temples, the support of the priests, the giving of fêtes, and the observance of ceremonial usage. Indeed, if one will only be sufficiently diligent in these latter directions he may safely be somewhat reckless in regard to loss of merit through violations of the moral law. Hence Siam is a land of many temples. Scarce a village but has one, while in the larger cities the number rises into scores, or even hundreds. Each temple has a monastery attached to it, and a number of resident priests, and young men and boys in training for the priesthood. To become a priest is the most effective way of making merit for a man; for a woman the best thing is to have many sons, who may acquire merit for her by becoming priests. The majority of men in Siam and the Laos country spend at least a few years in the priesthood.

It will readily be seen from this brief account of Buddhism, as held and practised in Siam, that it constitutes a formidable barrier to the progress of Christianity. Simply as the ancient religion of the country, it is strongly entrenched in the popular regard. "It is not the custom of our ancestors" is often considered a sufficient reply to the best-constructed argument for Christianity. Buddhism, too, is interwoven with the whole social life of the people—scarcely a family but has or has had a member in its priesthood. Its fêtes furnish the principal opportunity for social pleasures. Vast sums of money have been invested in its temples, pagodas, and monasteries, and in the support of its priests. It makes strong appeal to the self-righteous tendencies of the human heart. It operates powerfully to deaden the conscience, and to discredit the possibility of a vicarious atonement for wrong-doing.

**WORSHIP OF EVIL SPIRITS.**—Side by side with Buddhism, and to a large degree intermingled with it, is the religion of demon-worship. This is but one form of that Shamanism which prevails so largely in Asia and Africa. What gives it interest is the extent to which it affects the lives of the people. The spirits or demons, some of which may be said to correspond to the elves and fairies of western superstitions, but the majority of which are believed to be in greater or less degree malevo-

lent, are of several different kinds. Some are local genii,—spirits of the forests, the mountains, the streams, the caves. Others preside over certain natural phenomena,—as thunder, rain, wind; or over particular operations,—as ploughing, sowing, reaping, house-building; or certain situations in human experience,—notably birth, marriage, sickness, death. A vast multitude also are spirits of deceased persons. It would be easy to draw out these general statements into detail, but enough has been said to make it apparent how a superstition so elastic may be brought into connection with every event of life, and how it may cast the shade of fear over the whole of earthly existence. And this is the actual result. With every day and every turn in life the spirit-worshipper must consider how his conduct will be regarded by these invisible and for the most part malignant powers. His constant effort is to propitiate them. For this purpose he relies upon offerings, sometimes of animals, more frequently of food and flowers, and upon charms, spells, and incantations. In the more difficult questions he must have recourse to the professional medium or exorcist. This burdensome superstition finds its natural climax in the belief that in many instances sickness or misfortune is due to witchcraft. Severe injuries are not infrequently inflicted upon the supposed victim of such evil influence with the purpose of making the possessing spirit reveal the identity of the witch. Persons adjudged to be witches are driven from their homes, their houses burnt, and their gardens uprooted. There are in the Laos provinces cities where the whole population consists of such persons and their families.

Potent as this demon-worship is in its influence upon the people of Siam, and especially of the Laos provinces, it is less serious than Buddhism as a hindrance to the progress of the gospel. Since disease in its various forms is largely attributed to the influence of demons, medical missionary practice does much to weaken this superstition. So does the mission school, with its rational explanations of natural phenomena. And so heavy is the incubus of fear which this belief lays upon its adherents, that they are prepared to hail as good tidings a religion that promises relief.

**History of Missions.**—**EARLY EFFORTS.**—It was as a possible door of entrance to China that Siam first attracted the attention of Protestant Christians. In the year 1828, Dr. Karl Gutzlaff, who had gone to Singapore under the Netherlands Missionary Society, accompanied by Rev. Mr. Tomlin of the London Missionary Society, visited Bangkok. Convinced that here was an open door for missionary effort, these brethren sent an appeal to the American churches for men to occupy the field. This appeal was brought to America by the same trading vessel which brought the famous "Siamese Twins." In response the American Board instructed the Rev. David Abeel, then stationed in Canton, to visit Siam, with a view to the establishment of a mission there. Meanwhile Gutzlaff and Tomlin had been earnestly at work. While their attention was principally given to the Chinese, whom they found numerous in Bangkok, Dr. Gutzlaff prepared a tract in Siamese, and made a translation of one of the Gospels. But the death of his wife and the collapse of his own health compelled him to leave Siam for China. Mr. Tomlin also was

shortly called away to take charge of the Anglo-Chinese College at Malacca; and Mr. Abeel, who had arrived just after Dr. Gutzlaff's departure, was, after fifteen months' stay, compelled by ill-health to abandon the field (November, 1832).

**BAPTIST MISSIONS.**—Besides the appeal to the American churches, Gutzlaff and Tomlin had sent one also to the American Baptist Mission in Burmah. It is interesting to note in this connection that the very earliest effort on the part of a Protestant for the evangelization of the Siamese was made by Mrs. Ann Hasseltine Judson, who had, by the help of a Siamese resident in Rangoon, learned something of the Siamese tongue, and had translated into it the catechism just prepared by Dr. Judson for the Burmans, also a tract and the Gospel of Matthew. The catechism was printed (1819) on the mission press at Serampore, and is believed to be the first Christian book ever printed in Siamese. In response to the appeal made to them, the American missionaries in Burma commissioned Rev. J. T. Jones, one of their own number, a missionary to Siam. He arrived in March, 1833, and was permitted to continue in the work until his death in 1851. (See article A. B. M. U., Siam Mission.)

**MISSIONS OF THE A. B. C. F. M.**—The attempt of the American Board to establish a mission in Siam, which had come to an end with the departure of Mr. Abeel (1832), was renewed by the sending out of Messrs. Johnson and Robinson, who reached Bangkok in 1834. They were joined a year later by Daniel B. Bradley, M.D., who arrived in the same vessel with Mr. Dean of the Baptist Mission. These two men were destined to enjoy long periods of missionary service. Dr. Dean continued his labors for the Chinese, with sundry interruptions, until 1885. Dr. Bradley was ordained to the ministry in 1838. He was a man of versatile powers, and left an abiding mark on the Siamese nation. As preacher, teacher, physician, author, translator, and printer, he labored with untiring devotion for thirty-eight years, when he was removed by death (1873). He still lives, however, not only in the influence of his own life, but in the persons of his widow, and of his children and grandchildren, six of whom have had an active share in missionary work for the Siamese. Like the Baptists, the missionaries of the American Board at first carried on missions both to the Chinese and the Siamese, but with the opening of China proper the laborers engaged among the Chinese were withdrawn. The mission to the Siamese was maintained until 1849, when it was brought to a close by the departure of Rev. Asa Hemenway, the Board's only remaining missionary. Dr. Bradley having previously withdrawn his connection with it.

As yet but slight results had been obtained, either by the missionaries of the American Board or by their Baptist brethren, in the conversion of the Siamese. But much had been accomplished in other directions. The missionaries by their blameless and self-denying lives, and especially by their success in healing the sick, had won the esteem of the native community. By preaching and teaching, and by translating, printing, and distributing portions of the Scriptures and Christian tracts, they had brought the truth into contact with a multitude of minds; and especially ought we in estimating their labors to be mindful of the influence

which one of their number was permitted to exercise.

*Influence of Rev. Jesse Caswell.*—This was the Rev. Jesse Caswell, a missionary of the American Board, who arrived in Bangkok in 1840. The king who then ruled Siam was a usurper. At the death of the preceding king he had seized the government, compelling his nephew, the rightful heir to the throne, to seek safety by becoming a Buddhist priest. While pursuing his studies the young prince made the acquaintance of Mr. Caswell, with whom he was so much pleased that he invited the missionary to become his private tutor. The invitation was accepted, and for eighteen months this future king of Siam was under the daily instruction of Mr. Caswell. In this way the prince gained a knowledge of English, some acquaintance with Western civilization, and an introduction to the natural sciences, astronomy in particular. He learned, too, to put a high estimate upon the missionaries and their work, especially in its educational features. When, on the death of the usurper in 1851, he was raised to the throne, the results of these enlightening influences were at once felt. His predecessor had been a despotic and narrow-minded ruler, opposed to foreigners and all foreign innovations. He had rebuffed the overtures made by England and the United States for commercial treaties, and had used such rudeness toward Sir James Brooke, the English ambassador, that war with England seemed imminent. The new king at once instituted a more liberal policy. In 1855 treaties were consummated with England and the United States. The king also took frequent opportunity to show the favor with which he regarded the missionaries. Mr. Caswell having died in 1848, his Majesty erected a monument over his grave, and sent his widow presents amounting to \$1,500. He afterward invited the wives of several of the missionaries to act as teachers to the ladies of his household, and at a still later time employed an English lady, Mrs. A. H. Leonowens, as governess for his children, among whom was the present king of Siam. From 1851 until the present time the missionaries have been treated with great kindness and marked respect. On several occasions the king has made liberal contributions to the educational and medical departments of the work. Upon the conclusion of the treaty with the United States (1856) the Siamese Government requested that one of the missionaries (Rev. Stephen Mattoon) should be appointed consul. In 1878 another missionary (Rev. S. G. McFarland) was placed in charge of the newly opened "Royal College" in Bangkok, with the office of Superintendent of Public Instruction. The son of a missionary, himself an active Christian, he for many years held a high position in the Foreign Office. In 1882 the present king gave an audience to a newly arrived party of missionaries, on which occasion he made use of language in the highest degree commendatory of the influence exerted upon his people by their predecessors. Within the last year (1890) a medical missionary has been placed in charge of two hospitals, and a dispensary opened in Bangkok by the Siamese Government, and this with the understanding that no restriction is to be put upon his work as a Christian missionary. Such favor shown the missionaries by the rulers of the land has had marked effect in giving the gospel free course among

the people, and this advantage is due in large measure to the influence exerted by Mr. Caswell upon the late king.

*PRESBYTERIAN MISSIONS.*—One other of the American churches was to have a share in the work of missions in Siam. This was the Presbyterian Church (North). In 1848 the Presbyterian Board of Foreign Missions sent to Bangkok the Rev. William Buell and his wife. After three years of service they were compelled by the ill-health of Mrs. Buell to leave the field. The work was then suspended until 1847, when it was renewed by Rev. Stephen Mattoon and Samuel R. House, M.D. This mission continues until the present, and is now the only Protestant agency for the evangelization of the Siamese. Some points in its history may be briefly outlined. The first convert, Nai Chune, was baptized in 1859,—twelve years after the permanent establishment of the mission. What progress has been made since then may be judged from the statement taken from the last annual report of the Presbyterian Board, that at one station (Chieng Mai) "there have been adult accessions to the membership (of the church) at each monthly communion for the last twenty-two months, and in fifty-five out of the last sixty-one months, or since October, 1884."

In 1861 the mission opened a new station in Petchaburee, an important city, 85 miles southwest of Bangkok, and capital of a flourishing province of the same name. It was first occupied by Rev. Messrs. Daniel McGilvary and S. G. MacFarland. This station has been a prosperous one. It has now in connection with it 5 churches, numbering 267 communicants. It also maintains 12 day-schools, a boarding-school for boys, and an industrial school for girls. In 1882 a mission hospital was opened, and has since been carried on with marked success. The Petchaburee station has now become a centre of Christian influence not only for the province in which it is situated, but also for the provinces lying to the south, along the Gulf of Siam.

*Mission to the Laos.*—Another important step was taken in 1867 in the establishment of a mission to the Laos tribes. These are the inhabitants of the six provinces tributary to the King of Siam, which constitute the northern half of his dominions. Interest in the evangelization of these tribes was first awakened through the presence in the neighborhood of Petchaburee of a large colony of Laos, whose ancestors in a time of political disturbance had put themselves under the protection of the King of Siam, who had assigned them a residence in the province of Petchaburee. In 1863 Messrs. McGilvary and Wilson of the Petchaburee Mission made a tour of exploration to Chieng Mai, the capital of the most powerful Laos province. This important city is situated on the river Maa Ping, about 500 miles north of Bangkok. In 1867 Mr. McGilvary removed thither with his family, and Mr. Wilson and his wife followed him a year later. The courage exhibited in this undertaking may be seen in the fact that, owing to the rapid current of the river and the numerous rapids which break its course, the boat journey from Bangkok to Chieng Mai requires from six to ten weeks. The labor of the missionaries was soon rewarded by the baptism of their first convert, Nan Inta, a man of more than usual ability, and learned in the Buddhist

religion. His faith in Buddhism was first seriously shaken by the verification of the prediction made by the missionaries of the eclipse of August 18th, 1868. His conversion was followed within a few months by that of six others.

Martyrdom of Laos Christians.—These successes aroused the fanaticism of the king of Chieng Mai, who had at first welcomed the missionaries. Having failed in an attempt to secure their recall to Bangkok by charging upon them a scarcity of rice, which had prevailed about the time of their arrival, he suddenly caused the arrest of two of the converts (Noi Soonya' and Nan Chai). The arrest was made upon the false pretext that they had failed to perform public work assigned to them. But when they were brought before the king, he demanded that they renounce their connection with Christianity. Upon their refusal they were tortured by means of cords made fast in the holes in the lobes of their ears, and then drawn tightly over a beam. In this position they spent the night. The next day (September 12th, 1869) they were again examined, and upon their renewed avowal of their steadfastness were clubbed to death. The remaining church-members took refuge in flight, and for a time the missionaries themselves were in extreme peril. But at this juncture the persecuting king was called to Bangkok to attend the obsequies of his master, the King of Siam, who had died from a fever contracted during a scientific expedition to a southern province for the purpose of observing that eclipse which had been used of God for the conversion of Nan Inta', the first Laos convert. While in Bangkok the king of Chieng Mai fell ill, and died before he could reach his capital. Since his death the missionaries and their converts have enjoyed a fair degree of toleration. This has been due in part to the act of the present enlightened King of Siam in issuing, in 1878, a "Proclamation of religious liberty for the Laos." This he did in response to an appeal from the missionaries in Chieng Mai, on behalf of two native Christians who wished to be married in Christian fashion, without making the offerings to spirits customary on such occasions. Their heathen relatives attempted to prevent the marriage, and were supported in their attempt by the authorities; so there was nothing left for the missionaries but to appeal to Bangkok. The resulting "proclamation" has since proved an effective instrument for holding the persecuting spirit in check.

Medical missionary work was begun in Chieng Mai in 1875 with the opening of a dispensary, since developed into a hospital. A boarding-school for girls was opened in 1878, and one for boys in 1888. The former now (1890) has 91 pupils, the latter 94.

In 1885 a new station was established in the city of Lakawn, capital of the province of the same name. Lakawn is situated on the river Maa Wang, and is 75 miles southeast from Chieng Mai. The first missionaries were Rev. S. C. Peoples, M.D., and his wife. Here also there is a mission hospital. An industrial school for boys is just being put into operation, and it is probable that the Laos press will be set up here. The Laos Mission has vigorous churches also in three other provinces—Lapon, which joins Chieng Mai on the south; and Chieng Hai (Chieng Rai) and Chieng San (Kiang Hsen) to the northwest of Chieng Mai.

The Presbyterian Board of Foreign Missions has in Siam and the Laos provinces five stations—Bangkok, Petchaburee, Ratburee (on river Maaklong, half-way between Bangkok and Petchaburee; opened 1889), Chieng Mai, and Lakawn. In connection with these stations there are now (1890) 13 ordained missionaries; 21 lay missionaries, of whom 4 are physicians; 33 native helpers, 20 of them ordained; 12 churches; 1,114 communicants; 21 schools with 641 pupils; 4 hospitals, and 2 mission presses. The missionaries have translated, revised, and published the whole Bible in Siamese. They have prepared also a hymn-book and many other religious works, besides text-books for use in the mission schools.

It will thus be seen that the time has come when the speedy evangelization of Siam may be looked for. The whole land is open to missionary effort. Prejudice has been overcome, and the missionaries are held in high esteem. Important centres have been seized. The Bible has been translated. Schools and hospitals have been established, and a substantial church has been gathered. These are broad foundations; it only needs that the present generation of Christians should be worthy of their opportunity, and the walls will rise apace.

**Siamese Version.**—The Siamese belongs to the Tai family of the Indo-China languages, and is spoken in the kingdom of Siam. A translation of the New Testament into Siamese was commenced by Messrs. Gutzlaff and Tomlin, and after a careful revision by the Rev. J. T. Jones, one of the Baptist missionaries at Burma, it was printed in two vols. at Bangkok, 1843, aided by a grant from the American Baptist Bible Society. A second of 1,000 copies was issued at Bangkok, 1850. Another translation of the New Testament was made by the Rev. M. Mattoon of the American Mission, but this version needs revising. The work of revision was undertaken by the American missionaries N. A. McDonald and Van Dyke, who in connection with other missionaries undertook a translation of the Old Testament also. The first edition was published in 1881, a second in 1886.

(Specimen verse. John 3: 16.)

กัณฑ์ว่าพระเยซูเจ้าทรงพระบัญชาโดยนิตินัย

ประทานบุญแก่ผู้เชื่อของพระองค์, เพื่อทุกคนที่ได้เชื่อถือในบุตร  
นี้, จะมีชีวิตนิรันดร์, แต่จะมีชีวิตอยู่ชั่วชีวิตนี้.

**Siboga**, a town of Sumatra, East Indies, on the coast, northwest of Pakenten. Mission station of the Rhenish Missionary Society; 2 missionaries, 1 lady, 16 native workers, 460 adherents, 54 communicants, 79 school-children.

**Sibsagar**, a town of Assam, India, on the Dikhu River, nine miles from the Brahmaputra; the seat of the river trade; once a very important place, as proved by the ruins of a magnificent tank, with temples and palaces along its border, and still interesting on account of its tea-gardens. Population, 5,868, Hindus, Moslems, Christians. Mission station American Baptist Missionary Union (1874); 2 missionaries and wives, 5 native helpers, 7 out-stations, 3 churches, 147 church-members, 3 schools, 14 scholars. In 1889 a missionary was sent here to commence work among the Kols; the former missionary had been working only among the Assamese.

**Sidon** (Saida), a city on the coast of Syria, 20 miles south of Beirut, on the site of the ancient Zidon. Population about 11,000. Mission station of the Presbyterian Church (North), 1851; 1 missionary and wife, 2 female missionaries in charge of a female seminary, 1 academy with 140 scholars.

**Sierra Leone**, a rich and fertile peninsula on the west coast of Africa (Sierra Leone proper), which, with the island of Sherbro and much adjacent territory, forms a crown colony of Great Britain. It extends from the Scarcies River on the north to the border of Liberia, 180 miles, with an area of 3,000 square miles, of which only one tenth belongs to Sierra Leone proper. The shore is low, but back of it rise rugged mountains 3,000 feet in height. It was originally (1787) a settlement for the "liberated Africans" who were set free from the slave ships; sometimes 2,000 slaves were settled here in a year. Coming from almost every part of Africa, many languages were spoken, but English became the common tongue. The moral condition of the natives was most degraded; barbarism, immorality, and superstition reigned supreme. The population in 1888 numbered 75,000, and through the influence of the missions there were in 1881 39,048 Protestants and 369 Catholics. The climate is most unhealthy, so that it has been called the "white man's grave."

Freetown, with a population of 4,930 inhabitants, is the capital. Missionary societies: S. P. G.; stations, Domingia and Farringia; 3 missionaries. Wesleyan Methodist, including Gambia; stations at Freetown, Wellington, Hastings, Waterloo, York, Wilberforce, Sherbro, Limbah; 18 missionaries and assistant missionaries, 5,821 communicants. C. M. S. (1816); 2 missionaries, 2 lady teachers, Fourah Bay College, Anna Walsh Institute, 12 stations. United Methodist Free Church; 6 stations; 1 missionary, 7 native helpers. United Brethren (U. S. A.); 12 stations, 5 missionaries, 154 members, 234 day-scholars, 236 Sunday-scholars; all in the Sherbro district. African Methodist Episcopal Church; stations at Freetown and interior; 2 missionaries. The mission of the C. M. S. has resulted in the establishment of a native church, with numerous pastorates and out-stations, 59 lay teachers, 41 female teachers, 12,929 members, 5,777 communicants, 43 schools, 4,750 pupils. Seventy years ago Sierra Leone was a heathen land: to-day it is filled with places of worship.

**Sigompulan**, a town of Northwest Sumatra near the west coast and north of Sipirok. Mission station of the Rhenish Missionary Society; 1 ordained missionary, 1 female missionary, 10 native workers, 50 communicants, 96 school-children.

**Sih-chau**, a town in Shansi, North China, southwest of Tai-yuen. Mission station of the China Inland Mission (1885); 1 missionary and wife, 2 single ladies, 2 churches, 14 church-members.

**Sihanaka**, a town in Madagascar near Tamatave. Mission station of the L. M. S. (1875); 2 missionaries, 48 native helpers, 188 church-members, 3,352 school-children.

**Silo** (Shiloh), a town among the Kafirs in

Tambuki, East South Africa, on the Klippalaat River, 700 miles northeast of Cape Town. Mission station of the Moravians, opened in 1828, from the station Gnadendal (in accordance with a request of Lord Somerset that they should commence work on the northeast frontier of the colony), by three missionaries with some twenty Hottentots and a remarkable Kafir woman, who shortly after saved the mission from destruction by her bravery and eloquence, during an attack of the hostile chief of Tambuki. (See Moravian Missions, Eastern Province.) Silo has often suffered during the Kafir wars, once being laid in ruins, but it was rebuilt, and is now in a very flourishing condition, under the care of 3 missionaries and their wives.

**Simla**, a city of the Punjab, India, 170 miles north of Delhi. Chief sanitarium and summer capital of India. A very pleasant place, except for its inadequate water supply. Climate cool, exhilarating, healthy, though for several reasons the difficulties of drainage are considerable. Population, in summer 17,000, in winter 8,000, Hindus, Moslems, Sikhs, Jains, Christians. Mission station of the Baptist Missionary Society; 1 missionary, 10 native helpers, 3 out-stations, 160 church-members. C. M. S.; 1 missionary, 5 native helpers, 1 school, 63 scholars, 157 church-members.

**Simonton, Ashbel Green**, b. West Hanover, Penn., U. S. A., January 20th, 1833; graduated at Princeton College 1852; taught two years, and graduated at Princeton Theological Seminary 1858; ordained by the Presbytery of Carlisle; appointed the first missionary of the Presbyterian Board to Brazil, and reached Rio de Janeiro August 12th, 1859. While acquiring the language he preached in English to Americans and other foreigners. He soon became an effective preacher in Portuguese, and his ministry was remarkably blessed. In 1862 a church was organized in Rio, to which at almost every communion additions were made, mostly from the Church of Rome. He employed the press as an important auxiliary. He translated the Shorter Catechism and other works into Portuguese. He edited also the "Imprensa Evangelica," a religious monthly, sustained chiefly by his own articles, which were often of rare value, and attracted the attention of readers among the educated classes. His strength being overtaxed by his incessant labors, he took a journey to São Paulo, was attacked with fever at the house of his brother-in-law, Rev. Mr. Blackford, and died December 9th, 1867.

One of Mr. Simonton's colleagues has thus referred to him: "He was looked upon by all the members of the mission as our leader and chief stay, as he had been our pioneer. We took no important step, save from absolute necessity, without first hearing his counsels. The most talented, most learned, and best-formed of our members; master of the language, and possessing in unusual degree tact and prudence for planning and executing,—we have no one left to fill his place." Resolutions were drawn up by the United States consul, and adopted at a meeting held in the consulate, expressing the esteem of his countrymen and of many Brazilians.

**Simorangkir**, a town of Northwest Sumatra, northwest of Pantjurnapitti. Mission

station of the Rhenish Missionary Society; 1 ordained missionary, 1 female missionary, 15 native workers, 103 communicants, 102 school-children.

**Sind** (British India), the most northwestern province of the Bombay Presidency. It occupies the lower part of the Indus valley, including the delta of that river. North of it lies the Punjab; west, Baluchistan; east, Rajputana; and south the Arabian Sea and the Rann of Kachchh. Its limits of north latitude are 23° and 28° 40', and of east longitude 66° 50 and 71°. Including a small native state occupying a part of the territory, the area is 54,123 square miles, and the population 2,542,976, giving an average density of only 47 to the square mile; this sparsity of population is accounted for by the sterile nature of much of the soil. The country is largely destitute of trees, flat, and uninteresting in appearance. Its soil is in many places strongly impregnated with salt. Mohammedans preponderate, over three quarters of the population being of that faith. Hindus constitute only an eighth; Sikhs (members of a sect originating in the Punjab) about 5 per cent, aboriginal tribes about 3 per cent, Christians over 6,000, Jains and Parsis a thousand or more each. The Sindis represent the original Hindu population, but are now Mohammedans, having been converted under the reign of early Mohammedan rulers. The history of the province is complicated, and not of special interest. For many centuries it was ruled now by Hindu and now by Mohammedan dynasties. As English power on the west coast became stronger, entanglements with outlying native rulers were inevitable. At times the use of armed force against them was necessary for self-defence or for retaliation; and at other times treaties for trade and commerce would be made, and very likely broken, which again was supposed to render necessary military measures. As a result of such relationships, Sind was conquered in 1843 by an army under Sir Charles Napier, and formally annexed to British dominions. It is administered by a commissioner under the governor of Bombay. Karachi is the capital and chief town; it lies at the northern end of the Indus delta, and by the erection of elaborate harbor works it has been made one of the most important sea-ports in Western India. Its population (according to the census of 1881, the authority for all these statistics) is 73,560. The other large towns are Haiderabad, 48,153; Shikarpur, 42,496. There is constant communication between Karachi and Bombay by steamer; and the province is connected by rail with the railway system of Upper India.

The Church Missionary Society occupied Karachi in 1850, and Haiderabad in 1857. The success has been small. The American Methodists began work in Karachi, largely among unevangelized Europeans, in 1872 or 1873. Education has made rapid progress since the advent of British power. In 1859-60 there were only 20 government schools; in 1883-84 there were 340, with 23,273 pupils. There are also private schools, not included in the government figures. The census of 1881 returned over 27,000 males and over 2,000 females as under instruction, and nearly 77,000 males and over 2,800 females as able to read and write. The language in principal use is Sindhi, one of

the Sanskrit family, to which Marathi, Hindi, Bengali, etc., belong.

**Sindhia's Dominions** (British India), a native state protected by the paramount power of British India (see article Native States). Otherwise known, from its chief city, as Gwalior State. Ruled over by the Maharaja Sindhia, descendant of one of the great Maratha princes of the last century. The situation of Gwalior is north latitude 26° 13' and east longitude 78° 12', 65 miles south of Agra. Sindhia's territories consist of blocks or masses of country intermingled with other areas belonging to other chieftains or to the British Government. Thus any attempt at defining his boundaries is impossible. The population numbers (1881) a little over 3,100,000. These are mostly Hindus; Mohammedans constitute a little more than a twentieth of the whole. Few native states in India exceed Sindhia's in size and importance. His chief city, Gwalior, is renowned as containing some of the finest specimens of Hindu architecture extant, and as the site of a famous rock fortress. There is also a very old Jain temple here.

Gwalior has been occupied by the American Presbyterians as a mission station. There are 92 schools with nearly 3,000 pupils in the state—rather a small showing for so large and important a state.

**Sindhi Version.**—The Sindhi belongs to the Indic branch of the Aryan family of languages, and is spoken in the province of Sind, belonging to the Bombay Presidency. A translation of the Gospel of Matthew was issued in 1835 at Serampore, in Arabic characters. Between the years 1859 and 1868 the Gospels and the Acts were prepared by the Rev. A. Burn of the Church Missionary Society, and published in 1868 at London under the care of Mr. A. Burn by the British and Foreign Bible Society. The work of translation was continued by the Revs. Burn, C. W. Isenberg, and G. Shirt, and a complete edition of the New Testament was published under the care of the Rev. Joseph Redman, in 1889. Besides the New Testament, the following parts of the Old Testament were published: Genesis, translated by the Rev. A. Burn, and the Psalms, translated by the Rev. G. Shirt, both published in 1882; Isaiah, also translated by Mr. Shirt, published in 1888. Besides the Sindhi version in Arabic, the same Society published at Oxford the Gospel of Luke in the Hindi, and that of John in the Gurmukhi character, as prepared by Mr. Burn.

(Specimen verses. John 3:16.)

Arabic.

ڇاڪان تہ خدا جهان کي اِھڙو پيارو رکيو  
جو پنھنجو ھڪڙو ئي جِئَلُ پٽ ڏنائو تہ  
جيڪو ڪو تنہ تي وڃسہ اُٿي سو ڇڏ  
نٿي وڃي ھميشہ جِئَلُ لھي

Gurmukhi.

ਛਾ ਖਾਂ ਤਈਸਰ ਜਗਤ ਏ ਖਿਰੇ ਪਿਆਰੇ ਰਖੇ ਜੇ ਪਹਿਰੇ  
ਭਿਰਿਓ ਈ ਜ਼ਰਾਫ਼ ਪੁਤ ਤਿਨਾਈ ਤ ਜੇਰੇ ਕੇ ਤਨਿ ਤੇ ਫੇਸਾਫ਼  
ਅਭਿ ਕੇ ਨਾਸੁ ਨ ਥਿਏ ਫੇਤਰਿ ਸਰਾ ਜਿਅਫ਼ ਲਏ ॥

**Si-ngan**, a city in the province of Shensi, China, has 8 mosques, 3 Roman Catholic chapels, and the famous Nestorian monument of A. D. 781. In 1881 the China Inland Mission established a station here, which was destroyed in 1883; and so far, (1889) no work has been recommenced in the city itself, but three missionaries and assistants are working in the surrounding plain.

**Singapore**, an island about 27 miles long, by 14 wide, containing an area of 206 square miles, is situated at the southern extremity of the Malay peninsula, from which it is separated by a strait about three quarters of a mile wide. It is a part of the crown colony of Great Britain named the Straits Settlements. A number of small islands adjacent to it are also included in its territory. The inhabitants of the island are Europeans (2,769), Malays (22,155), Chinese (86,766), and natives of India (12,058) according to the census of 1881. Singapore town, at the southeastern part of the island, is the seat of government for the Settlements, has a well-defended harbor, and has 12½ miles of tramway. The climate is warm, but not unhealthy. Mission work is carried on by the S. P. G., with 1 missionary at the town of Singapore. Presbyterian Church of England, 1 missionary and wife; and in 1889 the Methodist Episcopal Church (North) made this a starting-point and prospective headquarters of their Malaysia Mission—see account under Methodist Episcopal Church (North),—and have already a large force of 5 missionaries, 3 assistants, 1 female missionary, working among the Chinese, the Malays, and the Tamils, together with an Anglo-Chinese school and a medical work. The report shows 107 members, 380 pupils in Anglo-Chinese school, 50 day-scholars, 160 Sabbath-scholars.

**Singhana**, a town in the Shaikhawati district of the Jaipur state, Rajputana, India, 95 miles southwest of Delhi, 80 miles north of Jaipur City. Population (1881), 5,259, Hindus and Moslems. It is said to be a handsome town, built of stone, on the skirts of a hill of purplish rocks, 600 feet high. Station of the Gossner Missionary Society.

**Sinhalese Version**.—The Sinhali belongs to the Indic branch of the Aryan family of languages, and is spoken in the southern part of Ceylon, from Batticaloa on the east to the river Chilaw on the west, and in the interior. In the year 1739 the four Gospels, translated by the Rev. W. Konjim, a Dutch minister, were published at Colombo, under the care of the Rev. J. P. Wetzel, and in a revised and corrected form in 1780 under the care of the Revs. Fybrands and Philipsz. The Acts were published in 1771, and in 1776 the New Testament was issued from the press. In 1775 a metrical version of the Psalms was published at Colombo, and republished in 1778. In 1783 the Books of Genesis, Exodus, and Leviticus, as translated by Mr. Philipsz, were also published. When, in 1812, the Colombo Auxiliary Bible Society was formed, the existing translation

underwent a thorough revision; and in 1823 the Bible, as prepared by Messrs. Armour, Tolfrey, Chater, and Clough, was published at Colombo. A new translation, which the Rev. Lambrick of the Church Mission at Cotta, near Colombo (whence it is called the "Cotta Version"), had undertaken, was published at the expense of the Church Missionary Society at Cotta, 1834. As both these versions had their merits, and as it was deemed important to have one standard translation of the Scriptures, a revision committee was appointed in 1853, with a view of reconciling the Colombo and Cotta versions. The Bible thus revised was issued in 1856, and adopted by all the Protestant communities. In 1885 the British Bible Society, in response to a resolution of the Kandy Auxiliary, supported by the Colombo Auxiliary, agreed to undertake a revision of the Bible. The Rev. S. Coles of the Church Missionary Society has undertaken the chief labor of revision, but he will be assisted by a committee in Ceylon, appointed by the Auxiliaries of Colombo and Kandy, who will finally revise the work.

(*Specimen verse.* John 3: 16.)

ਭਵੰਤਿਸਾਧੁ ਚਕ੍ਰਿਯਾਯੋਧੇ ਫੁਲ੍ਹਾ ਯਥਾ ਧ੍ਰਿਸ਼ਟ-  
ਯੋਗੇਂਹ ਚਿੰਤਾਯ ਯੋਗੇਂਹ ਯਥਾ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ  
ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ  
ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ  
ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ ਧ੍ਰਿਸ਼ਟਾਯ

**Si-ning**, a prefectural city in the western part of Kansuh, China, northwest of Lanchau. Mission station of the C. I. M. (1885); 4 missionaries, wives, and assistants.

**Sinnoris**, a town in Upper Egypt, in the province of Fayoum, not far from that city. Mission out-station of the United Presbyterian Church, U. S. A. (1868); 4 native workers, 96 church-members, 2 schools, 116 scholars.

**Sinoe** (Greenville), a town in Liberia, West Africa, 150 miles southeast of Monrovia. Warm, but healthy. Population, 500 to 700, chiefly Negroes. Language (at Sinoe) English. Religion (at Sinoe) Christian, of adjacent tribes paganism. Mission station Presbyterian Church (North), 1846; 2 missionaries, 1 missionary's wife, 1 out-station, 1 church, 100 members, 1 school, 17 scholars. Protestant Episcopal Church (U. S. A.); 1 missionary and wife, 32 communicants, 66 scholars. Methodist Episcopal Church (North); 1 missionary.

**Sio-ke**, a station of the Amoy, China, mission of the Reformed (Dutch) Church, with 6 out-stations and 193 church-members.

**Sipirok**, a town in Northwestern Batakland, Sumatra, on the west coast, south of Sigompulan. Mission station of the Rhenish Missionary Society; 1 ordained missionary, 1 female missionary, 17 native workers, 7 out-stations, 450 communicants, 140 school-children.

**Sipoholon**, a station of the Rhenish Missionary Society in Sumatra, East Indies, with 1 ordained missionary, 15 native helpers, 56 communicants, 110 school-children.

**Sipohuttar**, a town in North Sumatra, northeast of Pantjurnapitti. Mission station of the Rhenish Missionary Society; 1 ordained missionary, 1 female missionary, 1 out-station, 70 communicants, 100 school-children.

**Sirier** (Ghodnadi), a town in Poona district, Bombay, India, on the Ghod River, 36 miles northeast of Poona, 34 miles southwest of Ahmadnagar. The country around is hilly and uncultivated. At one of the town's suburbs is held yearly a Hindu fair, attended by 3,000 persons. Population, 4,372. Mission station A.B.C.F.M.; 1 missionary and wife, 27 native helpers, 11 out-stations, and an industrial school.

**Sistof** (Sistova), a town in Bulgaria, on the Danube, 30 miles east-southeast of Nicopolis. Population 12,000. Mission station of the Methodist Episcopal Church (North); 1 missionary and wife, 1 female missionary, 3 native ordained preachers, 7 other helpers, 28 church-members, 50 Sabbath scholars. Here also there were printed in the year 2,000 volumes, 45,000 pages.

**Sitapur**, a town, in the district of Oudh, Northwest Provinces, India. Mission station of the Methodist Episcopal Church (North), 1861, 1 missionary and wife, 1 single lady, 48 native helpers, 40 church-members, 16 schools, 453 scholars.

**Sivas**, a city in Central Asia Minor, at quite a high altitude and with a cool climate. Population of city and out-stations 128,450: Turks, Armenians, Greeks, Koords. Mission station of the A. B. C. F. M. (1855); 2 missionaries and wives, 32 native helpers, 12 out-stations, 3 churches, 200 members, 22 schools, 1,043 students.

**Slave Trade and Missions.** The time has been when "The Slave Trade" suggested the unspeakable horrors of the middle passage, when in the stifling hold of a small vessel human beings were packed like dead freight that neither ate nor drank nor breathed. It needs no specially vivid fancy to paint the misery that filled such a prison-house under the most favorable circumstances. Even while still under tropic skies, the festering mass was thinned by the death of those not strong enough to endure such misery and live. But when storms required the cutting off of the slight ventilation ordinarily allowed, or when a contagious disease broke out, then death held high carnival, and the covetous wretches who, for the sake of gold, inflicted such misery on their fellow-men, were not led by their great losses in such cases to deal very mercifully with survivors. But that, thanks to the diffusion of a free gospel, has all passed away. It could exist at all only while the brotherhood of man set forth in the gospel was ignored by a hierarchical church that would not allow the Word of God to have free course and be glorified, and itself always sided with those who promised the largest help in its attainment of its own end. The old African slave trade could not live in the advancing light of the gospel any more than its victims could in their cramped and stifling prisons.

Gradually the extirpation of slavery in America closed that market for slaves and rendered the trade unprofitable. But the system was not dead, and the Arab slave trade across the Dark Continent from Central to Northeastern Africa and the adjoining lands of the Levant took the place of that across the Atlantic Ocean.

The missionary, at least the Protestant missionary (we cannot say as much for former Papal missionaries in the valley of the Congo. See Wilson's *Western Africa*, \* p. 384) has always been the decided enemy of the slave trade, whether with America or Moslem countries, and it is to him more than to others that we are indebted for our knowledge of its horrors and abominations. In this connection the name of David Livingstone will never be forgotten, and lately we are happy to add to it that of Cardinal Lavigerie.

We learn something of the slave trade now carried on by Moslem Arabs from the pages of modern travellers. November 24th. 1883, H. M. Stanley was steaming up the Congo on his way to Stanley Falls, not far from the mouth of the Werre as it comes in from the north; he looked for the town of Mawembe, which he had passed in his first voyage down the river. The site was there, the clearing in the forest, and the white paths up the banks, but not a house or living thing was to be seen. The palisade had disappeared. The leaves of the banana trees were scorched and their stems blackened, showing the effects of the fire that had wiped out the town a few days before. Three days later he sent a boat to ascertain what slate-colored object was floating down stream, and found the bodies of two women bound together with cords. This tragedy had taken place only twelve hours before. Soon after he came in sight of the horde of banditti, 300 strong, with a like number of domestic slaves and women. Sixteen months had they been engaged in their work of slaughter. They had desolated a region of 34,570 square miles, just 2,000 square miles larger than Ireland; 118 villages in 43 districts had been destroyed, containing at least 118,000 people, and all they had to show as the result of these sixteen months of slaughter over so extensive a region was a wretched, ragged, and starving crowd of 2,300 women and children, with not one grown up man among them. Five expeditions in all had already carried as many captives away as these possessed. To obtain these 2,300 they must have shot 2,500 men, while 1,300 more had perished by the way from hunger and despair. On an average, six persons had been killed to obtain each puny child in the encampment. The slaves were fettered in groups of twenty chained together; such fruits as could be found were thrown down before each gang, to fight for as they might, and the odors and abominations of the crowded camp were simply horrible. The bones of many stared through the skin that hung in flabby wrinkles. He adds, "How small a number of them will see the end of their journey, God only knows!"

\* The substance of his testimony is that they not only held slaves, which might have been done at the request of the slave himself, as the best arrangement possible, but they participated in the traffic. Those who practised heathen rites were sold by them to the slave ships and the proceeds given to the poor, and the number of these was so large that slavers could always depend on them to complete their cargoes. Father Merolla tells that he once gave a slave to a captain in consideration of a flask of wine furnished for the sacrament. Indeed the missionaries thought it not wrong to sell negroes into slavery if only they were first baptized and not sold to heretics; and though, knowing the horrors of the slave trade, they ought to have been the first to oppose it, yet when Cardinal Cibo toward the close of the seventeenth century wrote, complaining that "the pernicious and abominable abuse of selling slaves was still continued," the missionaries thought it impossible to do anything because the natives had very little to trade save slaves and ivory.

The process of their capture is as horrid, as their condition, when Mr. Stanley saw them, was full of misery. The Arab steals up stealthily at midnight through the darkness to the doomed town; no sound save the chirping of insects disturbs the sleepers, till suddenly the torch is applied on all sides, and in the light of the flames of the grass roofs of the houses, the deadly musket shoots down the men as fast as they appear. Many succeed in reaching the shelter of the woods, but the women and children are seized and carried off. Mr. Stanley estimated that the result of the slaughter was only two per cent of the previous population, and that even that was reduced to one per cent before they reached their destination (*The Congo*, II. 138-151).

This account of the great explorer is confirmed by the following from a letter of Rev. J. A. Bain ("Missionary Review of the World," 1889, 679). His station is in Ukukwi at Maindu, 35 miles northwest of Lake Nyassa, on the Kiwira River. He writes: "At daybreak, March 15th, we were awoke by a number of shots fired in rapid succession; we were told it was Mereri with two bands of Arabs. The surprise was complete. More than thirty women with babes and several girls were captured. The men, only half awake, tried to defend their wives and children, but were driven back by the murderous firing. The Arabs entrenched themselves in a bamboo stockade, then glutted their lust on their captives. Two children, whose weeping over the dead bodies of their mothers disturbed the orgies, were flung into the flames of a burning house. The two following days were spent in plundering and destroying the villages. The cattle are Mereri's. The women are claimed by the Arabs, who will sell them when they tire of them. They left, after burning everything that could be burned."

An English missionary at Kibanga on Lake Tanganyika writes in 1888 ("Missionary Herald" 1888, 562): "At night we could see the villages everywhere in flames, the people fleeing for refuge to the lake, and the brigands leading away the women and children in long files. A poor old woman as she was led away caught hold of the clothing of the missionary, and begged him to save her, but she was hauled away by the rope that was round her neck; another received a wound from the butt end of a pistol. Where yesterday we sought to impart instruction and comfort, now reigns the silence of a desert."

The Rev. Chauncey Maples, of the Universities Mission, says that during a residence of six or seven years he had never gone 70 miles from Masasi without meeting a caravan of slaves. One of them numbered 2,000, and according to Mr. Stanley that number must represent an amount of butchery and an extent of territory turned from populous villages into a desert that is appalling to think of ("Missionary Herald" 1885, 135).

Dr. Kerr Cross writes from Karonga in April, 1889 ("Missionary Herald" 1889, 413): "For five weeks the Arabs have harassed us constantly. They hide in the woods and murder men as they pass to and from their gardens. A few days since a party of Wankondé were thus attacked: one was killed and another wounded. The Arabs cut off the head of their victim and fled home, and it is now stuck on a pole in their stockade. Another was in the woods cutting

trees for a house, when Arabs fired on him, piercing his shoulder. Again a band of our men were fired on by Arabs hidden in the long grass; only one was shot, and he was brought in carrying a piece of his intestines in his hand, and of course he soon died. A week ago we were awoke at midnight by a volley fired quite near our home. In a few minutes every man was at his post on the stockade, but only one old woman was killed; three bullets had gone through her body, and yet she lived till yesterday. What would be the fate of these poor villagers should the missionaries be driven off?"

Livingstone, in his "Last Journals" (59-63), gives some account of the brutalities on the road. June 19th, 1866, he passed a woman tied by the neck to a tree and dead; she could not keep up with the rest, and in order that she should not become the property of another she was thus despatched. Dr. Livingstone saw others tied up in the same way, and one lying in the path in a pool of blood. June 26th he passed another woman lying dead in the road. Bystanders told how an Arab had killed her early that morning, in anger that he must lose the money paid for her, because she was too exhausted to walk any further. His "Last Journals," pp. 383-386, gives an account of a merciless and unprovoked massacre of hundreds of native women and others.

On the borders of the Red Sea the regular price for girls from 10 to 15 years of age is from \$80.00 to \$100.00; boys from 7 to 11, \$60.00 to \$80.00; young women from 16 to 22, \$50.00 to \$70.00; and young men from 15 to 26, \$30.00 to \$50.00. They rarely sell a man over 25 years old. These slaves are carried to various Moslem countries by pilgrims returning from Mecca. The trade is carried on by Moslems alone in the open market under the shadow of the mosque of the prophet at Mecca ("Missionary Herald" 1888, 93).

As to the guilt of Mohammedans in connection with the slave trade, Cardinal Lavigerie is very outspoken, and for thirty years he has been in constant intercourse with them. He says ("Missionary Herald" 1888, 561):

1. "I do not know in Africa a Moslem state whose ruler does not permit, and often himself practise on his own subjects, and in ways barbarously atrocious, the hunting and sale of slaves.

2. "It is only Moslems who ravage Africa by slave raids and slave trading.

3. "Where the slave trade is prohibited by Christian powers, I do not know a Mohammedan who does not advocate slavery and declare himself ready to buy or sell Negro slaves.

4. "I know personally in Asiatic Turkey, and in that part of Africa under the Ottoman Sultan, many places where the slave trade and the passage of the sad caravans take place with the complicity of Turkish authorities.

5. "Never to my knowledge has any mufti or teacher of the Koran protested against this infamous traffic. On the contrary, in their conversation they recognize it as authorized by the Koran for true believers as regards infidels.

6. "Never to my knowledge has any *cadi* or Moslem judge pronounced a judgment which implied the condemnation of slavery, but all have sided with the teachers and expounders of the Koran."

In conclusion, we cannot more than barely

allude to the unutterable beastliness, as well as cruelty, of these Moslem slave traders, in connection with the mutilation of boys; for though the vast majority die after the operation, yet, as the market value of the survivors is greater on account of it than would have been the price of the whole, the horrid work goes on; to say nothing of another hardly less cruel operation performed on girls, to certify to their purchasers that they have not been outraged after its performance.

The following summary of an official paper, read in the Anti-slavery Conference at Brussels, and printed in the London "Times" concerning the Trade in Circassian Women, gives an idea of the difficulty of uprooting the system in Moslem communities. "The Porte cannot see its way (clear) to enter into any practical engagements affecting the time-honored and deep-rooted usages essentially connected with the domestic conditions of the Mussulman social fabric. All the conventions and treaties on the slave trade refer to African slaves; but as regards white Circassians, it would be impossible, short of a radical social revolution, to prevent the existing traffic, which is quite an ordinary thing, forming part of the domestic institutions of the country, and having a close connection with its religious tenets and usages."

**Slavé Version.**—The Slavé belongs to the languages of North America, and is spoken by the Indians of the station on the Mackenzie River, Canada. A translation of the four Gospels was made by Bishop Bompas, which, at the request of the Rev. W. S. Reeve, Archdeacon of Fort Chipewyan, supported by the Church Missionary Society, was published at London in 1863 by the British and Foreign Bible Society. The work of printing was commenced in 1881, but was considerably delayed by the necessity of sending proofs to Mr. Reeve. This edition was printed in the Roman character. In 1884 the same Society also published an edition of the same Gospels in syllabic characters for the greater benefit of the Indians themselves, under the editorship of the Rev. E. A. Watkins. Thus far 1,268 portions were disposed of.

**Slavonic Version.**—The Slavonic belongs to the Slavonic branch of the Aryan family of languages. The different tribes speaking this language were converted to Christianity through the labors of Methodius and Cyril, "who, contrary to the course pursued by Xavier, but anticipating the labors of modern and Protestant Missions and Bible Societies, conferred on those half-savage nations the inestimable blessing of a valuable translation of the Bible." Cyril, who understood the Slavic language, succeeded in making it available for literary purposes by inventing a suitable alphabet. He translated not only the liturgy and the pericopes into Slavic, but also commenced a translation of the Bible, which after his death (February 14th, 869) was completed by Methodius. The Old Testament was made from the Septuagint, the New after the Greek text of the so-called Constantinopolitan version. Passing over minor codices still extant, we only mention that a complete Bible codex of 1429 is at Oxford, and three others of 1499 at Moscow.

After the invention of the art of printing, the Psalter was published first (Cracow, 1481-1491; Cetynia, 1495); the four Gospels were published

in 1512 at Ugrowallachi; and the complete New Testament, together with the Psalms, at Ostrog, in 1580. In the year following, the entire Bible was published at the instance of the Ruthenian prince, Constantine Ostrogski (Ostrog, 1581). This edition was often reprinted (Moscow, 1663, 1727; Kief, 1758, 1779, 1788, etc.; St. Petersburg, 1730-39, 1751, 1756, 1757, 1759, 1762, 1763, 1778, 1784, 1797, 1802, 1806, 1811, 1815, 1822, 1862, 1863). The British and Foreign Bible Society, which also circulates the Slavonic version, disposed, up to March 31st, 1889, of 876,918 portions of the Scriptures.

(Specimen verse. John 3:16.)

ТА́КВЪ БОЪ ВОЗЛЮБИ́. БГ҃Ъ МІ́РЪ, І́АКВЪ  
И С҃НА СВОЕГО́ ЕДИ́НОРОДНАГО ДА́ДЪ ЕСТЬ,  
АА ВСА́КЪ ВѢ́РОВА́И ВЪ О́НЬ, НЕ ПОГИБЕ́-  
НЕ́ТЪ, НО ИМА́ТЬ ЖИВО́ТЪ ВѢ́ЧНЫИ.

**Slavs.**—The Slavs belong to the Aryan or Indo-European family of nations, and the group in which they are classed is commonly called the Slavo-Germano-Lithuanian group. Comparative philology has proved the intimate connection and relationship existing between these three members of the group and Latin, Greek, and Sanskrit.

The primitive history of the Slavs and date of their immigrations into Europe are covered with the veil of darkness, like those of many other nations. It is generally supposed that they appeared in Europe after the Germans, and that their original settlements extended between the sources of the rivers Don and Dnieper, and beyond the Dnieper towards the eastern shores of the Baltic Sea and the river Vistula, and towards the south not farther than the river Pripet. But between the 3d and 4th century A.D. they are found occupying a district the approximative boundaries of which were: from the river Niemen as far as the mouth of the river Duna; from the Gulf of Riga over the Valdai Heights as far as the mouth of the Oka; on the east, a line stretching from the Oka to Kieff and from there to the river Boog, while on the west the line extended to the Carpathian Mountains and the upper Vistula. Towards the end of the 5th or beginning of the 6th century the Slavs occupied the northern banks of the Danube; they soon crossed over and took possession of its southern banks, whence they spread themselves as far down as Albania, Thessaly, Epirus, and even the Peloponnesus.

According to some, these immigrations of the Slavs into the Balkan Peninsula began in the 3d or 4th century and lasted till the 7th. In the 7th century A.D. the Servians and Croats, moving from the Carpathian Mountains, occupied the present Servia, Bosnia, Herzegovina, and pushed on into Croatia and Dalmatia. The region around the rivers Elbe and Oder were likewise occupied by Slavs, who, however, like the Baltic Slavs, were swallowed up in and amalgamated with the Germans; but the Slavs in Upper Austria, Styria, Carinthia, and Kraina have maintained their own ground, though the Germans have considerably encroached upon them.

The introduction of Christianity among the Slavs is the turning-point in their history; and

with it their history takes a more definite shape and course. This momentous event was brought about by the combined efforts of two brothers, Cyril and Methodius, natives of Salonica, whom all the Slavs venerate as their apostles and "illuminators," and whom they worship as saints. Cyril, the younger brother, was a man well versed in all the learning that Byzantium at that time could impart, and on account of his erudition he was honored with the title of "philosopher." Giving up all the honors and emoluments to which they might have easily attained, the two brothers went to Pannonia at the request of Prince Rostislav, to preach Christianity among the Slavs of Pannonia.

Here they devoted themselves to the spreading of the gospel, and the translation of the Scriptures and the most essential liturgical books. Cyril revised a Slavic alphabet, constructed on the basis and model of the Greek, which is still known by the name of "Kyrillitza" (Kyrill's alphabet). It consisted of 38 letters, 24 of which were the 24 letters of the Greek alphabet, while 14 others were devised by Cyril to express sounds peculiar to the Slavic speech, and for which there were no corresponding Greek letters. In spite of the opposition of the German clergy, Cyril and Methodius succeeded in obtaining the approbation of the Pope, and he allowed them to use the Slavonic language in the church services. During a visit to Rome, in 869, Cyril died, aged 43 years; while Methodius returned to Moravia, having been appointed its bishop by the Pope. But he soon found his position shaken by the virulent opposition of the German clergy, was dispossessed of his bishopric, and died, it is said, in prison in 885.

The total number of the Slavs is estimated at about 90,000,000, distributed in round numbers as follows: Russians, over 60,000,000; Bulgarians, 4,000,000; Serbo-Croats and Slovenes about 7,000,000; Tchekho (czech) Moravians and Slovaks, 7,000,000; Poles about 10,000,000; and Serbo-Lansatians about 150,000. According to their religious denominations, about 68,000,000 Slavs belong to the Eastern or Orthodox Church; 20,000,000 to the Catholic; 1,500,000 to the Protestant; and about 800,000 are Mohammedans. To the Eastern Church belong the Russians, the Bulgarians, and the Servians; to the Catholic Church belong the Poles, the Tchekho-Moravians and Slovaks, the Croats, and the Slovenes. The Protestant Slavs are distributed as follows: Slovaks, 640,000; Poles, 500,000; Tchekho-Moravians, 150,000; Serbo-Lansatians, 130,000; Slovenes, 15,000; Servians, 13,000; Bulgarians, 5,000. The Mohammedan Slavs are found chiefly in Bosnia and Herzegovina (500,000), and Bulgaria (about 250,000), who, however, have retained and speak their respective Slavic dialects.

According to their geographical distribution, the Slavs are divided into (1) Southeastern Slavs, comprising the Russians, the Servians, the Croats, the Slovenes, and the Bulgarians; (2) Western Slavs, comprising Bohemians or Tchekhs (with their subdivisions, proper Tchekhs, Moravians, and Slovaks), Lansatian Serbs (divided into upper and lower Lansatians), and Poles. Accordingly the Slavic languages are also divided into two branches: (1) Southeastern, including the Russian, the Bulgarian, the Servian, the Croat, and the Slovene, with all

their local dialects. (2) Western, including the Bohemian, the Polish, and the Serbo-Lansatian, with all their local dialects. The Catholic Slavs use the Latin language in their church services and the Latin alphabet in their literatures, while the Orthodox Slavs use the "Kyrillitza," with some partial modifications, in their writing, and the "Church-Slavonic" in their churches. This "Church-Slavonic" language is the Palaeo-Slovenic of Cyril's translation of the Scriptures, changed and modified according to the orthography and grammatical construction or forms of the Russian. The most ancient manuscript of the Kyrillitza which bears a certain date, is the "Ostromirov's Gospel," written in 1053 for a Russian prince named Ostromir. There are other manuscripts, written in another alphabet, known as the "Glagolitza," which date probably as far back as this, and perhaps are older.

There can be no doubt that even in the ninth and the tenth centuries there existed various Slavic dialects, just as we find them now; but these dialects were nearer and much more intelligible to each other than at present. The differences did not relate so much to lexicological distinctions, as to distinctions in sound and pronunciation. Thus, for example, the ancient Bulgarian word *punt* or *pont* (road, way) was written and pronounced *poot* in Russian just as it is to-day. This explains how the work accomplished by Cyril and Methodius was accessible to all the Slavs in the ninth century, and how the literary productions of one Slavic tribe could be very easily transcribed and appropriated by another. But in the course of time these various Slavic dialects have tended to diverge more and more from each other, until at the present time they form quite distinct languages. The use of the Latin alphabet by the Catholic Slavs and of the Kyrillitza by the Orthodox tends to make this divergence still wider, as it makes their literatures unintelligible to each other. The common Bulgarian or Servian of to-day can hardly understand the spoken or literary language of the Pole or the Bohemian; nor can the Slovak or the Slovene comprehend the Russian. Then the foreign linguistic elements that have entered into the lexicological formations of the respective dialects have increased the differences. German and Latin have had a great influence over the Western Slavs, while Greek, Turkish, and other foreign languages have exerted a similar influence upon the Bulgarian, the Servian, and the Russian. In grammatical forms and construction all the modern Slavic dialects, with the exception of the Bulgarian, have retained a close resemblance to the Palaeo-Slovenic language, and one well acquainted with the latter will not find much difficulty in mastering and understanding the various Slavic dialects.

In conclusion, we must say that many fanciful derivations and explanations of the word "Slav" have been given. The most probable one is that the word is derived from *Slovo*, which means "word" or "speech," and the name in its ancient orthography is "Slovyanin," which the Russians have converted into "Slav-yanin" and the Europeans into "Slavs." So Slovyanin means the "man of speech," while the Germans, the nearest neighbors of the Slavs in olden time, were and are still called by the Slavs, Nyemtzi, from "nyem," meaning "dumb."

**Slovaks.**—The Slovaks are, strictly speaking, only a branch of the Bohemian race, and their language may be considered as a dialect of the Bohemian language. But of late years a separatist movement has risen among them, and they are trying to form a literature of their own and to be treated as a nation apart from the Bohemians, which is rather a sad comment upon the much-vaunted theory of panslavism.

The Slovaks inhabit the northwest of Hungary, and number over two millions. The greater mass of them (1,583,000) belong to the Roman Catholic Church and 640,000 are Protestants. They settled in the present territory they occupy towards the end of the 5th century, and shared the fate of the Bohemians and Moravians in many historical events. Christianity was introduced among them before the first half of the 9th century by German preachers; and later on in the same century Methodius, the Slavic apostle, introduced among them orthodox Christianity, together with the Slavic liturgy. But this orthodox Christianity could not be maintained for a long time, and after the death of Methodius (885) it was replaced by Latin Christianity and the Latin liturgy. In 907 A.D. the Hungarians put an end to the existence of the great Moravian kingdom, which had united under one sceptre the Slavs of Bohemia and Moravia and the Slovaks. In 999 the country of the Slovaks was conquered by the Poles, but soon after they fell again under the Hungarians, who practically put an end to their political independence. They preserved, however, their local liberties and national immunities for a long time, and in the 15th century the doctrines of Huss found warm adherents and followers among them. The dispersion of the Hussites and the emigration of the Bohemian and Moravian brethren strengthened still more the Slovakian reformed party, and the Bohemian language along with Bohemian books was established among them. Luther's reformation likewise found an entrance among the Slovaks—not only among the common people, but also among the nobility. But a Catholic reaction, which manifested itself as far back as the 16th century, gradually recovered its ascendancy, and though it could not entirely put down Protestantism, it spread among the larger part of the Slovaks. The efforts of the Hungarians to impose upon the Slovaks the Hungarian language about the end of the last century provoked a counter-movement on the part of the Slovaks, who defended their nationality and language against the encroachments of the Hungarians by developing a national literature of their own. Although the lot of the Slovaks under the stern rule of the Hungarians is not a very enviable one, still the national sentiment among them is so strong that the efforts of the Hungarians to keep them down and to denationalize them will prove vain.

**Slovak Version.**—The Slovak belongs to the Slavonic branch of the Aryan family of languages, and is spoken by the Slovaks, who live in the northwest of Hungary, and who are either Protestants or Roman Catholics. The former read the Bohemian Bible, and number about 500,000; the latter, whose number is 1,800,000, had only the dominical Gospels and epistles, published in their language at Buda in 1818–1822. In the year 1831 an entire Bible was

published for their benefit at Grau. The translation originally made by Bernolak was edited by Canon Georg Palkowicz, in two volumes. In the year 1883 the British and Foreign Bible Society published an edition of Palkowicz's New Testament, with approved and alternative readings in Roman characters, instead of the Gothic, as originally published by the editor. Up to March 31st, 1889, about 20,000 copies of the New Testament were disposed of.

**Slovenes.**—The Slovenes inhabit the districts of Carinthia, Kraina, Styria, and Istria in Austria, and number about one and one-third millions. They are classed among the South-eastern Slavs, and their language forms a branch of the South Slavic dialects. It bears a strong relationship to the Serbo-Croatian language, and in its lexicology has a great resemblance to the Bulgarian. The Slovenes belong to the Roman Catholic Church, with the exception of about 15,000 Protestants, and they all use the Latin alphabet, with some slight modifications, in their literature. The Slovenes settled in these parts of Europe in the 6th century; and about the end of the 8th they fell under the dominion of the Franks in the reign of Charles the Great. Their petty princes were allowed to rule over them as vassals of the Franks until, in the course of time, the country was entirely subjugated to German rulers, and ever since has formed a part of Austria. Christianity was introduced among the Slovenes in the 7th century by preachers who came to them from Aquileia (in Italy) and from Salzburg; but in the second half of the 8th century, and especially after the Frankish conquest of the country, the Catholic Archbishop of Salzburg, Virgilius (known as the apostle of the Slovenes), succeeded in establishing Catholic Christianity among the Slovenes through his German preachers. That the Slavic apostles Cyril and Methodius ever labored among the Slovenes is doubtful, still there are some very high authorities on the Slavic languages who claim that the language in which the original translation of the Scriptures was made by St. Cyril and Methodius was the language of the Slovenes, and not that of the Bulgarians. Hence they call it Palaeo-Slovenic in distinction from the Neo-Slovenic. The most ancient linguistic remains of this old Slovenic language are the so-called "Freisinger Extracts," found in an old Latin manuscript, and referred to the 9th century. Up to the 16th century the Slovenic language seems to have been almost lost, and to have been replaced by the Latin and German. This was due to the fact that literature was exclusively in the hands of the clergy. But when the Reformation found its way among the people a movement was made to bring to notice the vernacular of the people as a means of their enlightenment and instruction. Primus Truber (1508–1586) was the most active laborer for the spread of the new ideas among his people and for the elevation of the national idiom. He found many followers and adherents, and, thanks to his labors and theirs, a translation of the whole Bible, the first one in Slovenic, was published in 1584, the New Testament having been translated by Truber himself. Unfortunately this reformatory movement did not last long, and in the first half of the 17th century it was suppressed by a Catholic reaction, which violently raged against the

reformed party, banishing all those who refused to return to Catholicism, confiscating their property, and burning all the books and publications of Truber and his followers with such zeal that they are now seldom to be found. This persecution put a stop to all religious and literary progress among the Slovenes, so that all literary activity remained at a standstill till the end of the last century. The literature remained in the hands of the Catholic priests and the Jesuits. But in the general revival of the Slavic dialects and nationalities that began in the beginning of the present century the Slovenes also have begun to cultivate a national literature in their national tongue, and this movement has gone on increasing, especially since 1860.

**Slovenian Version**—The Slovenian is a language of the Slavonic family, and is spoken in Illyria. The first who published a translation of Matthew for the Protestant Slovenians was Canon Truber, Tübingen, 1555, and the New Testament in 1577. A complete Bible prepared by Georg Dalmatyn was published at Wittemberg 1584. A New Testament was also published by St. Kuzmicz, Halle, 1771, Presburg 1818. For the Catholic Slovenians, Thomas Krön, bishop of Graz, translated the dominical Gospels and Epistles (Graz 1612); Ludwig Schonleben (ibid. 1672, 1678); Paglowic (Laibach 1764); Marcus (ibid. 1777). A translation of the New Testament by Japel and Kumerdy was published at Laibach 1784-86, and a complete translation of the Bible in ten vols. was issued 1791-1804. None of these translations were regarded by the British and Foreign Bible Society as suitable for circulation. At last the Society succeeded in finding a suitable translator (1869), who translated the Gospels of Matthew and Mark into the Slovenian dialect, taking the original as his basis. As was to be expected, the publication of these Gospels awakened a violent opposition; but the success which attended their circulation encouraged the Bible Society to go on, and in 1882 the New Testament and the Psalms, translated and edited by Professor Stritar, was published for a million of Roman Catholics, among whom there is not a single Protestant community, or a single Protestant, except the Bible colporteurs. In 1888 the book of Isaiah, also translated by Professor Stritar, was published, Genesis having been issued in 1885. Up to March 31st, 1889, 72,650 portions of the Scriptures were disposed of.

(*Specimen verse.* John 3: 16.)

**Kajti** tako je Bog ljubil svet, da je sina svojega edinoorojenega dal, da kdorkoli veruje vanj, ne pogine, nego da ima večno življenje.

**Smith, Azariah**, b. Manlius, N. Y., U. S. A., February 16th, 1817; graduated at Yale College 1838. At the time of his conversion in college he became interested in missions, and decided to be a missionary. After graduating, he studied medicine at Geneva, N. Y., with Professor Spencer, attending six lectures daily. In 1839 he went to Philadelphia, where he had access to the Pennsylvania hospital and dispensary. In October of that year he entered the Divinity School, New Haven; received from the medical school connected with the college the degree of M.D. January 24th, 1840. He attended also lectures of the Law School on Black-

stone's Commentaries. He was ordained at Manlius August 30th, 1842, and embarked for Western Asia November 17th, as a missionary of the A. B. C. F. M. After residing a few months at Broosa and Constantinople, he went to Trebizond, spending five months in studying Turkish and practising medicine. In 1844 he visited Smyrna, Rhodes, Cyprus, and Beirut, and made a tour in the interior to Aleppo, Oorfa, Diarbekir, and Mosul. He travelled for a time with Mr. Layard. He was present at the death of Dr. Grant at Mosul. This year he made a dangerous tour in the mountain Nestorian districts of Koordistan. In 1845 he travelled extensively, after visiting Constantinople, including a visit to Trebizond and Erzeroom, remaining a year and a half. He was attacked by robbers for affording protection to an Armenian priest who had fled to his house; but by his courage and perseverance the offenders were punished, and damages recovered from the Turkish Government. His travels were extensive, and he often took long journeys to prescribe for cholera patients at different missionary stations. "Dwight's cholera mixture," widely used in the United States in 1849 for the cholera, was his preparation. Once he was attacked with the disease in the wilderness, his attendant forsaking him through fear; but after two days of suffering he recovered so as to proceed on his journey. On account of his peculiar adaptation to different fields, he labored for longer or shorter periods in many places; but Aintab, to which he was sent in 1848, and which he made his missionary home, he loved most of all. There he had seen the most wonderful displays of divine grace, and there he wished to close his earthly career. He returned to America in 1848, was married, and went back to his field. Dr. Smith was a thorough scholar. He published valuable papers on meteorology, Syrian antiquities, and natural history in the "American Journal of Science." He died June 3d, 1851, at Aintab.

**Smith, Eli**, b. Northford, Conn., U. S. A., September 13th, 1801; graduated at Yale College 1821; taught in Putnam, Georgia, for two years; graduated at Andover Theological Seminary 1826; ordained May 10th same year; left for Malta under appointment of the A. B. C. F. M., May 23d, 1826, as superintendent of a missionary printing establishment. In 1827 he went to Beirut to study Arabic. The missionaries being obliged to leave Syria on the general outbreak of the war after the battle of Navarino, Mr. Smith in 1828 returned to Malta. He was subsequently transferred to the Syrian mission; travelled through Greece in 1829 with Rev. Dr. Anderson, and with Rev. H. G. O. Dwight 1830-31 in Armenia, Georgia, and North Persia, thus opening the way for the establishment of the Nestorian Mission at Oroomiah. Returning to the United States in 1832 he published "Missionary Researches in Armenia" (2 vols., Boston, 1833), also a small volume of "Missionary Sermons and Addresses." In 1833 he embarked for Syria, accompanied by Mrs. Smith, formerly Sarah Lanman Huntington, whose brief but bright missionary career of only three years was terminated by her death at Smyrna, September 30th, 1836. In 1836 Mr. Smith was wrecked on the coast of Asia Minor. In 1837-38 and 1852 he was the companion and coadjutor of Prof. E. Robinson in

his extensive explorations of Palestine. "By his experience as an Oriental traveller, his tact in eliciting information, and his intimate knowledge of Arabic he contributed largely to the accuracy, variety, and value of the discoveries of Biblical Geography recorded in Dr. Robinson's celebrated 'Researches.'" In 1838 he again visited the United States. In passing through Europe he prosecuted inquiries concerning Arabic topography, and other details necessary to render the printing establishment as complete as possible. During this visit he travelled extensively in the United States, speaking and preaching to great acceptance. He returned to Beirut with his second wife, who died in a year. His health being greatly impaired, he made his last visit to the United States in 1845. With health restored he re-embarked for Syria in 1847. He now devoted himself in earnest to the work of preparing a new translation of the Bible into Arabic, to which he had made all his plans subservient. Intending originally to be connected with the press, he was led to pursue the study of Arabic and kindred languages. Among his qualifications for a translator as well as editor was his ripe scholarship. His learning was extensive and accurate. To the ancient classics he added an acquaintance with French, Italian, German, and Turkish. With the Hebrew he was very familiar, and the Arabic, the most difficult of all, was to him a second vernacular. Not only did his learning fit him for the difficult office of editor, but by long practice and close attention to the business of printing in all its branches he acquired an unusual skill in managing the minutest details. He not only wrote himself for the Arabic press, but devoted much time and labor to correcting and properly editing works written or translated by others. For many years he carefully read the proof-sheets of nearly everything that went through the mission press. He spent also much time and intense labor in superintending the cutting, casting, and perfecting of various fonts of new type made from models which he had himself drawn with the utmost accuracy. This work was done at Leipsic in the celebrated establishment of Tauchnitz. After eight years of incessant toil he completed the translation of the New Testament, the Pentateuch, the Minor Prophets from Hosea to Nahum, and the greater part of Isaiah. The degree of D.D. was conferred upon him by Williams College in 1850. With all his qualifications for the literary department, and his devotion to the work of translating, Dr. Smith was still a missionary of Christ, entering with his whole heart into all plans for the spread of divine truth. "By diligent effort he early became a fluent speaker in the vernacular, and ever after it was his delight to preach the gospel in the family, by the wayside, and in public assemblies." He had a strong desire to recover, and had prayed often and earnestly that he might be spared to complete the translation of the Bible. But God's plans, he said, were best, and he was grateful that he had been allowed to labor thirty years as a foreign missionary. His death was very peaceful. He died at Beirut, January 11th, 1857.

His work was taken up by his associate, Rev. C. V. A. Van Dyck, D. D., and carried to its completion on the basis furnished by Dr. Smith, and the Arabic Bible is to-day one of the finest

of monuments to missionary scholarship (see article Arabic Version).

**Smithfield**, a town in Orange Free State, Southeast Africa, north of Bapatli, northwest of Aliwal, North. Mission station of the Paris Evangelical Society; 1 missionary, 100 communicants, 30 scholars.

**Smyrna** (Turkish, Ismir), a city of Turkey, at the head of the Gulf of Smyrna, about 200 miles southwest of Constantinople. Population about 150,000, of whom a little more than half are Turks and the remainder Greeks (40,000), Armenians (10,000), Jews (15,000), and Europeans. The climate is hot and trying, the summer being very oppressive. The general appearance of the city from the sea and also from the Acropolis is very attractive, many of the houses, especially in the Christian quarters and along the quay, being of stone, and well built. As a business centre Smyrna has grown rapidly in importance, especially since the establishment of two lines of railway connecting it with the interior of Asia Minor. European customs and influence have also been largely predominant, and the intimate connection of the large Greek population with Greece and the islands of the Ægean, has helped to make it a centre of far greater commercial activity even than Constantinople. It has also derived considerable importance from the fact that it is the only Turkish city where the fleets of Europe and America can visit, and during the cooler months there is seldom a time when one or more war-ships are not anchored in the roadstead.

As a station for missionary work Smyrna has been prominent from the earliest times. The interest of its name as the home of Polycarp, and the only remaining one of the Seven Churches addressed by the Apostle John, naturally drew attention to it; but even more was probably due to the fact that at the commencement of the present century it was the only city of Turkey that was really open to missionaries, and with which there was direct communication from European and American seaports. The British and Foreign Bible Society (q.v.) early established an agent here, and the first missionaries of the A. B. C. F. M. to the Levant were located here (see A. B. C. F. M. and Armenia).

At present the missionary work is carried on among the Greeks and Armenians by the Western Turkey Mission of the A. B. C. F. M., with 3 ordained missionaries and their wives and 4 female missionaries. There are 9 out-stations, 28 native helpers, 3 churches, and 162 church-members. There is a large and successful girls' boarding-school and a kindergarten establishment.

Work among the Jews is carried on principally by the Established Church of Scotland, with 1 ordained and 1 medical missionary, 1 female missionary, 2 schools, 1,828 scholars (1,040 Jews, 698 Greeks, etc., 90 British); 220 communicants (18 Jews, 167 British, 35 Greeks, etc.).

The London Society for the Promotion of Christianity among the Jews also have a missionary and 2 colporteurs.

The Smyrna Rest is an establishment managed by some English ladies, though started by Miss Maria A. West, for many years a missionary of the A. B. C. F. M. in Con-

stantinople and Harpoot. Its prime object is to reach the sailors of different nationalities that throng the port of Smyrna, and are easily led astray by the liquor-saloons, that are very numerous. A central and commodious room was hired and fitted up as a café and reading-room. Coffee, tea, chocolate, etc., with other light refreshments, were served; reading-matter was supplied in the form of newspapers and periodicals; and in the evening there was a gospel service, in which singing held a prominent place. Later on another room also was hired for Sabbath services. An English sailor was engaged to go among the seamen, and every steamer and sailing-vessel was visited for the purpose of inviting the sailors to "The Rest." While attention was especially given to the sailors, work was done for all, and the numbers of all nationalities and every condition who were reached was very large.

One of the most interesting developments of missionary work has been the formation and the growth of the Greek Evangelical Alliance. It originated in the effort of Rev. Geo. Constantine, D.D., a native Greek, educated in America, to place the work among the Greeks on a firm basis of self-support. For many years work for that people had seemed almost hopeless. The Greek spirit seemed antagonistic to Protestantism, and hostile to any reform in the church itself. The distractions of a seaport also proved great obstacles, and there seemed no way of reaching the people. Dr. Constantine commenced a series of sermons in the hall connected with "The Rest," and by his eloquence drew large crowds. A profound impression was made, and the hierarchy saw that they were in danger of losing their power. The volatile nature of the Greeks rendered it easy to stir a tumult. Threats were uttered, stones were thrown at the windows of the hall, and on one Sunday a mob attacked the place, seeking especially for Dr. Constantine. Not finding him, they turned and went to his house, which they assaulted. Mrs. Constantine, a lovely American lady in feeble health, succeeded in drawing the bolt to the iron door, and the mob was forced to content itself with what damage it could effect from the street. So great was the shock to Mrs. Constantine that she never recovered from it, but a few months later died, undoubtedly from the effects of the nervous strain at that time.

The priests soon saw that they had overdone the thing. The American consul took prompt measures, and the result was a greater interest in Christian life than at any time before. The Alliance grew until it has become a most potent influence, not only in Smyrna, but in many other Greek communities of Asia Minor. (See article A. B. C. F. M., Western Turkey Mission.)

**Snow, Benjamin Galen**, b. Brewer Maine, U. S. A., October 4th, 1817; graduated at Bowdoin College 1846, and Bangor Theological Seminary 1849; ordained September 25th, 1851, and sailed November 18th, 1851, a missionary of the A. B. C. F. M., for Micronesia. He was stationed at Kusaie and Ebon. From failure of health he returned home in 1868, re-embarked in 1871. In 1877 his health again failed, and he returned to the United States. "Among a people sunk in the lowest

degradation, isolated from the world, long dependent for all communication with home friends on the yearly visit of the 'Morning Star,' he began and carried forth his work with unshaken faith in the promises of God. He lived to see Christian communities established on islands that had been the habitations of cruelty, to see men that had been the dread of the hapless mariners cast away on the coral reefs that girded their island-homes, the humble followers of Christ." He died at Brewer, Me., May 1st, 1880.

**Society for Promoting Christian Knowledge.** Headquarters: Northumberland Avenue, London, W. C., England.—This Society is the oldest organization for Christian work of the Church of England. It was founded in 1698, and has since carried on its work in ever-widening spheres of activity, and with ever-increasing expenditure of funds. Its history has not been furnished us, and the meagre facts which can be gained from its report must suffice instead of the lengthy notice which is its due both on account of its age and its widespread usefulness.

**Organization.**—The Society is composed of persons who must of necessity be members of the Church of England or some church in full communion with it. New members are received on recommendation of the existing members, after which they are elected, and on payment of a certain annual sum are entitled to full privileges. Persons who make subscriptions are entitled to some privileges in the form of receiving books and tracts; thus the Society is a close, self-perpetuating organization, with intimate connection with the Church of England, though apparently responsible to no one except its own elected authorities.

**Officers.**—Her Majesty, the Queen of England, is the patron of the Society. The Archbishop of Canterbury is the president, and there are numerous vice-presidents, comprising mainly the other archbishops and bishops of the Church of England, together with like dignitaries of any church in full communion with the Church of England, who may be members of the Society. There are four treasurers, two general secretaries, and two who are designated organizing secretaries. A general committee of administration called the Standing Committee, is assisted by special committees, such as the Committee of Finance, of Foreign Translation, of General Literature, the Tract Committee, etc.

Under one broad comprehensive title, the Society combines the work of many departments, each of which might well be the work of a single society. In its endeavor to aid Christian work of any kind throughout the world, it is:

1. **THE BIBLE AND PRAYER-BOOK SOCIETY OF THE CHURCH OF ENGLAND.**—In this branch of the work is included the producing and circulating of these books or portions of them not only in England but throughout the world. The publication is in seventy-five or more different languages. By grants of money or books; by supplying these publications at cost or less; by assisting translation and publication committees in various foreign lands, the work is carried on, and during the year 1889-90 over 600,000 books or portions have been circulated.

2. **A TRACT AND PURE LITERATURE SOCIETY.**

—It produces and circulates distinctively religious works, together with works by able writers, on science, history, and general literature, including fiction of a pure and elevating character. In connection with this branch of the work, grants of books are made to churches, reading-rooms, missions of every kind, deserving seamen, sailors, etc.

**3. A HOME CHURCH MISSION AND EDUCATION SOCIETY.**—In addition to the general Home Missionary work carried on along the lines already mentioned, there are the following distinctive objects of its care:

(a) A college (St. Katherine's) at Tottenham, England, where school-mistresses are trained. It has a capacity for 100, with the highest records for any such institution in England. (b) A training college for lay-workers was founded and is maintained in the east of London. (c) Money is given towards the building and fitting up of church institutes, and the building and renting of Sunday-schools, together with other purposes in connection with church education, such as the providing of lecturers on church history, the preparation of lectures and magic-lantern slides, to be rented out at low rates to churches or districts desiring such means of educating the masses, and many other plans along the same general lines.

**4. A FOREIGN AND COLONIAL MISSIONARY SOCIETY.**—This work is accomplished in various particular ways:

(a) Churches, chapels, mission-rooms are built or aided in being built in the dioceses of the church the world over. Over £7,000 were granted for this work during the year 1889-90. (b) Native clergy and lay mission agents are taken under its care and trained for their future work. During the year 26 such students were in training for holy orders, and 68 for lay work. (c) Medical missions are maintained or established, and medical missionaries, both men and women, are trained for the work. The sum expended for this purpose during the year was £500. (d) Bishops and clergy are endowed. For this object £500 were spent during the year. (e) As mentioned above, Bible translation and other work of similar character has been aided, and books of many varieties have been donated or the work of publication assisted. In connection with this work, the Translation Committee is assisted by vernacular sub-committees in Madras (Tamil and Telugu), Punjab, Sind, Bombay, and Calcutta. Depots for the Society's publications have been established at 25 places on the continent of Europe.

**5. EMIGRANTS' SPIRITUAL AID SOCIETY.**—An important and in some respects unique feature of the work of the Society is the care which it exercises over the many emigrants who annually leave the shores of Great Britain for other lands. These emigrants are watched over both spiritually and temporally in the following ways:

Chaplains attend them on their departure, and letters are given to the Society's representatives in foreign lands who meet the emigrants on their arrival, often give them substantial aid in locating in their new homes, besides protecting them from the wiles of those who are ready to take advantage of their ignorance and strangeness. In many cases chaplains are deputed to accompany a shipload of emigrants, and a matron is sent to look after the single women. During the voyage—a long one when

Australia, New Zealand, or South America is the objective point—the gospel is preached, church ordinances are administered, and the weary days whiled away by lectures which deal with the country of their destination, in regard to which many of the emigrants are sadly ignorant. At the principal cities, especially the ports of the United States, the Society has its representatives, who meet the emigrants on arrival whether they bear letters of recommendation or not; and in Canada, Tasmania, Australia, South Africa, South America, and New Zealand the emigrant receives like attention.

These, briefly stated, are the various branches of the important work of the Society. During the year 1889-90 the total value of the grants made to these various objects, partly in books, was £42,397. To meet this expenditure, the Society depends on its annual subscriptions, on donations, and legacies, from all of which sources its income during the year mentioned amounted to £44,215.

**Society for the Propagation of the Gospel in Foreign Parts.** Headquarters, Society's Office, 19 Delahay Street, Westminster, London, England.—The Society for the Propagation of the Gospel in Foreign Parts received its first charter in 1701 from King William III., upon application of Archbishop Tenison, one of a committee appointed by the Lower House of the Convocation of Canterbury to consider what was to be done for "The Promotion of the Christian Religion in the Plantations and Colonies beyond the Seas." The Society, as incorporated by the king, consisted of ninety-six members, the charter providing that the two Archbishops of Canterbury and York, the Bishops of London and Ely, the Lord Almoner, the Deans of St. Paul's and of Westminster, the Archdeacon of London, and the two Regius and the two Margaret Professors of Divinity at Oxford and Cambridge should always belong to the Society, which was founded for the "receiving, managing, and dispensing of funds contributed for the religious instruction of the queen's subjects beyond the seas; for the maintenance of clergymen in the plantations, colonies, and factories of Great Britain, and for the propagation of the gospel in those parts." Work was commenced at once among settlements of English people engaged in trade in Moscow and Archangel, and was rapidly extended to North America, the West Indies, and other colonies; but the Society did not become a distinctly missionary agency until 1821.

INDIA had been opened to the gospel in 1813, and in 1818 the S. P. G. undertook the foundation of a Missionary College at Calcutta. Its funds being pledged to colonial missions already existing, vigorous efforts were made to increase its income, and a memorial was addressed to the Prince Regent, praying that a royal letter, authorizing a general collection, might as, in former times, be issued. The proceeds from this letter, amounting to £45,747, were devoted to the Missionary College, which was designed to meet not only the present wants of the mission, but also all the requirements of a growing church. The plan combined chapel, hall, library, and printing-press; and instruction was to be given in the principal languages and dialects of India, as well as in the sacred and classical languages. The original object of the college was the education of native East Indian

and European young men for the service of the church; but some years after its foundation it was enlarged for the reception of law-students. The practical working of the college was in many respects unsatisfactory; nevertheless, within a few years missions, in charge of the college graduates, were established in some of the larger villages south of Calcutta. Among the first were Tollygunge, Howrah, and Barripur. These missions, before many years had passed, extended over an area of 40 miles north to south, by from 12 to 20 east to west, embracing 113 villages, with 26 chapels and 7 schools. The college is regarded as the key of missions of Bengal, and the present reports show that after a long series of disappointments and failures it is at last fulfilling the purposes for which Bishop Middleton (first Bishop of Calcutta) founded it. It is not only doing its proper work by training and sending forth students representing eight distinct races, but has evidently become the centre of the Christian education of Bengal, and also of such evangelistic work as is being carried on in its immediate locality.

In 1841 a mission was commenced at Cawnpur, and in 1852 the Delhi Mission was established; both suffered severely in the Mutiny in 1857, and the latter was entirely swept away, but was recommenced in 1860, and in 1877 was given fresh life by an organized effort of the University of Cambridge to maintain a body of men who should live and labor together in some Indian city. Delhi was chosen for this venture, the S. P. G. becoming responsible for the larger part of the maintenance of the Cambridge contingent. In 1869 the Chutia Nagpur Mission of Pastor Gossner was transferred, with its 17,000 Kol converts, to the S. P. G. The district within the sphere of this mission comprised 300 villages, divided into 35 circles, in each of which a reader was placed, who read prayers, instructed inquirers, and was visited periodically by the chief missionary.

In 1826 the work which had hitherto been carried on in Madras by the Christian Knowledge Society, was undertaken by the S. P. G., which in 1835 constituted Madras a bishopric, comprising three circles—(1) Madras itself, with a few isolated stations and the missions in the Telugu country and Hyderabad; (2) Tanjore and Trichinopoly, including the various stations connected with them, together with Cuddalore; and (3) Tinneveli and Ramnad.

The connection of the Society with Bombay (1836) was until recent years very slight. In 1869, when Bishop Douglas arrived at Bombay, he found that the entire missionary staff was laboring in the city itself and its immediate neighborhood. He proposed to commence a chain of mission stations, of which Poona, Kolhapur, and Ahmadnagar should be the chief. This plan was carried out, and the work has become so great that "Ahmadnagar itself could absorb all the S. P. G. staff in the diocese."

Burma was entered in 1859; the See of Rangoon now includes work in (1) the city of Rangoon, with St. John's College (which has 636 scholars), and the training institution at Kemmendine; (2) the general work of the missionaries at Moulmein, with a considerable Tamil Mission; (3) Toungoo, among the Karens; and (4) in Upper Burma, at Mandalay and Shweybo. The work in Burma has always been largely educational, but among the Karens is also distinctly evangelistic.

The Society commenced work in Ceylon in 1838, and late reports from Colombo speak of great missionary activity, which has roused the Buddhist priests from their usual lethargy into violent opposition.

The work of the diocese of Singapore, Sarawak, and Labuan falls into several divisions; Singapore itself, the care of English congregations, and the heathen in the scattered portions of the Straits Settlements; and the missions in Borneo, including new work in the territory of the North Borneo Company.

**JAPAN.**—The mission to Japan was commenced in 1873, and the North China Mission in 1874: in the former the missionary force has been increased from two to six, and from Osaka, Tokyo, and Kumamoto the work is progressing with encouraging rapidity. In China, work is carried on in Chefoo, Peking, and Yui g Chang, and a mission to Korea was undertaken in 1889.

**AFRICA.**—The work of the S. P. G. in South Africa has begun in 1820, when a chaplain was sent to Cape Town: it now comprises the dioceses of Cape Town, Graham's Town, St. John's, Zululand, Maritzburg, Bloemfontein, Pretoria, and St. Helena. In addition to pastoral labors for English colonists, much missionary work is carried on among the native tribes, and the Kafir and other converts are now numbered by thousands, and the foundation is laid of a native ministry fund supported entirely by themselves. Much attention is given to school and industrial work in the South African stations, and five branches of industry are regularly taught; in the boys' department, carpentry, wagon-making, blacksmithing, tinsmithing, and gardening, while the girls are instructed in the usual branches of household work. The Bishop of St. John's has asked permission of the Society to begin work in Pondoland, occupying one quarter of his diocese, but quite unevangelized. The Pondowise are the least civilized of the native races, and all work hitherto attempted among them has been unsuccessful. The diocese of Mauritius includes not only that island, but its many small dependencies, embracing Diego, Garcia, Rodrigues, the Seychelles Archipelago, and many small islands of the Indian Ocean. The population of these islands is about 376,000, of whom a large proportion are creoles, coolies from India, and children of liberated slaves.

The S. P. G. commenced work in Madagascar in 1864, and obtained the consecration of a bishop to lead the missions in 1874. The present reports show reasons for encouragement in the various stations. The West Indian Mission to the Pongas (on the western coast of Africa, has for several years been assisted by the S. P. G.

**AUSTRALIA**, entered in 1795, shows the result of the Society's labors in twelve dioceses, ten of which are now independent of aid, and are co-operating with the S. P. G. in opening a mission to New Guinea.

**THE NEW ZEALAND MISSION** was commenced in 1837. The single See of New Zealand has now grown into six, all of which are independent of England.

From 1853 until 1880 the Society contributed annually to the Melanesian Mission, and upon the death of Bishop Patteson raised £7,000 for the perpetuation of his memory. This sum was devoted to the erection of a memorial church on Norfolk Island, to the building of

the missionary ship, the "Southern Cross," and to the endowment of the mission.

The S. P. G. now assists in the maintenance of clergymen in Fiji, in Norfolk Island, and in the Sandwich Islands.

**Society or Tahiti Islands** are a group in the South Pacific, between latitude 16° and 18° south, and longitude 148° to 155° west. There are 13 islands and several small islets, divided by a channel, 60 miles wide, into two groups, originally called the Georgian Islands and the Society Islands. The principal islands are Tahiti, Moorea or Eimeo, Titiaroa, Meetia, Raratea, Tubuai, Moru, Huahine, Tahaa, and Bora-Bora. Tahiti, by far the largest of these islands, has an area of 412 square miles. Moorea has 50 square miles. The general physical characteristics are the same for nearly every one of the group. There is a mountainous interior, with low, rich plains sloping down to the coast. Coral reefs surround them. The water-supply is abundant, tropical fruits and vegetables grow in great abundance, and a salubrious, temperate climate is universal. The natives belong to the Malay race, and resemble the Marquesans and Rarotongans in appearance, but differ greatly from them in their customs. The dialect is one of the softest languages in Oceania. Agriculture is in a rather backward state, except in Tahiti and Moorea, where 7,000 acres are under cultivation, producing cotton, sugar, and coffee. The population of Tahiti is 11,200, of Moorea 1,600, with perhaps 12,000 inhabitants in all the other islands. The chief town and port is Papeete, in Tahiti.

The Society Islands, together with the Marquesas, Tuamotu, Gambier, Tubuai, the island of Rapa, the Wallis or Uea, and Howe Islands, form what is called the French Establishment in Oceania, under the control of a Commandant-General, who resides in Tahiti. Tahiti was taken possession of in 1844, and the various other islands were gradually encroached upon by the French, until in 1880 they became French possessions.

*Missions in the Society Islands.*—In 1797 the L. M. S. sent out its missionary ship "Duff," and the missionaries arrived at Tahiti in March of that year. From that time until the French occupation in 1844 great success attended the labors of the missionaries, whose influence over the converted islanders was exerted for their best temporal and spiritual good. In 1818, the anniversary of the L. M. S., the Christian king Pomare originated and formed a Tahitian Missionary Society. In 1839, just previous to the introduction of the French Protectorate, the following testimony to the good effects of missionary labor was given by the captain of a whaling vessel: "This is the most civilized place that I have been at in the South Seas. It is governed by a dignified young lady, about 25 years of age. They have a good code of laws, and no liquors are allowed to be landed on the island. It is one of the most gratifying sights the eye can witness on a Sunday to see in their church, which holds about 5,000, the queen, near the pulpit, with all her subjects around her, decently apparelled, and in seemingly pure devotion." With the institution of the French Protectorate the floodgates of iniquity were opened. The people were corrupted by the combined influence of rum-sellers and other

foreigners. The L. M. S. Mission was embarrassed and broken up, and withdrew from Tahiti and Moorea in 1852. At that time there were 1870 church-members in those two islands. Huahine was first reached by the missionaries in 1808, and the history of the mission there is similar to that of Tahiti and Moorea. The islands were practically Christianized, missionary societies were organized, and in 1852 there were 962 church-members in Huahine, Raratea, Bora-Bora, and Maupiti. Since the French occupation of the islands the work in Tahiti and Moorea has been under the care of the Paris Evangelical Society, which has continued the good work done by the L. M. S. in the face of two great difficulties—"the traffic in liquors and the Romish Propaganda" (Report of 1889). The report of 1889 states that their parishioners show profound attachment to the Word of God, there is a general celebration of the Sabbath, and a practice of liberal Christianity. Tahiti is divided into two sections—North and South. In the former, which includes the town of Papeete, there are nine other missionary stations, which are under the care of a native pastor, with 1,063 communicants and over a thousand scholars. In the southern division are Mutia and seven other stations, each with a native pastor, with 600 church-members and about 500 school-children, all under the supervision of three European missionaries, two residing at Papeete and one at Mutia. In Moorea there are 4 stations, with 1 missionary, 3 native pastors, 360 church-members, and 300 school-children. A missionary was sent out in 1888 to Raratea to take the place of the sole remaining missionary of the L. M. S., who died before his successor arrived. The people of that island, however, have utterly refused to have anything to do with a French missionary, and the people of Huahine seem determined to resist the French and to provoke a conflict. The missionary of the L. M. S. remained on Huahine during 1889 to prevent, if possible, the utter wreck of Christian work, until the Christians were ready to accept the new condition of things. Bora-Bora and Maupiti have each one native ordained pastor under the L. M. S.

**Sohagpur**, a town in Central Provinces, India, on the high-road from Bombay, 80 miles east of Hoshangabad, 72 miles east northeast of Mandla. It is a station on the Great Indian Peninsula Railroad, but is a place of small importance, commercially or generally. Population, 7,027, Hindus, Moslems, Kabirpanthis, Christians, Jains, Parsis, non-Hindu aborigines. Mission station of Friends' Foreign Missionary Society; 1 missionary and wife, 30 scholars.

**Solomon Islands**, a group in the South Pacific, consisting of a double chain extending from northwest to southeast, between 5° and 10° 54' south latitude, and 154° 40' and 162° 30' east longitude. They were first discovered in 1567, but as yet have not been explored to any great extent. Since 1886 the northerly part of the group, including the islands of Bougainville, Choiseul, Isabel or Mahaga, together with various smaller islands, with a total area of 57,000 square miles, has been seized by Germany. The population of this part is estimated at 80,000. The principal other islands are San Christoval, Guadalcanal, and Malanta. The climate is damp; unhealthy on the coasts, though the highlands are probably more salubrious.

The natives belong to the Melanesian race, and the language is of Melanesian type, with many dialects. Of their religion, habits, and customs little is known, though they resemble the other Melanesians in most things, and are known to be cannibals to some extent. Mission work is carried on in these islands by the Melanesian Mission (q. v.).

**Somerset, East**, a town in Cape Colony, Africa, 80 miles northwest of Grahamstown. Population, 2,231. Mission station of the United Presbyterian Church of Scotland (1869); 1 missionary, 6 out-stations, 102 church-members, 66 Sabbath scholars.

**Somerville**, a town in East Griqualand, Transkei, South Africa, 30 miles from Umlata. Climate, sub-tropical. Population, Kafirs, Fingoes, Pondomisis, and Gunbus. Language, Bantu and Kafir. Religion, fetichism and heathen superstitions. Mission station of the Free Church of Scotland (1884); 1 missionary and wife, 30 native helpers, 14 out-stations, 1 church, 317 church-members, 6 schools.

**Sonapur**, a town in India, in the Bombay district, not far from Dapoli. Race, Maratha. Mission station of the S. P. G.; 1 missionary, 2 schools, 119 scholars, 57 church-members.

**Sonora**, a large town in Hermosillo, north-west Mexico. Climate, tropical. Population, 10,000, Mexicans, Indians. Language, Spanish. Religion, Roman Catholic. Natives degraded, poor. Mission station of the A. B. C. F. M. (1886); 1 missionary and wife, 3 out-stations, 1 church, 15 church-members, 1 school, 12 scholars.

### **Soudan, Historical Sketch of.**—

Taken in its broader dimensions, or as spoken of by the Arabs and earlier European geographers, together with the additions claimed by Egyptian rulers in late years, Beled-es-Soudan, or the "Country of the Blacks," extends from west to east along the southern border of the Great Desert, from the Atlantic and Senegambia to the Red Sea and Abyssinia, and southward from the Desert to Upper Guinea on the west, and to the equatorial and lake regions on the east, being some 3,500 miles in length from west to east, and in its broader parts on the east some 1,600 in width, and comprising a population estimated at 50,000,000. It is thus almost a fourth of Africa, both in extent of country and in the number of its inhabitants. But Eastern or Egyptian Soudan, to which the eyes of the world have been chiefly turned the last few years, and which will attract yet greater attention in the near future, lies along each side of the Nile from Assouan or the first cataract to the equator, and, according to some, even beyond, some 1,600 miles or more from north to south, while its width, from Massowah on the Red Sea to the western limits of Darfur, is from twelve to fourteen hundred miles. It thus comprises the provinces of Nubia, Dongola, Sennaar, Kordofan, Darfur, the districts watered by the Bahr-el Ghazelle and the Bahr-el-Arab, the lands of the Dinka, Shilluk, and of others in the Lake region on the equator. The extensive additions which the distinguished viceroy of Egypt, Mehemet Ali, made, more than half a century since, included all the country on the Blue and White Niles, for great distances east and west of them, and

for several degrees south of the equator; and in after-years his grandson, Ismail, the first Khedive of Egypt, claimed that he had a right to extend his borders as far as the Juba River on the Indian Ocean. Khartoum, the capital of this vast region, is situated at the junction of the two Niles, Blue and White; and Suakim, on the Red Sea, is its chief seaport.

This section of Africa is chiefly inhabited by two distinct races. From the eleventh degree of latitude northward, the people are almost wholly Arab in their origin. They are chiefly nomads, and are professedly Mohammedan. Being exceedingly emotional and superstitious, they have the greatest regard for their fakirs or spiritual guides, ascribe to them a kind of supernatural power, and venerate them almost more than they do the Prophet himself. The country south of the eleventh degree of latitude is peopled by Negroes, chiefly of a sedentary and agricultural mode of life, who, while classed as Mohammedans, are in reality pagans. The mingling of Arab and Negro blood has produced a third hybrid, Arab-speaking, class, who are found in the more fertile parts of the Soudan, especially in Darfur. A small yet very distinct race, said to have descended from the ancient Nubians, is found in the northern province of Darsola; and between the Nile and the Red Sea, not far from Suakim, there is still another distinct and ancient tribe, who speak a language of their own.

Until the middle of the 7th century the present Soudan was under native rule, while Egypt was under the rule of the Romans. But in 638 the Saracens, led by the famous warrior Amrou, one of the generals of the caliph Omar, began to invade Egypt, and soon subjugated it. The Copts agreed to pay tribute to the Caliph, and the whole of Egypt as far south as Syene, the present Assouan, was made a province of the caliphate. For about five hundred years Egypt suffered from a frequent change of dynasty, until the reign of the heroic Sultan, Saladin, a Koord in origin, under whose vigorous rule she became in 1173 an independent empire. In 1250 the government was seized by the Mamelukes, who were brought from Turkey, Tartary, and Circassia as slaves, and were made soldiers, and some of them advanced to office in the state. They continued in power till 1517, when Selim I., Sultan of the Turks, overthrew the Mameluke dynasty, and reduced the country to a Turkish province under the rule of a pasha. The Mamelukes were still turbulent, and were not completely subdued till 1798, when the French conquered the country under the pretence of freeing it from the cruel Mameluke yoke. The English then came to the aid of the Turk, 1801, expelled the French, and restored the pasha appointed by the Sultan.

At this time Mehemet Ali, a poor fisherman of Greek descent, a shrewd and active leader, who, with a band of followers, had aided the English and Turks in expelling the French, succeeded in securing the appointment from the Porte, in 1806, as viceroy of Egypt. He proved himself to be a general, a statesman, and a man of affairs, and met with great success for many years. Finding the Mamelukes, whom he had used as a stepping-stone to power, a hindrance to his rule and a plague to the country, he massacred great numbers of them in 1811; others escaped and fled to New Dongola,

but they were followed and finally exterminated in 1820. Mehemet then made himself master of Upper Egypt, and by him the Egypt of to-day was virtually founded. By his great genius and diplomacy he eventually obtained power in perpetuity, shook the throne of the Sublime Porte, and wrested from the Sultan the highest dignity ever conferred on a subject—the dominion of a practically independent empire. His rule extended from the Mediterranean to the equator, and hereditary succession was established forever, according to Mohammedan law, in the eldest of his blood. But success did not always attend his plans, and the expedition which he sent into Nubia and Sennaar, 1821, to take military possession of those provinces, ended in the murder of the leader, Ismail Pasha, his youngest son. Ahmet Bey, whom Mehemet had sent to take possession of Kordofan and other Soudan provinces, hastened to avenge the death of Ismail, and put thousands of the people to the sword and applied the torch to their villages.

Mehemet Ali was succeeded by his son Ibrahim, then by his grandson Abbas Pasha, then by his son Saïd Pasha, and then, in 1863, by his grandson Ismail, son of Ibrahim. Ismail was the fifth viceroy of Egypt. In 1867 the Sultan bestowed upon him the title of Highness and Khedive, with important additions to his authority. In 1868-9 the Khedive enlarged his army, extended his sway southward over regions which Mehemet Ali had nominally taken, so as to recover and include the Upper and White Nile together with the Equatorial and Lake provinces. In 1874 he pushed his victories into the Darfur regions. But in levying enormous taxes upon the people he laid the train for revolt; and by borrowing vast amounts of money from the English and other Europeans both he and the nation became bankrupt, and were completely in the power of bondholding foreigners under a debt of \$500,000,000; though it is said that not more than half of this amount was ever received by Egypt. The interest on these loans, the annual tribute of \$3,600,000 to Turkey, together with all the running expenses of the land, which were now enormous, made Egypt and her Soudan territories the worst taxed country in the world, while the income thus derived was still inadequate to the heavy demands upon it. England and France were jealous of the interests of their bondholders, and England felt the supreme importance of keeping open her communications with India. They thus compelled the Khedive to receive foreign officials to supervise the revenue and look after foreign claims. Numerous other officials from England and France were appointed, at most extravagant salaries, to fill places from which natives were turned out. The growing arrogance of the foreigners increased the discontent of the cruelly taxed people, till at length the masses, including the Arabs and the ill-paid army, united into a "national party." The Khedive, under pressure of foreign influence, was compelled in 1879 to abdicate in favor of his son, Tewfik Pasha, who was generally looked upon as a mere creature of the foreign bondholding interest. The people, still cruelly taxed, began to resent the administration by foreigners, and the appropriation of much of the national income to pay interest on loans which had been made to Ismail, an utter spendthrift, for his personal benefit.

This resentment became so common and strong that Tewfik was compelled to appoint one of its foremost representatives, Arabi Pasha, as his minister of war. Arabi was an army officer and the head of the nationalist party, with the training received when he was practically at the head of the government. He was resolved to overthrow European influence, peaceably if possible, yet by arms if necessary. As minister of war, when he found a British fleet menacing Alexandria, he began to strengthen the forts which commanded the harbor; and his refusal to cease work on these forts was the nominal occasion of the bombardment which soon followed. The English had seen that Tewfik, who had been faithful to them, was in danger; his authority was gone; and deeming it necessary that he should be re-established as their ally, their ironclads appeared at Alexandria in spite of the Sultan's protest. The city was bombarded and burnt, June 11th, 1882, and thousands of Egyptians were killed. Meanwhile Tewfik, the nominal head of the government, had hidden himself in the palace at Ramleh.

The problem that confronted the English was a gigantic one and involved many conflicting elements. The other great powers would be jealous of a permanent occupation. The people of Egypt distrusted and disliked the Khedive, while they hated the foreigners. Thus it seemed utterly impossible to institute any system of government which should be strong and lasting, and yet satisfy Europe while securing England a predominant power. In the mean time a vigorous insurrection broke out in Soudan, where the turbulent people resented Egyptian oppression, as the Egyptians resented English interference. With all the fire of religious fanaticism, added to the wrath of the slave dealers; taking advantage of the smouldering wrath of the oppressed Egyptians, led by an ambitious adventurer, Mohammed Achmet or Ahmed, an Arab of African blood, the revolt began in June, 1881. An air of mystery surrounded Mohammed, and he styled himself El Mahdi (i.e. one who is spiritually guided), the Guide, and he claimed to be that Prophet of Islam whose coming had been awaited for 1,300 years. Emerging from seclusion, he and his army vowed to sweep every Egyptian soldier from the land, and free the people from any yoke, whether financial, religious, or political. When the revolt commenced, the Khedive was too much occupied with anarchy and Arabi Pasha at home to be able to cope with a distant rebellion. The Mahdi took several large towns before Egypt fell into the hands of the English. But these were petty successes as compared with the great victory he gained in July, 1882,—the same month in which Alexandria was bombarded,—when a force of about 6,000 Egyptian soldiers, nearly all the army, together with the commanders, were overpowered and massacred. In his efforts to take El Obeid, the capital of Kordofan, he was three times repulsed; but in January, 1883, he succeeded, and made the town henceforth his place of residence and base of operations. An English officer, General Hicks, was now sent to take command of the Egyptian forces in the service of the Khedive at Khartoum. In April he succeeded in defeating a rebel force of 5,000 in Sennaar; in May he defeated El Mahdi near Khartoum. In September he went from Khar-

toum in pursuit of El Mahdi with an Egyptian force of about 10,000 men, commanded by both English and Egyptian officers. In about two months, through the treachery of a guide, he was led into a defile not far from El Obeid, where the Mahdi fell upon him and left "not a man" of all his army to tell the tale.

While these events were transpiring in the Soudan, the English troops were preparing to withdraw from Egypt and leave that country to try the experiment of a semi-constitutional government. The orders for withdrawal had actually been given when the massacre at El Obeid occurred. As the massacred army was officered in part by Englishmen, it was feared the event would be looked upon as an English defeat; and being so interpreted, as it surely would be by the revolted tribes, would cause all the greater exultation among them. The English troops remained in Egypt, but did not enter the Soudan until they were in a sense forced to do so by the turn things had now taken at Khartoum, Sinkat, and Tokar.

The fate of General Hicks's expedition gave a new turn to Anglo-Egyptian affairs. England began now to take a deep interest in the Soudan war. She saw many Egyptian garrisons, and some of them in the command of English officers, hemmed in by hostile tribes, and in danger of being massacred. She saw Khartoum in danger. She heard a call for English troops to "vindicate English honor," and to this extent at least she was now willing to have a part in the war. But to send out troops to conquer the Mahdi would be to commit England to a policy of conquest and annexation, and surrender the conviction of the English Government that Soudan should be left to the Sudanese. The Khedive was first advised, then commanded, to abandon the Soudan, when the Khedive's ministers demurred; but a new ministry was appointed with Nubar Pasha at their head. Meantime affairs grew steadily worse. The report that Egypt would abandon the Soudan gave new strength to the revolt, and tribe after tribe joined the Mahdi's standard. Osman Digna, a courageous chief in Eastern Soudan, and one of the foremost of the Mahdi's lieutenants, raised an army of 20,000, laid siege to Sinkat and Tokar, not far from the Red Sea, and threatened the seaport Suakim, and thus threatened England's route to India. To protect this English ships were dispatched to Suakim, and marines landed there to protect the town. There, too, an Egyptian force was collected and marched thence, under General Baker, to the relief of Tokar. But they were too late. Ere they had reached the town they were attacked by Osman Digna, and half their number slain. The rest fled and took refuge in Khartoum, to which the Mahdi now laid siege. This was soon followed by a massacre of the whole force at Sinkat. Stung to action by these disasters, the British Government dispatched troops to Suakim, and was preparing to send an expedition, under General Graham, for the relief of Tokar, when news came that the garrison had surrendered. England, having now become concerned for the safety of Egypt, involving her connections with India and the protection of the bondholders, proposed to abandon the Soudan and encounter the Mahdi, if need be, farther north. She would begin by tranquillizing the hostile tribes, by relieving Khartoum, and by opening a way

by which the 20,000 English and Egyptian troops and a still larger number of non-combatants, civil officers and others, might retreat and leave the country. To this end General "Chinese" Gordon, who had formerly been for five years governor and governor-general of the Soudan, was sent almost alone, nominally by the Khedive, but really by English pressure and out of regard to popular clamor, to commence operations at the capital.

This action was late, but Gordon was hopeful. On the 24th of January, 1884, he arrived on his peaceful mission at Cairo. His route was up the Nile by railway to Assiout, thence by steamer to Korosko. A four days' ride on a camel took him across the Nubian Desert to Abu Hamed, and on the 18th of February, by way of the Nile, he reached Khartoum. He began his mission by promising the people relief from the oppressions which had provoked the revolt, especially from the extortions of the tax-gatherers; he tried to conciliate the natives by conceding their rights, promising release from the Bashi-Bazouk system of government, and telling them they were henceforth to govern themselves. He tried also to appease the wrath of the slave-traders by saying he "had decided to permit the traffic. Every one having domestic servants," said he, "may consider them his property and dispose of them." By threats and bribes, and by taking advantage of mutual jealousies and rivalries among the Sheiks, he endeavored to weaken the Mahdi's power and to obtain a foothold for a successful shaping of the political future. In answer to the surprise generally felt, and the many inquiries that came in from different quarters, when these promises became generally known, General Gordon explained that the English and Egyptian governments had decided to evacuate the Soudan and leave the people to be governed in their own way, by chiefs or sultans, as they were before they became an Egyptian dependency, which would preclude his interfering with slave-holding; that to liberate slaves without compensating their masters would be robbery; that he made a distinction between slave-holding and slave-hunting; and that as for the latter he would never cease to do all in his power to prevent it. In attempting to restore and establish native rule, one of his first acts was to send El Mahdi a commission as Sultan of Kordofan, of which El Obeid was the capital; which the prophet was said to receive with an ecstasy of delight. Gordon proposed that the British government make Zebehr Pasha governor-general of the Soudan; but the government declined because of his reputation as a great slave-dealer. Gordon insisted that Zebehr was the only man to carry out his programme, and that without him a peaceful solution of the question was impossible. But his request was not granted. The Mahdi, seeing that Gordon was taking no active measures, made hostile demonstrations. Gordon abandoned the policy of reconciliation for one of a more vigorous character, and asked that 200 English soldiers might be sent to Wady Halfa for the sake of showing that he had the support of European power and influence at his command; but that, too, was denied him. By the 1st of March Gordon began to feel that his chances of success were rapidly diminishing; and at last he offered to resign his commission. His resignation not being accepted, he continued

to struggle on as best he could, deserted by the government that sent him out, and beleaguered by the enemy. With these he fought several damaging battles as the months went by. On the 12th of May, 1884, the government was arraigned in the House of Commons for its inefficient, vacillating Egyptian policy, and charged with deserting Gordon. The motion to censure was lost; but it was not long before the government began to prepare an expedition to start in August for the relief of Gordon. On the 7th of August, \$1,500,000 was voted by the House of Commons to pay the expenses of the expedition. But it was not till early in September (9-12) that Lord Wolseley arrived in Egypt and assumed command of the enterprise, in which something more than 10,000 troops were to participate. Early in December these troops, divided into three forces, were formed at different points scattered along the Nile, south of Korosko. On the 16th Lord Wolseley, having journeyed 1,200 miles from Cairo, had reached Korti, just above Old Dongola, on the Nile, where the advance, under General Herbert Stewart, was awaiting his arrival. On his way up the Nile Lord Wolseley heard of the assassination of Colonel Stewart, Gordon's associate, a little above Merawe, where one of the three or four Khartoum steamers, with which he had been sent with despatches down the Nile by Gordon to meet the coming expedition, had been wrecked on a rock. On the 30th of December, General Stewart, with a force of 1,000 men, started from Korti for Metemneh across the desert. Having been reinforced with 500 more men, on the 16th of January, 1885, he had a hard fight with about 6,000 Arabs at the Abu Klea wells, in which, after great loss, he came off victor. Three days later he fought and won another desperate battle, in which he was severely wounded, at Gubat, three miles west of the Nile, near Metemneh, some 75 miles below Khartoum. Colonel Wilson having now been sent, January 26th, with a flotilla of three steamers found at Metemneh, to communicate with Gordon, General Stewart remained at Gubat till he heard of the fall of Khartoum, and then retraced his steps, with much difficulty, to Korti. Meantime General Earle, who had been sent up the river to Berber, had been killed in an assault upon an Arab fortification, before he reached Abu Hamed; and his column, hearing that Khartoum had fallen, returned also to Korti. It was here at Korti that the last boat-load of reinforcements arrived, February 2d, from down the river. Colonel Wilson arrived at Khartoum on the 28th of January, 1885. Reaching the confluence of the Blue and the White Niles, he was surprised to find the Arabs opening fire upon him from the fortifications on the banks. Reaching Omdurman, Gordon's stronghold, the fusillade of the rebels was continued. It was discovered that the enemy was in possession of the island of Tuti, just outside of the city. Pushing ahead, the garrison commenced firing upon them. No flag, save the green banner of the Mahdi, floated from the public buildings. The palace where Gordon had held out so long was deserted.

Everything seemed to be in the undisputed possession of the enemy. The Mahdi, having sixty thousand men in the vicinity of Khartoum, had introduced a number of his emissaries into the city, who, mingling fully with the native troops under Gordon, using bribes and

threats, and working on their religious feelings, had induced them to mutiny. Seven thousand of the garrison are said to have deserted to the rebels, leaving General Gordon only 2,500 that were faithful. With this small force he attempted to hold the city, but was finally compelled to surrender. Rumors as to just the time, place, and manner in which an end was put to the life of Gordon were many and varied. Dr. Fricke, who went out with him to Khartoum, and remained with him until his death, and who, as a merchant, has since travelled much in Africa, says: "He was speared by his own soldiers when he came to inspect them." Dr. Fricke, being a Mussulman, managed to escape, and with great difficulty made his way down the Nile. All reports were agreed, at the time, in saying that the Mahdi captured Khartoum on the 26th of January, 1885, through treachery; and most of these reports point to one Farez Pasha as the traitor. It is said that, having charge of the ramparts on that fatal day, he betrayed his trust, opened the gates, and so gave the foe the freest admission. Another report of the fate of Gordon was that he was "shot down under the acacias of the government buildings, on his way to the Austrian consul's, to take his last farewell of his good friend Hansal."

The great object of the costly work the government had undertaken in attempting to relieve Gordon and the beleaguered garrisons having proved an utter failure, the expedition was recalled. Upon this the Arabs were much emboldened, and the Prophet seemed to be left well-nigh free to carry out his assumed mission, make the Soudan independent, and hasten the final triumph of Islam. The retiring troops were greatly harassed; the few garrisons required to remain were threatened; and some of the Sheiks who favored the English were put to death. But deeds of violence, and the hostile advance of the Arabs northward with an eye on Egypt, were presently somewhat checked by the small-pox that had now begun to rage, and of which the Mahdi himself died in June, 1885. But the lull was of short duration. Mohammed Achmet was soon succeeded by a new Mahdi, Khalifa Abdullah. Egypt, being again threatened, sought the continued aid of the English, who ordered Suakim and all the east coast of Egypt from Suez to Massowah to be blockaded. This brought increasing distress upon the Soudanese, and the new Mahdi sent Osman Digna to lay siege to Suakim and drive the Egyptians into the sea; but towards the end of the year 1888 the British government sent war-ships and troops and relieved the city. But the repulse was only local and temporary.

The Mahdism of Abdullah evidently took on more of the religious element than did that of his predecessor. His great aim and that of his dervishes was to extend and establish the triumphs of the Mohammedan faith, till Islam should be made universal. To this end they would drive the English alike out of the Soudan, out of the equatorial regions, out of East Africa, and push their conquests to the Atlantic on the west coast. To this end they would invoke the aid of all classes in the Soudan, assail Christian missions in Uganda, intrigue with tribes on the Congo, and claim, indeed, nothing less than all that part of Africa which lies north of the Zambesi as Mo-

hammedan territory. Worsted at Suakim, they undertook the invasion of Egypt. Under the lead of his general, Wad-El-Njumi, several thousand of his dervish followers, some with heavy guns and gun-boats, were stationed at important points, as Wady Halfa and Assouan, along the Nile, and other places on the borders. To aid the Egyptian army in meeting them, fresh regiments were dispatched in July, 1889, from England, together with a squadron of the 20th Hussars, all under command of General Grenfell, to whom, in asking the foe to surrender, Wad-El-Njumi replied: "Your force is nothing to me. I have been sent to conquer the world. Remember Hicks and Gordon." On the 3d of August, 1889, General Grenfell engaged the dervishes near Toski, and completely routed them after a gallant defence, during which 1,500 of them were killed and wounded, and a thousand of them, together with fifty standards, were captured. But any further movement was deemed useless, unless the government would assent to the views of the British generals that Berber should be held as the true key of the Soudan.

It is more than sixty years since Mehemet Ali began to take at least nominal possession of extensive provinces, such as Nubia, Dongola, Sennar, Faka, and Berber in the Soudan. Some fifty years ago, 1838, he passed through the land and tried to give the teeming millions there some good idea of commerce and agriculture, and turn the trade of the country down the Nile. But he was himself too much interested in the fruits of the slave-trade to hold his semi-savage officials back from the iniquitous traffic. And so it is that, from that time on to the present, the interest and enterprise of that country have centred in these inhuman pursuits. Abbas Pasha did nothing to counteract the evil. Said Pasha tried to advance the interests of Egypt in the Soudan, and gave orders to have all abuses stopped, especially the odious traffic in slaves. But his orders were never honored; and at the close of his reign the revenue Egypt was getting from that country through onerous taxation amounted to a million and a half dollars, aside from large amounts from the slave trade. Upon Ismail's accession, earnest efforts were made to extend the limits of Egyptian Soudan still farther southward and along all the tributaries of the Nile; and to this end in 1869, the Khedive set the renowned equatorial African traveller, Sir Samuel Baker, in command as governor-general over all that vast region. But at the end of four years, 1873, finding himself unable to continue his fight with the slave dealers and their Egyptian accomplices, he gave up, and fought his way out as best he could. And yet, after all the enormous expenditure of nearly \$6,000,000, which this attempted four years' rule in equatorial Soudan had cost him, the Khedive could not give up the idea of holding the wild and lawless realm as an Egyptian dependency. And now a second arrangement was made with another distinguished Englishman, "Chinese" Gordon, who came to the Khedive recommended as just the man for the service he required. General Gordon entered upon the enterprise early in 1874, rich in experience, full of enthusiasm, having at his command a goodly number of able, scientific, and accomplished men, both English and American, and an infantry escort of 200 troops. The capital of his realm was, at first, Gondo-

koro, then Lado. At the end of three years, having recommended Emin Pasha to succeed him as governor of the Equatorial Provinces, in 1877 he was made Governor-general of all Soudan, the equatorial regions included. The plenary powers of his commission set him virtually above the Khedive's authority, while the indirect part which England had in the matter was a virtual pledge of his having the support of the Queen. Virtually independent, with much experience, and ample means at command, it was natural that much should be expected from his government. Upon his taking command, he found the country not only self-supporting, but paying more than half a million per annum into the Egyptian treasury. Egypt was, therefore, not a little surprised to hear, at the end of some two or three years of his administration, that he had determined to abandon the field, assigning as his chief reason that he hadn't money enough to carry on his government, there being now, in 1879, a deficit of nearly half a million dollars. Finding the Soudan, as he did, out of debt and with a surplus in the treasury, he left it heavily encumbered and with diminished boundaries. One great hindrance to Gordon's success was the determined opposition of the slave dealers. To their influence, direct or indirect, it was chiefly due that he too was so speedily compelled to withdraw and leave the country to their control.

As governor-general of the Soudan, Gordon was succeeded, in 1879, by Raouf Pasha. "He had three Europeans as his subordinates—Emin Bey, who, before Gordon left, had been placed in charge of the province of the Equator; Lupton Bey, an Englishman, who had followed Gessi as governor of the Bahr-el-Ghazelle; and Slatin Bey, an Austrian, in command at Darfur. Raouf had barely been two years at Khartoum when the Mahdi appeared on the scene."

Egypt was now too much occupied with her own direct home affairs, the revolt under Arabi and the incoming of the English, to admit of her doing anything for her dependencies. This gave the Mahdi and the slave-dealing Arabs a good opportunity to come to the front, out of which came the Soudan War; and with this, a long-continued entanglement of England with the affairs of Egypt and the Soudan provinces, over which Egypt claimed control. Nor is it yet plain to see what, or when, shall be the end of the strife and struggle still going on. Meantime the Mahdists, backed by the slave-dealing Arabs, have pushed their way up the Nile into the provinces over which Emin Pasha was set, until he has felt compelled to withdraw, little by little, southward, and finally, under the wing of Stanley's Relief Expedition, has been induced to give up the field and leave it to the undisputed sway of the Moslem and slave-hunting powers.

There have been several attempts to plant mission work in the Egyptian Soudan. Swedish and German missionaries have looked with hungry eyes toward it, and some of its towns were stations on the famous *Apostelstrasse* which was to connect Cairo with Abyssinia.

The most important effort, however, was made by the American Missionary Association in response to the generous offer of a large sum of money by Mr. R. Arrington, of Leeds, England. An expedition under the lead of Rev. Henry M. Ladd, D.D., made a long and extended exploration of the country in 1881 preparatory to

its regular occupation. The coming on of the troubles mentioned above put a stop to the enterprise, and it has not been renewed. The Soudan Mission mentioned in the article on the Congo Free State is distinctively a Western Soudan mission and has no intimate relations with the Eastern or Egyptian Soudan.

As European interests and influence in Africa are increasing, great efforts are being made in England to bring the Soudan, or at least all the upper Nile regions, under British rule. Men who have seen and studied the country through and through, such as Baker and Loring, tell us that in all parts of the Soudan, but especially in the southern portions of it, "there are vast tracts of rich lands filled with untouched treasures, lying fallow, and covered with millions of human beings, who can easily be brought under the influence of that higher western civilization in which it is our privilege to live,"—to say nothing of the many millions of acres and people beyond Gondokoro or in the equatorial regions, and nothing about Harrar and the Somali country,—all indicating what a mighty and glorious future the gospel might bring to the Soudan and to all its fertile and populous borders, could it have sway over them.

**Soul-Winning and Prayer Union.** Headquarters, Newport-on-Tay, Scotland.—The Soul-Winning and Prayer Union was formed in 1880, and has now a membership from all parts of the world of more than 4,600. It supports missionaries and Bible-works in China, and India; in Morocco, Congo Free State, and Old Calabar, in Africa; and in Jerusalem, Bethany, and Beyrout, in Syria. Gospel work is carried on in Great Britain by means of tent-meetings, circulation of tracts, etc. The tenth day of each month is observed by members everywhere as a time of united prayer for success in all undertakings of the mission, and for means to carry on the work.

**South American Missionary Society.** Headquarters, 1 Clifford's Inn, Fleet Street, London, E. C.—Captain Allen Gardiner, the founder of the South American Missionary Society, first visited South America with a view of establishing a mission in 1833. For years the great aim of his life had been to become "the pioneer of a Christian Mission to the most abandoned heathen." With this object steadily in view, he went through a constant succession of travels and adventures for some years, taking his wife and children with him on long, perilous journeys. After repeated disappointments in other countries, he was led to direct all his efforts towards the natives of South America. His attempts to reach the mountain tribes were defeated by the jealousy of the Roman Catholic priests. At last he thought that not even the Spanish priesthood would consider it worth while to interfere with anything he might attempt among the poor savages at the desolate southern corner of the great continent, and by beginning with them he hoped to reach in time the nobler tribes.

In 1830 Captain (afterwards Admiral) Fitzroy had been sent by the British Government to survey the coasts of Tierra del Fuego. On his return to England he took with him, for a visit, three native lads and a girl of nine years. They were kindly treated, and found capable of learning a good deal. When, a year later, Cap-

tain Fitzroy took them back to their own land, he was accompanied by a Mr. Williams, who hoped to remain in Tierra del Fuego as a missionary. A very few days sufficed to show the danger of this attempt: he returned to the vessel, and all thought of missionary work in this region was abandoned until Captain Gardiner took it up. His hope was that the natives who had visited England might be still alive, and that one of them,—called "Jemmy Button,"—if he had not forgotten all his English, might act as interpreter and friend. But he found great difficulties in the way. England, while warmly supporting missions to other parts of the world, seemed utterly indifferent to the fate of South America. After much effort he succeeded, in 1844, in forming a society called the Patagonian Missionary Society; soon after, he, with a few companions, attempted to establish a mission in Tierra del Fuego. Owing to the hostility of the natives it was a complete failure. The Society in England was much discouraged; "not so the brave captain." The sum of £1,000, which the Committee declared necessary to the starting of another expedition, was secured, £700 being given by a Christian lady of Cheltenham, the remaining £300 by Captain Gardiner himself; and on September 7th, 1850, Captain Gardiner again sailed from England. With him were Mr. Richard Williams, a surgeon in good practice, who gave up all earthly hopes in order to carry the glad tidings to the heathen; Mr. Maidment of the Church of England Y. M. C. A.; a ship-carpenter who had gone on the previous expedition, and who volunteered his services for this second attempt, saying that to be with Captain Gardiner was "like a heaven upon earth;" and three Cornish fishermen, Christian men, who readily offered themselves for the "forlorn hope," though plainly warned of its dangers. The seven brave men sailed from Liverpool, after a farewell service in Bristol, in the "Ocean Queen," a vessel bound for San Francisco, which promised to land them with their boats\* and stores at Tierra del Fuego. They took with them provisions for six months, and arranged that more should be sent by the first opportunity.

On the 5th of December, the "Ocean Queen" anchored in Banner Cove, Tierra del Fuego, and on the 18th she sailed away with many cheerful messages to friends at home from the brave men left behind. The journals of Gardiner and Williams, preserved almost by miracle, tell the painful story of the next nine months. Misfortunes and disasters rapidly succeeded one another. In a heavy storm an anchor and both small boats for landing were lost; in repairing a leak in the "Pioneer" the terrible discovery was made that by an oversight almost the whole supply of powder and shot had been left on board the "Ocean Queen," leaving them without the means of obtaining game, upon which they had counted to help out their supplies, which contained very little animal food, and also without power to defend themselves from the attacks of the natives, by which many

\* Living in a house upon land had been proved impracticable from the thieving and plundering habits of the natives; accordingly, for this attempt, two vessels, 26 feet long, to carry the stores, and to be a "floating home" for the missionaries, together with two smaller boats, to enable them to go on shore at any time, had been provided.

times their lives were in peril. Later, a terrible gale made a complete wreck of the "Pioneer." At Garden Island they buried several bottles, placing above them boards of wood on which were written, "Look underneath." Each bottle contained a written paper, "We are gone to Spaniard Harbor; we have sickness on board. . . . Our supplies are nearly out, and if not soon relieved we shall be starved." They also painted on the rocks in two places, "You will find us in Spaniard Harbor." Then, with the "Speedwell" they succeeded in reaching this last place of refuge—Spaniard Harbor. The frightful Fuegian winter began in April, and from the terrific storms of wind and snow the deep caverns in the rocks formed their best refuge. Their efforts to catch game and fish met with little success; they grew weaker and weaker; the sailor, John Badcock, was the first to die. Mr. Williams seems to have realized that the still expected "ship" would arrive too late for his relief, and his journal contains many farewell messages to beloved friends at home. One by one the little band passed away; it is probable that the brave Gardiner himself was the last survivor. The last entry in his diary is September 5th; a little note was also found, dated September 6th. The long-looked-for vessel, owing to strange mistakes and delays, did not reach the coast until the end of October. Following the directions written on the rocks, the "Speedwell" was found, with one dead body on board, and another on the shore, while books, papers, etc., lay scattered around. "The captain and sailors cried like children at the sight." A violent gale arising, they dared not remain longer, but put out to sea at once, carrying the sad news to Montevideo. By this time friends in England, greatly alarmed, had applied to government for aid, and the frigate "Dido" was sent to search for the lost missionaries, reaching the coast in January. Guided by the writings on the rocks, the officers soon completed the sorrowful discoveries. In Spaniard Harbor they saw on a rock the verses from Psalm lxii. 5-8, "My soul, hope thou in God, for my expectation is from Him," etc., with the drawing of a hand pointing to the spot where the wreck of the "Pioneer," and the bodies of Maidment and Gardiner were found. All the remains of the martyrs were reverently collected, and after the reading of the beautiful burial-service of the Church of England, were buried in one grave beside the "Pioneer." The colors of the "Dido" were lowered, and three volleys fired, as in honor of an officer's funeral. The heroic death of Gardiner and his companions accomplished what in life they had failed to do. The Christian public of England, almost stunned at first by the sad tidings received, soon resolved that the dying wishes and prayers of the martyrs should not have ascended to heaven in vain. The last directions of Captain Gardiner, so wonderfully preserved from plundering natives and raging winds, were acted upon; the Society was re-formed according to his plan, and now a Christian Mission is firmly established in Tierra del Fuego, and the South American Missionary Society is rapidly extending its agencies over many regions of the great continent, where generations yet unborn may bless the name of Allen Gardiner.

According to the plan of Captain Gardiner, the South American Missionary Society should have the threefold object of supplying the

spiritual wants of "his own fellow-countrymen," the Roman Catholics, and the heathen in South America; these directions the Society endeavors to carry out by missionary effort among the numerous native tribes, by ministerial work in the many communities of English-speaking people scattered throughout the continent, and among the sailors who frequent its harbors; and by evangelistic labors among the native people speaking Spanish and Portuguese, and among persons of other nationalities, by means of special services and, above all, by the distribution (by sale) of the Bible in the native languages.

The first attempt to carry out Gardiner's wishes was in 1854, when the missionary schooner "Allen Gardiner" sailed for Keppel Island, one of the West Falklands, which was selected as a station from which, by means of the schooner, missionaries might communicate with Tierra del Fuego, and to which natives might be brought for instruction. The Rev. G. P. Despard became the superintendent of this mission in 1856. Its further history will be found under the head of "The Fuegian Mission."

In 1860 the Rev. Allen Gardiner, the only son of Captain Gardiner, having first served under Mr. Despard at the Falklands, in Tierra del Fuego, and in Patagonia, went to Lota, in Chili, as chaplain to the English and Scotch residents; from whence he made many expeditions among the Araucanian Indians.

In 1864 a great enlargement of the work took place by the establishment of chaplaincies in Panama, Callao, and other places, and the opening of a medical mission in Patagones, Argentine Republic. During succeeding years the work was extended to Uruguay, Paraguay, and Brazil, and in 1867 the three departments of Captain Gardiner's plan, the English, the Spanish, and the heathen, were in full operation.

*The Fuegian Mission.*—As already stated, this mission was commenced by the formation of a station on the Falkland Islands. From thence, in 1856, a cautious intercourse was commenced with the Fuegians, and they were encouraged to visit the mission station at Keppel in small parties. After much toil of preparation a Fuegian family from one of the larger islands near Cape Horn was brought to Keppel by Mr. Allen Gardiner in 1858. The man was Jimmy Button; he was still able to speak broken English, and from him, at this early date, the missionaries learned something of the Fuegian language. On the return of that family to their own country, other natives visited Keppel. Mr. Despard visited Tierra del Fuego, and remained with the schooner a month on the coast, bringing back three men and their wives, together with two lads as visitors. Much pains were taken to gain the confidence of these natives, and to impart to them some religious knowledge. So friendly did they seem that in 1859 the missionaries thought they might venture to take the first step towards the establishment of a missionary station in their island home. Forming their judgment partly from their visitors at Keppel and partly from others on the Fuegian coast, they believed that the ferocity of the natives had been overstated. Accordingly, they sailed for Woolya, in Navarin Island. Mr. Philips was the leader of the little band of missionaries, and he was

fearlessly supported by Captain Fell of the "Allen Gardiner." Their first reception was friendly, and on Sunday, the 6th of November, they went ashore to conduct divine worship. While thus engaged they were attacked and massacred. One young Fuegian, who had been at the mission station, so earnestly implored to be taken back to Keppel in the ship which came in search of the missionaries that he prevailed over the scruples and hesitation of the captain. His arrival with his wife at the station enabled the surviving missionaries to go on with the difficult work of learning the Fuegian language; for, though bowed down with the weight of a great calamity, their courage never wavered, and they maintained their determination to go on with the work with unflinching constancy. For three years after the murder of the missionaries no visit was made to Tierra del Fuego. In January, 1863, the Rev. W. H. Stirling (now the Right Rev. W. H. Stirling, D.D., bishop of the Falkland Islands) was sent out as superintendent of the mission, and as soon as possible intercourse with Tierra del Fuego was resumed. Forty or fifty of the islanders were brought in successive groups of eight or ten to the station at Keppel, were fed, clothed, taught, and conducted back to their wild homes. They became accustomed to divine worship in their own language, and they also made rapid progress in acquiring English.

In 1868 a small settlement was commenced at Liwya, on Navarin island, on the southern shore of the Beagle Channel. Four young natives who had had special training at Keppel were placed there, among others. A log-house was built for them, and they were provided with goats and sheep, also implements and seeds for the cultivation of the ground. When Mr. Stirling visited them some months later he found them still in possession of house and goats. Mr. Stirling then resolved to try a residence on shore himself, and accordingly in January, 1869, established himself at Ooshooia, on the north shore of the Beagle Channel, and opposite to Liwya, on the south shore. Ooshooia has good harborage, plenty of wood and water, with land available for tillage and pasture. The party at Liwya removed to Ooshooia, and became a body-guard to their new chief. The "Allen Gardiner" sailed away on 11th January, and Mr. Stirling was left to face the dangers of his position alone. For seven months he remained, proving that a mission station on Tierra del Fuego had at length become a possibility. Other missionaries with their wives bravely ventured over, and Ooshooia is now a Christian village, with cottages,—not wigwams,—a church, a school-house, and an orphanage. The present divisions of the work in South America are:

1. *The Southern Mission*, including the Falklands and Tierra del Fuego.

(a) Keppel Island.—West Falklands has been occupied as a station since 1855, and forms a valuable missionary settlement, where natives of Tierra del Fuego, brought over at their own request, are boarded, instructed in Christian doctrine, trained in husbandry, etc. There are also a very productive industrial farm, workshop, and school, together with the numerous flocks and herds which afford abundant means of educating the natives to lead Christian lives,

and to follow peaceful pursuits on their return to their own country.

(b) Ooshooia, first missionary station on Tierra del Fuego, founded in 1869. About 300 natives have here received the rite of baptism.

(c) Wallaston Islands.—A promising beginning has been already made in the station established upon one of the islands of this group.

The mission vessel "Allen Gardiner" is employed in keeping open communication between these stations, conveying missionaries and natives to and from the coast, carrying farm produce, supplies, etc.

2. *The "East Coast" Mission*, including the Argentine Republic, Uruguay, Paraguay, and Brazil.

(a) The work of the Society—including mission to English and Spanish speaking people, and natives in the Argentine Republic, is carried on at Patagones (El Carmen), Rosario, Cordoba and Tucuman, Canada De Gomez, Alexandria Colony, Gran Chaco, Chuput (Welsh) Colony, and Concordia.

(b) In Uruguay at Fray Bentos, Salto, and Paysandu.

(c) In Paraguay, the Chaco: and

(d) In Brazil, at Rio de Janeiro, San Paulo and Santos, and Pernambuco.

3. *The West Coast Mission*, with stations in Chili, at Lota and Coronel, Chanalal and Araucania.

**Southern Baptist Convention.**—Headquarters, Richmond, Va., U. S. A. The Southern Baptist Convention was organized in the city of Augusta, Georgia, in May, 1845. It originated in a withdrawal of the Southern churches from union and co-operation with "the General Convention of the Baptist Denomination in the United States," popularly known as the Triennial Convention. (See article on American Baptist Missionary Union.) The constitution of this convention, as well as the history of its proceedings from the beginning, conferred on all the members in good standing of the Baptist denomination, whether at the North or the South, eligibility to all appointments emanating from the convention of the Board. Unmistakable indications, however, led the Alabama Baptist State Convention in 1844 to adopt a preamble and resolutions which were submitted to the Board of Foreign Missions of the Triennial Convention, to which a frank and explicit answer was returned, that "if any one having slaves should offer himself as a missionary, and insist on retaining them as his property, we could not appoint him. One thing is certain, we can never be a party to any arrangement that would imply approbation of slavery."

When this reply was made known, the Board of the Virginia Foreign Missionary Society addressed a circular to the Baptist churches of Virginia, suggesting that a convention be held at Augusta, Georgia, for conference as to the best means of promoting the Foreign Mission cause, and other interests of the Baptist denomination in the South. Both at the North and the South a separation seemed inevitable. At the North it was desired by many, regretted by a few, and expected by all.

Before the proposed convention in Augusta could meet, the Home Mission Society at its meeting in Providence, in April, had virtually

declared for a separation, and recommended that as the existing Society was planted in the North, and had there its Executive Board and charter, which it seemed desirable to preserve, it be retained by the Northern churches, and those sympathizing with them as to the appointment of slave-holders.

At the call of the Board of Managers of the Virginia Foreign Mission Society, there assembled in Augusta May 8th, 1845, 310 delegates from the states of Maryland, Virginia, North and South Carolina, Georgia, Alabama, Louisiana, Kentucky, and the District of Columbia. Owing to the short notice of the meeting, other states were represented only by letter. The Committee appointed for the purpose presented a resolution, "That for peace and harmony, and in order to accomplish the greatest amount of good, and for the maintenance of those scriptural principles on which the General Missionary Convention of the Baptist Denomination of the United States was formed, it is proper that this convention at once proceed to organize a society for the propagation of the gospel." Then followed the adoption of a constitution which was "precisely that of the original union; that in connection with which, throughout his missionary life, Adoniram Judson lived, under which Ann Judson and Boardman died. We recede from it no single step. We use the very terms, and we uphold the true spirit and great object of the late General Convention."

Thus the Southern Baptist Convention claims to be the real and proper successor and continuator of that body, which "at a special meeting held in New York November 19th, 1845, was 'dissolved,' and the American Baptist Missionary Union, with an entirely new constitution and a different basis of membership, was organized in its stead."

A Board of Foreign Missions was appointed to be located in Richmond, Virginia, and one for Domestic Missions, to be located in Marion, Alabama. The new Convention gathered around itself the enthusiastic support of the Baptist churches of the South; and the wisdom of its formation is evidenced by the fact that while Southern Baptists contributed to the Triennial Convention in 31 years, from 1814-1845, \$212,000, during the 34 years, from 1845-1879 (covering the period of the war), their contributions for Foreign Missions alone were \$939,377.

**Development of Work.**—Immediately after the organization of the Board they were instructed to correspond with the Boston Board with regard to mutual claims; and were authorized to make any equitable and prudent arrangement with that Board, to take a portion of its missions under the patronage of the convention. At the suggestion of the Boston Board, through Dr. Francis Wayland, it was agreed that "the property and liabilities of the General Convention should remain with that body," and that "the missionaries should have the choice of the associations with which they would be connected."

Under this arrangement Rev. J. L. Shuck, the first American Baptist missionary to China, and Rev. I. J. Roberts, who had followed Mr. Shuck in 1836, gave in their adherence to the Southern Convention. Rev. S. C. Clopton and Rev. George Pearcy were commissioned to

join them, and the missions of the new Board were fairly inaugurated.

Coincident with the establishment of the China mission, it was determined to commence work on the coast of Africa, where missions of the Northern Board were already in operation, and in 1847 stations were formed in Liberia and in Sierra Leone, and in 1850 in Central Africa.

As early as 1850 the attention of the Board was directed to South America as an important field, but it was not until 1860 that the opportunity was afforded for carrying out the plans of the Board. The Rev. T. J. Bowen, who had been obliged to leave Africa on account of ill-health, volunteered for the South American field; he was gladly sent, and a station was founded at Rio de Janeiro, from which point the work has rapidly spread.

In 1859 the needs of Japan attracted the attention of the Board, and in 1860 four missionaries, two ministers and their wives, were sent. All were lost at sea before reaching their field of labor. The enterprise, though deferred, was never abandoned, and definite steps are now being taken to establish a station in that country.

The duty of Baptists to send the pure gospel into the Catholic countries of Europe was felt by the Board from the very beginning, and France was chosen as a field for missionary labor; but the occupation of Rome by Victor Emmanuel in 1870 opened Italy to missionary work, and drew attention thither, and in 1871 Rome became a centre of operations which have spread throughout the peninsula.

**Statement of the Missions.**—CHINA.—The work of the Southern Convention in China is carried on under three missions, Canton, Shanghai, and Shantung. In 1846 the work was begun in Canton by the Rev. George Pearcy and Rev. Samuel Clopton. The work has progressed since that time with little or no interruption, and Canton has been the centre of the work in China. The mission now includes 13 stations, in which labor 11 foreign missionaries and 28 native helpers; the church-membership is 207.

Shanghai was chosen as a station at the same time as Canton, being situated in a central position on the coast. It is a city of great importance for missionary operations, since the Chinese come here from all parts of the empire, the number of transient inhabitants being estimated at about 100,000. During the Tai-ping rebellion in 1854 the mission property was destroyed, but on the seizure of the city by the imperialists full restitution was made and the work renewed. The Tai-ping movement was strictly religious and iconoclastic in its origin, and proved in the end a benefit to the mission, for it roused the moral sense of the people and offered a blow at the great curse, idolatry, and the preaching of the missionaries was decidedly more effective after than before the insurrection. The Shanghai mission has now 2 stations, 2 out-stations, 4 ordained missionaries, 4 churches, and 107 members.

The mission in Shantung, a northern province of China, was begun in 1860, immediately on the conclusion of the treaty of Tien-tsin, the stations chosen being Tung-Chow and Chefoo. Some opposition was experienced at first from the gentry of Tung-Chow, but the common

people showed great interest. At the outset the Shantung reports and statistics were included in those of the Shanghai mission, although the fields were 500 miles apart; but in 1866 Tung-Chow was set off as an independent mission, and has continued to be so regarded. There are now in Shantung 2 stations, 22 out-stations, 11 foreign missionaries, 2 churches, 127 church-members.

**AFRICA.**—One of the first fields chosen by the Southern Convention was Africa. In 1846 work was begun by Rev. John Day in Liberia, where the Northern Board had already established a mission, but in 1856 they withdrew and the Southern Board alone carried on the work of Baptists in the Dark Continent. The field was found to be one of great promise, and in 1850 the work was extended by the formation of a mission in the Yoruba country, and in 1855 a station was opened in Sierra Leone in connection with the Liberian mission. For four years, from 1860 to 1864, war raged among the native tribes of Central Africa, and the missionaries of the Yoruba country were driven to the coast and the mission had to be suspended. Soon after this, the money pressures and panics attendant upon the civil war at home rendered it necessary to withdraw support from the African mission for a time, and from 1866 to 1874 the work was carried on by the missionaries without aid from the Board. In 1875, the native war being terminated and the Yoruba country again opened to missionary operations, and the finances of the Board by this time permitting, laborers were sent to occupy that field. The Liberian mission was closed and Lagos chosen as a centre from which work could be extended to Central Africa. The report of the Board for 1889 gives the following statistics: 5 stations, Lagos, Abbeokuta, Ogbomoshaw, Gaun, and Hauser Farm; 13 foreign missionaries, 8 native assistants, 165 pupils in schools, and 79 church-members.

**SOUTH AMERICA.**—The mission in South America was begun in 1860 at Rio Janeiro by the Rev. T. J. Bowen and his wife. The health of the former, which had caused his transfer from Central Africa, compelled him to again give up his work, and with his return the mission in South America was suspended. For twelve years nothing was done, at the end of which time, at the urgent request of a church of settlers in Brazil from the Southern United States, the Board again renewed its operations. The Board has five stations in Brazil: Rio de Janeiro, on the coast, in the southeast; Pernambuco, on the coast, in the northeast; Bahia, midway between Rio de Janeiro and Pernambuco; Maceio, south of Pernambuco; and one in the city of Juiz de Froa in the mining district of Minas Geraes, in the southeastern part of the country. There are 13 foreign missionaries at work, 3 native preachers, 1 native assistant, and 229 church-members.

**ITALY.**—In 1850 the Board began deliberations with regard to work in the Catholic countries of Europe, but no mission was begun until 1870, when Rev. Wm. N. Cote, M.D., who was secretary of the Y. M. C. A. of France, was appointed missionary of the Southern Convention. On the opening of Italy for evangelistic work, by the victory of Victor Emmanuel, operations were immediately begun in that city, and from thence have spread throughout Italy. There are now 10 stations of the Southern Convention on

the peninsula—Rome, Pinerolo, Milan, Venice, Bologna, Modena, Carpi, Bari, Naples, and Torre Pellice,—besides two,—Cagliari and Iglesias—on the island of Sardinia. There are 5 foreign missionaries, 11 native workers, and a total membership of about 350.

**MEXICO.**—The missions of the Convention are now established in the following states of Mexico: Coahuila, Zacatecas, Aguas Calientes and Jalisco. Saltillo, in Coahuila, is the headquarters of the mission, and there are in all 7 stations, occupied by 7 married missionaries and 5 female missionaries, with 800 church-members, organized into 19 churches. The churches are better organized, more liberal in their contributions, and more anxious after self-support than at any previous time in their history. A Mexican National Foreign Missionary Society has been organized, and a missionary has been sent to Central America.

**JAPAN.**—In 1860 the Board appointed three missionaries to Japan; two of them were prevented by the outbreak of the war from going out. The third, J. Q. A. Rohrer, with his wife, set sail from New York in the "Edwin Forrest" on August 3d, 1860. The vessel was never heard of afterwards, and the mission to Japan was then abandoned until November, 1889, when two missionaries and their wives were sent out. They are to be located at Kobe, and as soon as the language is acquired will enter upon active, aggressive work.

**Southon Ebenezer John**, b. Gosport, England, August 23d, 1850; studied medicine at Edinburgh; sailed April 18th, 1879, as a medical missionary of the L. M. S. to the Central African Mission, arriving at Zanzibar May 27th. Accompanied by Dr. Mullens and Mr. Griffiths, he reached Mpwapa July 11th, and settled in Urambo October 25th, the same year. He was shot in the arm by the accidental discharge of a gun in the hands of an attendant. Mr. Coppleston, a missionary at Myui, being sent for, though not a surgeon, successfully amputated the arm, under directions from Dr. Southon. But there was not strength to rally from the shock to the system, and amid intense pain his life passed away. He died July 26th, 1882.

By having a board held in place for him, after he was wounded, he wrote two letters, closing the first in these words: "Who shall lay anything to the charge of the Master-builder if He removes one workman who has finished his portion, and sends others to carry on the work? If He calls me to help Mullens, Thomson, and others gone on before, how gladly will I respond, and joyfully 'knock off work here!'" The second was a letter to his brother in England in the view of approaching death, dated Urambo, July 22d, 1882, in which he says: "My sufferings during the last five weeks have been awful. Tell everybody, if I die, that my most earnest wish was to die at my post, and nothing short of death could make me leave it."

**Spalding, Henry H.**, b. Bath, N. Y., U. S. A., 1804; graduated at Western Reserve College 1833, and Lane Theological Seminary 1835; ordained August the same year; appointed by the A. B. C. F. M. in 1836 missionary to the Nez Percés Indians, with his wife, Dr. and Mrs. Whitman, and William B. Gray. In a company of fur-traders they travelled on horseback nearly 2,200 miles beyond the Missouri River, to Fort Walla-Walla, a trading-post of

the Hudson's Bay Company, which they reached September 2d, 1836, being four months and six days on the journey from Liberty, Mo., to that place. The mission was broken up by the massacre of Dr. Whitman and others in 1847. (See article on Dr. Whitman.) Mr. Spalding, who was in the vicinity, providentially escaped. The murderers were on his track. Hiding by day, he made his way night after night, barefooted, over sharp rocks and thorns, until, almost dead, he reached a place of safety. Then, with his family, he left the mission field for a time. In 1862 he resumed his work, but remained only a few years. In 1871 he renewed his labors under the Presbyterian Board of Foreign Missions, in which he continued till his death, which occurred at Lapnor, Idaho, August 3d, 1874, after a long and useful life as a missionary among the Indians and a home-missionary among the whites. Though his labors were so much interrupted, he accomplished a great work among the Indians. "From savagery they have been raised to a good degree of civilization. From knowing nothing of the gospel, a large proportion of the tribe have become its professed followers." Over 900 of the Nez Percés and Spokanes were added by him to the church. He prepared and gave to the people a translation of the Gospel of Matthew, and a collection of Nez Percés hymns. He had proceeded also far in the translation of the Book of Acts.

#### Spanish Evangelization Society.

Secretary and Treasurer, Mrs. Robert Peddie, 8 Granville Terrace, Edinburgh.—The Spanish Evangelization Society, formed 1855, has done much to aid in establishing in Spain a native Protestant church. In its three long-established centre stations (Huelva, Cadiz, and Seville) are congregations of Spaniards, with resident missionary pastors, and well-attended day and Sabbath schools: from these centres itinerating work is done in the neighboring villages, and there is a wide-spread distribution of Scriptures and tracts among the outlying population. Minor stations having no resident pastors are at Escornar, Villafranca, Puerto-Real, El Carpio, and Tharsis. In the early days of its history the Society did much interesting work among the *Emancipados*—Spanish Negro slaves who had purchased their freedom; and also among the Gypsies, whom even the Catholic priests neglect.

The Society reports for 1888, 5 churches and 11 schools. Testaments, portions of Scripture, tracts, etc., have been distributed during the year to the number of 16,533.

**Spanish and Portuguese Church Aid Society.** Headquarters, 8 Adam Street, Adelphi, London, W. C.—In 1867 the Rev. L. S. Tugwell, a clergyman of the Church of England, was appointed to the British chaplaincy at Seville, Spain. Finding that the priest-ridden classes around him were eager to hear the gospel, he inaugurated a movement, which in 20 years has grown into a fully organized native church, comprising 16 organized congregations, and many mission stations not yet provided with pastors. To supply the needed funds to carry on this work, Mr. Tugwell founded the Spanish and Portuguese Church Aid Society, which had the warm support of the Earl of Shaftesbury and other prominent men, and which is now presided over by the Archbishop

of Dublin. The churches in Spain to which aid is given are in (1) Seville, where there are 2 churches, with boys' and girls' schools and free dispensary; (2) Madrid, 1 church, with 240 members, and schools. "La Luz," a fortnightly journal, is published here and circulated throughout Spain and Spanish America; (3) Malaga, 2 churches, mission stations, and schools; (4) Monistrol, church, schools, and mission stations; (5) San Vicente, carrying on work, notwithstanding bitter persecutions from the Jesuits; (6) Salamanca; (7) Villaescusa and (8) Valladolid; churches and mission stations. Aid is granted in Portugal to churches in Lisbon, Rio de Mouro, and Oporto.

**Spanish Version.**—The Spanish belongs to the Græco-Latin branch of the Aryan languages, and is spoken in Spain and her colonies, and South American republics. Nicolo Antonio (*Bibl. Hisp. vetus*, ii, 214) mentions many manuscripts of a translation into the Lemosinian dialect, which do not go beyond the year 1470. This text was printed (Valencia, 1478), and ascribed to the General of the Carthusians, Boniface Ferrer, who had died in 1417. The National Library of Paris has two manuscripts in the Lemosinian dialect, a complete Bible and an incomplete Old Testament, which are said to be older than the 15th century. (J. M. Guarda, *Revue de l'Instruction publique*, Avril, 1860.) In the same dialect there is also extant a manuscript containing a metrical version of the Bible by Romerus de Sabrugera, which Antonio (p. 273) mentions as *Biblia en Catalan*. A Castilian translation made by a rabbi in 1430 is also mentioned, and, as Antonio (p. 214) states, among other books the Escorial Library contained a *Hispania versis sacri textus IV evangg. et XIII epp. Pauli, interprete doctore Martius Lucena cognomine El Machabeo*.

The translations of the 16th century are almost exclusively made into the Castilian dialect of the present Spanish. To this period belongs the New Testament translated from the Greek, by Francisco de Enzina, Antwerp, 1543. This edition was presented to the Emperor Charles at Brussels by the translator. In 1556 a New Testament was published at Venice, the translation having been made by J. Perez. About the same time a translation of the Old Testament, made by Spanish Jews, was published at Ferrara, 1553 (Amsterdam, 1611, 1630, 1656, and after). This version was of service to Casiodoro de Reyna, who published his translation of the entire Bible at Basle in 1569. Copies of this volume appeared with a new date on the title-page in 1586 and again in 1622. After the death of De Reyna his translation was revised and adopted as his own by Cipriano de Valera, by whose name it is generally known. In its revised form the New Testament appeared in 1596 and the Bible in 1602, but no subsequent edition of the Bible is noted until 1861.

Towards the end of the 18th century Felipe Scio de San Miguel, bishop of Segovia, published a classical translation of the Bible into Spanish (10 vols., Valencia, 1790-93; 20 vols., Madrid, 1794-97), with a commentary. It was often reprinted. A more recent translation, having respect to the sacred originals, was published by Felix Torres Amat, bishop of Astorga; Madrid, 1824-29, 9 vols.; 1832-35, 6 vols. (reprinted at Paris, 1835, 17 vols.). The British and Foreign Bible Society republished Valera's and

Scio's versions of the entire Bible and Enzina's version of the New Testament. The Society for Promoting Christian Knowledge published in 1853 a corrected edition of Amat's version, prepared with the assistance, and printed under the care, of Señor Calderon. A new version of the entire Scriptures, prepared by Mexican priests, was printed by Ribera in 1831-33. This was the first Bible ever printed in Spanish America. The present diffusion of the Bible in Spain and Spanish America is owing chiefly to the efforts of the British and Foreign and the American Bible Societies. The first editions of the former were printed only from Enzina's edition of 1708. At length, in 1820, in consequence of the representations and example of the American Bible Society, an edition of Scio's New Testament was printed in London, followed in 1821 by an edition of the entire Bible of this version. An edition of the New Testament from Valera's version was issued by the same Society in 1857. The Old Testament from the same version followed in 1861.

The style of the Reina-Valera version is harsh and antiquated, and it has been repeatedly revised, with but partial success. The editions published by the British and Foreign Bible Society in Madrid are, for the most part, conformed to a revision made about 1867 by the Rev. L. Lucena, Professor of Spanish at Oxford. Marginal references have been appended. In 1885 the Society printed tentatively a revision of the Gospel of Luke, made by its agent in Spain, the Rev. E. Reeves Palmer. At the present time a committee in Madrid is co-operating with the Rev. J. Jameson in preparing another revision of the New Testament. Pastor Fliedner of Madrid has also been publishing independently a translation of his own.

The American Bible Society's revision of Valera, prepared by Messrs. De Mora and H. B. Pratt, first appeared in 1865. Mr. Pratt had already at that time devoted much time to the study of Spanish, and the fruits of his life-long work are soon to appear in a new translation of the entire Bible, which may be looked for in the year 1892. His edition of the Psalms, first printed in Bucaramanga in 1876, was reproduced by the Society in 1879, and has also been printed in Barcelona. Since 1885, when his version of Genesis was published, he has been in the employ of the Society, devoting his whole time to the work, in which he has been materially aided by missionary and native scholars in Mexico, among whom he has resided.

An independent version of the New Testament was published by the American Bible Union in 1857. For the blind, too, the British and Foreign Bible Society issued a small edition of the Gospels of Mark and John.

**Spaulding, Levi**, born Jaffrey, N. H., U. S. A., August, 22d, 1791; graduated at Dartmouth College 1815, and Andover Theological Seminary 1818; sailed for Ceylon June 8th, 1819. He occupied the station of Manepy for several years. In 1833 he removed to Oodoo-ville, and with Mrs. Spaulding took charge of the girls' boarding-school, which was under their care for nearly forty years. He visited the United States in 1844 and returned in 1846. He was one of the most accurate Tamil scholars in Southern India, having so mastered the language as to use it with great facility, and often power. He performed a large amount of literary labor. More than twenty Tamil tracts were prepared by him, and many of the best lyrics in the vernacular hymn-book were from his pen. He prepared two dictionaries, one Tamil, the other English and Tamil, and took a prominent part in the revision of the Scriptures. He furnished an excellent translation of Pilgrim's Progress, and compiled a Scripture History, which is used in the schools. School-books, hymn-books, tracts, and Gospels passed through his hands for revision and proof-reading. But he was far from being chiefly occupied with these tasks. In season and out of season, to moodeliars and odigars, in their verandas, or seated with wayfarers under the hedge, to the poor and the maimed in lanes and highways, and to the children in the school or the street, wherever he met a native he ceased not to preach and to teach Jesus Christ. His fluency in the colloquial language, his apt quotations from Hindu books, his original illustrations, and ready and racy sallies, combined with his genial humor, gave him great influence with the natives. He died at Oodoo-ville June 18th, 1874, fifty-four years and eleven days from his embarkation. The native converts throughout the district loved him as a father, and many of the heathen mourned his death.

**Spaulding, Mary Chrystie**, died at Batticotta in 1875. She had been over fifty-five years connected with the mission, and about forty years in charge of the girls' boarding-school at Oodoo-ville. Her sympathetic services, rendered not only to the natives but to the mission families on all occasions of suffering or sorrow, richly entitled her to the appellation, which was universally accorded, of "Mother Spaulding."

**Spezia Mission for Italy and the Levant.** Funds supplied by individual contributions in England and Scotland. Secretary, Eliot Howard, Esq., Walthamstow, Essex, England.—In 1863 the Rev. Edward Clarke, an English pastor, published a paper on the importance of Italy as a mission field, which met with opposition from many sources, but finally resulted in the formation of "The Spezia Mission for Italy and the Levant," the object of which is to supply every necessitous part of Italy with the gospel.

In 1866 Mr. Clarke went to Italy as superintendent of the mission. Obstacles bristled at every point. The problem of Bible-school work proved a most difficult one to solve, but Mr. Clarke at length began it with one child. There are now nine schools with hundreds of scholars, superintended by earnest Italian teachers, some of whom were early scholars. The Bible-schools are a principal feature of the work, but through the religious services held weekly at thirty different points, and by the

circulation of Bibles and tracts, there is a widely extending influence among men and women. Many who have been converted are actively engaged in evangelistic work. Other departments of the work are, work among soldiers and sailors, and the orphan home at La Spezia, which had its beginning during the terrible outbreak of cholera in 1883, and is now firmly established.

The mission is conducted by 3 English missionaries, with 30 native assistants. There are 19 day and Bible schools, with nearly 600 scholars, in the 20 stations and 21 sub-stations, on the Gulf of La Spezia, Tuscany, and the province of Venezia.

**Srinagar**, the capital of Kashmir, India, is the headquarters of the C. M. S. Mission in the valley of Kashmir, in which missionary tours have been made as far north as the Zaji La Pass, which leads to Little Tibet. The present staff consists of 1 missionary and 2 medical missionaries. Mrs. Bishop (better known as a traveller and writer by her maiden name of Isabella Bird) has given money to build a woman's hospital here, as a memorial to her late husband, Dr. John Bishop. The Maharajah gave an excellent site. Thirty patients will be accommodated, and the ladies of the Church of England Zenana Missionary Society are to have control of it.

**Srivillipattur**, a city in the Tinneveli district, Madras, India, and centre of the local traffic of the state. It has a temple with an annual car procession attended by about 10,000 people. Population, 18,256, Hindus, Moslems, Christians. Mission station of the C. M. S.; 2 missionaries, 43 native helpers, 495 church-members, 24 schools, 593 scholars.

**Stack, Matthew**, b. Maukendorf, Moravia, Austria-Hungary, March 4th, 1711. In his early youth he had deep religious impressions, and leaving Moravia he went to Herrnhut in Saxony. Soon after his conversion he received from Count Zinzendorf an impression of the condition of the Greenlanders which led him to devote himself to work among the heathen. He set out with his cousin Christian Stack and Christian David for Copenhagen January 19th, 1733. On their arrival they found that the mission under Egede was about to be abandoned, communication with Greenland closed, and their project was regarded as romantic and ill-timed. They applied to Count Von Pless, the king's chamberlain, who fully stated the difficulties. "How will you live?" he asked. "We will cultivate the soil, and look for the Lord's blessing." "There is no soil to cultivate—nothing but ice and snow." "Then we must try to live as the natives do." "But in what will you live?" "We will build ourselves a house." "But there is no wood in that country." "Then we will dig holes in the ground, and live there." "No," said the count, seeing their faith, "you shall not do that. Here are \$50 to help you: take wood with you." Other persons aided them. The king decided to reopen communication with Greenland, and gave them a letter to Egede, commending them to his kind attention.

Matthew Stack embarked with his two friends April, 1733, and after six weeks' voyage reached Ball's River, and selected a place for a mission, and called it New Herrnhut. In commencing his

work Matthew Stack encountered great obstacles. The language was difficult of acquisition; the natives not only refused to listen to him, but were positively hostile, in various ways annoying and persecuting him. They mimicked his reading, praying, and singing; interrupted his devotions by hideous howling and beating of drums. They stoned him, destroyed his goods, attempted to send his boat out to sea, and even sought to take his life. He was often in straits for provisions, and obliged to buy seals from the Greenlanders, who sometimes refused to sell them at any price. Often he had to live on shell-fish and sea-weed, a little oatmeal mixed with train oil, and even old tallow-candles. But, nothing daunted, he toiled on, when, after five years of privation and suffering, he had the reward of his patient endurance. As one of his associates was copying a translation of the Gospel of Matthew some natives from South Greenland passing by stopped, and asked what was in that book. On the missionary's reading the story of God's love and the sufferings of Christ to save us, Kajarnak, one of the savages, said with much earnestness, "How was that? Tell me that once more, for I too would fain be saved." He became a Christian, was baptized, labored faithfully for Christ, and died in faith the following year. His companions through his efforts were converted, and soon three large families pitched their tents near the missionary that they might hear more of the gospel. In his seventh year Stack baptized the wife, son, and daughter of Kajarnak. The wife became as active and useful as the husband. In 1741 Stack visited Germany, married, returned to Greenland in 1742, and found the work progressing and the mission established on a sure footing. In 1747 he had more than a hundred Greenlanders at the Lord's Table. After forty years spent in the Greenland Mission, he went in 1771 to Wachovia in North Carolina, and for years devoted himself to teaching the children in Bethabara, N. C. In 1783 he united with the Salem Congregation in celebrating the semi-annual centennial jubilee of the Greenland Mission. In 1785 he was rendered helpless by a fall. When told that the Master would soon come and call for him, he raised his clasped hands, and said with deep emotion, "Yes, dearest Saviour, come soon, come soon." He died December 21st, 1787, in the 77th year of his age.

**Stallybrass, Edward**, a missionary of the L. M. S. to Siberia from 1817-1839. His first station was Irkutsk. In 1819 he commenced a station at Selenghinsk. The early time of his residence here was spent in exploring the southeast of Lake Baikal with Mr. Rhamn, and later with Mr. Swan among the Chorinsky Buriats. On his return from a visit to England he made his home at St. Petersburg, and for some time was engaged in the revision of the Mongolian Scriptures. In 1840 the Siberian Mission was suppressed by the Russian Government, and he returned to England, arriving July 13th, 1841. He died at Shooter's Hill, Kent, July 25th, 1884, aged 91.

**Steinkopff**, a town in Cape Colony, Africa, a little south of the Orange River, east of Port Nolloth. Mission station of the Rhenish Missionary Society; 1 ordained missionary, 1 female missionary, 6 native workers, 2 out-stations, 220 communicants, 200 school-children.

**Stellenbosch**, a town in Cape Colony, South Africa, 25 miles by rail east of Cape Town. Population, 3,173. Mission station of the Rhenish Missionary Society; 4 missionaries, 2 ladies, 15 native workers, 1,000 communicants, 310 day-scholars.

**Stendal**, a town in North Natal, Africa, on a branch of the Chikela River, southeast of Ladysmith and northwest of Hermannsburg. Mission station of the Berlin Evangelical Society (1860); 1 missionary, 1 native helper, 104 church-members, 28 scholars.

**Stewart, Charles Samuel**, b. Flemington, N. J., U. S. A., October 16th, 1795; graduated at Princeton College 1815, where he was converted in the great revival. He first studied law and afterwards theology, graduating at Princeton Seminary, and sailed as a missionary of the A. B. C. F. M. for the Sandwich Islands in 1823. On account of the ill-health of his wife he returned home in 1825. He lectured extensively in the Northern States in behalf of missions. In 1828 he was appointed chaplain in the United States navy. This position enabled him to visit nearly all parts of the world, and furnished material for the works afterwards published. He was stationed for many years at New York, and in 1836-7 edited the U. S. "Naval Magazine." In 1862, on account of failing health, he was retired, and at his death he was the senior chaplain in the navy. In 1863 he received the degree of D.D. from the University of New York. He died at Cooperstown, N. Y., December 15th, 1870, aged 75.

**Stoddard, David Tappan**, b. Northampton, Mass., U. S. A., December 2d, 1818. His early education was at Round Hill Academy. He studied at Williams College; graduated at Yale College 1838, taking high rank as a scholar, especially in the physical sciences. Having consecrated himself to the work of the ministry, he declined an invitation to go on an exploring expedition with Captain Wilkes. After graduating he became tutor at Marshall College, Pa. While there he was offered a professorship in Marietta College, Ohio, but declined it, and entered the Theological Seminary, Andover. Before completing his course he was appointed tutor in Yale College, and accepted the position. Impressed with the conviction that he ought to be a missionary, he was licensed and ordained, and having offered himself to the A. B. C. F. M., was appointed to the Nestorian Mission. In 1843 he embarked for Smyrna. Before going to Oroomiah he visited several mission stations in Turkey. After learning Turkish he on reaching his station commenced Syriac, that he might preach and also might assist Dr. Perkins in his translation of the Scriptures into modern Syriac. In five months he was able to instruct a class of Nestorian youths, and the male seminary was reorganized and committed to his care. In 1846 a revival occurred, of which he gave an interesting account to the Board. In 1847 the cholera raged fearfully in Oroomiah. Mr. Stoddard's health being impaired, he went, by medical advice, to Erzeroum. He returned an invalid. The death of his wife in 1848 at Trebizond depressed him. With consent of the Board he took his orphan children home, intending to return as soon as they were provided for. He devoted his time to

travelling through the country and presenting the claims of the missionary work. His labors were arduous and incessant. He re-embarked in 1851. Soon he began to instruct his older pupils in theology, to prepare them for preaching to their countrymen. Besides his other work, he prepared a grammar of Modern Syriac, published in the "Journal of the American Oriental Society" in 1855. Having taken his telescope with him, he pursued the study of astronomy, and furnished Sir John Herschel observations on the zodiacal light. He also prepared an extended notice of the meteorology of Oroomiah, published in "Silliman's Journal." His theological lectures, embracing a full course of doctrinal theology, were delivered in Syriac. After a visit to Tabriz to consult with the Russian consul in regard to plans for averting a threatened attack on the missions by the Persian Government, he was attacked with typhus-fever, and died January 22d, 1857. He had been connected with the Nestorian Mission fourteen years. "His talents, his varied acquirements, his energy and activity in the midst of weakness, his humility, his devoted piety, his kindly sympathy and warm affection, his winning gentleness, meekness, simplicity, and godly sincerity, made him decidedly 'a man of mark,' and secured from all who knew him high respect, and from very many ardent attachment."

**Stone, Seth Bradley**, b. Madison, Conn., U. S. A., April 30th, 1817; graduated at Yale College 1842, Union Theological Seminary 1850; embarked as a missionary of the A. B. C. F. M. for Africa, October 14th, 1850; was stationed among the Zulus. His health having failed, he returned to the United States in 1875, and died in New York June 27th, 1877. The mission say of him: "He was a faithful, hard-working missionary for twenty-four years among the Zulus. A close student of the Zulu language, he translated portions of the Old and New Testaments. He published an edition of church history in Zulu, also a summary of general history. Thirty-nine of the hymns in our new hymn-book were translated or composed by him."

**Straits Settlements**, a crown colony of Great Britain, comprises Singapore, Penang (with Province Wellesley), and Malacca, all of which are treated of in separate articles. In 1886 the Keeling or Cocos Islands, a small group 1,200 miles southwest of Singapore, owned by an English family, were placed under the government of the Straits Settlements, and in 1888 an uninhabited island 200 miles southwest of Java, named Christmas Island, was also added to the Straits Settlements.

**Strict Baptist Mission**.—Hon. Secretaries: Josiah Briscoe, 58 Grosvenor Road, Highbury New Park, London, N., England; I. R. Wakelin, 33 Robert Street, Hampstead Road, London, N. W., England.

The Strict Baptist Mission was established in 1861 simply as a church institution, with but one missionary, but has since become a denominational society supported by more than 50 churches. Its work was commenced in 1861 at Talleygaum, a populous village between Bombay and Poona. In 1866 this work was relinquished, a station having been in the

meantime opened at St. Thomas' Mount (9 miles south of Madras). Here a church with a native pastor was formed in 1870. A Bible-woman and 5 school-teachers are now employed at this station. In 1871 a church was formed at Poonamallee, Madras; here there are also three schools.

In 1882 application was made to the committee to take under its care a station at Tinnevely, left vacant by the death of Mr. Arnlapen. There were at this station in 1888 56 baptisms.

The mission to Ceylon was commenced in 1868. There are now six stations under the Society's care, in all of which there are day and Sunday schools; at Jaffna a church has been formed with 16 members.

**Stronach, Alexander**, b. Edinburgh, Scotland, April 15th, 1800; was an evangelist of the Irish Evangelical Society; ordained August 1st, 1837; sailed August 7th the same year as missionary of the L. M. S. for Singapore, arriving March 5th, 1838. In 1839 he took the place for a time of Mr. Davies at Penang. In August, 1843, he attended the conference of the L. M. S.'s missionaries at Hong Kong, and also the general convention of missionaries held from August 22d to September 4th, to discuss the subject of Scripture translation. He then returned to Penang, and, on the removal of the missionaries to China, he returned June, 1844, to Singapore, and conducted the Chinese department of that mission. Leaving that place May 1st, 1846, he went to Hong Kong, where he superintended the type-foundry, and also assisted in the mission. In August he went to Amoy, where, assisted by Mrs. Stronach, he conducted a boarding-school for Chinese boys. His health failing, he returned to England in 1869, retired from the service of the Society in 1870, and died in London February 6th, 1870.

**Stronach, John**, b. Edinburgh, Scotland, March 7th, 1810; studied at Edinburgh University and Theological Academy, Glasgow; was ordained August 10th, 1837, with his elder brother Alexander, and sailed as a missionary of the L. M. S. for China, reaching Malacca March 2d, 1838. He attended the Hong Kong conference (see above), and on the opening of the ports of China he went to Amoy and commenced a mission there. Mrs. Stronach sailed for England November 10th, 1845, for her health, but died at sea near England, March 7th, 1846. In May, 1847, Mr. Stronach removed to Shanghai, having been appointed one of the delegates for the revision of the Chinese version of the New Testament. On the completion of that work he returned to Amoy in 1853. On March 17th, 1876, he left Amoy, and, after visiting Japan, proceeded via America to England, arriving January 6th, 1877. In 1878 he retired from foreign missionary service. He died in Philadelphia, U. S. A., October 30th, 1888, after forty years' uninterrupted labor in China. Mr. Sadler, his colleague, says: "His powers of a literary and intellectual kind were of no common order. He stood well in his university, and made a great mark in the translation of the Bible into Chinese, known as the Delegates' Version. It was a charm to hear him speak Chinese. He was a most idiomatic speaker. His literary ability did not cease with Bible translation, but could be directed to the making of tracts. One

of these, called the 'Hick bun' (or Inquirer), was a masterly setting forth of the difficulties felt by a literary Chinaman, and the answers of the missionary. He assisted also in revising Dr. Douglas' dictionary of the Amoy language. He was greatly blessed as an evangelist in Amoy, and labored indefatigably in starting stations, appointing native ministers and working with them. His strength and high spirits, as well as his fund of knowledge, made him very attractive to the Chinese, and to all who wished to become Chinese in their power of speaking the language. He was thoroughly at home in street-preaching, and would hold an audience in a remarkable way. His fund of humor was bewitching. And his good-nature in bearing abuse without resenting it won the heathen to the Saviour."

**Sturges, Albert A.**, b. Granville, Ohio, U. S. A., November 5th, 1819; graduated at Wabash College 1848; Yale Divinity School 1851; embarked January 11th, 1852, as a missionary of the A. B. C. F. M. for Micronesia, reaching Ponape the following September.

He labored most happily for thirty-three years at his missionary station on Ponape. He showed great tact in his relations with the natives, and skill in drawing out the activities of the church-members. Much of his time was given to the translation of the Scriptures, and he had the joy of seeing the New Testament completed, and in the hands of the people. In his last letter, written from Ponape, just before a paralytic stroke which he had in 1885, he says: "I cannot tell how thankful I am to be here, and to have so much strength given to me to preach the gospel to these needy people. Especially on the Sabbath is my heart full of gratitude to the Master and to the Board for sending me to help these infant churches into a better life." In 1885 his health required him to return home, where, though in much physical weakness, he carried on the work of translation. He died at Oakland, California, September 4th, 1887.

**Suchau** (Soochow) is regarded by the Chinese as one of the richest and most beautiful cities in China. It is situated on a cluster of islands in Ta hu, "Great Lake," 70 miles northwest of Shanghai, with which it is connected by a network of streams and canals. Its walls are 10 miles in circuit, and the suburbs extend for many miles around, while an immense population lives in boats. The rebels captured it in 1860, and left it, when recaptured, in 1865, a ruined city. But it is rapidly recovering from that calamity. The beauty of the women, and the picturesqueness of its location, with the many fine buildings, cause it to be celebrated in proverb and poetry. Its silk manufactures are of especial note, but all Chinese manufactures are produced in great abundance and of superior quality. Several channels connect it with the Yangtze, and small steamers at high-tide reach the many important villages and towns in the surrounding districts. The population is estimated at 500,000, and from the top of one of the high pagodas can be seen an area containing a population of 5,000,000.

Mission station of the Southern Baptist Convention; 1 missionary and wife. Methodist Episcopal Church (South); 2 missionaries, 2 female missionaries (1 a physician), 1 hospital, and 1 high-school. Presbyterian Church (North); 2 missionaries and wives, 25 members, 72 day-

scholars. Presbyterian Church (South); 2 missionaries and wives, 2 female missionaries.

**Suchau**, a city in Szchuen, China, on the Yangtze River, 1,600 miles from Shanghai; has recently been occupied by the A. B. M. U., two missionaries leaving for that region early in 1890.

**Sukkur**, a town in Upper Sindh, India, 200 miles from Haiderabad and nearly 300 from Karachi. Mission station of the C. M. S. (1887); 1 missionary, 27 communicants.

**Sulu Islands**, an archipelago lying between Mindanao, the southern island of the Philippines, and the northeast extremity of British Borneo. By a protocol, signed at Madrid in 1885, Spanish protection is recognized over this archipelago. There are over fifty islands, the largest of which is 36 miles long and 12 broad. No Protestant mission work is carried on in these islands.

**Sumatra**, one of the largest and richest islands of the East Indian Archipelago, extends 1,047 miles from northwest to southeast, lying between latitude 5° 40' north, and latitude 5° 59' south. Its area is estimated at 160,000 square miles, and the greater part of the island belongs to the Dutch Government, though many of the interior districts have not been brought under complete subjection. Throughout the whole length of the island extends a range of lofty mountains, which lies nearer the western coast than the eastern, hence on the eastern slope there are several large rivers, but the watercourses on the western slope are comparatively short. Sugar-cane, coffee, rice, and spices are the principal products, though much fine timber and many tropical fruits are found in abundance. The greater part of the population belong to the Malay race, but it is probable that they have absorbed many aboriginal tribes, a few remnants of which are found in the interior, such as the Kubus, who seem to have a mixture of Negrito blood, and the Battaks. These latter differ in many points from the Malay type. They are somewhat undersized, with broad shoulders and rather muscular limbs. Their eyes are large and black, with heavy brown eyebrows. These people inhabit the country around Tobah Lake, about midway between the east and the west coast, near latitude 3° north. Their language contains words of Sanskrit origin, and has evidently been affected by Javanese, Malay, Macassar, Sundanese, and Tagal influence. Another peculiar tribe are the Redjangers, who use distinctive characters, which they cut on bamboo with their short kreeses or daggers. The possessions of the Dutch Government in the island of Sumatra are divided into the residencies of the West Coast, the East Coast, Benkulen (the extreme southwestern coast), Lampongs (southeastern coast), Palembang (southeastern and central), and Atjeh, the northern extremity. The principal towns are: Pedang, on the west coast, about latitude 1° south, the residence of the governor, with a population of 15,000, including a Chinese settlement and a European quarter; Benkulen, the capital of the Residency of that name, with 12,000 inhabitants; Palembang, in the Residency of Palembang, has 50,000 inhabitants, with barracks, hospitals, one of the finest mosques in the Dutch Indies, and a tomb, said to be that of Alexander the Great. Included

in the Dutch possessions of Sumatra are various islands which are contiguous to it. On the west coast, under the Residency of that name, are the Banyak Islands, Nias Islands (q.v.), Battu Islands, Nassau Islands, and Engano. On the east are Bengkalis, Reau-Lingga Archipelago, and Banca. The latter is separated from Palembang by Banca Strait, and has an area of about 5,000 square miles, and a population of about 7,000.

The Missionary Societies at work in Sumatra are: (1) The Rhenish Missionary Society, with stations at Sipirok, Bungaboudar, Pranserat, Pangaloan, Csigonpulan, among the Battaks; (2) The Java Comité, with stations at Sinnapilapil and Haranbaru, near the west coast; (3) The British and Foreign Bible Society, with colporteurs in the seaports and along the coasts of Sumatra. Scriptures—New Testament and parts of the Old Testament in Malay; New Testament and Psalms in Nicobar for the Battaks of North and South Sumatra.

**Sundanese Version.**—The Sunda belongs to the Malaysian languages, and is spoken by about 4,200,000 of the 18,000,000 inhabitants of Java. Of these about 2,000 are Christians, and their numbers are increasing. There is as yet no complete Bible in the Sundanese, and this fact must be ascribed to the great difficulties in mastering the language. In 1870 the British and Foreign Bible Society published an edition of the Gospel of Luke, translated by the Rev. G. J. Grashius. In the mean time Mr. Cooloma, of the Netherlands Missionary Society, had undertaken a translation of the New Testament into the Sundanese, which was published by the Netherlands Bible Society at Leyden in 1878, in Roman characters. The same Society also published in the same year an edition of the Gospel of Luke in Arabic characters, also prepared by Mr. Cooloma. In 1877 the Netherlands Missionary Society requested the British and Foreign Bible Society to undertake the publication of Mr. Cooloma's translation of the Old Testament. It published in 1878 the Book of Genesis, and in 1882 the New Testament.

(Specimen verse. Luke 15: 18.)

Ajeuna mah dek indit ngadeuheusan ka bapa, sarta rek oendjoekan kijeu: Noen ama, simkoes ring geus tarima migawe dosa ka sawarga saréng di pajoeneum ama.

**Sunday-Schools.**—Christianity is pre-eminently the religion which takes special interest in the young. Ever since childhood was ennobled by the example and teachings of Christ, it has been a well-known truth that the child or the youth is more susceptible to Christian teaching than the adult; what might be called the chance of Christian life diminishes in an increasing ratio as the years increase. The Sunday-school is thus one of the most important agencies for the spread of the gospel, and at times it is the only means which can be employed. The character of the work and its relation to the church varies greatly in point of time and influence, and may be divided, as is other mission work (see Methods of Missionary Work), into two great classes: 1. Evangelistic; 2. Pastoral.

The latter division may be dismissed with but a few words. The character of the work,

the necessity for it, the methods used, are exemplified in all Christian communities, and are substantially the same in all lands, and among all people, where a church has been gathered together. In this work the Sunday-school is the nursery of the church, from which come the future fathers and mothers in Israel; and the church that ignores this important work will rapidly feel the effect on its stability and future usefulness.

As an evangelistic agency, the Sunday-school differs from the ordinary Sunday-school of Christian communities in that it becomes the parent of the church, and is thus the reverse of the preceding. Where bigotry, ignorance, superstition, and prejudice rule the natives of foreign countries; where immorality, scepticism, and sin in all its bold, defiant forms, flourish openly in the wilder sections of so-called Christian countries—the Sunday-school is oftentimes the only evangelistic agency that can be employed. The nature of children—unsuspecting, frank, innocent, and trustful—will aid in the work of interesting and instructing them; the instinct of parental love will lead people to welcome such efforts in behalf of their children, even when ignorant themselves, or seemingly hopelessly depraved; and by first reaching the children an entrance can be gained into homes whose doors would otherwise be closed. Then gratification at the kindness done the child will remove prejudice and disarm opposition, which otherwise would be an insurmountable obstacle to the missionary.

Under this head of evangelistic or missionary agencies the account of the following societies will fairly present the work which has been done and is now in progress along the lines thus briefly defined.

**Sunday-School Union, The American.**—The American Sunday-School Union was organized in Philadelphia in 1824; and the Philadelphia Sunday and Adult School Union, formed in 1817, some other Sunday-School societies being merged in it. It had two principal objects: *First*, to establish and maintain Sunday-schools for the benefit of neglected children and communities, and to aid in improving existing schools. *Second*, to publish and circulate moral and religious literature. Its first purpose is accomplished by the employment of Sunday-school missionaries, who devote their entire time to exploring destitute settlements and neighborhoods in the newer States and Territories, and in the older States, especially in the Central, Southern, and South-western States. Each missionary visits from house to house, consulting with persons representing different views; secures their approval and sympathy; holds religious meetings; persuades the people to establish a Bible-school where none exists; shows them how to conduct it; aids them in procuring Bibles and other suitable books; watches over each new school to secure its growth and permanence, and revives and aids other feeble schools, whether denominational or Union. He thus successively canvasses each neighborhood and district in the county, and then passes on to those of another county, until the entire field to which he is appointed is supplied with successful schools. In this effort all evangelical denominations unite, and the schools thus organized and maintained become *nuclei* for the formation of churches of the denomination which is

the majority in the vicinity; sometimes two or more churches are formed from a single school.

The money for the support of these missionaries is contributed by Christian people of all denominations, who are interested in the moral and religious welfare and prosperity of the youth of our country. The number of these missionaries is large, and is constantly increasing; 95 are now employed. The greatest difficulty encountered is the procuring of men in every way qualified, by intelligence, industry, patience, perseverance, a pleasing address, and unquestioning faith in God, for the work. Some of these now in the field are veterans of many years' service. One, Rev. B. W. Chidlaw, D.D., has taken out his commission in 1890 for his fifty-fifth year of continuous labor in the cause. Another, a layman, Stephen Paxson, of blessed memory, went to his reward, after forty years of such labor as very few men could have performed. And Rev. John McCullagh of Kentucky died in June, 1888, after about fifty years' service. In 1890 the outlay for the prosecution of the missionary work was \$106,186.24.

The amount of good accomplished by this faithful band of workers can never be known in this life. Their record is on high, and will be declared before an assembled universe. But a few figures gleaned from the records of the Union will indicate its vastness:

	From 1824-1890.	Year end'g Mar. 1, 1890
Schools organized.....	85,896	1,685
Teachers in these schools.....	518,201	7,353
Scholars " " ".....	3,554,958	59,432
Schools aided by missionaries....	153,265	1,852
Teachers in the schools aided....		12,788
Scholars in these schools.....	9,712,218	120,792
Schools previously reported aided, and aid continued.....		4,461
Containing teachers.....		22,685
scholars.....		210,527
Bibles distributed in 1889-90.....		6,788
Bibles distributed in the thirteen years 1876-1889 about.....		53,000
Testaments distributed in 1889-90.....		9,337
Testaments distributed in the thirteen years 1876-89, about.....		105,000
Visits to families in 1889-90.....		42,222
Sermons and addresses delivered.....		12,020
Miles travelled by missionaries, about 18½ times round the globe.....		463,243

About \$8,300,000 worth of the Union's publications have been circulated by donation and sale, through this missionary agency, in the sixty-six years of the existence of the Union.

The aim of the Union, from its first organization, has been to call into Christian activity and usefulness the lay members of the churches, and induce them to consecrate themselves to Christ's work. The president, vice-presidents, the thirty-six managers, the corresponding and recording secretary and treasurer, are all laymen; but ministers may be employed as editors, secretaries, and missionaries. Yet very many of the missionaries are laymen.

But the aims of the Sunday-School Union extend farther than the employment and maintenance of Sunday-school missionaries and the establishment and aid of Sunday-schools, important as these objects are. It seeks also to impart to adults as well as to children such religious instruction and knowledge as will lead them to Christ and make them wise unto salvation. While it avoids all those doctrines which are matters of controversy, it aims to give to all whom it can reach a better knowledge of the Scriptures and of the plan of redemption, and attempts by its books and periodicals to develop

a taste for a pure and Christian literature, and to attract both youths and adults to good books, and induce them to abandon the many vile and infidel works, and the foul and unwholesome issues of the secular press, which are leading them to destruction. It has published more than 2,300 books, and now issues 12 periodicals, semi-monthly, monthly, and quarterly, all devoted to religious and Sunday-school instruction. These papers and periodicals are ably edited, finely illustrated, and very interesting, and they have a wide circulation. The books and publications of the Union may be divided into three classes: 1. The Question Books, Graded Lessons, Lesson Helps, Scholars' Guides, Records, Hymn and Tune Books, and Maps, Charts, and other appliances for direct Sunday-school instruction. These number over 200. 2. Practical aids for Sunday-school and Bible-class workers, as well as for pastors and others. There are about 75 volumes of these, all of moderately large size, including Schaff's and other Bible Dictionaries, Bissell's Biblical Antiquities, Rice's People's Commentaries, Biblical Geography, Allibone's Bible Companion, Nicholl's Introduction to the Scriptures, Scripture Biographical Dictionary, etc. 3. About 2,000 Sunday-school books, carefully examined and edited, and of great interest. Narratives, biographies, historical and descriptive works, stories, inculcating temperance, purity, a Christian life, and philanthropic sacrifice for others. Every writer whose books have been examined and accepted has been scrupulously careful to send forth "no page, which, dying, he might wish to blot." And these books are sold, donated or distributed through the missionary and other agencies of the Union by scores and often hundreds of thousands of copies. They go on the frontiers, in the new States and Territories of the West, Southwest, and South; reaching families and communities, where books, except the vile, obscene, and infidel publications and newspapers, are not found, and furnish to the young the only wholesome reading to be obtained. This powerful agency for good, both in its publication and missionary departments, should be greatly enlarged and increased. The Union has also done a great and good work in aiding by money grants the translation and circulation in foreign tongues of some of its best books by missionaries and missionary societies. Many of these have been put in circulation in India, China, Japan, and Burmah, and not a few in France, Italy, Germany, and Greece.

The action of the Union toward all other publishing and missionary societies has been uniformly kind and helpful; many denominational Sunday-schools have been aided, and many libraries donated to these schools, and hundreds of vigorous churches have started from the Union schools. They have demonstrated that unity of action and Christian love could coexist with the largest charity, and that by this unity of action the cause of the Redeemer would be greatly benefited and God would be glorified.

**Sunday-School Association, The Foreign.** Headquarters, 130 State Street, Brooklyn, N. Y.—This association is composed of a number of men and women voluntarily united for the purpose of establishing and aiding Sunday or Bible-schools in all non-English-speaking countries. It was incorporated in 1878, but its work practically began in 1856.

The working force of the Association consists of a president, A. Woodruff, 130 State Street, Brooklyn, N. Y., a recording secretary, a corresponding secretary, a treasurer, eleven trustees, and a corps of forty or fifty letter-writers. Its plan of work is to secure correspondence in foreign countries, and by means of systematic letter-writing to become acquainted with the spiritual condition of those lands, the need of religious instruction, the best method of supplying their need, and then suggestions are given, plans for the establishment of Sunday-schools are formulated, and, if necessary, money or books are donated, and the schools are inaugurated. The correspondents are sought out by means of reports of the various religious societies; through magazines, missionaries, colporteurs, Bible agents, government officials, travellers, and personal friends. The vast amount of correspondence rendered necessary is conducted by the corps of letter-writers, who are divided into four committees: Spanish, Italian, German, French, one of which meets every week to read the letters received from its particular countries, and to recommend applications. A general meeting is held once a month, at which letters are read and supplies voted.

The principle which underlies the methods of the Association is that the Sunday-school is particularly adapted to those fields which are untilled from want of laborers and means, by reason of the following facts: 1. It has a capacity for utilizing any number of Christians too small for the work or support of a preacher, and gives them an opportunity for individual work and growth. 2. It is economical, as compared with the cost of preaching services. 3. It avoids national and ecclesiastical prejudice by making each nation self-evangelizing. 4. It reaches the mind of the pupil at an age most impressionable, and least blinded by superstition, prejudice, or scepticism.

The various committees donate their services, and the work is thus conducted with a minimum expenditure of money for a maximum diffusion of influence. The various countries reached by this methodical correspondence are: *Spanish*: Spain, Portugal, Mexico, Brazil and other South American States. *German*: Germany, Austria, Russia, Bulgaria. *Italian*: Italy. *French*: France, and all countries not included in the work of the other committees, such as China, Japan, and Africa. The Association aims also to supply literature suitable for the young. From the report for 1889 the results of the work of the Association are given as follows:

**Distribution of Christian Literature.**—Six illustrated papers for children have been aided in their establishment and distribution. "Glad Tidings," in Japanese; "El Amigo," in Spanish; "O Amigo," in Portuguese; "La Feuille du Dimanche," in French; "Die Sonntag Schule," in German; and "Il Amico," in Italian. Last year 13,000 subscriptions were paid for these papers. Several books have been published. One, "Christie's Old Organ," will illustrate the diffusion of this work. First published in 1877, it has been translated into sixteen different languages, and previous to October, 1888, 21,500 copies were circulated in Germany, Hungary, Bulgaria, Belgium, Portugal, Greece, Syria, Japan, Bombay, Ceylon, Bohemia, France, Italy, Asia Minor, China.

Besides the publications of the Association, it also sends out copies of the "Sunday-school Times," "Peloubet's Notes," and the "Westminster Teacher," besides various helpful leaflets, tracts, and cards.

In Germany the 25th anniversary of the work was celebrated in 1888, at which time there were 3,000 schools, 30,000 teachers, and 300,000 pupils.

In Holland the last reports gave the number of schools as 1,291; teachers, 3,800; scholars, 141,640. The reports from other countries show a like gratifying progress in the work. The result of individual efforts is shown by one instance out of many, where a gentleman opened correspondence with Spain, and fifty flourishing Sunday-schools have already been organized, and fifty more have been started.

*Receipts.*—The Association receives donations from all sources, but especially from the Sunday-schools. Its work is carried on at a cost of less than six thousand dollars a year, no debt is incurred, and with the exception of a small sum for clerical work at headquarters, every cent of the money received is expended directly on the work. In addition to the annual report, a quarterly leaf is distributed, which is edited gratuitously by ladies chosen from the committees, and thus the claims of the foreign fields are presented.

The Association bases its claims for the efficacy of letter-writing on the example given by the apostles, and the precedent and authority of the New Testament, which is composed so largely of letters.

*Sunday-School Union's Continental Mission.* Headquarters, 55 and 56 Old Bailey, London., E. C., England.—The Sunday-School Union was formed in 1803. Until 1864 its efforts were confined to the improvement of methods of instruction in the Sunday-schools already established in Great Britain, the organization of new schools in destitute places, and to supplying these schools with books at reduced prices. These objects have been attained by means of a library and reading-room, containing 7,000 volumes for circulation, and 1,000 for reference, which is open daily, except Sundays, and is accessible to all teachers upon the annual payment of one shilling; training classes; a biblical and educational museum; Normal, Greek, Hebrew, and correspondence classes; college lectures, illustrated lectures for teachers and senior pupils, etc. In connection with the Union are Bands of Hope, Christian Endeavor Societies, Reading Circles, etc. The report for 1889 shows 18 Metropolitan Auxiliaries and 210 Country Unions.

In 1864 Mr. Albert Woodruff of New York, who had just completed a tour through the principal countries of Europe, pressed upon the committee so earnestly the needs of children in those lands that the Continental Sub-Committee was formed, to endeavor to extend among the nations across the Channel the blessings which the Sunday-school system had conferred upon the English people. At that time there were very few Sunday-schools in any part of Europe; now, owing in great measure to the efforts of this committee, there are about 3,000 in Germany, 1,500 in Holland, 400 in Switzerland, and large numbers in France and Sweden. During the past year (1889) 17 missionaries have been employed in this work in the countries above named.

The International Bible Reading Association, connected with the Sunday-School Union, has a membership of 232,000; 203,000 of these members reside in the United Kingdom, 6,200 in the United States, 2,500 in Canada, 2,350 in the West Indies, 450 in British Guiana, 16,000 in Australia, and 400 in South Africa. Branches of the Association have also been formed in India, Ceylon, Gibraltar, and Newfoundland, in China, Japan, Persia, Nicaragua, and other countries.

**Surat**, a town in Gujarat Province, Bombay, India. Climate hot, unhealthy, malarious. Population, 107,149, Hindus, Moslems, Parsis, Christians. Language, Gujarathi, Hindustani, English. Natives well-to-do, prosperous. Mission station Irish Presbyterian Church (1846); 1 ordained missionary and wife, 5 others, 16 helpers, 1 church, 53 church-members, 15 schools, 1,565 scholars, a high-school, and an orphan-asylum.

**Suri**, (Soory), the administrative headquarters of the Birbhoom district, Bengal, India; has a population of 9,000, and is a mission station of the Baptist Missionary Society; 1 missionary, 53 church-members, 307 day-scholars, 44 Sabbath-scholars.

**Surinam**: see Dutch Guiana, under Guiana.

**Surinam**, or **Negro-English**.—The Surinam or Negro-Dutch is spoken in Surinam, Dutch Guiana, and is a compound mainly of English and Dutch. A translation into this dialect was made by Moravian missionaries, and published at London in 1829. A revised edition of the New Testament, prepared by Hans Wied, together with the Psalms, was also published at London in 1846; and another edition of the New Testament was published in the same year by the Netherlands Bible Society at Bantzen. In 1865 the British Bible Society published a third edition of the New Testament and Psalms, and a fourth revised edition was published in 1888.

The edition, consisting of 3,000 copies, was issued under the care of the Rev. E. Langerfeld of the Moravian Mission, with which about 25,000 souls are connected, of whom over 8,000 are communicants.

(*Specimen verse.* John 3:16.)

Bikasi na so fasi Gadó ben lobbi kondre, va a gi da wan Pikien va hem, va dem allamal, dissi briebe na hem, no sa go lasi, ma va dem, habi da Liebi vo tehgo.

**Susu Version.**—The Susu belongs to the Negro group of the languages of Africa, and is spoken on the coast of Senegambia.

The Rev. Duport, a West Indian Negro, has translated the Gospels of Matthew, Mark, and John into the Susu, and they were published by the Society for Promoting Christian Knowledge about the year 1858. The New Testament was published by the same Society in 1883.

**Suto**, or **Lesuto**.—The Lesuto belongs to the Bantu family of African languages, and is spoken in Basutoland by the Bapeli, Migwamba, and other tribes of the Transvaal, Cape Colony, and Orange Free State. French missionaries translated the Scriptures into the Suto. As early as 1837 the Gospel of Matthew was published, and since that time detached portions

were added. In 1849 the British and Foreign Bible Society published the Psalms, the translation having been made by the Rev. E. Casalis of the French Protestant Missionary Society. In 1857 the New Testament was printed at Cape Town, and republished by the British and Foreign Bible Society at Paris in 1868, under the care of the Rev. E. Casalis. A revised edition, prepared by Mr. Ellenberger, was issued in 1873. Parts of the Bible, translated by Mr. Knothe of the Berlin Missionary Society, were issued at Berlin in 1870. In 1873 a revised edition of the New Testament was published at Morija, and in 1881 the entire Bible, prepared by Messrs. Pelissier, Arbousset, Ellenberger, and Mabilie, French missionaries, was published at London under the care of the Rev. A. Mabilie, who had brought the MS. from Basutoland to England. A new edition of the New Testament, with a few corrections and emendations, was published in 1867 by the British and Foreign Bible Society. The edition, which was in 32mo, consisted of 3 000 copies.

(*Specimen verse.* John 3:16.)

Gobane Molimo o ratife lefatsé hakálo, o le neile Mora oa oona a tsuetseng a 'notsi; gore e mong le e mong a lumelang go éena, a sé ke a fela, a mpe a be le bophélo bo sa feleng.

**Sutton, Amos**, b. Sevenoaks, Kent, England, 1798. His early history is interesting. A lady, one Sunday morning on her way to Sunday-school, saw some boys playing, and invited them to go to the school. They all refused but one, who said he would go if she would give him a shilling. She consented; he came with her, and continued to attend. That boy was Amos Sutton, who was for thirty years a missionary in India. Having studied theology with Rev. J. G. Pike, he was ordained at Derby, and sailed in 1824 for Orissa, India, as a missionary of the General Baptist Missionary Society. He was stationed most of the time at Cuttack. He preached in Oriya and in English, taught in the mission academy and was superintendent of the orphan asylums. He translated the whole Bible into Oriya, and made a second revision of the New Testament. He visited England and America. He returned to his mission from America in 1835, in company with Rev. Dr. Phillips, who was sent to the same field by the American Free Baptist Missionary Society. Dr. Sutton, besides translating the Scriptures, published an Oriya dictionary, grammar, and lesson-book, wrote three volumes of tracts in that language, and translated many English books for his scholars and converts. He died at Cuttack, Orissa, August 17th, 1854.

**Suvisheshapuram**, a town in the Tinnevely district, Madras, India. Mission station of the C. M. S. for 61 villages, with 4 native pastors, 54 other workers, 828 communicants, 942 scholars.

**Swahili Version.**—The Swahili belongs to the great Bantu family of languages, and is greatly affected by contact with the Arabic language. It is the *lingua franca* of Equatorial Africa. A translation into this language was undertaken by the Rev. Edward Steere (died 1882), who had been connected with the Central African Mission since 1863. The first portion of

the Bible, the Gospel of Matthew, was printed by the British and Foreign Bible Society in 1869, and the Psalms followed in 1870. In 1874 the Gospel of John was published, and in 1875 a reprint of the Gospel of Matthew under the editorship of Bishop W. G. Tozer, at Zanzibar. The Gospel of Luke, as translated by the Rev. J. Rebmann of the Church Missionary Society, was printed at the Crischona Press, near Basle, in 1876, the same Gospel having also been published in 1872 at Zanzibar, as translated by Abdul Aziz and Pennel. A revised edition of John's Gospel was issued in 1878, under the editorship of the Rev. T. H. Sparshott. The portions of the New Testament which were issued from time to time at Zanzibar were revised, including the Gospel of Luke as translated by Mr. Rebmann and Bishop Steere, and the New Testament as a whole was published in 1884, at London.

Of the Old Testament, the Book of Genesis was issued in 1883 by Archdeacon Hodgson, of the Universities Mission to Central Africa. The translation was the work of the late Bishop Steere. In 1884 the British and Foreign Bible Society published the Book of Joshua, which was translated by Archdeacon Hodgson, aided by a native of Zanzibar, once a slave, but at the time of publication a student at St. Augustine's College, Canterbury. This version, which was the first translation of the Book of Joshua in any East African language, was revised by the Rev. H. Geldart and Miss Thackeray. In 1890 the whole Bible was published, after twenty years' labor, in the Roman character. Besides the edition in Roman, the British and Foreign Bible Society issued in 1886 an edition of 500 copies of the Gospel of John in Arabic character, intended for those who know the Swahili language and only the Arabic character. The version has been transliterated by Miss Allen, who also carried the edition through the press.

(*Specimen verse.* John 3:16.)

Kwani ndivyo Muungu anvyoupena ulimwengu, akatoa na Mwana wake wa pekee, illi wote wamwaminio waupate uzima wa milele wala wasipotee.

**Swan, William**, b. June 21st, 1791, at Balgonie, New Brunswick; studied at the Theological Academy of Glasgow; sailed July 1st, 1818, for Siberia as a missionary of the L. M. S. His chief work was among the Tartars of the Buriat and Mongolian race on the frontiers of Siberia and Chinese Tartary, southeast of Lake Baikal. For eight years he itinerated with Mr. Stallybrass, but in 1828 made his permanent home at the Ona. During these years he, in conjunction with Mr. Stallybrass, completed the Mongolian version of the Scriptures. On its completion he visited St. Petersburg, and after a stay of ten weeks he obtained permission from the government to print it. He then went to England, married, and returned to St. Petersburg. In 1837 he returned to his station on the Ona. In 1840 the Siberian Mission was repressed by the government, and he went back to Scotland in 1841. His connection with the Society was then dissolved. He died at Edinburgh January 1st, 1866.

**Swatow**, a seaport of Kwangtung, China, is situated on the estuary of the Han River, 5 miles from the sea, 225 miles east of Canton

and 180 northeast of Hong Kong. It is a treaty port, with quite an active foreign commerce and large manufactories. Population, 300,000. Mission station of the A. B. M. U. (1846); 2 missionaries and wives, 1,085 members, 7 schools, 132 pupils. The missionaries' premises are at Kak chieh, a suburb opposite Swatow proper, across a channel of the river a mile wide. Presbyterian Church of England; 8 missionaries, 2 medical missionaries, 981 communicants.

**Swedish-Lapp.**—The Laplanders scattered throughout Sweden cannot understand the Bible published in Lapponeese, and accordingly the Gospel of Matthew has been translated into this form or dialect of the Lapp language. The translation was made by a Swedish missionary in Lapland of the name of Laestadius, whose father worked among the poor Laplanders. The British and Foreign Bible Society published this Gospel at Stockholm in 1880, with the Swedish in parallel columns, and up to March 31st, 1889, disposed of 2,000 copies.

**Swedish Missions.**—The first missionary work undertaken by Protestant Sweden was among the Lapps, or, as they are more properly called, the Finns, who in scattered nomadic tribes occupy the whole northern part of the country. That mission has on its records several names, as for instance that of Peer Fjellström, 1697-1764, which are still remembered with gratitude; but unorganized and unsystematized as it was, all its exertions and sacrifices were of no avail for a thorough success.

In 1638 a Swedish colony, 'Nya Svealike,' afterwards called "Vinland," now Pennsylvania, was founded on the Delaware in North America, and the Swede Campanius, who in 1642 began to preach to the Delaware Indians and compiled a dictionary of their language, was the first Protestant missionary to enter the New World. The colony was afterwards transferred to Holland, then to England, and finally to William Penn; but up to 1831 it continued to be served by Swedish pastors.

Meanwhile the powerful impulse which the Protestant mission received from England in the beginning of the present century made itself felt also in Sweden. In 1818 a mission paper was established, and in 1829 the first small mission society was founded at Göteborg. It was followed in 1835 by the Swedish Mission Society, and in 1845 by the Mission Society of Lund. In 1855 the latter was absorbed by the former, and in 1876 the Swedish Mission Society united with the Swedish Church Mission (founded in 1874), though, as will be seen, it was not wholly absorbed by it. Two other large societies were organized—the Evangelical National Institution in 1856 and the Swedish Mission Union in 1878. Besides these four great associations, quite a number of minor ones, still in their infancy, have sprung up and will be enumerated below.

**I. The Swedish Mission Society** (*Svenska Missionssällskapet*). Headquarters, Stockholm, Sweden.—Very soon after its foundation, January 6th, 1835, the Society was able to send out its first missionary to the Finns, Carl Ludwig Tellström, an artist, a painter. During his summer visits to their camps it had gradually grown upon him that though it might be well enough to paint their portraits, tents, flocks, etc., for the Swedish public, it would be better

if he could speak Christ down into their own hearts, and he became a missionary. Next year he was joined by two other young men, and the field proved fruitful to them. Their methods were: visits to the tents, preaching of the gospel, and some general instruction.

But an entirely new departure of singular efficacy was taken by a young Finnish girl, Marie Magdalene Mads-daughter, in 1864. By the preaching of the missionaries she had come to see and understand the misery in which her race lived. Then she learned Swedish that she might be able to speak to the king. She then walked two hundred miles down to Stockholm. Nothing daunted by suddenly finding herself in the midst of a great, rich, exceedingly elegant and exceedingly gay city, she picked out in the street the first lady who to her eyes seemed to look trustworthy, and in a short conversation she made that lady her patroness. Next day she had an audience with the king, and after talking with a number of influential men during a stay of a few days, she walked back to her native place with money enough to build a house or an asylum, or, as it is called, a "Children's Home," to which she could invite the children of her race to come and stay for some time and be instructed in that which is necessary, and also in something of that which is useful. The Society provided her "Home" with teachers, and so successfully did the plan work that it has now five such institutions established among the Finns, and several more in preparation.

A considerable portion of its annual revenue, which, in all, amounts to 21,487 kronor, the Society draws from the so-called Five-cents Circles. A person belonging to a certain social circle undertakes to collect five cents every week from every member of that circle who is willing to contribute, and pays over the sum every month to the Society. The trouble is very little to any one person in comparison with the result attained. Besides its annual revenue the Society owns invested funds to the amount of about 150,000 kronor, and by these means it supports its missions to the Finns, which it also directs independently, while, since its union with the Swedish Church Mission in 1876, it pays the surplus of its income into the coffers of that Society, and partakes proportionally in the direction of its mission to the heathen. The Society has its seat in Stockholm.

**II. The Evangelical National Society** (*Den Evangeliska Fosterlandsstiftelsen*). Headquarters, Stockholm, Sweden.—The Evangelical National Institution was founded in 1856 by Pastor H. I. Lundborg, as a consequence of a strong and widespread revival within the pale of the Swedish church, produced by the lay-preacher Rosenius. Propositions of union were made to it in 1875 by the Swedish Church Mission, but declined. It is the object of the institution, on the ground of the Evangelical Lutheran Confession and in harmony with the church of Sweden, to make itself the organ of all such free and spontaneous mission movements which may arise among the Swedish people. It consists of a great number of minor societies, generally called "Ansgar Societies" or "Evangelical Lutheran Societies," having a common head in their annual conference, which assembles in Stockholm and decides all important questions, and in their common board of directors, which consists of

twelve members elected by the conference, which has its seat in Stockholm. In 1887-88 the revenue of the institution amounted to 137,800 kronor, its expenses to 91,069 kronor. It also owns an invested fund from which old or sick missionaries are pensioned.

Since 1861 the institution issues a weekly paper, "Missionstidning," founded by Rosenius and edited by him until his death in 1869. In 1863 it established a missionary seminary at Johannelund, on Lake Mälär, a little outside of Stockholm. The seminary has at present eleven scholars, who, according to their educational advantages before their entrance, remain there from one to six years before they are sent out to the stations. Originally the institution undertook only home-mission work, and its labor was essentially evangelistic. But in 1861 it extended its activity also to foreign missions, and it now works in two different fields—among the Gallas in Eastern Africa, and among the Gonds in Hither India.

The mission to the Gallas was begun in 1865, on the advice of Dr. Krapf and Bishop Gobat, but the great sacrifices and enormous exertions it has cost do not seem to have brought proportional results. The difficulties do not arise from the character of the people. The Gallas, numbering between eight and ten millions, and inhabiting an inland region of Eastern Africa from latitude 3° south to latitude 8° north, have for centuries stood as a wall against Mohammedanism, but for Christianity they have on many occasions showed some sympathy. The difficulty is, how to reach them. From the north, through Abyssinia, the door is closed. Abyssinia is nominally a Christian land, with churches, monasteries, monks, and priests. But its Christianity is a petrified perversion, which makes the people utterly hostile to anything which looks like missions. To the east, along the coast, live the Somalis, and they and the Gallas are insinctively enemies. The first Swedish missionaries did not reach the Gallas at all, and up to date the principal result of the mission has been the establishment of 13 stations at Tendar, Ogauna, Frida, Kulluko, Massana, Amberderho, Eilet, Geleb, Godjam, McKullo, Djumma, Keren, and Arkeka, with 11 Swedish missionaries, 11 native helpers, 99 members, and 108 children in the schools.

The Mission to the Gonds, on the contrary, begun in 1877 on the advice of Dr. Kalkar, is very promising. The Gonds, inhabiting the forest-clad plateaus in the Central Provinces of India, belong to the old Dravidian population of India, but have in course of time become very much mixed up with and influenced by the surrounding Hindus. The Swedes have here 7 stations.—Sangor, Narsingpur, Chindwara, Nimpani, Betul, Amarvara,—with 20 male and female teachers, 64 members, 453 children in their day-schools, and 261 grown-up pupils in their Sunday-schools.

III. *The Swedish Church Mission* (*Svenska Kyrkans Mission*). Headquarters, Stockholm, Sweden.—In 1868 the General Assembly of the Swedish Church (*Kyrkomötet*) laid before the king a petition that the whole missionary activity should be organized by law as a function of the church, the state institution; and September 11th, 1874, the king authorized the establishment of the Swedish Church Mission, under a board of seven di-

rectors, with the Archbishop of Upsala as its permanent president. As above mentioned, the negotiations for a union with the other mission societies already existing did not succeed, but the Church Mission, nevertheless, immediately began work. It draws its revenue, amounting in 1888-89 to 46,406 kronor, with an expense of 58,060 kronor, from a general collection taken up on a certain day in all Swedish churches, and maintains a mission among the Zulus in Africa, and a mission among the Tamils in the southern part of Hither India.

The Zulu Mission was begun in 1876, on the advice of Bishop Schreuder, who had long wished to see the whole energy of all Scandinavian mission societies united into one common effort, made possible by the close relation between the languages and the fundamental unity of the confessions. An estate, "Rorke's Drift," was bought in Natal, just on the boundary of Zululand; and the mission has now 4 stations in Natal and 1 in Zululand, with 9 missionaries, 71 members, 68 children in the schools, and 326 heathen settlers on its grounds.

The Tamil Mission was also begun in 1876, in close connection with the Leipsic Tamil Mission, which has its central station in Tranquebar. The Swedish central station was located at Madura, and has now 9 out-stations, with 4 missionaries and 545 members.

IV. *The Swedish Mission Union* (*Svenska Missionsförbundet*). Headquarters, Christinehamn, Sweden.—The Swedish Mission Union was formed August 2d, 1878, in Stockholm, as the representative of the Waldenström faction, which separated from the Evangelical National Society because the latter clung rigorously to the Augsburg Confession, while there were certain minor details of said confession by which the separating faction would not be bound. The Union consists of 465 minor associations, with a membership of 53,688 persons. In 1888-89 its revenue amounted to 110,096 kronor, its expenses to 113,106 kronor. At its head stands a committee of seven, which has its seat in Stockholm, and is elected by the annual assembly of delegates from the associations.

The Union maintains a mission school at Christinehamn with 34 pupils, who generally remain there three years, and of whom 10 are preparing for missionary work among the heathen. It has stations in five different fields—Finn-marken, Russia, Congo, Alaska, and North Africa.

Among the Finns the mission was begun in 1880, and is now carried on by three missionaries at three stations—Wilhemina, Sorfeli, Malu. In the same year it was also begun in Russia, where at present seven missionaries are at work in five different places. The mission there, however, has principally the character of revival work, though at the station on the southeastern frontier the missionaries come in close contact with heathendom. The Congo Mission was started in 1881 and labored for some time in connection with the Congo Inland Mission, but has now 3 independent stations—Mukimbunga, Kibunfi, Diadia,—with 13 missionaries and helpers. The Alaska Mission works since 1886 among the Yakutats at St. Michel and Yakutat, with 5 missionaries; and the North Africa Mission since 1887, with 2 missionaries among the Jews in Algeria.

Among the minor mission societies, most of

whom simply support other societies with their money, we mention those which carry on independent missions.

V. *The Friends of the Finns* (*Lapska Missionens Vänner*). Headquarters, Stockholm, Sweden.—This Society was founded March 17th, 1880, by the Princess Eugenie, and is supported by a number of royal ladies. It has a revenue of 9,910 kronor, and supports two itinerant preachers.

VI. *East Gothland's Ansgarius Union* (*Öster-Götthland's Ansgariiförening*). Headquarters, Jönköping, Sweden.—With an annual revenue of 4,521 kronor the Society sent out in 1887 one missionary to the Gallas in East Africa.

VII. *The Swedish Mission in China* (*Svenska Missionen i Kina*).—This mission was begun in 1887 by Erik Falke, and labored for sometime in connection with the China Inland Mission, but its three missionaries are now preparing for the establishment of an independent station in the province of Shansi.

VIII. *Jönköping's Society for Home and Foreign Mission* (*Jönköping's Förening för inre och ytre Mission*).—The Society sent in 1887 one missionary to Honan, China.

IX. *Swedish Women's Mission among North Africa's Women* (*Svenska Kvinnors Mission blandt Nord Afrikas Kvinnor*).—The Society has since 1887 sent Swedish ladies to work among the Mohammedan women at Bona, Algeria.

**Swedish Version.**—The Swedish belongs to the Teutonic branch of the Aryan family of languages, and is spoken throughout Sweden. In the life of St. Bridget (died 1373), which was written shortly after her death, we are told that she had a translation of the Bible in her vernacular. This translation is said to have been prepared by her confessor, Canon Magnus Matthias of Linköping. King Magnus Erikson disposed in his will (about 1340) of "unum grossum librum biblic in swenico." In the "Swenska Bibelarbeten," which the librarian Klemming published at Stockholm 1848–55, 2 vols., we find a Pentateuch, probably from King Magnus' Bible; Joshua and Judges by Nils Ragwald or Rægevaldson, confessor at Wadstena (died 1514); Judith, Esther, Ruth, and the books of the Maccabees, by Jöns Budde of the Nädalend Monastery, Finland (died 1491); and the Apocalypse, and Gospel of Nicodemus, from the 15th century. In 1526 Laurentius Anderson, Chancellor of Sweden, published in connection with Olof Person, the New Testament at Stockholm, and the entire Bible, prepared after Luther's version, by the Archbishop Lars Person, was published, under the patronage of Gustavus Vasa, at Upsala, in 1541. A revised edition of this Bible was published at Stockholm 1617–1618, and often reprinted. A new revision undertaken by Johannes Gezchius, senior and junior, Bishops of Albo, was published in 1679 and 1728; and still another, undertaken at the command of Charles XII., appeared at Stockholm 1703. The most recent version of the New Testament is the translation by the Archbishop Lundberg of Upsala, and by the Professors Thorén and Johansen, which was published in 1882, and sanctioned by the church authorities and the king. This translation is now regarded as the authorized version of the Swedish Church. An excellent translation of

the Old Testament has been published by Prof. Melin (1865–1869). The British and Foreign Bible Society adopted the text of the edition of the Swedish Bible Society, and published its first edition, which was stereotyped, at London in 1828. The Society circulated the Scriptures in Swedish till the year 1884, when it withdrew, leaving the field to home organizations. Its circulation up to March 31st, 1889, was 3,258,441 portions of the Scriptures in Swedish, and 5,122 Swedish-English New Testaments.

*Specimen verse.* John 3: 16.)

Th så älskade Gud världen, att han utgaf sin enda Son, på det att hvar och en, som tror på honom, skall icke förgås, utan få ewinnerligt lif

**Syria and Palestine.**—*The Name.*—The geographical term "Syria" seems to have originated with the early Greek traders, who designated by it the land whose chief commercial city was Tsur, Sur, or Tyre. When the Arabs came into the land in the 7th century A.D. they called Damascus, Dimishk esh-Sham, and named the provinces of which they made it the capital Bar esh Sham. The Christian inhabitants of the land still call it "Suriyeh." The term "Palestine" comes from Pelesheth (פֶּלֶשֶׁת—"land of wanderers"), and refers probably to the nomadic tendencies of the early inhabitants. No form of the word "Palestine" (Philistia, Palestina, etc.) is at present in common use in the country. The term is historical rather than political, and defines that part of Syria which stretches from Dan (near Mt. Hermon) to Beersheba, and from the Mediterranean to the Syrian desert.

*Geography.*—Syria (Turk. *Suristan*) extends about 400 miles,—from the Taurus mountains on the north (latitude 37°) to Egypt (latitude 28°), and from the Mediterranean to the Syrian desert, an average width of less than 200 miles,—and contains 70,000 square miles. It is nearly continuous with the "Promised Land" and the kingdom of David. It is about the size of New England, Palestine east and west of the Jordan being of the size of Vermont and New Hampshire, and very similarly situated. Mountains on the north, the sea on the west, and deserts south and east give the land a somewhat remarkable geographical unity. The mountain ranges and river basins run parallel with the coast, rendering access easy from north to south. The Taurus Mountains send a spur off to the south not far from the coast. This is broken by the deep gorge of the Orontes (El-'Asi) River. The range takes a new start in the beautiful peak of Mount Casius near Antioch, and stretches down along the coast, receiving various names at different points. Between Antioch and Tripoli it is called from the people who inhabit its slopes the "Nusairiyeh" range, which terminates in Jebel el Husn. A low saddle in the hills comes next, and then the Lebanon range springs suddenly up to the height of over 10,000 feet; and twenty miles across the plain to the east the almost equally massive Anti-Lebanon starts off to follow its mate down the coast for a hundred miles. Lebanon gradually tapers down from 10,000 feet to 8,000, to 5,000, to 2,000, until it drops into the hills of Galilee, and reaches almost sea-level in the Esdraelon plain. Anti-Lebanon holds its own for over half its length, then drops; but gathering in power, as a final effort, throws up its southern peak of

Mount Hermon (Jebel esh Shaykh) 10,000 feet into the air. Between these two magnificent ranges runs the fertile valley of Cælo Syria (El Bukaa), from ten to twenty miles in breadth and averaging over 2,000 feet above sea-level. The Orontes drains the northern part of the Bukaa, while the Litany (rising not far from the sources of the Orontes) flows southward and breaks through to the sea in the latitude of Mount Hermon. At the foot of this mountain rises the Jordan ("the descender"). This strange stream is delayed in the great marsh called El Huleh (Lake of Merom) at about sea-level. Breaking away from this it tumbles down in a few miles over 600 feet below sea-level into the sea of Galilee (Bahr Tabariyeh). After lingering for 16½ miles at this level it next plunges down 667 feet in a distance (as the crow flies) of 66 miles, but winding about 200 miles until it throws its muddy waters into the Dead Sea (Bahr Lut), 1,300 feet below the Mediterranean. To this phenomenal sea (46 miles long and 5 to 15 miles broad) there seems to be no outlet. Although there is a geological depression from its southern end to the Akabah Gulf of the Red Sea, and although there are indications that its waters were once on a higher level, the Dead or Salt Sea could not have been connected with the ocean, because there is a rise of ground of 781 feet above sea-level in its way.

West of the Jordan and south of the Esdraelon valley the hills of Ephraim slowly rise, forming the great backbone of Palestine. A sharp spur is thrown off to the northwest, which ends in the rocky headland of Mount Carmel. But to the south the trend is continually upward past Samaria, Nablous, Shiloh, Bethel, Jerusalem, Bethlehem, until Hebron is reached. From thence the hill-country of Judea falls away into the Sinaitic desert. Deep wadies run off gradually to the Mediterranean, but to the east sharp gorges plunge precipitately down into the Jordan valley a thousand or so feet below sea-level.

South of Mount Hermon and to the east of the Jordan, Anti-Lebanon gives place to a moderately high mountain wall, for the most part precipitous on its western side, but sloping away into the Hauran region and toward the desert beyond. The mountains of Gilead merge into the mountains of Moab and are continued southward to the Arabian border. The Hauran has indications of volcanic action, and has a number of interesting mountain peaks. A few oases in the desert—such as Tadmor (Palmyra)—belong geographically to Syria.

*Population.*—The population of Syria has been variously estimated, and as no accurate census has been taken, no definiteness can be attained. Just at present (1891) the population seems to be waning. There are probably 2,000,000 inhabitants in the country who have been roughly divided as follows:

Mohammedans (Sunnites and Metawileh) .....	1,000,000
Nusairiyeh .....	250,000
Maronites .....	250,000
Orthodox Greeks .....	235,000
Papal sects .....	80,000
Jews .....	30,000
Ismailiyeh, Gypsies, etc. ....	30,000
Armenians .....	20,000
Jacobites .....	15,000
Druses .....	100,000
Protestants .....	6,300
Bedouin Arabs .....	60,000

2,076,300

Such is the estimate of 1881. Since then the Jews have increased in number, notably at Jerusalem. The cities have grown, while in every direction the rural population is declining. The larger cities are Damascus (200,000), Aleppo (120,000), Beyrout (100,000), Jerusalem (85,000), Tripoli (with its port, 25,000), Homs (20,000), Hamath (20,000), Zahleh (15,000), Nablous (15,000), Sidon, Nazareth, Acre, Hebron, and Jaffa (each 10,000), Antioch (6,000), Bethlehem (5,000), Haifa (5,000), and Tiberias (3,000). The western slopes of Mount Lebanon are the most densely populated parts of the country outside of cities.

*Race.*—From the earliest times there has been a notable mixture of races in Syria, yet all along the Semitic type has prevailed with a persistence truly remarkable. Flood-tides of Egyptians, Greeks, Romans, Koords, Armenians, Persians, Teutons, and Mongols have swept the country repeatedly, only to be as repeatedly driven out. The bad blood of many nations has soaked into the soil, and reappears in many channels; but the original race type, though modified, has absorbed the remnant of many nationalities so effectively that there is a typical Syrian resultant, which differs widely from the surrounding peoples. With the exception of the Bedouin Arab of the southeast, the Koordish Bedouiz of the northeast, the Turkish officials, the Armenian merchants, and the so-called Franks or foreign residents, the Syrian type is universal, modified, it is true, by hereditary religious customs and convictions, but holding its own through the centuries. It is characterized by a certain calculating shrewdness covered with an exterior of extreme politeness. The race-type is saturated with the despotic idea, which appears in every grade of society. Manual labor is counted ignoble. Religious differences have bred a mutual suspicion. Credit is almost unknown. Trade is a matter of sharp haggling over prices. The typical Syrian is proud, ambitious, loves display of ornament, cannot be trusted to obey to the letter, has a temerity of action on the basis of slight information, quickly yields to fear in the face of real calamity, and is thoroughly immersed in a gross materialism. A millennium of Moslem dominion and centuries of Turkish oppression have accentuated these faults. But wherever an opportunity has been given, a native force of character has come to the surface, so that even the precipitous slopes of Lebanon have been terraced thousands of feet above sea-level, and a restless desire to better their condition has sent whole colonies of Syrians across the oceans to Australia, South America, and to the United States. Common-school and higher education is having a marked effect upon the country, but the seeds of disunion and mutual hatred were planted too long ago to be materially affected during the short period, comparatively, in which western Christian influences have been brought to bear on Syria.

*Languages.*—With the Arabs in the 7th century came the Arabic tongue, which immediately became the language of trade. It was thus inevitable that it should become universal in the land. The older Syriac, a closely allied Semitic dialect, slowly succumbed, leaving behind broad marks of influence in the colloquial Arabic, so that a man's speech betrays the locality from which he comes. To the extreme north of Syria, in the region of Aleppo, the

Armenian (Aryan) language is frequently heard. The official language for the whole country is Turkish, while everywhere Moslems of all nationalities use Arabic as their religious language. Syriac remains the liturgical language of the Maronites and the Jacobites. North of Damascus there are several villages in which Syriac is still the vernacular. Hebrew is heard frequently in Jerusalem. Linguistically, then, Syria is a unit and is closely allied in this particular with the Euphrates region, Arabia, and Egypt.

*Commercially.*—The centres of commerce in Syria are Damascus (which means "seat of trade"), Aleppo, Alexandretta, Tripoli, Beyrout, Haifa, Nablous, and Jaffa. Homs, Hamath, and Jerusalem might also be mentioned. Railways have been projected, but the line running from Jaffa to Jerusalem is the only one in operation, unless the road in Cilicia running from Mersina to Adana should be counted as within the limits of Syria. A fine diligence road connects Damascus with its seaport Beyrout. Other roads, such as those connecting Tripoli and Homs, Homs and Hamath, Jaffa and Jerusalem, Jerusalem and Hebron, Haifa and Nazareth, Beyrout and Ain Zehaleh, and Beyrout and Brumana, are in operation, while other roads are in process of construction. Otherwise the highways of Syria are little better than bridle-paths, and transportation is expensive. The Hauran is the granary of the country. Olives, figs, licorice, oranges, grapes, and apricots are important crops. Maize, tobacco, and white potatoes are freely raised—America's gift to Syria. Soap from olive oil is made in quantities at Haifa and elsewhere. The silk-worm is busy all over. Mt. Lebanon, and the villages on the eastern slopes are alive with domestic weaving establishments. Bethlehem is the seat of work in olive-wood and pearl utensils (souvenirs). Jerusalem is now, as it always has been, a caravansery for pilgrims from every clime.

*Politically.*—Syria (in its widest extent) is divided by the Turkish government into four vilayets—Adana, Aleppo, Syria (proper), and Jerusalem. Since 1860 the Lebanon region has been under the protection of foreign powers and is governed by a Christian mutassarif under special foreign oversight. The result has been that this part of Syria is the best governed and most progressive section of the land. The seat of government is at Btedin. Roads have been constructed bringing the scattered sections of this region together. The centre of political danger to the Turk in Syria is in the Hauran district, where the Bedouin Arabs, settled and nomadic, have never consented to do military service in the Turkish army and are exceedingly jealous of official interference. However the telegraphic service has been extended everywhere, even to these remote districts, and Turkish soldiers have easily put down incipient revolts. The Porte has ruled Syria by skilfully playing off one religious sect against another, so that there is not the remotest danger of Nusairiyeh and Maronite and Druze striking hands. French influence since 1860 has been pervasive in the land. Trade has been opened, schools have been fostered, and religion has been watched by the French officials in the land with a care that betokens a desire at some time to control the country. Russia is jealous of this French propaganda, and under Moscovite auspices Jerusalem is being surrounded by towers,

churches, and hospices. The Turkish method of governing the Christian sects in Syria is to use the church organization in administering justice. Each sect commits its affairs into the hands of the head man of the body, who intermediates between the people and the Turkish officials. Woe to a man who falls out with his church! In effect he becomes an outlaw. Hence when the missionaries entered the country in the first half of this century, hoping to regenerate the decayed Christian churches, they were compelled to start a new sect so that those who accepted evangelical truth could have the protection of the law, such as it was. For when a Maronite was led to accept the gospel statement of redemption through Christ alone he was not allowed to remain in that communion. He was driven forth. His neighbors could wantonly take his property and maltreat him without let or hindrance. Consequently an evangelical communion was established under the Turkish law, and a Protestant is appointed to represent it before the law.

*Socially.*—The feudal system has not entirely disappeared from Syria, and princely families have until lately exercised great influence. The prince is patriarchal in his relations to his house, and thus many of the evils of the system are mitigated. But the mass of the people are plebeian. The clergy exercise great social power, as would be gathered from the preceding paragraph. The marriage of the secular clergy is almost universal among the Oriental Christian sects; and in the cases where these sects have been won over to the Roman Catholic faith this custom has, by special stipulation, been retained. The status of woman has been low. In the Moslem harem she has been denied all active connection with society. The Bedouin women, as well as those of the Nusairiyeh and Metawily, have a greater freedom and are more nearly on the level of men. The Druze women were of a higher grade and often could read. In this respect they were ahead of the women of the Christian sects, who have always been exceedingly ignorant and superstitious. Syrians are polite in the extreme, love neighborly chat, have joyous feast-days, and live a happy, careless, and rather indolent life. Drunkenness is common at certain seasons of the year among certain of the Christian sects. Instrumental and vocal music, mostly in the minor key, is constantly heard. Shepherd boys still picturesquely play the simple reed as they wander with their flocks. There are a great many home comforts among the middle and upper classes, and foreigners soon acquire a taste for many native dishes. The reverence of son for father, and many other Syrian characteristics, are truly admirable. At a later point in this article the great advance of Syria in education will be emphasized in its relation to social affairs. Syria is a land of homes, and in this centre lie the hopes for the country.

*Religiously.*—The statistics of the population of Syria are classified on a religious basis, and are given in a preceding paragraph. The orthodox Moslem faith (Sunnite) dominates the country. The Metawileh, Nusairiyeh, Ismailiyeh, and Druzes are Mohammedan sects more or less removed from orthodoxy. Until lately some of these sects were secret organizations, and even now we have a very limited knowledge of some of them. The Christian sects are found largely in the middle and northern parts

of the land. The section of Mt. Lebanon under foreign oversight is very largely Christian in population. The Maronites (q. v.) are massed on the northerly slopes of this range. The Greek orthodox votaries are scattered about very evenly, but are especially numerous along the coast. The Jacobites are few in number, and are found mostly in the region of Homs and along the edge of the desert. The Armenian churches are more numerous in Northern Syria. While there is this great diversity in religious affairs in Syria, it is a diversity which is found everywhere, and so the same conditions prevail everywhere. Thus, whether we discuss the country religiously, socially, linguistically, commercially, racially, politically, or geographically, it is a unit.

*History.*—Syria has been from time immemorial the battle-field of nations, and it will be impossible to give in this statement even a chronicle of the great events that have taken place within its boundaries. It and its people have had a mission to perform for the civilized world, second to the mission of no other land and people. The Phœnician and the Hebrew stand for the two important elements in all civilization, commerce, and religion. As history dawns, the Phœnicians were the traders of the world, and had a strong rule along the coast. Innumerable warring tribes divided up the rest of the land among themselves. The Hebrews appeared as a nation in the 15th century B.C., and in the 11th century, under David, conquered the whole of the territory called Syria to-day, with the exception of Phœnicia. After the division of the Hebrew kingdom (975 B.C.) the new power of Syria arose, with its capital at Damascus. In the 8th century (721 B.C.) Assyria conquered Northern Syria and overwhelmed the northern tribes. Later Jerusalem fell before the Babylonian power (583 B.C.) and Judah went into captivity. Persia absorbed Babylon, and, until the conquests of Alexander the Great (323 B.C.), controlled the land along the eastern Mediterranean. After the death of the great conqueror, Ptolemy and the Seleucidae were rivals in Syria, the power of the latter from their capital of Antioch being finally successful. The Jews rose in rebellion against the attempt to Hellenize their nation, and the heroic era of the Maccabees resulted (168–37 B.C.). The Romans were irresistibly being pushed eastward, and were obliged to add Syria to their growing empire. The country was ruled by native kings and Roman governors until it was thoroughly amalgamated in the Eastern or Byzantine empire. The grand duel between Byzantine and Persian (Sassanidae) under the Emperor Heraclius weakened the Roman power so that in the 7th century A.D. the armies of Islam made easy work in conquering the land. The Ommeiad dynasty from Damascus ruled the Moslem world from 661 A.D. to 750. Several centuries later, as the Abbasside dynasty was breaking up at Baghdad, Syria was a prey to factions. The Seljuk Turk appeared, reversing the mild treatment the Christians had received at the hands of the Saracens hitherto, and persecution, imprisonment, and butchery aroused the knighthood of Christian Europe to undertake the Crusades (1095–1291). After the failure of the Crusades, Syria was again the scene of Moslem misrule at the hands of the Mameluke sultans of Egypt, and of fiercer raiders from Tartary. Early in the 15th cen-

tury Tamerlane carried his annihilating hordes as far south as Damascus. In 1517 the whole land was conquered by Selim I., the Ottoman Turk, and, with the exception of the brief time during which Ibrahim Pasha held Syria (1832–1841), has been controlled successfully by the Porte.

The first Christian church was at Jerusalem, and at Antioch the name "Christian" arose. The Apostles and their followers carried the gospel to every portion of Syria, and the faith took root everywhere. The scattering of the Jews, as a result of the great rebellions against Roman dominion in 70 and 130 A.D., changed the type of Christianity in Syria materially; but it went on so successfully, that at the time of Constantine we find the land honeycombed with Christian churches.

Some of the greatest church fathers either were born or lived in Syria,—Ignatius, Justin Martyr, Eusebius, and Jerome,—missionary influences went out on every side, the Bedouin Arabs were reached, and Frumentius, a Syrian, was the apostle of the Abyssinians. Constantine and his mother, Helena, were drawn to the land made sacred by so many associations. Jerusalem became attractive to pilgrims. The ascetic spirit, so widespread in those days, took possession of this veneration for the sacred places. Monasteries sprang up all over the land. Hermits swarmed among the wild gorges of the Judean desert, and when Chosroes, the Persian conqueror, swept over the country, he slaughtered Christian monks by the thousand. Then came the Arab, who treated the Christians mildly. The Church of St. John in Damascus, it is true, was converted into a mosque; but Omar at Jerusalem left the Church of the Holy Sepulchre to the Christians, as well as the Church of the Nativity at Bethlehem. But Christianity dwindled. Islam attracted many Syrians into its ranks. At the time of the Crusades the whole number of Christians in the land was probably not more than half a million. The Roman pontiff had long been desirous to win the Oriental churches, which for the most part refused to acknowledge the universal supremacy of the Pope. During the Crusades, the Maronites (q. v.) threw in their lot with the western Christians, and formed an alliance with the Church of Rome which has grown closer every century. The Roman Catholics have utilized these 250,000 Maronites as a centre for mission enterprises. The work has been pushed with vigor for three centuries, and has resulted in an addition to that communion of between 80,000 and 90,000 Syrians. The Greek Catholic Church is the most important outcome of this movement. It allows the marriage of the secular clergy, the retention of the Arabic service, the Oriental calendar and communion in both kinds. The Papal, Jacobite, and Armenian churches in Syria come next in importance. There are, in all, at least 350,000 (quite probably 400,000) of the inhabitants in Syria who acknowledge the papacy. The country is divided by the Roman Catholics into two parts—the patriarchal mission of Jerusalem (centred at Jerusalem and embracing Palestine and Cyprus) and the apostolic vicariate of Aleppo (embracing Northern Syria, centred at Beyrout). In the patriarchate mission in Palestine (including Cyprus) there are reported 28 stations (3 being in Cyprus), 20 churches, 22 secular European

priests and 18 native clergy, 90 Franciscans and 10 Carmelite priests, 13,000 Latin Catholics and 11,000 in the Oriental churches subject to Rome, 58 schools with 3,900 pupils, and 7 orphanages with 429 pupils. In the vicariate of Aleppo there are 15 stations and 9 out-stations, 3,000 Latin Christians, with 344,500 of the Oriental rites, two seminaries, 280 elementary schools with 15,197 pupils, 1 university at Beyrout with 570 students, 12 intermediate schools with 1,674 pupils. The Capuchins, Carmelites, Jesuits, Lazarists, Trappists, Sisters of Charity, Sisters of St. Joseph, Dames de Nazareth, and Sisters of the Sacred Heart are the chief workers in this field.

*Protestantism.*—Into this seething little world of fierce religious propaganda—Mohammedan, Oriental, and Papal—the new force of Protestantism came in the third decade of this century. The Turkish Government rather favored it than otherwise,—considering it a new tool by which it could work confusion to its enemies. Rev. Pliny Fisk and Rev. Levi Parsons (Middlebury College, Vt.) landed at Smyrna in 1819. In 1821 Mr. Parsons went to Jerusalem to make that the headquarters for the work in Syria. In 1823 Mr. Fisk and Dr. Jonas King summered on Mt. Lebanon, and later made Beyrout the centre for work. In the same year Rev. Wm. Goodell, Rev. Isaac Bird, and their wives landed at that city. Shortly after both Mr. Parsons and Mr. Fisk died, but the work moved on. In 1828 violent persecution (ending in the death of Asaad Esh Shidiak, “the martyr of Lebanon”), political and warlike agitations, the forcible closure of schools at Beyrout, Tripoli, and elsewhere, led the missionaries to go to Malta and wait until the storm should blow over. In 1830, however, they returned and took up their labors with redoubled energy. A printing-press was established at Beyrout by Rev. Eli Smith, tracts and books were published and a translation of the Bible undertaken, and the land was more fully explored for favorable stations. Reinforcements came from America—Revs. Wm. M. Thomson, Nathaniel A. Keys, Samuel Wolcott, L. Thomson, Mr. Whiting, Mr. Sherman, Dr. C. V. A. Van Dyck, and their wives. In 1843 it appeared that greater concentration would make the work more effective, and Jerusalem was handed over to the Church Missionary Society of England. As already stated, the missionaries were compelled to organize a separate church to give protection to their followers under Turkish laws. Abeih and Hasbeiya were special centres for work. Other helpers came from America—Messrs. W. A. Benton, J. A. Ford (Aleppo), David M. Wilson, Horace Foote (Tripoli), and later still Messrs. Daniel Bliss, H. H. Jessup, W. W. Eddy, Simeon H. Calhoun, and Geo. E. Post. The translation of the Bible into Arabic (see Arabic Version) went on. The Syrian Protestant College was founded at Beyrout in 1865, having been incorporated in 1863 by the legislature of New York. A medical class was formed in 1867. In 1873 the present buildings, situated on Ras Beyrout, were first occupied.

But before this, in 1870 when the Old and New School Presbyterians of the United States were united, the Syrian Mission was handed over in a spirit of great magnanimity by the American Board to the Presbyterian Board, because up to this date the New School Presbyterians had contributed largely to the A. B. C. F. M. The missionaries found that the work would not be ma-

terially affected by the change. In fact a new impetus came to the mission, and the progress since 1870 has been very great, in twenty years more than trebling the resources of the mission as well as the number of native adherents. Other workers came, among whom may be mentioned Messrs. Samuel Jessup, James S. Dennis, Gerald F. Dale, Theo. S. Pond, O. J. Hardin, F. W. March, W. K. Eddy, Geo. A. Ford, Ira Harris, Harvey Porter, Frank Hoskins, with their wives, and Misses Emilia Thomson, E. D. Everett, Harriet La Grange and Harriet Eddy. The translation of the Bible was carried on to completion by Dr. Van Dyck after the death of Dr. Eli Smith. The college, under the wise leadership of Dr. Daniel Bliss, has grown constantly in efficiency and influence. It has three departments—preparatory, collegiate, and medical (with pharmaceutical)—with over 200 students from all parts of Syria, Egypt, and Cyprus. The theological seminary of the mission was built and equipped under the leadership of Dr. James S. Dennis, who is its president. The mission press at Beyrout has from the first printed nearly half a billion pages and has over four hundred publications on its catalogue, all of them with the government approval printed on the title-page. In 1889 24,569,167 pages were printed and 52,203 volumes sent forth.

During these years a large number of native Syrian Protestants have arisen who have done a great work for their land. Among them, besides the martyr Asaad Esh Shidiak, may be mentioned Gregory Wortadeh, Butrus Bistany, Dr. Meshakah of Damascus; and a large number of men are to-day taking the places of these good and learned men whose names will never be forgotten.

The Church Mission Society took up the work in Palestine, with its headquarters at Jerusalem, in 1843. It occupies the field from Acre to Hebron and Gaza, and from Mt. Hermon to Moab east of the Jordan. It has pushed forward under great discouragements, but has made steady progress. It has stations at Jerusalem, Nablous, Jaffa, Gaza, Ramleh, Nazareth, Haifa, and Es Salt, etc. It has a number of successful schools. The work of this Society in the Hauran was stopped by the Turkish Government, and considerable opposition has developed of late throughout their territory.

The particulars of the work at Acca, Gaza, Jaffa, Jerusalem, Haifa, Nablous, and Nazareth are given in the articles on those stations. At Salt (the ancient Ramoth Gilead) there are substantial church and school buildings under the care of one missionary, with 4 out-stations and 30 communicants; girls' school, with 25 scholars, and 70 other scholars in the day-schools. Ramallah is occupied by 1 missionary and wife, with 3 out-stations, 55 communicants, 55 scholars.

The London Jews' Society has missions at Jerusalem, Jaffa, Damascus, Aleppo, and other places. The Established Church of Scotland has a mission to the Jews at Beyrout. At Tiberias there is another Scotch mission to the Jews.

The Irish Presbyterian Mission in Damascus (q.v.) was founded in 1843. The United Presbyterian Church of the United States was interested in this work for many years, but has of late concentrated its mission endeavors in Egypt. Dr. Crawford and his partners in the mission live at Damascus and occupy the territory around the city and in the southern sections of Anti-Lebanon.

The British Syrian schools and Bible Mission were established in 1860 by Mrs. Bowen Thompson. Since her death her sister, Mrs. Mott, has had charge of the work. It embraces about 30 schools, mostly for girls, in which over 3,000 pupils are gathered. The principal schools are at Beyrout, Damascus, Zahleh, Baalbec, Hasbeiya and Tyre. The Free Church of Scotland has a mission in the Metn district of Mt. Lebanon under the care of Rev. W. Carslaw, M.D.

The Society of Friends in England and America has mission work at Brumana, on Mt. Lebanon, and at Ramallah, northwest from Jerusalem. The German Evangelical Missions include the German Deaconesses of Kaiserswerth, the Jerusalem Verein of Berlin, and the work of German chaplains in Beyrout and Jerusalem. The Kaiserswerth Deaconesses came to Syria after the terrible Druze massacres in 1860, and established orphanages in Jerusalem and Beyrout, and soon became connected as nurses with the Johanniter Hospital in the last-named city. The Jerusalem Verein (see article) has work in that city and also in Bethlehem. There are girls' schools at Bethlehem, Nazareth, and Shmian under the care of a society of English ladies. Miss Taylor's (Scotch) school at Beyrout for Druze and Moslem girls is very successful.

There are also a number of special societies or private enterprises. *The Jerusalem Mission of Mercy.* Mr. T. J. A. Alley arrived in Jerusalem in December, 1889, and since that time has conducted a work which can best be described in his own words: "In view of the unexampled poverty on all sides, I saw that to preach Christ (though I am not a minister) and the Golden Rule with its many parallels, and yet decline to illustrate those plain Scriptures by relieving the helpless poor, would be vain mockery." With this feeling Mr. Alley lives in the plainest possible manner, and spends his time and the money given him in answer to his solicitations and prayers in relieving the temporal wants of the poor, especially the Jews, so many of whom come to the land of their fathers in great want and distress to end their days among the scenes which remind them of past glories of Israel. By gifts of money, clothing, and other necessities his friends in England and America aid him in his life of self denial and ministration to those among whom he walks and labors as did his Saviour, with a like disregard of the comforts of life, and a warm heart for the poor and suffering.

*The Jerusalem Faith Mission and Home* is under the care of two ladies from New York, who represent the International Christian Alliance. They carry on a mission to the Jews and a Faith Home. The latter is a resort, resting-place, or home for missionaries or any Christians who seek the advanced Christian life without regard to any sectarian or denominational peculiarities. The ladies have won the highest esteem and earnest good wishes of missionaries of all denominations.

*Evangelical Mission to Israel* is the name of a mission under the care of an Israelite, Mr. D. C. Joseph, who has a reading-room where he conducts meetings, assisted by his wife and a Bible-woman. An assistant conducts an out-station at Hebron. The work is independent of any society, and relies on the gifts which come in answer to prayer and personal appeals.

*The Jerusalem Presbyterian* is another independent mission, similar to the above, conducted

by the Rev. Abraham Ben Oliel, who, after forty years of missionary work along the Mediterranean, has recently moved from Jaffa to Jerusalem, and works among the Jews. Mr. Leithaby's mission has already been treated of under the title Moab Mission.

*The Bethany Home* is an independent mission started by Miss Crawford in 1887. A stone building was completed in 1889. She has gathered a school of thirty, both boys and girls, from among the Moslems. Assisted by a Bible-woman, she works also among the sick and poor around her. In addition to the work of the Jerusalem Union at Bethlehem, already spoken of under Bethlehem, the Society for Promoting Female Education in the East have at Bethlehem a mission with 2 medical missionaries, 3 female missionaries, and a girls' school with 60 scholars. Preaching service is attended by an average of 50, and the Sabbath-school numbers 48 scholars. At Nazareth Miss Hannah Kawar, the daughter of an educated native minister, is conducting a school for little girls at her own expense; the attendance numbers 36. A hospital for women and children, named Marienstift after its founder, H. R. H. the Grand Duchess of Mecklenburgh-Schwerin, is located at Jerusalem. It has no fixed income, and the labors of the doctor and his wife are given gratuitously.

The Reformed Presbyterian Church of the United States has a mission in northern Syria, with stations at Latakia, Antioch, and Mersine, Asia Minor. It deals more especially with the strange race of the Nusairiyeh (q.v.).

Besides these societies we find in Syria a number of very useful institutions such as Miss Arnott's school, the Mary Baldwin Memorial School, Miss Maugan's medical mission at Jaffa, as well as a large number of similar undertakings scattered about the country.

Bible work is carried on in Syria by the American Bible Society, with its headquarters at Beyrout, whence it sends Arabic scriptures over the whole world. Palestine is occupied by the British and Foreign Bible Society. The Tract Societies of America and England have given most substantial help to the mission in its effort to supply the whole Arabic reading world with Christian literature. The interesting item about all these numerous Protestant societies at work in Syria and Palestine is the fact that they are all working in substantial harmony. There is no more difficult mission field in the world. Jerusalem is the worst city in the world, not because of gross licentiousness, but because of spiritual pride; and the whole land partakes of the same spirit. Syria is at present in a most depressed state, agriculturally and commercially. The last fifty years have seen a leap ahead intellectually, and roads and the telegraph are binding the country together. In the end the simple gospel must prevail in the land that gave it birth, but many generations must come and go before Islam will yield, and before the stubborn oriental rites, as well as the papal votaries, will give up the meaningless and injurious human elements that have entered into their worship.

**Syriac Version.**—The Syriac belongs to the Semitic family of the languages of Asia. The oldest and most important version is the Peshito, or Peshita (i.e., the correct or simple), because confined to the text. The period at which this version was made has been much

Armenians, the Persians being very few in number. Mission work is carried on by the Presbyterian Church (North), 1873, in the city itself and throughout the province, which is one of the most fertile and populous sections of Persia, specially at Maragha, Miandab (famous for the massacre during the Koordish insurrection in 1879), and Ilkachee. There is a boys' school, with 20 boarding and 47 day scholars; a girls' school with 30 day and 25 boarding scholars. The medical missionary, Dr. G. W. Holmes, was appointed court physician to the governor of the province, who is also heir-apparent to the throne of Persia, and was able to exert not a little influence towards mitigating the severity of the treatment of Protestants by the Persian Government. The present force is 2 missionaries and wives, 1 medical missionary, 3 female missionaries.

**Tahiti:** see Society Islands.

**Tahiti Version.**—The Tahiti belongs to the Polynesian languages, and is spoken in Tahiti, Society Islands. The Gospel of Luke, the first part of the Scripture published, was translated by the Rev. Henry Nott of the L. M. S. It was issued from the press at Tahiti in 1818. In 1830 the New Testament was completed, and five years later the complete Bible was printed. Mr. Nott was sent to England in 1836, and in 1838 the British and Foreign Bible Society issued an edition of 3,000 copies of the entire Bible and an equally large edition of the New Testament. A second edition of the Tahiti Bible was printed by the same society in 1845-6, after being revised by Rev. Messrs. William Howe and Thomas Joseph. This edition was soon exhausted, and a careful revision was made, preparatory to the printing of a new edition, by the Rev. Messrs. Howe, Alexander Chisholm, and John Barff, the latter supplying the marginal references. The edition was carried through the press in 1863 by the Rev. Joseph Moore, and 5,000 copies were printed. In 1877 a new edition of 5,000 copies was printed in London under the superintendence of the Rev. A. T. Saville; a few corrections were inserted and maps were supplied. In 1883 a school edition of 4,000 copies of the Bible was carried through the press in London by the Rev. J. L. Green. Up to March 31st, 1889, 57,579 portions of the Scriptures were disposed of.

(*Specimen verse.* John 3:16.)

I aroha mai te Atua i to te ao, e ua tae roa i te horoa mai i ta'na Tamaiti fanau tahi, ia ore ia pohe te faaroo ia 'na ra, ia roaa râ te ora mure ore.

**Tai-chair,** a town in Chehkiang, China, 75 miles southwest of Ningpo. Mission station of the China Inland Mission (1867); 1 missionary and wife, 12 native helpers, 6 out-stations, 7 churches, 191 church-members.

**Tai-ku,** a town in Shansi, China, 60 miles northwest of Fenchau-fu. Mission station of the A. B. C. F. M. (1883); 1 missionary and wife, 1 physician and wife, 1 out-station, 1 school, 15 scholars.

**Taiwan,** the capital and treaty port of Formosa (q.v.), China. The Presbyterian Church of England has here the headquarters of its mission in Formosa, which numbers 7

missionaries, 2 female missionaries, 17 stations among the Chinese, 1 Hakka station, 16 stations among the Pepohoans, and 21 organized, 14 unorganized congregations.

**Tai-yuen,** the capital of Shansi, China, lies on the bank of a branch of the Yellow River, in a fertile plain 3,000 feet above the level of the sea, 250 miles southwest of Peking. The climate is healthy, but subject to great extremes of heat and cold. Population, 80,000. Mission station of the C. I. M. (1877); 11 missionaries, wives, and assistants, 1 church, 20 communicants. Baptist Missionary Society (1879); 6 missionaries (4 married), 3 out-stations, 2 churches, 25 communicants.

**Takow,** a treaty port of Formosa (q.v.), China; is a mission station of the English Presbyterian Church, in the Tong Soa district, where they have 11 stations, 1 being for the Hakkas.

**Ta-ku-tang,** a market town in the extreme northern part of Kiangsi, China, on Lake Poyang, a little south of the Yangtsz-kiang. Mission station of the C. I. M. (1873); 1 missionary and wife, 1 female missionary, 1 chupe, 3 communicants.

**Talaguga,** a town in the Gaboon and Corisco district, West Africa, on the Ogowe River, 50 miles above Kangwe. Mission station of the Presbyterian Church (North); 1 ordained missionary, 1 female missionary, 1 native helper.

**Talaing Version,** the oldest of the versions made into any of the languages of Burma. Mrs. Sarah Boardman commenced the work of translation. After her marriage to Dr. Judson she continued the work, and in 1837 she had published several tracts and small books in the Talaing, and completed the translation of the New Testament, which she transferred to Mr. Haswell, who issued portions of the New Testament in 1838 and an edition of 3,000 copies of the whole New Testament in 1847. (See Pegu Version.)

**Ta-li,** a prefectural city in the northern part of Yunnan, China, northwest of Yunnan City. Mission station of the C. I. M. (1881); 2 missionaries, 1 chapel.

**Taljhari,** a native pastorate and district in Bengal, India, among the Santals, in the region sometimes called Santalia (q.v.), with 795 Christians, who support an evangelist in a neighboring district.

**Tamatave,** the principal port of Madagascar, is situated on the east coast, on a point about 350 yards wide. It is quite cosmopolitan in its character, as representatives of some of the principal European and Asiatic nationalities live within its limits. A low estimate of the foreign residents makes their number 1,200. Most of them are creoles from Mauritius, and natives of India of various religions and castes. Not more than 50 are pure British and French. French influence prevails, as there is a French Resident, controller of customs, and Roman Catholic priests, who teach and preach in French. The native population of about 4,000 is composed of Hovas from the interior, Taimoro from the south, Tanosy from St. Marie, and Betsimisaraka from the surrounding districts. The latter are an exceptionally ignorant, super-

stitious tribe, who have been further debased by contact with the cargoes and crews of the various trading-vessels from Mauritius and Réunion which stop at the small ports. The town gives name to a district of the L. M. S., which has little political or administrative unity. It comprises the strip of country along the east coast of Madagascar, from the extreme north down to Mahanoro, a length of 480 miles, with a breadth of from 5 to 30 miles. This large district is under the charge of but 1 missionary. There are 51 congregations (9 in Tamatave town) with 448 church-members, 91 preachers, and 1,500 scholars in the mission schools. The Hova governors and soldiers, by their life and work, do much to keep the Christian spirit from dying out among the lower tribes. The S. P. G. have a station at Tamatave town, but find great difficulty in the work, since the majority of the creoles are Roman Catholics.

**Tameau-lajang**, a town on the upper course of the Burite River, Central Borneo. Mission station of the Rhenish Missionary Society; 1 missionary (ordained), 3 native helpers, 80 church-members, 30 school-children.

**Tamil Version.**—The Tamil belongs to the Dravidian family of the non-Aryan languages, and is spoken in the South and Central Karnatic and North Ceylon. The honor of producing the first translation of the New Testament into Tamil belongs to the Danish missionary Ziegenbalg, who was sent to Tranquebar in 1706 by Frederick IV., King of Denmark. The New Testament was published in 1714, the Society for Promoting Christian Knowledge having generously contributed towards its cost. Ziegenbalg had commenced the translation of the Old Testament, but left his task unfinished, as he died in 1719. In the same year Benjamin Schultze, also a Danish missionary, was sent to India. Having mastered the Tamil, he undertook the translation of the Old Testament, which was published in 1727. He then betook himself to a revision of Ziegenbalg's New Testament, and afterwards undertook a second revision, in which he was assisted by other missionaries. Schultze returned to Europe in 1742, and died in 1760. Schultze was followed by Fabricius, another Danish missionary. His version of the whole Bible was published at Tranquebar in 1782. Altogether there were fourteen editions of Fabricius' New Testament, and two of the Old, brought out by the Danish Mission before the close of the last century, aided by liberal grants made by the Society for Promoting Christian Knowledge, and some Continental missionary societies. A revision of the Tamil Scriptures was undertaken by Rhenius, of the Church Missionary Society, but he only lived to complete the New Testament, which was printed by the Madras Auxiliary of the British and Foreign Bible Society in 1820. Another revision was executed by a representative committee of the various missionary societies in the Tamil-speaking provinces, and was published in Madras in 1850. But in the opinion of many competent judges, it had serious defects, and a still further revision was demanded. In 1857 six missionary societies entered into the alliance for revision—the Society for the Propagation of the Gospel, the Church Missionary Society, the London Missionary Society, the Wesleyan Missionary Society, the American Board of

Missions, and the Scottish Free Church Mission. The only Tamil missionaries who held aloof were those of Ceylon. The Rev. H. Bowen was appointed principal reviser, and Fabricius' translation was taken as basis. The work of revision was completed in 1868. After a careful examination by members of the Jaffna Auxiliary, who had, as before stated, declined to take part in the revision, but afterwards cordially accepted it, the whole Bible was published in 1871. It went by the name of "The Union Version," and continues to this day the only version used in the Tamil missions, with the solitary exception of the Leipsic Evangelical Lutheran Mission, which uses the version of Fabricius. An edition of the Tamil Bible, with references and marginal readings, was published in 1882. A revised New Testament, with references and marginal readings, was also issued in 1887. Up to March 31st, 1889, the British and Foreign Bible Society disposed of 2,549,150 portions of the Scriptures, besides 32,000 portions in Tamil and English.

(*Specimen verse.* John 3 : 16.)

தேவன், தம்முடைய ஒரேபெருன குமாரனை விசுவாசிக்கிறவன் எவனோ அவன் கெடப் போகாமல் நித்தியச் சீவனை அடைபு ம்படிக்கு, அவனாகத் தந்தருளி, இவ்வளவாய் உலகத்தில் அன்புசுடர்ந்தார்.

**Tampico**, a town in the state of Tamaulipas, on the river Paranco, 5 miles from the Gulf of Mexico. Population, 5,000, Indians, Spaniards, Creoles. Language, Spanish. Religion, Roman Catholic. Social condition civilized, prosperous. Mission station Associate Reformed Synod Southern Presbyterians (1881); 2 missionaries and wives, 1 other lady, 13 native helpers, 12 out-stations, 6 churches, 226 church-members, 1 theological seminary, 2 students, 4 other schools.

**Tamsui**, a treaty port of Formosa (q. v.), China, in the northern part of the island; is headquarters and principal station of the mission of the Presbyterian Church of Canada. A missionary and a missionary physician are located at Tamsui, and from there visit and direct the work in the surrounding districts, in which there are 50 congregations, 51 native preachers, 2,833 church-members, 25 students in the college at Tamsui, 30 girls in the girl's school, and 1 hospital.

**Tandur**, a station of the Methodist Episcopal Church (North) in Madras, India, near Secunderabad; 1 missionary and wife, 4 native helpers, 2 church-members, 2 schools, 55 scholars.

**Tanganyika**, a large lake in Central Africa, 480 miles in length from northwest to southeast, and from 10 to 60 miles broad. It occupies a long depression in a region of considerable elevation, south of Victoria and Albert lakes, and northwest of Nyassa. Beautiful scenery borders the lake, and many parts of its shores are thickly inhabited. Ujiji on the east shore is the largest settlement.

Lake Tanganyika was discovered by Speke, 1867, and visited by Livingstone (1867) and Stanley (1874).

The L. M. S. has two stations on the lake: Niumkorlo, at the south end of the lake, with

3 missionaries (1 married); and Fwambo (q.v.), 2 missionaries (1 married).

**Tangier**, a seaport of Morocco (q.v.), is situated on the south shore of the Strait of Gibraltar, 38 miles southwest of the Rock. Population, 10,000. Mission station of the North Africa Mission (see article); 9 missionaries.

**Tanjore**, a town of Madras, India, 180 miles southwest of Madras City, 45 miles from the Bay of Bengal. It contains two forts, the rajah's palace, and a pagoda, considered one of the finest in India. Tanjore is also noted for its artistic manufactures, including silk carpets, jewelry, repoussé work, copperware, and curious models in pith, etc. Population, 54,745, Hindus, Christians, Moslems, etc. Mission station of the S. P. G.; 1 missionary, 23 native helpers, 7 schools, 268 scholars. Wesleyan Missionary Society; 1 native pastor, 1 chapel, 1 school, 22 scholars.

**Tanna Version.**—The Tanna belongs to the Melanesian languages, and is spoken in Tanna, New Hebrides. Before the year 1869 no portion of God's Word appears to have been printed in Tanna. In that year, the Rev. J. G. Paton from Scotland, who had been driven from Tanna in 1862, printed a portion of the Gospel of Mark in Auckland. In 1878 the Gospel of Matthew was printed at the mission press at Tanna, followed in 1881 by the Acts of the Apostles; in 1883 by the Book of Genesis; and in 1884 by the first 19 chapters and part of the 20th chapter of Exodus. In each case the edition consisted of 200 copies. With the exception of the portion of Mark, the other parts were translated by the Rev. William Watt. The New Testament, translated by Mr. Watt, was published in 1890 by the National Bible Society of Scotland.

**Taoism.**—Laotze is said to have been born in the year 604 B.C., though there has been some question whether he was or was not a real character. The fact that the names of his village and county and state or province seem to be allegorical, like the names in Pilgrim's Progress, has led to a doubt on this subject. But some allowance should be made, probably, for the tendency among the Chinese to deal in allegorical names. Even the shops of the chief cities sometimes bear upon their signs names which excite a smile in a foreigner.

Laotze's history, all things considered, seems real. It is said that he left a son, who won distinction in public office.

Laotze's birth occurred about a half-century before the birth of Confucius; they were therefore contemporaries. Both are said to have been the sons of very old men.

The condition of China, or of that particular province in which Laotze lived, corresponding to a portion of the present Shantung province, was greatly disturbed by border wars and intestine revolts and intrigues. There was scarcely a vestige of morality, and the political condition of the country was chaotic. Both Laotze and Confucius aimed at reform. Both appear to have been disinterested and high-minded. Both were rather impatient, however, with the stolidity and degradation of the people, and with the vices and corruption of the reigning princes.

Laotze appears to have held for a time an office as keeper of the archives, as the old records express it; but his mind drifted toward

philosophy and political reform, and the position he held was far from meeting his ambition: political engagements were irksome to him.

Comparatively little is known of this truly profound thinker or reformer. He is supposed to have been poor, and for that reason perhaps the more keenly conscious that his nation and his age failed to appreciate him. He was, in short, too morbid in spirit to make the best use and secure the greatest results of his rare gifts. He formed no school of followers, and wrote no books. On the contrary, he withdrew himself from men, was too proud to teach or write, disliked display of any kind, and was in fact a recluse.

Confucius, on arriving at manhood and entering upon his career, sought an interview with Laotze, with a hope of profiting by his great ability, his observation, and his experience. He was received coldly, however, and with severe criticism instead of sympathy. Much as the two men were alike, they had wide differences of character, and these were increased by the fact that Laotze was already an old man when Confucius appeared before him. He was in no attitude of mind to approve or even tolerate what he considered the gushing enthusiasm and crudity of Confucius. He looked upon him as an ambitious, blustering agitator, sounding brass and a tinkling cymbal, and he predicted the failure of his pretentious efforts at reform.

Confucius, on the other hand, was astonished at the churlishness of the old reformer, was perplexed at his involved and incomprehensible theories and mystical speculations, and he could only compare him to the "incomprehensible Dragon."

At last, in old age, Laotze's despair at the condition of the country became overmastering. He had dire forebodings of calamity, revolution, bloodshed, political chaos, and destruction. He had become more and more unpopular as he had grown more and more reproachful toward his countrymen.

He dreaded to witness the ruin which he was sure was coming upon the land, and he fled into voluntary exile, passing westward through the Hankow Pass into the province of Honan. He was induced to stop for a time with the Keeper of the Pass, and instruct him in the principles of his philosophy. This gate-keeper seems to have realized that no ordinary person was before him, and he was unwilling that a man who was too morbid and impracticable to write any book or organize any class of disciples should pass from the knowledge of men without leaving some substantial results of his thinking. He appears to have taken down from dictation the main principles of the reformer's teaching. This record is known as the Taou Teh King. It embraces all that is known of Laotze's doctrines.

After leaving the Hankow Pass for the west, Laotze passed into obscurity, and, so far as is known, nothing was ever heard of him afterward. Many legends sprang up around the history of Laotze like the young shoots at the root of a dying tree. One of these relates that upon leaving the Pass for his voluntary exile he parted with his servant. The latter, learning the plan of his master, was unwilling to accompany him, and in the settlement charged an exorbitant sum as back wages; but as Laotze had by a spell kept him alive far beyond his appointed time, he withdrew the spell,

and the servant became a dry skeleton. However, at the request of the gate-keeper, who interceded for the servant, he restored him to life, and then found him reasonable in his price. Other absurd legends are preserved, one of which is that Lao-tze was miraculously born at the age of eighty, and that he was known as the "Old Boy." He was gray-haired at birth. Certain legends similar to those which are related of Gautama, and which may have been copied, are also given—as that Lao-tze leaped into the air as soon as he was born. Some of his followers have claimed that he was a spiritual being, and not an actual, ordinary man.

*The Character of Lao-tze.*—Laying aside all legends, and contemplating the actual life of Lao-tze, so far as scanty materials enable us to do, we find him a man above reproach in morals, though living in a dissolute age. The parallels between his severe type of philosophy and that of the great names of Greece are quite remarkable. He was uncompromising and exacting in his standards of right and wrong, morose and despondent in temperament, proud and impracticable in his relations to men, and having little tact in approaching them. He was too much of a quietist to be a successful reformer. He had been soured by disappointment and he died in despair. His system had brought him no comfort; he had seen no improvement in the condition of society. He regarded his life as a failure, and yet he seems to have come very near to the truth in many respects.

He approached the sublime ethics of our Saviour more nearly than any of his contemporaries, though they were among the greatest names in history, for Lao-tze, Confucius, Pythagoras, Gautama, and, according to Monier Williams, Zoroaster, are supposed to have lived within a century of each other. Lao-tze taught that real virtue is a spiritual and interior excellence, and not outward doing or speaking. In this respect he fought much the same battle with the objectivity of mere formal and immovable customs as our Saviour did in His dealings with the Pharisees; and like Him he urged the law that is written within, and of which the outward world knows nothing. He taught also that he who foregoes and yields up and forbears is the one who really finds and succeeds, and that he who humbles himself is really exalted.

In general, like our Saviour, he exalted the quiet and passive virtues, and he taught the duty of doing good even to those who injure us. In this respect he stood in strong contrast with Confucius, whose position more nearly resembled that of the old Jewish dispensation, which required "an eye for an eye, and a tooth for a tooth." The justice of that dispensation was as high as Confucius felt called to go in his dealings with men; no one placed greater emphasis than he upon justice, but he could not understand the duty of doing good in return for evil. Some terse expressions from the lips of Lao-tze show the deep subjectivity of character as he conceived it. "It is not necessary," he said, "even to peep through the window to see the celestial Tao." At another time he said, "There is a purity and quietude by which one may rule the world." Again, "Lay hold of Tao (wisdom) and the whole world will come to you." Again, "One pure act of resig-

nation is worth more than one hundred thousand exercises of one's own will." The moral elevation of character that is set forth in these utterances is certainly remarkable. It is worthy of a place in Christian ethics.

There were some points in which Lao-tze seemed to be at one with Gautama. He taught that even in this life it is possible to completely possess Tao, and that thus the creature may become one with the creator by the annihilation of self, it being understood that to possess Tao is in another sense to be possessed by Tao as an indwelling principle or life, all of which implies a near approach to the Pantheistic absorption in deity which Hinduism also teaches. A general difference between the spirit of Lao-tze's teaching and that of Confucius may be expressed thus: Confucius would say, "Practise virtues, and call them by their right names." Lao-tze would say, "Practise them, and say nothing about it." Although he had great reverence for the ancients, he did not idolize them as did Confucius, and as he has led the Chinese nation to do.

There seems to have been in the interviews of the two sages some little controversy on this point, in which Lao-tze told Confucius, by way of subduing his romantic enthusiasm, that the "ancients were only so many bundles of dry bones; wisdom did not die with them." He illustrated the grace of quietness and the safety which it secures by saying that "the leopard by his brilliant colors, and the monkey by his frivolous activity, only draw the arrows of the archer," and to the loud-mouthed reformer he would say, "You are like a man who beats a drum while hunting for a truant sheep."

One point in which Lao-tze was far in advance of his age, and abreast with some of the best political thinking of whatever age, was his maintenance of the theory that kings exist for the good of the people and not for their own selfish ends, which ends the people, like so many dumb beasts, are designed to subserve. "Kings," according to Lao-tze, "should rule so quietly, and holds the reigns so lightly, that the people may forget them as kings, and only think of them as superiors." There should in all government, as he insisted, be a minimum, and not a maximum, of government. Surely these practical and lofty political principles stamped Lao-tze as a man of prophetic genius.

Confucius said much more than he concerning government: more, certainly, in the number of details; but no counsels of his are so laden with sublime principles as those of his rival, and none of his teachings are more in accord with the truth.

*The Philosophy of Lao-tze.*—It is as a philosopher that Lao-tze most inspires our respect and honor. Tao, which was his ideal of the all-comprehending and eternal essence of things, means Reason, as nearly as it can be translated; but it means more than that word represents to us. It is the Infinite Reason, in such a sense that it embraces all excellence and glory; it corresponds very nearly to the word Wisdom as it is used in the Book of Job and the Ecclesiastes. Tao was deified by Lao-tze, though in no superstitious sense; and yet it was impersonal; it was apprehended by him in a pantheistic sense. Thus he says: "All things originate with Tao, conform to Tao, and return to Tao."

Taou exerts its influence in a very quiet manner; its influence is still and void, and yet it "encircles everything and is not endangered;" it is ever inactive, and yet leaves nothing undone; nameless, it is the origin of heaven and of earth. It is not strange, perhaps, that with so vague a conception of the supreme force in the world the Chinese mind should have lapsed into a mere general conception of Deity, and that the prayers of the emperors have for ages been addressed to Heaven.

Professor Douglas, of the London University, has summarized the elements of Taou as follows: (1) "It is the Absolute, the Totality of Being and Things. (2) The Phenomenal world and its order. (3) The ethical nature of the good man, and the principle of his action." One is reminded of various philosophic schools of ancient and modern times. The "totality of being and things" is about equivalent to the pantheistic conception of the Indian Vedanta. It does not differ materially from the "absolute substance" of Spinoza or the "absolute intelligence" of Hegel. It must be confessed that Laotze was a profound philosopher. He has rarely been excelled in the history of philosophy, for in view of his comparatively isolated position we must regard him as eminently original. His system was wholly his own; he was the father of Chinese philosophy. In profundity of thought he far exceeded Confucius, though he was less practical. Confucius was not a philosopher in the strictest sense: he was only a skilful and eminently practical compiler of ancient wisdom. He did not claim to be more than this, and with laudable modesty he spoke of himself as only an editor. But the Taou Teh King of Laotze came from his own brain.

There is a seeming contradiction in the teachings of Laotze in reference to the past. While Confucius carried his reverence for ancient authorities to an extreme which scarcely seemed to admit the possibility of anything new in the world, Laotze took issue with him sharply, and even poured a degree of contempt upon his extreme reverence. At the same time, though he admitted no age of antiquity as necessarily authoritative, he looked back, in a general way, to a golden age of simplicity and virtue which had passed away, and his whole idea was to return from the complex wisdom and civilization which he regarded as only a curse, to the better days when men had few wants and lived quietly.

He was in accord with Confucius on one point, namely, the uprightness and dignity of man's original nature. They recognized no doctrine of human apostasy which assumed hereditary form. In logical consistency they both maintained that every man is born without evil bias, and is sound at the core. The continued influences of demoralizing example were supposed to account for the evils which these great sages found in the world about them.

Like the ancient Druids Laotze propounded his great principles of life in triads, and the three precious virtues which he cherished were compassion, economy, and humility, all of a quiet type. He did not believe in intellectual brilliancy of any kind, much less in any show and pomp of conscious power, and he had little to say of prowess; his ideals were not the great and ambitious and mighty as men are reckoned to be mighty, but those, rather, who represented

the passive virtues, the gentle and retiring graces of human life.

There is a difference of opinion as to Laotze's idea of God. Professor Douglas thinks that he had no conception of a personal divine being, at least that he recognized no such being; but, on the other hand, Professor Legge of Oxford seems confident that the supreme "heaven" or God in heaven was involved in his idea of Taou. He maintains that Laotze often spoke of heaven in a non-material sense, and that in one instance he calls the name of God itself.

One thing is certain: whether Laotze regarded Taou as personal or no; he assigned to it providential oversight and care and all forms of beneficent interest. Says Professor Legge: "Taou does more than create. It watches over its offspring with parental interest. It enters into the life of every living thing. It produces, nourishes, feeds, etc."

Laotze's doctrine of creation seems a little vague. He says: "That which is nameless is the beginning of heaven and earth. Taou produced One, the first great cause; One produced Two, the male and female principles of nature; Two produced Three, and Three produced all things, beginning from heaven and earth." This strikingly resembles the Shintoo notion of the origin of all things, according to which there is one absolute though unknown being, from whom emanated two, male and female, and from these the world of beings was produced. Both Confucius and Laotze speak of heaven both as material and as personified.

According to Professor Douglas, Laotze would agree with the Darwinians as to the creative indifference of the Deity or deified influence which is characterized as heaven. "It has," he says, "no special love, but regards all existing beings as 'grass dogs' made for sacrificial purposes." "Yet," he adds, "it is great, and compassionate, and is ever ready to become the Saviour of men."

If the question whether Laotze was really religious in his thought were dependent on such statements as this, we should be compelled to answer in the affirmative, for the being or power which is regarded as "great and compassionate and ever ready to become the Saviour of men" is an object of religious contemplation, surely.

As to the physical laws of the world, Laotze maintained that the earth is held together, not by gravitation, but by Taou. In a sense this was true, supposing Taou to represent the infinite force, for gravitation is but a second cause. The expression "the earth is held together by Taou" is nearly equivalent to the declaration that "God holdeth the earth in His right hand." Something like the Buddhist idea of an eternal round of life and death seems to be intended by Laotze's doctrine that existence and nonexistence constantly originate each other.

We have alluded to some similarities between the teachings of Laotze and those of Christ, especially in the gentle virtues of kindness, humility, forbearance, etc. The differences, however, which appear are more striking than the resemblances.

Christ showed a balance of truth. He taught the passive virtues, but also the active ones which Laotze did not. He commended modesty and secrecy in prayer, and yet the duty of active influence. "Let your light so shine," etc. This was not for self, but for others. Confucianism was active, Taouism passive, Chris-

tianity was both. The fatal defect in Taouism was its lack of divine recognition and divine power. Its ethics were high, but it had no love for God and therefore none for man.

*The Taou Teh King.*—This is a short treatise, already referred to, embracing the sayings of Lao-tze which were recorded by the Keeper of the Hankow Pass as the great teacher was about to go into exile. It is very brief, only about the length of the Sermon on the Mount. In its general character it is exceedingly intricate, and often obscure. The best scholars feel little confidence in their interpretations of it. Here is a specimen. "There was something chaotic and complete before the birth of heaven and earth. How still it was and formless, standing alone and undergoing no change, proceeding everywhere, and in no danger of being exhausted. It may be regarded as the mother of all things." In its real spirit and meaning this passage corresponds remarkably with one found in the Rig Veda, in which the original chaos is described as being brooded over by the infinite Brahm, the "Only Existing One," breathing quietly. The vagueness of the philosopher's conception is well set forth in this passage: "I do not know the name, but designate it the Taou (the way), and forcing myself to frame a name for it, I call it the Great. Great, it passes on in constant flux; so passing on it becomes remote; when remote it comes back."

*Modern Taouism.*—There could hardly be a stronger contrast than that which is presented between the ancient and the modern Taouism. Lao-tze was virtually rationalistic, but the present system is the most irrational of the great existing religions; it is a mass of superstitions of the lowest type. It is only the name of Taouism applied to a mixture of Buddhism and the ancient nature-worship and other superstitions of China. Speculation seems to have spent itself in the few centuries which followed the life of Lao-tze. Having first run wild in theories, it degenerated into low superstitions. The principle in Lao-tze's teaching which seems to have suggested the prevalence of spirits and ghosts in all nature, animate and inanimate, was his declaration that the presence of Taou is universal. He gave it a pantheistic omnipresence and indwelling in all beings and things. He little thought, probably, that this would lead to the notion that every object in nature is haunted, and thus cause the land to swarm with polytheism. A Taouist is afraid of his shadow. In the woods or in dark ravines he imagines he is about to be pounced upon by sprites or demons. The trees have souls, the very air is laden with a mysterious influence. Telegraph wires cannot pass through the open spaces nor steeples be reared without disturbing "fungschuay," nor can the earth be excavated for the purpose of mining or the introduction of any modern improvement without great risk that this omnipresent something shall be disturbed.

Taouism continued to be a philosophy for some time after the death of Lao-tze, but it was a changed and ever-varying series of speculations. In the opinion of Dr. Legge, it did not become a religion, strictly speaking, until after the introduction of Buddhism in the first century A.D. It had a priesthood and abundant superstitions, but it was sorely in need of being reinforced by something higher. So far as history informs us, no successor of Lao-tze seemed to correctly interpret or propagate his teachings.

His standard was too high, his theories were above the reach of his successors, his ethics and his transcendentalism alike failed to be appreciated. Professor Douglas has a very different estimate of the followers of Lao-tze from that ascribed to the immediate successors of Confucius. While the latter drew multitudes of the best men of the age about him, Lao-tze's camp was a Cave of Adullam to which the discontented and erratic resorted. His teachings, therefore, were left in the worst of hands.

Among the most influential Taouists in the next generation was Leitsze, who argued Lao-tze's quietism into a general Epicurean license. "Lay aside aspiration, and live for to-day; live in the freedom of the beast," would express his general view. Lao-tze had said: "Lay aside pomp and circumstance, live simply and with little pretence." Leitsze carried the idea to extremes. He also gave a licentious interpretation to the pantheism of Lao-tze, assuming that "if Deity lives and acts in us, then we are Deity, and are above restraint; we are as free as the gods."

The development of this extreme logical sequence of pantheism has not been confined to Taouists or to any particular country. The Upanishad pantheism of the Hindus led to the same results by the same logical process; men came to regard the soul as beyond the reach of sin or stain. Even in the extreme fanaticism which sometimes attaches to Christian doctrine, notions of liberty and perfection lead to the abandonment of law, and to general laxity of life.

Leitsze attached great importance to dreams. They constituted one mode of his teaching. He represented the emperor Hwangte as dreaming that he was in a world where men lived in the freedom of perfect indifference; nothing troubled them. These wonders led to the art of conjuring, and Leitsze wrung from Yin He, the Hankow Gate-keeper, his assent to these arts, and his endorsement of them on the alleged authority of Lao-tze. In all this Leitsze wholly misrepresented the great philosopher and his principles. As a result of these frauds there swept in that flood-tide of juggleries which swamped the principles of Taouism, and opened the way for the old national superstitions.

Leitsze did not fail to encounter the rising Confucianism. He tried the old tactics of his master Lao-tze; he endeavored to put down Confucianism with ridicule. He had no better weapons than those of borrowed sarcasm. As it seemed necessary to his prestige that he assume the rôle of a philosopher, he developed a theory of the universe, but it was puerile and failed to win respect. His favorite method of argument was that of dialogue in which his view was always made to triumph. He was forever fighting men of straw of his own manufacture. In one of these the superior wisdom of pursuing sensual enjoyments while one can is shown to be the best advantage. Yet this man, by his intellect and vigor, won great influence for a time.

He was followed by Chwangtsze. He was inclined to return from Leitsze to a position more like that of Lao-tze. He discoursed on the vanity of life, and bitterly opposed the superfluous homilies and showy benevolences of Confucianism. "Sages," he said, "turn round and round to be benevolent and kick and struggle to become righteous, and the people suspect their very earnestness. They bow and distort themselves in their endeavors to act with propriety, and the empire begins to break up." The satire

which underlies all this is keen, and has a measure of truth.

There are some resemblances between the theories of Chwangtze and the Vedanda philosophy of India. He treated wakeful and conscious life as an illusion, and doubted the substantial reality of all things. And to this day there is a belief among Taoists that there is an inner and invisible soul in all objects; the unseen appears to be quite as real as the visible. As an illustration of this doubt as between the tangible and the invisible, he related a dream in which he seemed to be a butterfly, flitting about in the air, and he felt no little surprise on waking to find that he was no butterfly, but Chwangtze. "But then," he says, "the thought came to me, on the other hand, was that really a dream, or am I now dreaming that I am Chwangtze and not a butterfly?"

In the third century before Christ, Taoism had gained such influence that the reigning emperor ordered a general conflagration of all sacred books except those of the Taoists, but the doctrine as then held was not that of Lao-tze. It had undergone successive changes until it had become a system of childish superstitions. It was believed that immortality might be gained by charms and spells. The emperor Chwangtze believed this, and also that in the western seas there were happy isles where genii dispensed the elixir of immortality to all who came. This emperor sent expeditions to these imaginary isles to bring back the elixir. The period of his reign was a great harvest-time for all Taoist frauds. The priests claimed the most astonishing of occult arts.

Taoism was now neither a philosophy nor a religion; it was a system of jugglery. Under the reign of the emperor Woo of the Han dynasty, who also became an implicit believer, the system still flourished, even down to about 100 B.C. This emperor also sent expeditions to the happy islands; alchemy and the quest for the elixir of life were at their height. It will be remembered that in Europe also similar fanaticisms have at various times been rife; but the wildest of them never equalled that of the Taoists of China in the reign of Woo. From the emperor down, all classes were seeking this elixir. Business of every kind was for a time neglected and the fields were untilled. Only the astrologists and priests were thrifty. The emperor lavished fortunes on their wild schemes.

Under these fanatical emperors Confucianism was bitterly persecuted. Many distinguished Confucian philosophers were burned alive, and all their books were burned (see Prof. Legge's "Religions of China"). But at the death of Woo a great reaction took place and Confucianism was revived and reinstated.

In the first century A.D. the first high-priest or pope of the Taoists was appointed, and the office has descended in his clan to this day. He is elected by the priests of the clan; he is not bound by rules of celibacy or any particularly ascetic requirements.

Taoism became a religion, strictly speaking, soon after the advent of the Buddhists, somewhere about the close of the first century A.D. Like Buddhism it had great powers of absorption, and from having been at first a philosophy and then a system of jugglery it now borrowed certain religious elements from Buddhism. The two systems, both of which were rather

absorbent than catholic and charitable, entered into kindly relations with each other. They at length came to have so much in common that their priests united in the same services, and it is stated by Prof. Legge that an emperor of the Chi dynasty strove to unite them by ordering Taoist priests to adopt the practice and the habit of the Buddhists. Some were put to death for refusing to conform. Taoists have persistently refused to submit to the full ritual of Buddhism, and their monks have withstood the requirement of celibacy. Low and degraded as Taoism had long been, it never sank into idol-worship until it came into contact with Buddhism. Neither had the followers of Confucius or Lao-tze ever worshipped an image until the custom was borrowed from the Buddhists. Now the temples of Taoists vie with those of the Buddhists in this respect.

One of the most noticeable effects of Buddhism upon the Taoist system is seen in the adoption by the latter of a trinity. Buddhism had images in its temples representing Buddha, the Law and the Sangha, though at a later day they came to be regarded as representing Buddha past, present and to come. At length there appeared in the Taoist temples a trinity of colossal images, representing the Perfect Holy One, the Highest Holy One, and the Greatest Holy One. Monasteries and nunneries were unknown among the Taoists until after the introduction of Buddhism; the doctrine of transmigration was also derived from the same source. The Buddhist notion that women distinguished for virtue and character shall be rewarded at the next birth by being born as men, was also adopted by Taoists (see Prof. Legge's Religions, etc., page 192).

In one view a doctrine of eschatology seems out of place in Taoism, since it maintains that rewards and punishments are received in the present life. For example: the so-called "Book of Rewards" makes punishments consist almost invariably in shortening the period of the present life; immortality is spoken of, but it is something treated as of little account. Nevertheless, in each provincial temple of the Taoists may be seen what is called a Chamber of Horrors—a Purgatory. This, doubtless, is an esoteric conception, and is borrowed from Buddhism.

The real spirit of Taoist superstition is seen in the writings of an old author of the fourth century A.D. named Ko Hung. He says that "mountains are inhabited by evil spirits who are more or less powerful, according to the size of the mountain. If a traveller has no protection he will fall into some calamity. He will see trees move though not by the wind, and stones will fall from impending rocks without any apparent cause; he will be attacked by sickness or pierced by thorns, etc." A mirror should be carried, since the mischievous elves are afraid to approach him thus equipped, lest their true character should be discovered.

Taoism has experienced great vicissitudes. During the reign of the emperor Whan, 147-165 A.D., great favor was shown to this system, and the custom of offering imperial sacrifices to Lao-tze at Kocheen, his birthplace, was begun. Many attempts were made to save life by charms, and in order to increase their power, legends borrowed from Buddhism were assigned to Lao-tze. Among other things it was claimed that after he left the Hankow Pass he spent three nights under a mulberry tree under

temptation of the Evil One; lovely women, also, were his tempters.

The system again sank into neglect in the reign of Thukien, 569-583 A.D. Orders were issued against both Taoist and Buddhist monasteries, and no doctrine could be taught but Confucianism. Again, under the Wei dynasty, Buddhism and Taoism were reinstated. In the reign of Tai Wute there was a return to the notion of an elixir of life, and the emperor became a Taoist. In this reign Buddhist asceticism began to be copied by Taoists. The emperor Tai Ho, 477-500 A.D. built temples and monasteries for this sect.

The emperor Woo, 566-578 A.D., abolished Buddhism and Taoism because their jealousies and strifes created disturbance, but Teing, 580-591, reinstated the two religions on equal grade. Under the Tang dynasty Taoism again held for a century the ascendancy over Buddhism, and Lao-tze was canonized. In A.D., 625-627, the Taoists, having become insolent, were banished to the provinces of Quangtung and Quangsi, but under Hwuy Chang they were reinstated and Buddhism was stigmatized officially as a foreign religion. Under the Sung dynasty, 960-976, Taoist priests were forbidden to marry. Hweitsung ordered the Buddhist priests to adopt Taoist names for their orders. The Manchu dynasty, following next in order, persecuted the Taoists, but Jenghis Khan promoted them; also Kublai Khan, in the 13th century A.D. Hung Che, 1488-1506, was very hostile. The present Manchu dynasty has also been hostile, and has passed various edicts against Taoist jugglery.

The sacred book of Taoism, known as the "Book of Rewards," inculcates ethics which are on the whole commendable. The precepts are generally in negative form, but notwithstanding the morality of the "Book of Rewards," the moral grade of modern Taoism is extremely low.

Among the virtual deities at the present time are first of all, Lao-tze, who is supremely revered. But a god of providence having general charge of human affairs is found to be necessary, and accordingly Yunwang Shangti, or the Precious Imperial God, is assigned to that place. The constellation of the Great Bear is also worshipped as a representative of the sidereal powers, also various forces of nature, as the Mother of Lightning, the Spirit of the Sea, the Lord of the Tides, etc. The dragon is a great object of worship with Taoists. His images are everywhere; serpents are his living representatives. Even Li Hung Chang, great statesman as he is, worshipped a serpent which crept into a temple in Tientsin in time of a flood in 1874. Chang Chun, a disembodied sage of the past, is now worshipped as a god of literature; a great hero of the past is worshipped as the god of war, and a third deity is the god of medicine. But altogether the most popular is Tsachin, the god of wealth. Every store and shop has a little altar for burning incense to him. This suits the average Chinaman better than the transcendentalism of Lao-tze, or the lofty ethics of Confucius, or the nirvana of Buddhism. The boasted millions of Buddhists in China all believe supremely in Tsachin.

The polytheism of China is still further ramified under the influence of Taoism, embracing gods of the sea, of the village, of the

hearth, of the kitchen, and demigods to represent all virtues; in other words, deified men, heroes, scholars, etc.

A remarkable influence has been produced by these superstitions upon the Buddhism of China, as shown in the fact that the Buddhist temples are full of the same images of ideals, of virtues, and of heroic men. In the great Buddhist temple of Honan in Canton there are hundreds of full-sized figures of deified men.

**Tapiteua**, one of the Gilbert Islands (q.v.); mission station of the Hawaiian Evangelical Association; 2 native pastors, 174 church-members.

**Tarsus**, a city of Southern Asia Minor, 20 miles from Mersine. The birthplace of the Apostle Paul. Population, Turks, Armenians, and Nusairiyeh. Mission out-station of the A. B. C. F. M. worked from Adana. Occupied also by the Reformed Presbyterian (Covenanter) Church, U. S. A., for its work among the Nusairiyeh. A movement was started in 1889 for establishing an institute called St. Paul's Institute, which should combine several departments of evangelistic and educational work. The unhealthiness of the climate, due to the great heat in summer and the prevalence of malaria, together with the difficulty of securing the necessary permits from the Turkish Government, have, however, so far delayed the accomplishment of the plan.

**Tartar**, or **Tatar**, is a name which has been loosely applied to the inhabitants of Central Asia, and does not carry with it any ethnological or political significance. The various races which inhabit Central Asia belong to the Aryan and Turanian races—the former predominating in the Russian provinces, the latter more numerous towards the confines of China. In the Russian Empire there are three large groups:

(1) Those in European Russia and Poland. These are: The Kazan Tartars, who speak a pure Turkish dialect, and are followers of Mohammed; the Astrakhan Tartars; and the Crimean, or Nogai, who are perhaps the best type of the Tartar race.

(2) Those inhabiting the Caucasus: The nomadic Nogai; the Karatschi; the Mountain Tartars, who are of very mixed origin, and practically consist of tribes who are not included in any other classification.

(3) The Siberian Tartars, who are mixed with Finnish blood, and are the most difficult to classify. Some of them have been named as follows: Baraba Tartars, who live in Tobolsk; the Tcholyon, on the Tcholyon River, who present many Mongolian characteristics; the Altai-Teleutes, and numerous other tribes.

In Turkestan the intermixture of the Mongol and the Turkish races is so indiscriminate and complete, that it is perhaps convenient to designate the various tribes by this provisional term until further research will enable correct subdivisions of the races to be determined. (See Mongol.)

**Tasmania**, formerly Van Diemen's Land, is a British colony of Australasia, including the island of that name, and several smaller ones lying, for the most part, in Bass Strait. Area, 26,215 square miles. The estimated population (1889) is 151,470, composed of Tasmanians, English, Australasians, Chinese, and Germans.

The island is traversed by mountain ranges with fertile valleys. The climate is mild, and not subject to extremes. It was made a penal settlement in 1804, but transportation of criminals ceased in 1853. The aborigines are entirely extinct. Hobart, the capital, had a population of 21,118 in 1881, and Launceston had 12,752.

The people are now nominally Christian, the majority belonging to the Church of England, the remainder being Roman Catholics, Wesleyan Methodists, Presbyterians, and others.

The S. P. G. has 1 missionary. The Wesleyan Methodist Missionary Society have 602 churches in Victoria and Tasmania together.

**Ta-tung**, a prefectural city in Shansi, China, is occupied by the C. I. M. (1886); 3 missionaries and assistant missionaries.

**Taung**, a town in Bechuanaland, South African Republic, near a branch of the Orange River. Mission station of the L. M. S. (1866); 1 missionary, 5 out-stations, 8 native preachers, 391 church-members.

**Tavoy**, a town in Lower Burma, India, on the Tavoy River, 30 miles from its mouth. The town lies low, and its north western and southern portions are flooded at high tide, and swampy during the rains. It is laid out in straight streets, and the houses are generally built of timber or bamboo, thatched with palm-leaves. Its trade is of little importance. Population, 13,372. Moslems, Hindus, Christians. It is the place where the Karen Mission of the A. B. M. U. was commenced in 1828. In the Burman department there are now 1 missionary and wife, 1 church, 15 church-members, 1 Sunday-school, 1 school, 75 scholars; Karen work, 1 missionary and wife, 17 out-stations, 14 native preachers, 17 self-supporting churches, 984 church-members, 3 Sunday-schools, 14 day-schools, 440 scholars.

**Taylor, Bishop William: Self-Supporting Mission Work.**—William Taylor is a clergyman of the Methodist Episcopal Church in the United States who in about 1850 commenced a work which has identified his name with missions in many countries. At first a street-preacher in San Francisco, Cal., he afterwards visited other countries, and became impressed with the idea that the existing system of missionary societies was not the best. That missions should be self-supporting, and in a sense indigenous to the soil. He has worked in India, South America and Africa, with good results in each country, but at present his labors are chiefly confined to Africa. He is now Missionary Bishop of the M. E. Church (North) for Africa, where he remains most of the time. In his absence he is represented in New York City by a few non-salaried men and women, who administer the home business, take entire charge of the South American work, and of the African work, so far as to respond to Bishop Taylor's calls for men and equipments.

His custom is to go in advance of his missionaries, select a locality, open the way and station the men, and then consider himself responsible for nothing additional. There is also a Transit and Building Fund Society of Bishop Taylor's Self-Supporting Missions which pays the transportation fares of accepted candidates (where they are unable to bear their own expenses) from New York to the mission fields,

with such outfit as is deemed necessary to start the mission, but assumes no further obligation.

Nor does the Society deem itself justified in paying the outgoing expenses entire, where less than five years' service is rendered.

All applications must be accompanied by testimonials from the pastor and presiding elder as to religious character and general fitness for the work. A certificate as to health from a reliable physician, and a statement from a principal, professor, or other intelligent person, as to education, are required.

In South America three kinds of laborers are in demand: 1. Well-qualified teachers (graduates); those who have had some experience in teaching being preferred. Some first-class music-teachers required. 2. Preachers and teachers—men who can teach through the week and do evangelistic work on the Sabbath. 3. Missionaries pure and simple, who will devote their entire time to soul-saving. The same literary qualifications are required for each class. Both married and single men can be employed in each of these departments, and all will be expected to labor in Sunday-schools and gospel-meetings.

The qualifications necessary are good health, sound mind, holiness of heart and life, entire consecration to the self-supporting work, willingness to live among the people, fare as they fare, and, if need be, die among them.

As appears by the report, dated March, 1888, within three years about 100 missionaries have been secured and sent to the field; and from February 5th, 1886, to March 24th, 1888, there was expended for transit, outfits, furnishings, Congo steamer (\$16,301), Santiago College building mortgage (\$46,600), etc., the total sum of \$109,000.

The great departments of the work are: Educational, Industrial, and Evangelical, and of early self-sustentation; later, absolute self-support, and then self-propagation,—founding new missions without help from home.

**Work in South America.**—CHILI. Concepcion.—Here there are (1888) two schools and a church organization. On a large lot fronting the best street in the city has been erected a building (90 by 35) for the boys' school.

Santiago.—A large and magnificent school building is located here on one of the best streets. It is doubtful whether there is anywhere in the United States a school structure with better appointments. It is three stories in height, having about 100 rooms, besides a large gymnasium detached from the main building.

Coquimbo.—This station is the oldest and perhaps the most flourishing of their stations. There is here a Methodist Episcopal church-building, a parsonage, a church organization, and school-buildings for both boys and girls,—instruction given separately,—and all in prosperous condition.

Iquique.—This place is the chief city taken by Chili from Peru as a war indemnity, and the transfer has proved a benefit. The mineral products are reported to be inexhaustible. A lot has been purchased on the corner of two principal streets. On this a building has been erected containing two apartments for schools, for boys and girls respectively. There is also a commodious parsonage, a neat chapel-room, and a revived organization of a Methodist Episcopal church.

**PERU.**—Callao, the most northern station in South America, is the chief seaport town of Peru, only seven miles from Lima, the capital. Romanism is dominant here, and the country is in almost every respect more than a century behind the age. Callao is the only place in Peru where there has been any attempt at missionary work. Here there is a school of 35 pupils and religious services are held.

At Colon there is a mission house, and a Methodist Episcopal church has been organized. Other preaching places are at San Pablo, Tabernilla, and Panama.

From July, 1878, to July, 1889, there came to the western coast of South America, under the auspices of the "Self-Supporting Mission," 26 preachers, 18 of them married; 9 male teachers, 3 of them married; and 46 female teachers. Most of the wives assisted in the schools. Of the entire number 27 are still in the field; of the 26 preachers 6 remain.

In **BRAZIL** there are three stations—Para, Pernambuco, and Manaos. These are served by 5 persons. There is at Para (March, 1888) a church organization with a membership of 29. The station at Manaos has just been opened.

**Work in Africa.**—Within three years (preceding March, 1888) about 100 missionaries have been secured and sent into the field.

**West Coast Stations.**—It was understood from the beginning that the mission should not take boarding-schools or open school-work regularly until enough food could be produced from the soil for their sustenance. Bishop Taylor arranged for building 14 houses in the missions on the west coast this year (1888-9), for chapel and school purposes.

**Cavalla River District.**—This includes the following stations: Wisika Station, about 40 miles up from the mouth of the river. Its king, chiefs, and people received a missionary, built him a good native house, and supported him for several months. Eubloky, on the west bank. Yahky. Tateka, on the east bank. Beabo, on the west bank, has adequate resources of self-support. Bararoba, on the east bank. Gerribo, west bank, has a mission house. Wallaky, a large town of the Gerribo tribe, on the west bank. Plebo. Barrek.

At eight of these stations there are frame, weather boarded, shingle-roofed houses, the floors elevated about six feet above the ground, the whole set on pillars of native logs from the forest. In all these places schoolhouses are being built. Each station is in a tribe distinct and separate from every other tribe, and each river town represents a larger population far back in the interior of the wild country.

**Cape Palmas District.**—Pluky (across Hoffman River from Cape Palmas) is the beginning of the Kroo coast line of stations. Here Miss McNeal's school-house is crowded; besides teaching during the week, she preaches on the Sabbath. Garaway, 20 miles northwest of Cape Palmas. Here enough of food is produced on the farm to feed two or three stations. Piquini Sea, 30 miles northwest of Cape Palmas, has a school and a school-farm. Grand Ses. Sas Town; a church organized. Niffo. Nanna Kroo. Setra Kroo; farming, teaching, and preaching carried on. On each of these Kroo stations, except Pluky, there is a well-built mission house. Excepting the missionaries, there is not a Liberian or foreigner of any sort in any of the stations named on Cavalla River or Kroo

coast. Ebenezer, west side of the Sinoe River. The king of the tribe has proclaimed Sabbath as God's Day, and ordered his people not to work on that day, but to go to church. Benson River, in the Grand Bassa country.

At Mamby, on an inland lake, which can only be reached by a journey of many days' length by steamer and boat, the French have recognized and registered the native title given to the mission to 100 acres of land. While professedly friendly, the French have limited the work of the mission by forbidding the giving of instruction in any language save French.

Kabindu, near the mouth of the Congo.

St. Paul de Loanda, a beautiful landlocked harbor, has a mission which has been self-supporting from the Portuguese patronage of the schools, but an adequate corps of teachers is needed.

Dombo, 180 miles up the Coanza River,—which is as large as the Hudson,—is a noted trading centre and the head of steamboat navigation. The property of the mission here is worth \$5,000. The school-work and machine-shop were self-supporting from the beginning.

Fifty-one miles overland from Dombo, over hills and valleys, reached by way of an old caravan trail, lies Nhanguepepo, with \$6,000 worth of mission property. Originally intended to be a receiving station for new missionaries, where they could be acclimatized, it has become specially a training-school for native agency. There is here an organized Methodist Episcopal church. A great variety of work is carried on by converts. This station yields ample sustentation for all these workers, and is continually making improvements, which are paid for from their profits.

Pongo Andongo is reached by a march of 38 miles easterly. It is wedged in between stupendous mountains. There is a large adobe house here, including chapel and store-room, nearly an acre of ground with fruit-bearing trees in the town, and a good farm of about 300 acres a mile out—all worth about \$4,000. Pongo Andongo has passed the line of self-support, and is making money to open new stations in the regions beyond.

Malange, a town of about 2,000, and noted for its merchandise, is 62 miles from Pongo Andongo. Here is a mission store; school-work and preaching are sustained. The property here is worth about \$6,000, and the big farm pays, and two pit saws, run by four natives, turned out \$1,500 worth of lumber last year, which sells for cash at the saw-pits. A two-story mission house has lately been completed.

Luluburg, in the Bashalinga country, discovered by Dr. Pogge and Lieut. Weismann in 1883, is reached by a journey of a "thousand miles" toward the northeast. Here Dr. Summers founded a station, built a couple of houses, and was making good progress when, worn out by disease, he died.

Lueba, at the junction of the Lulua and Kassai rivers.

Kimpopo, near the northeast angle of Stanley Pool, was opened in 1886 as a way-station on the line of transportation to the countries of the Upper Kassai. Here was dug an irrigating ditch a mile long, drawing an abundant supply of water from a mountain creek, and the mission farm of 10 acres supplies plenty of food, and is a source of revenue.

South Manyanga is 100 miles from Leopold-

vile and Matadi is 230 miles distant on the Lower Congo. A launch of three or four tons burden is used in traversing the 88 miles from this station to Isangda, which has been a station for over two years, with good native houses built by the mission.

Vivi, 55 miles distant, is one of the most beautiful stations on the Congo, and will soon be self-supporting, as the soil is fertile and game is plenty. The mission raises live-stock, in addition to vegetables and fruits.

Banana is reached by steamer 100 miles down the Congo, and is within one hour and a half, by oars, of the station at Natombe. Here there is a school-house 22×24 ft., with 20 scholars; also a fruit orchard.

Two years ago were started, between Vivi and Isangila, three stations,—Vumtomby Vivi, Sadi Kabanza, and Matamba,—where pretty good houses were built. The aim this year has been to supply the guarantees for self-support. Besides fruits and vegetables, the most reliable resource for the new Liberian stations in marketable values is coffee.

Provision has been made to supply the stations with ploughs and oxen, and coffee scions, which after five years will produce two crops annually in Liberia for fifty years.

The Steamer.—A steamer is needed on the Lower Congo much more than upon the Upper. With it on the Lower Congo, and a steel boat on the middle passage, to carry freights from Isangila to Manyanga, the mission will have an advantage in the freight business to the upper countries, and it will cut expenses down more than one-half of the present rate, and they will be able to do work for other missions as well. Except in leadership and superintendency, all this heavy work will be done by natives, whom the missionaries wish to employ and train to habits of industry, as that is part of their mission plan.

From March 25th, 1888, to October 31st, 1889, there was expended \$71,219.38.

**Taylor, Horace S.**, b. West Hartland, Conn., U. S. A., October 31st, 1814; received his collegiate and theological education at Western Reserve College 1844; ordained Milan, Ohio; sailed May 6th the same year under the A. B. C. F. M. for the Madura Mission; stationed first at Tirupuvanam, removed in 1850 to Mandapasalai, which he occupied till his death, except during a visit to the United States 1865-7. Letters from his associates show how he was esteemed. Mr. Capron says: "With the exception of Mr. Tracy, Mr. Taylor was our oldest missionary. He was active, laborious, and successful. No other member of our mission had the privilege of gathering so many congregations and receiving so many converts to the church. He lived near to Christ by prayer and the study of the Scriptures." Mr. Rendall says: "Mr. Taylor leaves behind a very precious memory. His heart was full of love for his Master and for his work. He had a kind, loving word for all, both Christians and heathen. I never knew him to be discouraged in all these twenty-five years. During my eighteen years in Madura I received nearly a hundred notes from him every year, and I never received one in which he showed the least depression or the slightest indication of discouragement. He was remarkably active in mind and labors, ever planning

to advance Christ's cause among the people. In the Mandapasalai station he gathered from the heathen into Christian congregations about 1,800 souls, of whom nearly 300 are communicants, and he organized nine village churches." Mr. Taylor had been declining in health for some time; and though he went to Madura to attend the annual meeting of the mission, he was not able to leave his room. He visited the sanitarium on the hills, but failed rapidly, and died February 3d, 1871.

**Tchermiss Version.**—The Tchermiss belongs to the Finn branch of the Ural-Altaic family of languages, and is spoken by a tribe on the Volga and Kama, in the governments of Kazan and Simbersk. During the reign of the emperor Alexander I. the Russian Bible Society printed at St. Petersburg in 1820 the New Testament in the Tchermiss language, under the care of the archbishop of Kazan. Since the dissolution of the Russian Bible Society nothing further has been done for this people.

(Specimen verse. John 3:16.)

Теньгѣ ярашнѣ Юма санданкамъ,  
шша якъ шкѣ ѳргажамъ. пұшъ, сакай  
инянъша шыдаланъ ѳнже-ямъ, а ѳлежѣ  
варѣ мучашдѣма кұрумъ мұчка.

**Tchuvash Version.**—The Tchuvash belongs to the Turki branch of the Ural-Altaic family of languages, and is spoken by a tribe of 670,000, partially Christianized and living in the mountains of Kazan, Nijni-Novogorod, and Orenburg. In 1820 the Russian Bible Society published at St. Petersburg an edition of the four Gospels, which were translated by a committee at Simbersk. When the Russian Bible Society was dissolved the work of translation came to an end. Of late the British and Foreign Bible Society has engaged Prof. Jacobliff, the government inspector of the Tchuvash schools in and around Simbersk, to prepare a translation into the Tchuvash dialect.

(Specimen verse. John 3:16.)

Сяпѣ ѳбрѣдре Тѳра Эдемя, што барзѣ  
ху ѳвълне деръ сѳбрѣдпыне, штобы поръ  
инянѣгнѣн ѳпѣ апъ пѳдтаръ, а ѳсрѣдаръ  
ѳумюръгѣ бұрназя.

**Teheran** (Tehran), the capital of Persia, is situated in latitude 35° 40' north, longitude 51° 25' east. It is a walled city, with narrow, ill-paved streets, though here and there Parisian boulevards and European houses present striking contrasts to the native quarters. The water supply is good and abundant, and public baths are numerous. The population of 210,000 consists of Turks, Persians, and Armenians, and a few Jews and Parsis. The king's college is established here, with 250 students who receive a liberal education.

Mission station of the Presbyterian Church (North), 1872; 4 missionaries and wives (1 medical missionary), 4 female missionaries (1 medical missionary), 2 out-stations, 48 communicants, 3 day-schools, 120 pupils, girls' boarding-school, 81 scholars, boys' school, 34 day and 46 boarding scholars, and a dispensary.

**Teh-ngan**, a city in the province of Hupeh, Central China, on an affluent of the Yang-tsz River. Mission station of the Wesleyan Missionary Society; 1 missionary, 1 native pastor, 2 chapels, 84 church members, 1 school, 1 teacher, 10 scholars.

**Telang**, a town in Borneo, on the upper course of the Kahajair River, north of Raive. Mission station of the Rhenish Missionary Society; 1 missionary, 1 native helper, 40 church-members, 14 school-children.

**Tellicherry**, a port on the Malabar Coast, Madras, India, 43 miles north-northwest of Calicut. A healthy and picturesque town built upon a group of wooded hills running down to the sea, protected by a natural breakwater of rock. It has a good harbor and an excellent trade. Population, 26,410, Hindus, Moslems, Christians. Mission station of the Basle Missionary Society; 3 missionaries (2 married), 37 native helpers, 3 out-stations, 415 church-members.

**Telugus**, a race occupying a section of the Madras Presidency, India. (See India, Madras, A. B. M. U., C. M. S., etc.)

**Telugu Mission.**—Conducted by Rev. C. B. Ward. Supported at first by contributions, at present mainly by its own earnings.

The Telugu Mission had its start in a prayer-meeting held in Goolburga, a railway station about 300 miles from Bombay, India, in February, 1879. The great famine of 1876-78 was just over, and the actual work of the mission began in March, 1879, by taking from a famine poorhouse, which had been kept up by private charity for over a year, 5 boys and girls, who were cared for by Mr. Davis, a Methodist missionary, at his house in Goolburga; to this number were soon added 14 waifs from a famine camp at Adoni, and 2 from Goolburga, making 21 Telugu, Kanarese, and Mohammedan children. By the 1st of October, 1879, 180 orphans had been gathered at Mr. Davis's house, the bulk of the care of all these little ones falling on Mr. Davis. At a later period Rev. C. B. Ward, of Chicago, U. S. A., was put in charge of the work, which is not now an "Orphan Home," but a Christian colony of 50 adults and 40 children.

The insurmountable difficulties in the way of acquiring any land under the Mohammedan Government has made a "two-house" arrangement a necessity—one at Secunderabad for Mrs. Ward, her own and the native children; the other at Dothan, or wherever Mr. Ward can find employment in railroad construction or mining, for his whole field force. The last four years have been thus spent in camp by the greater part of the colony.

The mission has lately succeeded in renting about 2,000 acres of land; its migratory life will therefore soon cease, and the colony will become the basis of supply for evangelistic workers in all the region around.

The mission has from the first been conducted on the "faith" principle, contributions towards its support never having been solicited; it is now in large measure self-supporting, one half of the \$35,000 which have been expended during its ten years of existence having been earned by the mission. For the last four years the earnings have far exceeded the contributions.

Work has been begun on the mission village, and it is hoped that vigorous evangelizing labors may be entered upon from this centre.

**Telugu Version.**—The Telugu belongs to the Dravidian family of non-Aryan languages, and is spoken in Northern Circars, Cuddapah, Nellore, and the greater part of Hyderabad or Telingana. A translation into the Telugu, or Telinga as it is also called, was undertaken by the famous missionary, Benjamin Schultze, which, however, was never published. Of the translation undertaken by Serampore missionaries, the New Testament was published in 1818, and the Pentateuch in 1820.

A translation known as the *Vizagapatam Version*, commenced by the Rev. Augustus Desgranges of the London Missionary Society, aided by Mr. Anunderayer, a Telugu Brahmin of high caste, but a convert to Christianity, and continued by the Revs. J. Gordon and Pritchett of the London Missionary Society, was published at Madras, 1812-55. The Telugu Bible is at present undergoing a careful revision by a revision board under the presidency of the Rev. Dr. J. Hay. Of the revised version, thus far the Pentateuch, Job, Psalms, Proverbs, Jeremiah, and Lamentations have been published. In the mean time interim editions of the Bible made up of revised parts and portions of the old version are printed to satisfy the necessary demand.

Portions of the New Testament were also published with English and Sanscrit.

(*Specimen verse.* John 3: 16.)

యెందుకో దేవుడు కోకుం ప్రపంచుట  
యేలాంటి—అయిన యందు విశ్వాసముచే  
ప్రతివాడున్న నశించక నిత్యజీవము పొందెకొ  
రకు తన జనితైక కుమారుని యిచ్చెను

**Temne Version.**—The Temne belongs to the negro group of African languages, and is spoken by the Temnes, who are a small and destitute tribe in Quiah Country, in the neighborhood of Sierra Leone, West Africa. The Rev. C. F. Schlenker of the Church Missionary Society translated the New Testament and the Book of Genesis, which were published by the British and Foreign Bible Society in 1867. In 1869 the same society published the Psalms at Stuttgart, prepared by the same translator. In 1888 the same society published the Book of Exodus, translated by the Rev. J. Markah and J. A. Alley of Port Lokkoh. The latter also read the proof.

(*Specimen verse.* John. 3: 16.)

Tša yo K'uru o por bōlār ara-rū, šā o sōnd Ow'ān-  
K'or o kom gbo sōn, kāma w'ūni ō w'ūni, wōg lāng-kō  
o tšē dinnē; kēg kāma o sōlo a-nēšqam atabāna.

**Temple, Daniel**, b. December 23d, 1789, at Reading, Mass., U. S. A. The perusal of Dr. Buchanan's "Christian Researches in India" at his conversion led him to the decision to become a missionary to the heathen. He studied at Phillips Academy, Andover; Dartmouth College; and Andover Theological Seminary. While in the seminary he offered himself to the

A. B. C. F. M., and was appointed a missionary to Palestine. After spending a year in the service of the Board, he was ordained October 3d, 1821, and embarked January 2d, 1822, reaching Malta February 22d. Here he remained till 1833, the political condition of Turkey and Syria rendering it unsafe for a missionary family to settle there. He prepared books and tracts for circulation in Italy, Greece, and Turkey, which were printed on the press he took with him, widely distributed, and well received. In 1828, by invitation of the Prudential Committee, he visited the United States, and engaged in an agency for the Board till his return to the East. He embarked for Malta January 18th, 1830, taking his children with him. In addition to the superintendence of the press, he had during almost his whole residence here two services on the Sabbath in English in his own house, a Sabbath-school which he taught himself, and also a lecture Friday evening. In 1833, December 7th, he left Malta for Smyrna, the place selected by the Committee as the most eligible for the press. From 1822, when the press was established in Malta, to the time of its removal, were issued 350,000 volumes containing 21,000,000 pages. Nearly the whole had been circulated, and additional supplies of some of the works were urgently demanded. The arrival at Smyrna of a vessel with presses and printing materials, and an ordained missionary, created great opposition, and Mr. Temple was ordered by the governor to leave the city in ten days. But after some correspondence with the consul the storm passed away. The Greek Ecclesiastical Committee broke up eight schools, containing from six to eight hundred children, and forbade the teachers to remain with the missionaries, threatening them with imprisonment or banishment if they refused to obey. In 1837 Mr. Temple commenced the publication of a monthly magazine in Greek, "The Repository," of a mixed character, which met with much favor. The Greek patriarch forbade all his subjects to read any of the missionaries' translations of the Scriptures in Turkish, Arabic, Servian, Bulgarian, or Slavonian dialect. During this year the plague, of which Mrs. Dwight died at Constantinople, raged with terrific violence at Smyrna. In 1839 the famous edict known as the "Hatti Sherif" was promulgated by the Sultan, placing all the subjects of his empire on an equality. An imperial order also was issued restoring the Armenians who had been banished for embracing the gospel. During the visit of Drs. Anderson and Hawes to the mission it was decided to abandon the Greek department in Greece and Turkey. This made it necessary for Mr. Temple to leave the missionary field. He embarked for the United States June 7th, 1844. He preached in Concord, N. H., and at Phelps, N. Y., but resigned his pastorate on account of ill-health December 27th, 1849. A voyage to Chagres, and in 1851 to Liverpool, did not benefit him, and he rapidly failed, and died August 9th, 1851. Dr. Goodell, his associate at Smyrna, in his funeral sermon thus spoke of him: "His study of the Bible his familiarity with the very language of the Bible, the copiousness and pertinency of his prayers, the perfect ease with which he would introduce religious conversation, even of the most personal kind, and the truly Christian courteousness of his manner under the contradic-

tions of cavillers, were all wonderful. His labors were blessed wherever he went, and soldiers and sailors, as well as many others, look up to him as their spiritual father."

**Tetuan**, a seaport of Morocco (q.v.). The province of the same name has an area of 914 square miles, with a population of 17,900. Mission station of the North African Mission (see article); 3 missionaries.

**Tezpur**, a town of Assam, India, on the Brahmaputra, 75 miles above Gauhati. The town is built on a plain between two low ranges of hills, upon which the houses of the European residents are built. It is an important seat of trade, where the river steamers touch to take on board tea, and to leave stores of various kinds to be distributed among the neighboring tea-gardens. Of late years the character of the houses and sanitary condition of the town have been much improved. Population, 2,910. Mission station S. P. G.; 2 missionaries, 3 native helpers, 26 out-stations, 207 school-children.

**Thaba-Bosiou**, a town in the Orange Free State, Africa, northeast of Hermon. Mission station of the Paris Evangelical Society (1837); 1 ordained missionary, 1 female missionary, 460 communicants.

**Thatun** (Thatone), a town in Amherst district, Tenasserim division, Burma, India. Population, 3,218. Now a place of little importance, but formerly capital of an independent kingdom, and one of the earliest places mentioned in Taking history. The town contains several pagodas, most of them mutilated and in ruins. Mission station of the American Baptist Missionary Union; 1 female missionary, 7 native helpers, 26 church-members, 1 school, 32 scholars.

**Thayetmyo**, a town on the Irrawaddy River, Burma, 25 miles from Prome. In the rains the place looks fresh and green, but during the dry season it presents a dreary appearance. Climate healthy, but excessively hot. Population, 8,379. Race and language, Chinese. Religion, spirit-worship. Social condition barbarous. Mission station A. B. M. U. (1888); 1 missionary and wife, 11 native helpers, 3 out-stations, 3 churches, 61 church-members. S. P. G. (1867); 1 native missionary.

**Thlotse Heights**, a town in the northeast of Orange Free State, South Africa, on the Caledon River, south of Ebenezer. Mission station of the S. P. G.; 1 missionary, 63 communicants.

**Thongze** (Thoungzai), a town in Burma, India, on the Prome and Thongzai Railroad, midway between the two places. Mission station of the American Baptist Missionary Union (1855); 1 female missionary, 12 native helpers, 7 out-stations, 2 churches, 397 church-members, 3 schools, 145 scholars. (See American Baptist Missionary Union.)

**Thurston, Asa**, b. Fitchburg, Mass., U. S. A., October 12th, 1787; graduated at Yale College 1816, Andover Theological Seminary 1819; embarked as a missionary of the A. B. C. F. M. October 23d, 1819, with others, who formed the first band of missionaries for the Sandwich Islands. In an obituary notice in the

"Honolulu Friend" it is stated: "As a missionary Mr. Thurston ever labored with great usefulness and success. His knowledge of the native language and character was most thorough; and as a preacher he was much beloved by the native Hawaiians. In the early years of the mission his labors as a translator were arduous and successful." In an address at his funeral, March 12th, 1868, Mr. Corwin said: "This day is just one month less than 48 years from the day when he and the still surviving companion of his earthly pilgrimage were stationed at Kailua, the ancient residence of the Hawaiian kings. And there for more than 40 years he continued to reside and to labor as the honored pastor of a large and very important parish. He was the instructor for a time of both Kamehameha II. and Kamehameha III., and his influence over them, especially the latter, was great. Never once leaving the islands for 48 years, he was honored by natives and foreigners alike as a faithful, patient, persistent worker. Only when advanced age and repeated strokes of paralysis had rendered him incapable of service did he consent to resign his pastorate at Kailua, that he might spend the closing years of his life in this city." He died at Honolulu March 11th, 1868, aged 81.

**Tiberias**, a town in Western Palestine, on the upper course of the Jordan River. Population, 6,000, Jews, Moslems, and Syrian Christians. Languages, Arabic, a Jewish jargon, and Hebrew. Mission station of the Free Church of Scotland Jewish Mission (1884); 2 missionaries (1 married), 1 female missionary, 7 native helpers, 1 out-station, 1 school, 60 scholars, 2 preaching places, 20 to 50 average attendance.

**Tibet**, one of the possessions of China, comprising a great division of the Chinese Empire, is a country of which very little is definitely known. Surrounded by high mountains, it has been to a great degree isolated from the rest of the world. Tibet is a corruption of the Chinese name; the people themselves call it the "land of Bod." The Kwanlun Mountains bound it on the north; on the east are the Chinese provinces of Szchuen and Yunnan; Assam, Buhtan, Nipal, and Gurhwal separate it from Burma and India on the south; while on the west its boundaries are not sharply defined from the territory of Kokonor. Little Tibet does not properly belong to Tibet, though it is claimed by Chinese geographers. The greater part of the surface consists of high tableland (elevation 11,510 ft.), divided into three parts by mountain ranges: the valley of the Indus on the west, between the Hindu Kush and Himalaya Mountains; the high desert land, almost uninhabitable and wholly unknown, lying between the Kwanlun and Himalaya Mountains; and the basin of the Yaru-tsangbu on the east, consisting of high ridges and deep gorges, mountains and valleys. Numerous peaks of perpetually snow-capped mountains are here found, of which Mt. Kailasa (26,000 ft.) is the highest.

The principal river, the Yaru-tsangbu, drains the whole of Southern Tibet between the first and second ranges of the Himalayas, and is supposed to empty into the Brahmaputra, though explorations have not yet been extensive enough to decide the truth. All the large rivers of Southern and Eastern Asia find their source

in Tibet. In the central part are numerous lakes. The climate is varied, but in general the air is pure and excessively dry. Snow and ice last for most of the year, but in the middle of summer the valleys, even between the snowy mountains, are excessively hot. In the southern part moisture and vegetation are found, and sheep, goats, and yaks are raised.

The government is conducted by two high commissioners appointed at Peking, but these confer with and are guided by the two grand officers of the Tibetan hierarchy, the Dalai-Lama and the Teshu-Lama: the former is known generally as the Grand Lama. The power is practically in the hands of the priests or lamas (see Lamaism, under Buddhism), whose number is so great as to give Tibet the name of the "kingdom of priests." The southern frontier is strongly fortified, and communication with the states intervening between Tibet and India is forbidden. On the Chinese frontier the same strictness is exercised, for the policy of exclusion is fostered alike by the Lamas and the Chinese—the one because they wish to preserve their religious supremacy and fat offices, the other because they wish to retain their political power, faint though it be. L'hassa, the capital, has only once been visited by an Englishman,—Mr. Manning, in 1811,—and its location has but recently been agreed upon to be approximately in lat. 29° 39' 17" N. and long. 91° 05' E. It stands in a fertile plain, at an altitude of 11,700 feet, encircled by mountains. It is noted for the number of its monasteries, bonzes and lamas, filthy streets and mean buildings. The population is estimated at from 40,000 to 80,000, and the population of the whole of Tibet is estimated by Russian authorities at 6,000,000. The people belong to the Mongol race. They are not so highly civilized as the Chinese, but are more so than the Mongols. Physically they are of somewhat slender build, with brown hair, slightly oblique eyes, swarthy, and beardless. They are a mild-tempered, genial, kind and friendly people, and intensely religious. In no other country is so much deference paid to the priests; the proportion of believers in the religion is also greater than in most countries. Their religion consists of two kinds: the old original religion called the "Bon," of which little or nothing definite is known; and that form of Buddhism called Lamaism. The social customs of the people differ greatly from that of their neighbors on the east and south, particularly in the position which women hold. Here polyandry is the custom instead of polygamy, the wife being usually espoused by brothers. In general education is restricted to the priests, but the women, who conduct most of the traffic, learn writing and arithmetic. In some of the northern provinces the chieftainship is held by the women.

The language of Tibet is derived from the Sanskrit. It is alphabetical, and reads from left to right. Thirty consonants are recognized, with four additional vowel signs. Their literature, as well as many of their customs, has been influenced to a great degree by China.

Missions are not permitted in Tibet. In former times the Roman Catholic Church made noble efforts to enter the forbidden land, and was for a time successful. In 1330 the apostle of Tartary, Odoric Forojuliensis, travelled in Tibet and found missionaries al-

ready in the city of L'hasa, who had gone there, it is supposed, early in the preceding century. In the 17th century a mission was commenced from India, and the reigning prince was favorable to the new religion; but his apostasy was made the pretext for his overthrow. Various attempts at evangelization have been made since that time. The most noteworthy one was in 1845, when Fathers Gabet and Huc penetrated to L'hasa after a journey of eighteen months, only to be arrested by the Chinese officials, who sent them prisoners to Canton. From that time the Société des Étrangères has made numerous attempts both by way of India and China to enter the kingdom; but after suffering persecution and the massacre of their priests they have given up the effort, and occupy now only the confines of Tibet, where they work among the Chinese and such Tibetans as are there found.

The Moravian Brethren occupy three stations in Little Tibet (see Leh, Poo, and Kyelang), where they are waiting for opportunity to enter Tibet. One or two attempts have been made at great risk, but have proved ineffectual. They have studied the Tibetan language, and there are now several works which will aid the future missionaries to Tibet when the country is opened. A Tibetan-English grammar, a Tibetan grammar, and a New Testament in Tibetan have all been published. The missionaries of the C. I. M. in Szchuen and Yunnan are also waiting to possess the land. A prayer union has been formed among the Moravians, whose object is to pray for the opening of the land of priests to the preaching of the gospel.

**Tibetan Version.**—The Tibetan belongs to the Tibeto-Burma group of non-Aryan languages, and is spoken in Tibet. The Gospels of Mark and John have been translated into the Tibetan language, and lithographed by Moravian missionaries, who have found their way into the immediate vicinity of this vast country, from which visitors and foreigners are rigidly excluded. Prior to 1868 the Rev. H. A. Jaeschke of the Moravian Missionary Society had translated the New Testament (save Luke, Hebrews, and Revelation), which was published at Lahore 1859-1865. A new effort was made by the British and Foreign Bible Society in 1880 to publish, at the request of the Moravian Missionary Society, a revised edition of the New Testament, made by Mr. Jaeschke, who was to complete the translation and edit the edition at Berlin, where he was carrying through the press for the India Government a Tibetan dictionary. In 1881 an edition of 5,000 copies of each of the four Gospels was published, which was much admired by Tibetan scholars. They were printed in the square form common to Tibetan books, and revised by Messrs. Heyde and Redslob of Kyelang, and aided by Nathaniel, a baptized lama. As Mr. Jaeschke died in 1883, the British and Foreign Bible Society agreed that Mr. Reichell, who worked many years on Jaeschke's dictionary, read the first proof, while Dr. Malan of Broadwindsor read the second proof. Under this arrangement the New Testament was completed in 1884. In 1887 the Psalms, translated by the Revs. F. A. Redslob and A. W. Heyde, and in 1889 the Pentateuch and Isaiah, were published. Up to March 31st, 1889, there were disposed of 30,023 portions of the Scriptures.

(Specimen verse. John 3 : 16.)

 སྤྱི་གྲོ་ཐོབ་པར་བྱེ།

**Tieling**, a city in Manchuria, China, not far from Moukden, with a population of 30,000. Mission station of the United Presbyterian Church of Scotland (1875); 1 missionary, 73 church-members.

**Tientsin**, one of the most important cities of North China, is situated at the junction of the Grand Canal with the Pei Ho, 30 miles from the sea and 80 miles southeast of Peking. It is the port of and "key to the capital," and is famous as the place where in 1858 the treaties were made. Climate healthy and pleasant; maximum temperature 100° F. Population, 500,000. Religions, Confucianism, Buddhism, Taoism, Moslemism. Natives not very elevated, distrustful, untruthful. Mission station of the A. B. C. F. M. (1860); 2 ordained missionaries, 1 unordained, 2 missionaries' wives, 1 female missionary, 4 native helpers, 2 out-stations, 1 church, 79 members, 2 schools, 37 scholars. It is the financial headquarters of the mission. Methodist New Connexion (1859); 2 missionaries and wives, 1 single lady, 10 native helpers, 2 out-stations, 3 churches, 105 members, 1 theological seminary, 10 students, 2 schools, 40 students. A work for women has recently been commenced under the care of a lady missionary, and is progressing rapidly. L. M. S. (4 missionaries and wives, 2 female missionaries) has a large medical mission here, with a hospital and dispensary, and the work of the mission has been vigorous along the usual lines of boys' schools and theological schools. The country work of the mission has also developed into a new station of the mission at Hsiao-Chang, 150 miles southwest of Tientsin. A beautiful church-building, in the form of an elaborate temple, adorns the main road to the native city; a conspicuous object to thousands who pass its busy location upon the river. In the Tientsin district of the Methodist Episcopal Church (North) Mission there are 6 circuits and stations, 4 of which find their centre in the city. The present force consists of 2 missionaries and wives, 3 female missionaries, with 2 churches, 150 members, 4 day-schools, 81 scholars, 2 Sabbath-schools, 150 scholars, in the city itself. C. I. M. (1888); 3 missionaries and associates. (For further account of Tientsin Missions, see article on China.)

**Tierra del Fuego**, an archipelago at the extremity of South America, separated from the mainland by the Strait of Magellan. The islands are divided into three groups: East Fuegia, including one large island 200 miles long from north to south; South Fuegia, a triangle of numerous small islands, with Cape Horn at the apex; and West Fuegia. The climate of most of the archipelago is cold and dis-

agreeable, and fogs and high winds make navigation difficult. A line from Cape Espiritu Santo due south to Beagle Channel divides the archipelago between the Argentine Republic on the east and Chile on the west. Three races are recognized among the inhabitants: the Onas, the Alacalufs, and the Yaghans. They are all on a low scale of mental and moral life; they wear little or no clothing, kill the old women and eat them, throw their children overboard to propitiate the storm spirits, and indulge in other barbaric customs. The language has been reduced to writing by the missionaries, and is said to contain 30,000 words. The South American Missionary Society (q.v.) works among the Yaghans almost exclusively, from Ooshoia, a station on Beagle Channel, on both sides of which this race is found. There are in all 6 missionaries (3 married), 1 female missionary, 5 native helpers, 3 stations, 4 out-stations, 2 churches, 35 church-members, 3 schools, 60 scholars.

**Tiflis**, the capital of Transcaucasia, on the Kur River. It is a mixture of Asiatic and European architecture, the old part being built of sun-dried brick, and containing all the bazaars and business life of Tiflis, the modern part resembling any European city. Climate hot and unhealthy, but the place is popular on account of the warm mineral springs in the vicinity. Population, 104,024, Russians, Georgians, Armenians, Persians, Jews, Germans, and French. Mission work has been attempted at different times by different societies (see Caucasus; Basle Missionary Society), but none with success, on account of the oppressive laws of the Russian Government. The American Bible Society had a Bible depot there, but that was withdrawn, and now the only evangelical work is that of the British and Foreign Bible Society.

**Tigré Version.**—The Tigré belongs to the Semitic family of African languages, and is spoken throughout Eastern Abyssinia. A translation of the four Gospels, made by the Revs. Isenburg and Kügler, and revised by Dr. Krapf, was published by the British and Foreign Bible Society in 1865, at the Crischona Press, near Basle.

ዘለዓለዋ፡፤

**Tillipally**, a large town in Ceylon, East Indies, on the north shore of the peninsula of Jaffna, at the northern extremity of the island. Climate tropical, damp. Temperature, 80° F.; very healthy for young children. Population, 21,698, Hindus, Tamil, Dravidian. Religions, Hindu and Dravidian demonology. Language, Tamil. Christians do not lose caste here. Mission station of the A. B. C. F. M. (1816); 1 missionary and wife, 68 native helpers, 4 out-stations, 2 churches, 167 church-members, 1 theological seminary, 137 students, 18 schools, 1,013 scholars.

**Tinana**, the principal station of the Moravians in East Griqualand, South Africa, on the Tinana River, 3,000 to 4,000 feet above the sea. It was chosen on account of the plentiful supply of wood and water in the neighborhood, and for the great fertility of the soil. The surrounding country consists of high table-lands, intersected by ravines and rivers, and at the time of the opening of the station (1869) it was inhabited by about 5,000 heathen, Fingoes and Kafirs. The missionaries here have been compelled to undergo many and great hardships, owing to the frequent Kafir wars; but the work has prospered, and the present missionary and his wife are accomplishing much in and about the station, and the out-stations Muari and Xotshan.

**Tindivanam**, a town in Madras, India. Station of the Reformed (Dutch) Church, U. S. A. (1875); 1 medical missionary, 29 out-stations, 451 communicants, 27 schools, 627 scholars, 1 boys' boarding-school, 34 boys, 1 caste-girls' school, 49 girls.

**Tinné Version.**—The Tinné belongs to the languages of North America, and is spoken in the Hudson's Bay Territory, near Fort Simpson, and over a vast tract of country east of the Rocky Mountains. The Rev. W. W. Kirkby of the Church Missionary Society translated the Gospels of Mark and John, which were printed in the syllabic character by the British and Foreign Bible Society, and circulated among those for whom they were designed since 1871. In 1873 the same Bible Society published an edition of the Gospel of Mark in the Roman character. The version was prepared by the Rev. W. C. Bompar, Bishop of Athabasca.

(Specimen verse. John 3:16.)

**Tinneveli**, a district and town in the southern part of the Madras presidency, in India. The town is located in N. lat. 8° 44', and E. long. 77° 44', about 350 miles south-southwest of Madras, with which it is connected by rail. The population in 1881 was 23,221, almost wholly Hindu, Mohammedans numbering 1,538, and Christians 425. The district of Tinneveli, of which the town is the capital, contains an area of 5,381 square miles, at the southeastern point of Hindustan, bounded on the south and east by the sea, on the west by the Ghats, which separate it from Travancore, and on the north by the district of Madura. The history of the district is involved with that of Madura. After centuries of Hindu rule the Mohammedans came, and after them came a half-century of anarchy, which was ended in 1801 by the cession of the whole region to the English. The population of the district was (1881) 1,699,747; 86½ per cent were Hindus, 8½ per cent (140,946) Christians, 5½ per cent Mohammedans. Christianity has taken firmer root here than in any other district in India. Statistics show that between 1871 and 1881 the Hindus lost 2½ per cent, while the Mohammedans gained nearly 6 and the Christians over 37 per cent. The converts to Chris-

tianity are chiefly among the Paravars, who are all Roman Catholics, and constitute a fishing caste, occupying the shore villages; and the Shanans, a low caste, who live by cultivating the Palmyra palm, and who have furnished most of the converts to the Protestant missions. The number of Protestant native Christians was returned as nearly 80,000 in 1881. Protestant missionary work was begun in the town of Tinneveli about 140 years ago, by the Danish missionaries at Tranquebar, who with their native preachers made occasional tours to the south. But no Christian preacher seems to have resided there permanently before 1771, when a native preacher took up his residence at Palamcottai, three miles from the town of Tinneveli; no European missionary was stationed there until the year 1788, when Rev. J. D. Joenicke was sent there. He died in 1800. The missionary Schwartz also travelled in the district. The S. P. C. K. maintained the mission at Palamcottai until 1816 when it was passed over to the Church Missionary Society, and in 1829 transferred its work in the town of Tinneveli to the S. P. G. These two societies have since divided the work in the district between them. Christianity had begun to exert no small degree of influence at the time the work was transferred to the societies that now conduct it, and since then the work of conversion has proceeded with great vigor. About the year 1877 Rev. R. Caldwell, D.D., of the S. P. G., and the Rev. E. Sargent, D.D., of the C. M. S., were consecrated bishops assistant to the Bishop of Madras, for the purpose of affording better episcopal supervision to the work of their respective societies in that district.

The C. M. S. carries on an itinerant mission from this place under 5 missionaries. A college, with an attendance of 226, is under the care of 2 missionaries. A female institute with 185 boarders and 39 branch schools are under the care of 2 missionaries of the Church of England Zenana Missionary Society. In the native church there are 10 councils in the district.

**Tiruvalure**, a town in the Negapatam district, Madras, India. Mission station of the Wesleyan Methodist Missionary Society; 2 out-stations, 24 native workers, 18 church-members, 8 schools, 283 scholars.

**Tiruvella**, a town in the Travancore district, India, near Alleppe. Mission station of the C. M. S. under the missionary at Alleppe; 1 native pastor, 29 other workers, 753 communicants, 3 churches, 22 schools, 390 scholars.

**Tobago Island**, one of the Windward Group, West Indies. It is a mass of rocks, which rise abruptly to the height of 900 feet at its steepest point. There are several good harbors. Area, 120 square miles. Population, 17,054. Mission field of the Moravians (1790-1827); 1 missionary, 3 stations, 3,071 church-members.

**Tobase**, a town in British Kaffraria, E. South Africa. Mission station of the Moravians, occupied in 1869 as an out-station of Buziyya. At first it was not successful, but since the Kafir war of 1881 the work has progressed most encouragingly. A native minister is in charge, and the station is visited by the missionaries at Buziyya.

**Tocat**, a city in Western Turkey, 60 miles north-northwest of Sivas. Mission sub-station

of A. B. C. F. M., worked from Sivas, although for many years also the residence of a missionary of the Foreign Christian Missionary Society. It was here that Henry Martyn died, and his grave is marked by a stone in the Armenian cemetery.

**Tokelau Islands**, a group of small islands in Polynesia, north of Samoan Islands, southeast of the Ellice Group. These islands, together with the Ellice and Gilbert Groups, are visited annually by missionaries of the L. M. S. at Samoa. The statistics for the three groups are: 23 native ministers, 2,051 church-members, 23 Sunday-schools, 2,659 scholars, 23 boys' schools, 1,443 scholars, 23 girls' schools, 1,216 scholars.

**Tokushima** is the largest and most important city on the island of Shikoku, Japan. It is situated on the northeast coast, and is connected with Osaka by a daily line of steamers, the trip to Osaka occupying only eight hours. It has a population of 60,000, and in the province of Awa, of which it is the capital, there are 800,000 people in the many towns and villages. Mission station of the C. M. S. (1884); 1 native pastor, 25 church-members, 1 school, 28 scholars, Presbyterian Church (South), 1885; 3 missionaries.

**Tokyo**, formerly called Yeddo, the capital and principal city of Japan, is built in the centre of a great plain, which extends back from the water to the mountains for a distance varying from twenty to sixty miles, and borders the shores of the Bay of Tokyo for about a hundred miles. There is thus no want of land over which the city may extend. Already it occupies about 28 square miles, and as far as the extent is concerned, it is second only to London. It is situated at the northwest end of the Bay of Tokyo, in latitude 35° 26' 30" north, and longitude 139° 39' 24" east. Through the city runs the O-gawa, or Great River, dividing it into an eastern and a western part. Numerous canals penetrate the city at various points, and on the east is another river, Naka-gawa. The city is divided into various sections for purposes of government and postal delivery. Here are found the numerous palaces and public buildings of the government; the temples of Buddha, Confucius, and various Japanese deities representing the old civilization and the old religion; but side by side with these stand the distinctively Christian buildings, together with the Imperial University, School of Engineers, and the numerous other institutions of learning, whose influence is rapidly lessening the number of worshippers at the ancient shrines, so that a few years from now they will probably be museums of antiquities rather than temples to which worshippers are drawn through fear and superstition. The rapid strides which European civilization is making in Japan can be seen nowhere better than in this city. Alongside the old stone wall, surrounding the palace grounds, with its moat,—one tortuous ribbon of variegated colors from the lotus-flowers which bloom there in summer-time,—are seen the electric wires for the telegraph and telephone. The puffing smoke of the railway-engine overcomes the pungent odor of the incense in the temples; gas is used for lighting streets and shops, and each year civilization, with its attendant conveniences and luxuries, is thoroughly permeating the life and habits of the citizens. Not only is Tokyo within easy reach

of Yokohama, 10 miles away by rail, but it is the centre of many important railway systems, some already completed and others in course of construction. One of the numerous bridges which span the watercourses of the city is considered the topographical centre of the empire, from which all distances are reckoned. The population is estimated at 1,165,048.

Missionary societies commenced their work in Tokyo almost as soon as the empire was opened to the outside world. A fuller, more detailed account of the occupation of this city by the missionaries will be found under the articles treating of the various missionary societies, and also in the article on Japan. At present the societies represented in Tokyo are: A. B. C. F. M.; 1 missionary and wife (for residence only). A. B. M. U. (1874); 3 missionaries (2 married), 4 female missionaries, 3 native preachers, 3 churches, 192 members, 1 school, 88 scholars. Methodist Episcopal Church (South); Biblical institute, 3 European professors, Anglo-Japanese college, publishing department, 1 European superintendent,—total, 9 foreign missionaries (6 married), 7 female missionaries, 2 churches, 700 members, 1 day-school, 130 scholars. Protestant Episcopal Church; 6 missionaries and wives, including missionary bishop, 5 female missionaries, 7 chapels, 60 church-members, a young ladies' seminary, a boys' school, a girls' school, and a divinity school. Presbyterian Church (North), 1869; 7 missionaries and wives, 2 unmarried missionaries, 12 female missionaries, 1 university with preparatory college and theological department, 213 students, 1 female seminary, 77 pupils. The work of this church is combined with the seven other missions who have united to form the United Church of Christ in Japan. The Reformed (Dutch) Church co-operates in the work of the Presbyterian Church (North) in the *Meiji-gakuin* or University at Tokyo, and together with the other missions has united in the Union Church of Christ in Japan. The Methodist Church of Canada has 6 missionaries at Tokyo, 4 employed in the academy and theological school, and 2 in a self-supporting mission, which reports 101 members. S. P. G. (1873); 2 missionaries (one the Bishop of Japan), 198 communicants. C. M. S. (1874); 1 missionary, 54 native communicants, 2 schools, 87 scholars. Baptist Missionary Society; 1 missionary, 157 church-members, 58 day-scholars, 102 Sabbath-scholars. United Presbyterian Church of Scotland (1874); 2 missionaries. Their work is united with the other missions in the Union Church.

**Tolligunge** (Tollygunge), a town in the district of Calcutta, Bengal, India. Mission station of the S. P. G. (1887); 2 missionaries, 14 native helpers, 2 churches, 850 church-members.

**Tomlin, Jacob**, b. near Clitheroe, Lancashire, England, 1793; was a Fellow of St. John's College, Cambridge; sailed as a missionary of the L. M. S. for Malacca June 20th, 1826. Leaving Malacca in April, 1827, he went to Singapore, whence he took a voyage to Batavia. In January, 1828, he returned to Singapore. In March he removed to Malacca, and aided in the work of the college. In August he went with Mr. Gutzlaff to Bankok in Siam. In May, 1829, on account of ill-health, he returned to Singapore. In the

autumn he sailed for Batavia. From November to January, 1830, he accompanied Mr. Medhurst to the island of Bali. On June 17th, 1831, he sailed from Singapore with Dr. Abeel for Siam, returning to Singapore January 14th, 1832. In that year his connection with the Society was dissolved. In 1834 he commenced a seminary at Malacca, called "The Benevolent Institution." In 1836 he returned to England. Mr. Tomlin was an earnest worker, and highly esteemed. He died in England, but the date and place of his death are not known to the Society.

**Tonga**, a dialect of East Central Africa. Reduced to alphabetic form by Rev. E. H. Richards, a missionary of the A. B. C. F. M. at Inhambane. The New Testament was prepared and printed, most of the press-work being done by the natives at Inhambane. The Book of Revelation, however, was brought to New York to be printed. Mr. Richards, at present (1890) in America, intends on his return to Africa to take up the translation of the Old Testament, and to make further revision of the present work. The work is done under the auspices of the American Bible Society.

**Tonga Islands**: see Friendly Islands.

**Tonga Version**.—The Tonga belongs to the Polynesian languages, and is spoken on the Friendly Islands by about 22,000 people. The work of translating the Scriptures into this language commenced in the year 1831, when a strong reinforcement of missionaries arrived at Tonga. The New Testament was printed at the mission press in 1849, and after undergoing another revision it was sent to London, and an edition consisting of 10,000 copies was printed by the British and Foreign Bible Society in 1851. In 1860 the same Society published an edition of 10,000 copies of the entire Bible, under the superintendence of Rev. Thomas West, of the Wesleyan Missionary Society. In 1873 the Rev. James Egan Moulton was sent, by a resolution of the Wesleyan District Meeting in Tonga, to England to revise the New Testament, and to carry it through the press. Owing to the reviser's failing to comply with the rules of the Bible Society, his version was printed by a private firm in 1880. It was warmly welcomed by the natives, and by them pronounced superior to all former versions. The Old Testament is now undergoing a thorough revision. Up to March 31st, 1889, the British and Foreign Bible Society had disposed of 35,276 parts of the Scriptures.

(*Specimen verse.* John 3 : 16.)

He nae ofa behe ae Otua ki mama ni, nae  
ne foaki hono Alo be taha nae fakatubu,  
koeuhi ko ia kotoabe e tui kiate ia ke oua  
naa aua, kae ma'u ae moqi taegata.

**Tongareva**, or **Penrhyn**, a small island in Polynesia, east of the Tokelau Islands, west of the Marquesas, and north of the Society Islands. It is visited from Raratonga.

**Tonkin** (Tonquin), is a French colony in Asia on the borders of the Gulf of Tonkin, lying between the Chinese provinces of Kwangtung and Yunnan on the north, and Annam on the south and west. It was annexed by France in 1884, and is divided into fourteen provinces, with an estimated population of

9,000,000. Hanoi, the chief city, is a union of many villages, with an aggregate population of 150,000. The Roman Catholics are at work in Tonkin, and claim 400,000 members.

**Toungoo** (Taung-ngu), one of the principal cities of Burma, India, 170 miles from Rangoon by land, 295 miles by water, 37 miles in a direct line from the frontier of Upper Burma (see Burma). Mission station of the A. B. M. U. (see article), which carries on here work among the (1) Burmese—1 missionary, 31 members; (2) Paku-Karen—1 missionary and wife, 51 native preachers, 65 churches, 2,723 church-members, 65 schools, 890 scholars; (3) Bghai Karens—1 missionary and wife, 2 female missionaries, 91 native preachers, 75 churches, 2,689 members, 50 schools, 932 scholars, (4) Red Karens—1 missionary and wife; (5) Shans—1 missionary and wife, 2 female missionaries, 3 native preachers, 1 church, 27 church-members, 18 scholars.

S. P. G. (1873); 3 missionaries, 1,094 communicants (nearly exclusively Karens), 3 boarding-schools, 157 scholars, 15 other schools, 434 pupils.

**Toy, Robert**, a missionary of the L. M. S. to Madagascar from 1862 to 1880; stationed at Antananarivo. In 1863 he took charge of the native church at Ambohipotsy, in the capital, and of the connected country churches. He visited the eastern part of Vonizongo in 1868, and with Mr. Jukes made a tour of the Betsileo provinces. In November of this year the Memorial Church at Ambohipotsy was opened, of which he took charge, and in connection with his other duties was occupied in a revision of the Malagasy version of the Bible and other literary work in the Malagasy language. He started a training-class for native preachers in 1869, assisted by Mr. G. Cousins, which afterwards became a theological seminary. His health failing, he went to England in 1870. Returning in 1873, he resumed his work in the theological institution, and in addition assisted in the revision of the Malagasy Bible. In 1877 the church at Faravohitra and its surrounding districts was added to his college work. In 1879, his health having seriously failed, he started for England, and died on the voyage, April 19th.

**Translation and Revision of the Bible.**—The Bible is God's Message to all His children; but the children of the One great Father and the one great family speak many tongues, mutually unintelligible to each other, and the object of Bible translation is to enable all the children to hear and understand their Father's words and purpose of love. The Bible reveals God's thoughts in men's words. The bookless savage hears in it a message and summons from his true home—just as the Christian scholar who breaks through conventional crusts recognizes in it the Father's voice speaking words of comfort to His child.

When God revealed Himself in the flesh He did not come in the intolerable splendors of Deity to alarm men, but in the guise of a simple, plain, homely man, who shared in their common labors, sufferings, sorrows, joys. In like manner God's message is humanized in coming to men in their own common, homely tongue. It is God's will that every man should hear His voice in the familiar speech of his own home.

In the early days of the Christian Church a great assemblage came together in Jerusalem.

It was fifty days after the Passover Sabbath, and the event of the festival looked for was the presentation of the first-fruit loaves of wheat harvest. "The day of Pentecost was fully come;" but a different event awaited the multitude. "The feast of harvest" was gladdened by the first-fruit of that great work of enabling all men to hear the gospel in their own common speech. There were "Parthians, and Medes, and Elamites, and the dwellers in Mesopotamia, and in Judea, and Cappadocia, in Pontus, and Asia, Phrygia, and Pamphylia, in Egypt, and in the parts of Libya about Cyrene, and strangers of Rome, Jews and proselytes, Cretes and Arabians;" and the Spirit of God worked great miracles, and the Galilean disciples were enabled to proclaim the gospel in the divergent tongues of the vast heterogeneous crowd of three continents. "We do hear them speak in our tongues the wonderful works of God."

What the Spirit of God did on the day of Pentecost for fifteen or sixteen peoples, that are the translators of the Bible doing for all the peoples of the world. God worked a miracle, as there was no other way on that occasion of making His will known to the people. But God never works a miracle to do for us what we can do for ourselves or others. He has left it to His church to continue the work begun at Pentecost; not by miracle, but by patient labor, faith, and prayer, under the guidance of the same Spirit that touched with flame the tongues of the disciples on the day of Pentecost. The translator aims at doing by incessant practical hard work, by learning, by zeal, by energy, what was done by divine and gracious miracle in the early days of the infant church. The end in view is that every man may hear in his own tongue the wonderful works of God. For such a work special gifts, graces, acquirements, and instruments are needed, and of these we proceed to speak in the following sections.

**Qualifications Necessary for a Translator.**—The translator should be deeply conscious of the gravity of his work as well as of its importance. The man who enters on such work in a frivolous spirit will fail, like the general who entered on a great war with a light heart. Perfection in translation is unattainable, but it should be aimed at. Translation at best bears pretty much the same relation to the original that the wrong side of velvet bears to the right side. In the wrong side of the texture you may have all the material of the original: the warp and woof may be skilfully shot, all the weight and color may be in the piece, but the glossy pile is wanting. In translation the artistic touch which each author gives to his work, independent of the substance matter, can never be caught or transferred by another hand. If this be so in ordinary translation, it is still more applicable to Bible translation.

The original languages of the Bible constitute great difficulties. The Semitic Old Testament—Hebrew and Aramaic—is full of perplexities. The language is archaic, the idioms are Oriental, the transitions are abrupt, the allusions are uncertain; the words thrown together in juxtaposition give little cue, by form or relation, to their exact meaning. Many passages are vague, and capable of several interpretations, and all passages have alliteration and play upon words which cannot possibly be reproduced in translation.

The original of the New Testament is Semitised Greek, and the old Hellenic forms are filled with new ideas, like the new wine in the old bottles. The Hellenic words had to be emptied of their old meanings before being dedicated to the new service, and they are often inadequate expressions of the fresh gospel thought. The translator will have to trace the Hebrew conception in the Greek form.

In both Old and New Testaments there are many hands visible. The Holy Ghost, who inspired the men that wrote as they were moved, did not interfere with their individuality or style of expression. Paul does not write like Luke, nor John like James. The prophets are distinct from each other in thought and style, and immeasurably removed from the feeling and form of our exact, metallic age. Taking into account the composite character of the book, from the simplest narrative to the most flowing rhapsody, one cannot but recognize how ill-equipped a modern scholar is for translating right through the Bible. The man who would successfully reproduce this Holy Book must himself be under the influence of the Holy Spirit who inspired and guided the various authors. Purvey, in his prologue to Wickliffe's Bible, says: "He hath need to live a clean life, and be full of devout prayers, that the Holy Spirit, Author of wisdom, knowledge, and truth, dress him in his work, and suffer him not to err. . . . By this manner, with good living and great travail, men may come to true and clear translating, and true understanding of Holy Writ." God's Spirit is needed to help in any work undertaken for His glory or for the elevation of man; but His presence is indispensable in understanding and reproducing in another language the book that proceeded from Himself. The author of a book understands it best, and the Spirit of God will help all who seek His aid to the right comprehension of His word. Without the Spirit the translator must and should fail.

Faith in the Bible is absolutely essential to the translator. He must have an assured conviction that the Bible is the veritable Word of God—the word that has gone forth out of His mouth, and which is destined to accomplish that which He pleases, and to prosper in the thing whereto He sent it. It is not necessary that he pin his faith to any special theory of inspiration. A clear conviction that the Bible is what it professes to be—the Word of God—will save him from perplexity and panic on the issue of new theories from the Sceptic Ring. It is not desirable that he should have to take down all his beliefs from the shelf and re-examine them whenever a new hypothesis regarding the Bible makes its appearance. The hypothesis will doubtless come from a professed believer, with regrets as to the unsettling tendencies of the times. A fixed faith on reasonable grounds will save him much trouble. The hypothesis will stand till the next theory is elaborated, and then it will be ground to powder, like its predecessors. Their

"little systems have their day.  
They have their day, and cease to be."

'But the Word of the Lord endureth forever.'

The translator should not only have a reasonable intellectual belief in the Word of God, but he should be a man who has tried and tested it, and found in it his own strength and joy.

Loyalty to the Bible always accompanies a living faith in the Book. As God's Word, he will reverence it; as his strength in weakness, his guide in perplexity, his light in darkness, he will love and trust it. He will not treat it as a common or secular thing, but as a precious and sacred treasure. Having felt its power himself, he will be careful that none of its meaning is lost in passing through his hands. Having been blessed by it, he will do all that is in his power to make it the bearer of blessings to others. Every phrase, word, letter, mood, and tense will have due weight with him, and nothing will be slurred over or dealt with in a careless or slovenly manner.

A sound judgment is indispensable to a translator of the Bible. No matter how great his attachment and loyalty to the Bible, if he has an ill-balanced mind he is in danger of getting entangled with biblical fads; and the biblical fadist is always discovering things in the text of the Bible that have no existence, giving prominence to parts that are of no more importance than other parts, and unconsciously using the book to support his own whimsical opinions. The translator should know the Bible in the unity of its truth, and be able to see individual passages in the light of surrounding truth. He should be able to divest himself of the prejudices of the religious or philosophical school in which he has been brought up, and to cast aside all prepossessions in favor of even the venerable readings of his own Authorized Version. He should avoid controversy as much as possible, for most advocates are in danger of being carried by their own arguments into extreme positions. Controversy is seldom fair, and when a little heat is engendered, the simple truth, between the two extremes, is overlooked. The biblical fadist should not be encouraged to undertake translation. The reproduction of his fancies may do incalculable harm.

Sound scholarship must be based on sound judgment. A liberal education, especially in languages, is a good groundwork for biblical scholarship. The miraculous linguist is to be avoided. The man who professes to know twenty or thirty or a hundred languages is a deceiver. None of the phenomenal linguists ever did any work that lived, and never will. The translator should concentrate his chief attention on a few languages, and leave large professions to people who wish to be wondered at. A good knowledge of the original languages of the Bible is requisite to a good translator. If he has an opportunity of learning Arabic, he will be well rewarded. Besides the help it will give him in understanding the Hebrew Old Testament, the Arabic language will introduce him to Semitic thought, in the length and breadth of a splendid living literature. Moreover, Van Dyck's Arabic version of the Bible is one of the best in existence, and often, by the modern living idiom, supplies the key to the obscure Hebrew idiom. The Syriac version was one of the first made from the original, after the writing of the New Testament—perhaps the very first, and a knowledge of the Peshito will be useful to the translator; but Syriac has little literature worth reading, and the time spent on it might more profitably be devoted to Arabic. The Latin Vulgate should also be at the side of the translator for consultation, and also the Septuagint; and of living versions the English Revised and Segond's French will be found use-

ful and suggestive. The latter need not be followed blindly. The translator should be thoroughly acquainted with the manners and customs of Bible lands, and with all modern discoveries bearing on the Bible.

The translator should be thoroughly acquainted with the literature of the language into which he is to render the Scriptures. He should read its classics, and especially the poetry, in order to enrich his vocabulary with choice words, and to learn to pack them close with concentrated thought. He should read the newspapers, and converse with the people, until he is able to think in their language, without the intrusion of auxiliary words from other languages. Most languages have corresponding idioms, and by constant watchfulness and practice approximations may be found. If the language is foreign to the translator, he should employ a trustworthy native to accompany him as much as possible. He should be constantly composing in the language, and employing his native assistant to correct his compositions, and he should get by heart a choice specimen of the language daily. Dr. Van Dyck, the translator of the Arabic Bible, like his predecessor in the work, Dr. Eli Smith, made himself thoroughly acquainted with the poetry, proverbs, history, and indeed the whole range of Arabic literature. He spoke the language faultlessly, and knew all the niceties of Arab speech better than the Arabs themselves. His perfect mastery of the Arab tongue nearly cost him his life. During the fearful massacres of 1860, in the Lebanon, Dr. Van Dyck was mistaken for a native Christian. He protested that he was an American, but the Mohammedans told him no foreigner ever spoke Arabic as he did. He escaped with difficulty by establishing his identity. Dr. Van Dyck began to learn Arabic when he was young. He had an ear for delicate shades and tones of sound; an intense thirst for knowledge regarding the Arab race, which he loved; unwearied perseverance in study; a retentive memory, always strengthened by exercise; the art of conversation, which not only charmed the natives as they listened to the poetry of their tongue flowing from his lips, but also inspired them to pour out at his feet their choicest stores of jewelled thought; and above all, with his strong American head was allied a large, warm, loving heart, and a simple, living faith that made him a prince of Bible translators. The result has been perhaps the best version of the Bible in existence.

Patience, in abundant measure, is a necessary endowment of a translator. Haste is the fruitful author of ill-done work. The student in a hurry will never be a scholar. The impatient translator will turn out crude and unfinished copy. The translator's best equivalents for the original words which he wishes to translate will be only approximations. He will have to weigh and balance every word, feel its rhythm on his tongue, and mark its cadence in relation to other words. He will require to examine, with much expenditure of time, the use made of the same word in other places in the Bible. In many instances he will have to forget the classical usage of Hellenic Greek, and seek new meanings for familiar words in the Septuagint and in the Hebrew idiom. He must never be too indolent to turn up his lexicon or concordance. There will doubtless be many influences drawing and pushing him forward at headlong speed. It may be that he is called to work for

a bookless people, who have never had the Scriptures. Their need is an urgent call, and he is anxious to get the New Testament into their hands. Or he finds an imperfect version in the hands of the people, and by the help of a presumptuous native he hastens to improve the version, *currente calamo*. It not infrequently happens that Bible Societies expect impossibilities, and, with inadequate knowledge of the difficulties to be overcome, urge translators forward with inconsiderate haste. Many translators in their early impatience, or through the impatience of others, have rushed versions to their own discredit, and to the injury of the cause which they sought to serve.

Patience is an attribute of strength, and the translator requires firm moral fibre to resist the influences that would hinder patience from having her perfect work.

Bishop Steere of Zanzibar spent five years in completing his version of the Gospel of St. Mark, which he first took in hand, into the Swahili tongue. He made a first draft of the portion, and taught his freedmen to print it. This he revised, and his freedmen printed it again. Then he read it, and discussed it with his converts, and re-revised it; and again they printed it. This process was repeated many times before he sent his work as copy to the Bible Society to have it set up in permanent form. By this patient procedure with one Gospel he acquired facility in translation, and he had the joy of giving the New Testament to that great people before being taken home to his reward. The memorable words of the revisers of the Authorized Version should never be forgotten by translators: "We did not disdain to revise that which we had done, and to bring back to the anvil that which we had hammered; but having and using as great helps as were needful, and fearing no reproach for slowness, nor coveting praise for expedition, we have at length, through the good hand of the Lord upon us, brought the work to that pass that you see."

So in the translation of Luther's Bible. The scholars who aided Luther revised with him every line with patient care, and sometimes they returned fourteen successive days to the revision of a single line, several days being given to the consideration of the fitness of a troublesome word. On one of these occasions Luther said to Melancthon, "It is not easy to make the old prophets speak German."

The English and German translators and revisers were rendering the Scriptures into their mother tongues, but the majority of translators and revisers are called upon to translate into tongues which are foreign to them, and which they are obliged to learn. The wise translator will always work by the assistance of native scholars, and this will necessitate patience in many respects. He will have to bear with the inaccurate and self-satisfied ways of the unmethodical natives. He will not be able to take renderings on trust, but must lead his helper round the idea until the exact point is reached. Sometimes, when engaged on languages which have no literature, and which have never been written, he will have to catch the words alive, and fix them as best he can on paper. He will have to fish up his nouns and verbs and prepositions with the patience of a perfect angler, and when he has got his parts of speech, he will only be able to string them

with unwearied practice. Moffat used to assemble the natives around him, and listen to their discussions, noting their accents, shades of inflexion, structure of sentences, and all their processes of word-building. Others gather a few natives together as friends or converts, and by their aid construct vocabularies and grammars while building up a new version. In all such operations it is only patience that has her perfect work. There is nothing, perhaps, which tries a translator's patience so much as having his work revised by others. It is never pleasant to have one's composition found fault with, and every correction made by a reviser assumes imperfect work on the part of the author. If the translator has the grace of patience when he first sees the work that has cost him so much pulled to pieces, he will soon come to appreciate the suggestions of men much inferior to himself. For all these things patience and Christian courtesy are absolutely necessary.

The translator should cultivate a simple, easily understood style. Very often first translations, made into a literary language, are cast in too lofty a style. The native helper is a scholar, generally proud of his native literature in which he has been educated, and his aim will be to translate the Scriptures in accordance with high classical models. He is ambitious to do his best, and his best will be a style understood only by scholars like himself. When Bishop Steere reached Zanzibar he found some portions of Scripture in a poetic, stilted style, and he began at once with simpler aims. The Turkish version was also at first rendered in the form pleasing only to the educated, but it has been brought down by a revision committee of missionaries to the comprehension of the people. It is not the business of a translator to render a version in a language as the language ought to be, but as the language is. The common plain language of the people as used in commerce and in everyday life will be the victorious form of speech, and into this form, avoiding all vulgarisms and low expressions, the Scriptures should be translated.

When the proper standard has been reached another question of great difficulty will arise. The translator should strive to convey the meaning while remaining as faithful as possible to the letter of the text. Jerome's dictum, "to translate after the sense, rather than after the word,"—"*magis sensum e sensu quam ex Verbo Verbum transferre*,"—is the rule for translators. The sense must be given whether the passage be rendered literally or not, but pains should be taken to transfer the sense by giving due weight to every word.

In China a corps of delegates, consisting of English and Americans, were appointed to make a version of the Scriptures in the classical script. The Americans and English had diametrically opposite notions as to how the work was to be done. The American leading idea was faithfulness, and the American delegates attempted to carry their idea into practice by literal translation. The English aimed at conveying the sense with idiomatic polish. The delegates did not work harmoniously, and after the completion of the New Testament they separated. In the end two versions were produced, an English and an American. Both had striking merits and striking defects. The American was literal, but unidiomatic and harsh. The English was idiomatic and polished, but somewhat paraphrastic. Up to the present time most of

the Americans have stood by their faithful version, and the English have held by their classical version. The two translations will afford rich material for the committee now engaged on a new Union Bible, and the various versions, which were a source of division, will be blended in the book which is to be the authorized version of China.

**COMMITTEES.**—Translators of the Scriptures should, whenever practicable, carry out their work by committees. The general rule of the British and Foreign Bible Society on this subject is as follows: "That whenever it is practicable to obtain a board of competent persons to translate or revise a version of the Scriptures, it is undesirable to accept for publication the work of a single translator or reviser."

The language of Scripture, like the truths of Scripture, is many-sided, to meet the necessities of many-sided man. Like the diamond, it must be looked at from many points and angles before the full effect of its light is realized. The most learned and most intelligent missionary should be chairman of the committee, which should be as representative as possible of the different denominations and nationalities concerned, competent scholarship for the work being the paramount consideration.

The chairman, by the assistance of native scholars, should make the first draft. When he has made it as perfect as he can, clean copy with wide margins should be submitted to each member of the committee for revision. These copies, with revisions and criticisms, should be returned to the chairman within a given time, and when he has had sufficient opportunity to examine and collate the suggested emendations, the committee should be convened for what may be called the first revision. Carefully drawn up rules should be formulated and agreed upon before beginning the work. One of the most important revisions of modern times was that of the Malagasi Bible. The chief reviser was in the pay of the British and Foreign Bible Society. Of the other members, three belonged to the London Missionary Society, one to the Norwegian Missionary Society, one to the Society for the Propagation of the Gospel, and one represented the Friends' Foreign Mission.

In the meetings of committee for the first revision, when the copy prepared by the chief reviser was under discussion, he, as chairman, had simply a casting vote; but at the second or final revision he had a personal vote in addition to the casting vote as chairman. The entire revision occupied a little over eleven years. During the first revision there were 771 meetings of committee of three hours' duration each. In the second revision the chief reviser had the assistance of three native scholars, and the members of committee sent their suggestions to the chief reviser, and met once a month to settle doubtful points. In carrying out the final revision on these lines, the chief reviser and his native helpers spent 89 days together, and the committee held seven sessions, occupying twelve days. The changes made in the second revision were to give harmony to all the parts, and from the native standpoint, to render the translation more easily understood, and more pleasant to the ear.

The first great version of the Old Testament takes its name, Septuagint, from the supposition that the translation into Greek was the work of seventy scholars. It was certainly the work of a large revision committee, and hence its great

value and permanence. The revision of the English Bible which resulted in the Authorized Version of 1611 was the work of many scholars. The Dutch version was the production of twelve translators and sixteen revisers. The *Manx* Old Testament was the work of twenty-four translators and two revisers.

The recent revision of the English Bible by two companies of revisers, one for the Old Testament and one for the New, with the co-operation of two committees of American scholars, has been one of the events of our time. A full statement of the origin, aim, and accomplishment of that great undertaking may be read in the revisers' preface to the Old and New Testaments, and the result of their labors is in our hands. One of the rules of procedure which guided the revisers was as follows:

"To make or retain no change in the text on the second final revision by each Company, except two thirds of those present approve of the same, but on the first revision to decide by simple majorities."

The guidance of one strong scholarly man as chief reviser secures to some extent unity of style, purpose, and plan in a version. The assistance of a number of patient, courteous, fellow-workers guarantees the due consideration of different shades of meaning and expression. Some of the revisers may be well up in the Hebrew and critical literature of the Old Testament; some may be acquainted specially with the Greek and textual criticism of the New Testament; there may be some who may not have had the advantages of an early liberal education, and who may not know much or anything of the original languages of the Bible, but who have thoroughly mastered the native language into which the translation is to be made, and who know their own Bibles; and the assistance of all such members on a committee will be of inestimable value. There are some minds which delight in unravelling the mazy and involved composition of St. Paul; some which will feel more pleasure in the narratives of St. Luke; and there are some whose minds have an affinity to the minds of the old Hebrew prophets and seers, and who will be best fitted for rendering the poetic parts of the Bible. The cold, matter-of-fact scholar who has been drilled in the exact and literal rendering of the classics is, by the very precision of his scholarship, to a certain extent unfitted to translate Hebrew poetry, which is always richer in thought than in words. The Hebrew poet always projected his theme beyond the formal expression of it.

In the translation and revision of the Japanese Bible many hands were employed. The different books were committed to those best able to deal with them, and when translated were revised by committees, aided by accomplished and scholarly native Christians. In this way the style of the Old Testament has been made to conform to that of the New, and the work of various translators has been harmonized so that there is as complete uniformity in the entire version as if the different books had been the individual work of a single translator. Of individual translators one of the earliest and one of the latest are brilliant examples. Jerome gave the Bible to the Latin world. His version was for many centuries the only Bible used in the West, and directly or indirectly it is the real parent of all the vernacular translations of

Western Europe, not taking into account the Gothic and Slavonic. The crisis in which the version was produced and the man who produced it were alike exceptional. Referring to both, Westcott writes: "In the crisis of danger the great scholar was raised up who probably alone for 1,500 years possessed the qualifications necessary for producing an original version of the Scriptures for the use of the Latin churches."

For many years the late Professor F. Delitzsch, D.D., employed all his learning and skill as a specialist in Hebrew on the translation of the Greek New Testament into Hebrew. He took counsel with many Hebrew friends during the preparation of the work. The first edition was published by the British and Foreign Bible Society in 1877. The version was at once admitted to be the best translation of the New Testament into Hebrew ever produced. The first edition of 5,000 copies was immediately exhausted. With a view to the publication of a revised edition interleaved copies were placed in the hands of all prominent British and American Hebraists for revision and suggestion. Similar copies were submitted to the leading German Hebraists. The world's great Semitic scholars were unanimous in acknowledging the excellence of the version, and most of them sent elaborate criticisms and revisions. These Dr. Delitzsch collated with great care by the aid of several Jewish scholars, and a second edition of 5,000 was exhausted in 1879. Again a number of Hebrew scholars were appealed to for suggestions with a view to a third edition, and again they responded by elaborate criticisms. Dr. Delitzsch, with humility equal to his profound scholarship, revised his work in the light of every suggestion, and spared no pains to make the version worthy of the message which it carried. The same course was followed in preparing the fourth and stereotyped edition in 1880. Again many Hebrew scholars contributed suggestions, and again Dr. Delitzsch devoted all his learning to the perfecting of what he then considered the final revision.

The printing of the fourth edition was exceedingly slow, owing to the extraordinary care taken by the author to have it not only faultless, but as perfect an expression of the original as possible. When Dr. Delitzsch had examined and collated all the suggestions submitted to him he settled the copy and sent it to press. The first proof was read by a Jewish scholar on the Rhine, who corrected it, making suggestions, and returned it to Dr. Delitzsch, who revised it and returned it to press. The second revise was read by the same Jewish scholar, and by Dr. Delitzsch as before. The third revise was sent to Canon Driver of New College, Oxford, and by him returned direct to Dr. Delitzsch, who examined all Canon Driver's corrections and suggestions before marking it "for press." It was now supposed that the text was fixed, and that Dr. Delitzsch, by paying back to the Jews the Christian's obligation for the Hebrew Scriptures, had placed the Christian Church under an incalculable debt of gratitude to him; but the final touches had not yet been given. In 1883 he was again preparing the text for a fifth edition of 5,000 copies, and proceeding in the same methodical, thorough, and elaborate manner. In 1884 he was unremittingly occupied in the improvement of his version, and in constant exchange of thought with

Hebrew professors, in view of the publication of a large octavo edition to be bound up with the Hebrew Old Testament. In 1885 he was busy with the text by the help of a number of Hebrew scholars, revising and collating for a fifth edition 32mo. Thus year after year found the greatest of modern scholars turning anew to the perfecting of his great work; and in 1889, when over 76 years of age, he was still unwearied in his correspondence with the leading Hebrew scholars in preparing for the eleventh edition of 5,000 copies, his one desire being to leave the most splendid achievement of his mature scholarship as faultless as possible. In 1890, when confined to bed, feeble and helpless in body, but clear in mind, he continued his beloved task. On the 7th of March he went home to his reward, leaving his friend, Dr. Dalman of Leipzig, to carry the edition through the press. Never in the history of translation was such splendid scholarship, united with unstinted labor, so lavishly bestowed on a version of the Scriptures. And in the entire range of the world's versions there is nothing to compare with Delitzsch's Hebrew New Testament. The world is richer for this matchless work of faith and labor of love.

Single translators, without any pretensions to Delitzsch's scholarship, have frequently produced useful versions of the Scriptures. Moffat translated from the English Authorized Version into the language of the Bechuana and Matebele tribes. While following the Authorized Version he consulted the Dutch version, and occasionally Luther's German version. The translation was a faithful reproduction of the 1611 text, with a few deviations in accordance with the Dutch. Moffat declared that he was conscious of the imperfection of his version, but that he knew it had brought many into the fold of Christ. He did the best he could in translating, and the Committee of the Bible Society did the best they could in publishing his translation, and the Spirit of God accepted the work, and blessed it to the salvation of souls. In these as in other matters our gracious heavenly Father accepts our best. An imperfect version is better than no version. When a perfectly equipped scholar cannot be found for translation or revision work, we must be content with less than perfection. When a committee cannot be got together for the work, it must be entrusted to individuals. De Sacy's Vulgate version in French has been greatly honored, and Lasserre's translation of the Gospels has made the fourfold story of Jesus live in the hands of Frenchmen. Segond also has given the French a living Bible in their own tongue. But all these "one-man versions" have the distinct defects of "one-man versions."

THE TEXT TO BE FOLLOWED is of primary importance in Bible translation. Up to 1881 the work of translation for the British and Foreign Bible Society was carried on in accordance with the following instructions:

"Whenever practicable, a version should be a direct translation from the Hebrew and Greek originals. For the Hebrew Bible, the edition of Van der Hooght is considered the standard; and in the use of this the translator is at liberty to follow either the *ketub* or the *keri*; but not to adopt any rendering which is not sanctioned by the Massoretic vowel-points, or the *keri*, or the English Authorized Version, or the marginal readings of this last. In the

Greek Testament the Elzevir edition of the 'Textus Receptus' of 1633, and reprinted by the British and Foreign Bible Society, is considered the standard; but in cases where the Authorized Version differs from this, either in the text or in the marginal reading, the translator is at liberty to adopt a rendering which may agree with any one of these three; and if a translator or editor think it better to omit the subscriptions of the epistles, the insertion of these is not required."

As far as the Old Testament is concerned these instructions still hold good. Hebrew manuscripts of the Old Testament are of no great antiquity, dating only from A.D. 916. No doubt there are ancient readings preserved in such versions as the Septuagint, the Samaritan Pentateuch, the Syriac, and the Latin Vulgate. And there are doubtless previous readings of the old Hebrew preserved in quotations in the New Testament. Collations of such readings have been made with much labor and some skill; but nothing has been discovered or done to warrant the Bible Society in adopting a new text. The English revisers did not consider the present state of knowledge on the subject of versions and manuscripts sufficient to justify them in any reconstruction, and they agreed to abide by the Massoretic text as the basis of their work. The Common Hebrew Bible of the British and Foreign Bible Society was followed by the revisers, and they were guided in their procedure on lines practically similar to those laid down for translators by the Bible Society. They only departed from the Hebrew text in exceptional cases, as had been done by the Authorized translators. Alternatives to all such variations are placed in the margins, the most authoritative readings standing in the text.

The case of the New Testament is widely different from that of the Old. Numerous ancient and important Greek manuscripts of the New Testament, in whole or in part, have been discovered in recent years. Enormous learning and pains have been bestowed on the collation and classification of these manuscripts, and on the investigation of early versions and quotations. Sufficient material has been accumulated for the substantial restoration of the Greek Testament of the fourth century. Textual critics have made the results of their patient labor known in many ways. Many critical editions of the Greek Testament have been published, some of them accompanied by commentaries in which the weight and bearings of the various readings have been set forth, and the process by which they have been appraised. Different schools of critics have dealt with the subject, and have followed slightly different methods in settling the text. All have not been able to agree on exactly the same results. One result, however, of importance to Bible societies was clear, namely, that the "Textus Receptus" was of little critical value, and could not be imposed on translators or revisers as the sole text to be followed. The adoption or construction of a text that would fairly represent the best *consensus* of sound critical scholarship became a necessity, but a necessity almost impossible of accomplishment. Textual criticism, as applied to the Greek New Testament, forms a study of much intricacy and difficulty, and, with the soundest and most candid workers, still leaves room for consider-

able latitude of opinion. It was suggested that the Bible Society should form a text of the New Testament that would unite alike the timorous and the reckless. A critical text formed by the Bible Society would have simply added another edition of the Greek Testament to the numerous editions already in existence. It might have met the wants of translators, but it would have been rejected by extreme men of the different schools. The Committee were urged to take up one of the many good editions, and give it the stamp of the Society's *imprimatur*, but this counsel they wisely declined to follow.

A more practicable proposal was that a Greek text should be formed, giving the readings in all cases where Tischendorf, Tregelles, Lachmann, and Scrivener were agreed, and in all other places abiding by the "Textus Receptus." Such an edition could have been produced with great ease, but it is doubtful if it would have given satisfaction; and as the matter-of-fact Tregelles and the more speculative Tischendorf would have been often at variance, as well as the others, the edition would have been almost the same as the "Textus Receptus."

No proposal was made that was not beset with difficulties for the Bible Societies, but the difficulties of inaction were also great; for some of the many translation and revision committees at work for the Society—the Malagasi for instance—declined to reproduce the "Textus Receptus" in all its parts, and in proceeding with the translation left all passages of questionable authority untranslated till such time as the Bible Society should modify the instructions binding translators to follow an imperfect text.

Under these circumstances it was resolved to await the text of the English revisers. The New Testament Company was composed of experts who had made a special study of the Greek New Testament. The members were chosen for eminence in textual criticism, and they represented the different schools of thought. It was not in their commission to provide a new text of the Greek Testament, but by their rules they were to follow the text "for which the evidence was decidedly preponderating." Such a company of revisers had never been brought together before, and it was believed that the text agreed upon would meet the wants of the Bible Society. In any case it would go forth with a weight of authority possessed by no other version. The result has in a large measure justified expectation, and while many objections have been raised against the English of the revisers, the text that underlies the revision has been pretty generally accepted as bearing the stamp and authorization of the leading masters in textual criticism—the most cautious as well as the most conservative. The Committee of the British and Foreign Bible Society in 1881 issued the following revised instructions to translators and revisers:

"The question, what Greek text ought to be the basis of translations and revisions of translations of the New Testament, has long engaged the anxious consideration of the committee. They have watched with deepening interest the gradual accumulation of manuscript evidence, and the vast amount of learning and skill brought to bear upon it during recent years. They were by no means una-

ware of the defects of the Elzevir edition of the 'Textus Receptus,' reprinted by the Bible Society, and hitherto recommended as the standard; but they felt, amongst the multiplication of editions in the present day, the difficulty of suggesting a satisfactory alternative.

"The revisers of the English New Testament having now completed their labors, the subject has again claimed the attention of the committee; and they thankfully avail themselves of the opportunity thus afforded of acting, as they trust, with proper caution, and yet with a due regard to the requirements of sound Biblical knowledge, in this important matter. The committee have accordingly resolved to authorize missionaries and others engaged on behalf of this Society in the work of translation or revision to adopt such deviations from the 'Textus Receptus' as are sanctioned by the text of the Revised English Version of 1881. The committee are not prepared to authorize any deviation from the 'Textus Receptus' not sanctioned by the text of the Revised English Version.

"In transmitting this resolution the committee would offer the following suggestions:

"Two editions of the Greek Testament have been published simultaneously with the Revised English Version—one at Oxford, the other at Cambridge. Neither of these has the direct sanction of the Company of Revisers; but each in its way gives the result of their decision.

"The Oxford edition gives in the text the readings followed by the revisers; the old readings, or those not followed, being, so far as was thought material, placed at the foot of the page.

"The Cambridge edition is a reprint of the text from which the English Authorized Version is presumed to be taken, and which, for practical purposes, may be treated as nearly identical with the Elzevir text, the variations adopted by the revisers being carefully noted at the foot of the page; attention being called to variations or omissions from the old text by a marked difference in the Greek type.

"It will be open to translators or revisers to use either of these editions.

"Neither of these editions gives any clue to the varying degrees of weight attached by the Company of Revisers to the readings adopted by them. For this we are obliged to turn to the marginal notes in the Revised English Version. The careful attention of translators is invited to the observations of the Company of Revisers on the revision of the Greek text in their preface, and to the caution suggested by their emphatic words: 'Many places still remain in which for the present it would not be safe to accept one reading to the absolute exclusion of others.' 'In these cases,' the revisers add, 'we have given alternative readings in the margin, whenever they seem to be of sufficient importance or interest to deserve notice.' These alternative readings should, therefore, be carefully studied before any change is adopted from the 'Textus Receptus,' and whilst the committee would not desire to control the conscientious judgment of translators or revisers, they would suggest that where the marginal note in the English version indicates that there are ancient authorities in support of the Elzevir text, there would be safety in adhering for the present to the Elzevir text.

"With regard to omissions from the Elzevir text, the committee believe it will be found that in nearly all cases in which words and sentences are omitted from the text, and are unnoticed in the margin of the English revision, they may be safely rejected as spurious.

"It is possible that in some cases a translation or revision may admit of alternative marginal readings. The committee would not discourage their introduction where thought necessary; but the circumstances attending translation so greatly vary, that the introduction of such must be largely left to the judgment and discretion of translators and revisers. In any difficulty the editorial superintendent will render any assistance in his power.

"The Committee feel how much of sound judgment, and heavenly wisdom and skill, is needed in the important and responsible work of translation and revision; but they rejoice to know that, as they who are called to it labor in faith and prayer, in an habitual dependence upon the illumination and direction of the Holy Spirit, they will find it a work which the Great Inspirer of Scripture in an especial manner loves to honor and bless."

The same regulations substantially have been adopted by the American Bible Society, and thus far the two great societies have proceeded on the same lines in the work of translation and revision.

Translators and revisers will find useful guidance in the Revised English Bible in the matter of uniformity and consistency. In this matter the Authorized Version was very misleading. It was a principle with the Authorized revisers to vary their translations and phrases as much as possible, even when rendering the same words and phrases, and in the same passages. In this way literary elegance was secured at the expense of strength and faithfulness. The English revisers aimed at translating the same Greek word by the same English word, but they did not carry out this principle with inflexible rigidity. Varieties of rendering compatible with the true meaning of the text have to some extent been preserved, but varieties suggestive of differences which have no existence in the Greek have been excluded. The exact shade of meaning of words and phrases is generally to be reached from the context. All important names and terms should be uniformly translated. The names for the Divine Being and His attributes, for man and his faculties, theological terms, ceremonial and Christian ordinances, and all such expressions as become the common currency of the Christian Church, should be maintained at one uniform standard. When versions are completed, and almost ready for the press, it is desirable that the whole should be gone over with a concordance, for the purpose of harmonizing all the parts.

THE NAMES FOR THE DIVINE BEING require special attention. The difficulty of finding any Supreme Being among the heathen is sometimes very great. Sometimes the gods are so numerous that the difficulty consists in making a proper selection. Sometimes there are no gods at all; but the translator's chief difficulty will be to find any name among the heathen associated with the ideas of reverence or worship. In this matter as in many others the translator will have to do the best he can. In the Septuagint and Greek Testament, Theos

is substituted for Elohîm, and Lord (Kurios) for Jehovah and Adonai promiscuously. The terms were not equivalents, but apostles and martyrs preached the gospel meanings into the names until they became expressive of the true gospel thoughts now associated with each. Every care should be taken to select the best word, but it must be remembered that in all countries the truth about God is gathered not so much from the name as from what is taught concerning Him who bears it. The translator in a heathen tongue must select the best term or name he can find. Though he may be obliged to take the name of a false god, he will find that by degrees, through reading the Bible, the false meaning will disappear, and the true meaning assert itself. It might be possible to transfer the original names of God by transliteration, as the name Jehovah is transferred in a few places into the English Bible, but in that case the names would, in themselves, be absolutely without significance when first introduced.

Great difficulties have arisen in China regarding the Divine name. When the delegates began to make a union version for China they did not like to take the names for God and Spirit that they considered had been degraded by some of the Roman Catholics. They were also unwilling to take the names of Chinese gods whose characters and appearances were most ungodlike. It was suggested that the divine names should be transliterated, but the Delegates' Version was made on the condition that every evangelical denomination in China should have liberty to publish editions for itself, employing whatever name it thought best for God, Spirit, and Baptize. The Committee of the British and Foreign Bible Society, in accordance with almost the unanimous opinion of British scholarship, came to the conclusion that the most appropriate terms for God and Spirit, in China, were Shang-ti and Shiu, and they only published editions of the Scriptures with such terms. The American Bible Society published editions of the Scriptures with such names for God and Spirit as were demanded. At present there are nine possible forms and combinations of the names for God and Spirit in use in China, but there is reason to believe that the native Christians will decide the question, throughout China, in favor of Shang-ti and Shiu, as they have already done in several localities where they have had power.

In the Revised English Version the word Jehovah is transliterated in a few places more than in the Authorized Version, but only in places where a proper name seemed to the revisers to be absolutely required. In many versions the word Jehovah occurs wherever it is found in the Hebrew. This is sometimes a disadvantage. The British and Foreign Bible Society was requested to withdraw Valera's Version from Spain, owing to the frequent occurrence of the word Jehovah, which the natives declared was a new Protestant God. The name when translated and not transliterated should be printed in small capitals, as is done in English, or in some other way which will distinguish the word.

Translators will find it difficult to render the word *Baptizo* in a manner satisfactory to all. If translating for a non-denominational society which is supported by all denominations, they cannot be expected to translate the word by a

term which supports the views of one denomination and condemns the usage of almost all other denominations. In versions made for the British and Foreign Bible Society the word *Baptizo* and its cognates are transliterated or transferred, as is done in the English Bible, unless it can be translated by some native word signifying sacred washing, without limiting the form to either dipping or sprinkling. An attempt has been made to get over the difficulty by placing the neutral term in the text, and the denominational term in the margin, with the words "some translate immerse"—which is simply the statement of a fact. Where the version is Baptist, it would be better that the difficulty should be got over by an alternative reading, than that a rival version should be issued. These matters require to be dealt with on both sides in a spirit of mutual forbearance.

Translators should be careful to choose the central language in commencing versions, and to resist all pressure to undertake translations in insignificant and dying dialects. Many versions produced in local *patois* have led to considerable waste of Christian money. At first it may not be possible, with limited experience, to say which branch of a group of languages is the best vehicle for reaching the most people; but first editions should be tentative and small, and the second editions should be revised into the dominant form. Prince L. L. Bonaparte has made versions of the Scriptures into more than a hundred languages, dialects, and *patois*, for linguistic purposes. These his Highness has handed over to the Bible Society, with permission to revise them for evangelistic purposes; but there are only a few of them on which the Society would be at all justified in spending funds.

The translator should be careful to mark in some distinctive way words translated to make the sense complete, but which have no equivalents in the originals. Such words are marked in our English Bibles by being printed in italics. This is somewhat unfortunate, as in all other forms of English literature italics are used to give emphasis and prominence to words. In our old black-letter English Bibles the understood words were marked in Roman characters, which were smaller, and somewhat insignificant, and hence more suitable. In the modern Greek Bible the supplied words are printed in a smaller character. The italics should be as few as possible. A great many in the Authorized Version are superfluous. In foreign languages the supplied words, when necessary, should be printed in type similar to the body of the text, but somewhat smaller. In preparing chapter and page headings only simple summaries should be given. In our English Bibles the chapter headings are printed in such small italics that they are seldom consulted, and they form an undesirable wedge between chapter and chapter. The British and Foreign Bible Society has long had a paragraph English Bible prepared by Canon Girdlestone, and it has begun to print foreign versions in paragraphs, with sectional headings which simply announce the subjects of the sections. The headings are simple summaries, such as "The Creation," "The Flood," "The Temptation," "The Fall," etc. Versions so arranged, well printed, and accompanied by maps have been published in Italian, Sesuto, Malagasi, French, and Dutch, and they have been well received.

For the present distress, in China, the committee have agreed to publish summaries, sectional headings, and simple explanations of words and terms not likely to be understood by the Chinese.

The ordinary chapter and verse form in which most of our English Bibles are printed has certain advantages in facilitating the finding of passages and for reading verses about, but the Scriptures can be read much more intelligently in the paragraph form. Much can be done by artistic printing, by proper spacing, and the arrangement of parallelisms to encourage the reading of the Scriptures. Lasserre's Gospels in paragraph form are so arranged that every page says "read me;" and Frenchmen for the first time read the gospel with pleasure. There are many additional considerations, and necessary conditions, and infinite details, which might be advanced with regard to Bible translation, but these will be best learned in the practical work of translation. As in preparing sermons, writing books, and public speaking, each worker reaches his own style by his own methods, so translators must be left to find out the lines within certain limitations on which they can best accomplish the sacred work entrusted to them; and in the matter of details, common sense and scrupulous conscientiousness will be the best guides.

Dr. Cust's contribution to this encyclopedia (see Appendix B) enables one to judge of the immense work already accomplished in Bible translation.

The Bible is the greatest of all the classics, and its importance may be judged in contrast with them. Versions of the classic masterpieces of Greece, Rome, and the far East are few, and are found on the shelves of libraries and in the homes of learning. The versions of the Bible are for the people, and no sooner have they fallen from the press than they are taken up in such quantities by the missionaries, by the colporteurs, by the zenana women, and by all who wish the divine message made known, that the average circulation of the British and Foreign Bible Society alone is over four million copies a year.

Plato was perhaps the most spiritual, the most elevated, teacher that the heathen world produced. Excellent translations of Plato's works have been published in English, German, French; but no one can imagine an attempt being made to translate them into three or four hundred languages, as has been done with the sacred Scriptures. There are at the present time over a thousand philologists busied with Bible translation and revision, and wherever the living missionary goes he takes with him the living word. What a grand work this is when regarded merely from the standpoint of literature and science, but how glorious when it is remembered that the Book is the living Word of God, dowered with the gifts of civilization and salvation.

**Tracy, William**, b. Norwich, Conn., U. S. A., June 2d, 1807; studied at Williams College; graduated at Princeton Theological Seminary 1835; was ordained April 12th, 1836; sailed November 23d, 1836, and after spending a few months at Madras, reached Madura October 9th, 1837. He visited the United States in 1851 and 1867. At Tirumungalum he opened a boarding-school for boys. From that

day he was largely engaged with the educational work of the district. By 1842 the boarding-school had grown to a high-grade seminary, and in 1845 it was removed to Pasumalai. Here the next twenty-two years of his life were spent, except when at home in 1850. More than 250 young men passed through the course of study. Few classes left him in which nearly all were not Christians, a large number of them engaging in evangelistic work, and others occupying honorable posts in government service. He was an efficient member of the Revision Committee of the Tamil Bible. A short time before his death he had the joy of welcoming his youngest son with his wife to the mission work in the land of his birth. He died at Tirupuvanam, South India, November 28th, 1877, aged seventy, and in the forty-first year of his missionary service.

**Tranquebar**, a town in British India, on the shore of the Bay of Bengal, about 150 miles south of Madras. It is situated in the delta of the Caveri River, in north latitude  $11^{\circ} 2'$ , and east longitude  $79^{\circ} 54'$ . The town, with a small area of country, was obtained by the Danish East India Company in 1616, and held by the Danes until 1845 (with the exception of a few years), when, with Serampur in Bengal, it was sold by them to the English. Under Danish rule it was a place of some political and commercial importance, which in recent years, by the diversion of business to other centres, it has almost wholly lost. The population in 1881 was only 6,189, of whom 4,916 were Hindus, Mohammedans 820, and Christians 453. The great interest which Tranquebar possesses for us consists in the fact that it is the place where Protestant missionary effort first began in India. Here Bartholomew Ziegenbalg and Henry Plutschau, the pioneers of the great army of Protestant evangelists, came from Denmark in 1706 and founded the first Protestant mission station. They labored under the greatest difficulties, and yet within three and a half years a Christian community had been gathered, numbering 160 persons, which rapidly grew. The publication of books was begun at once. Ziegenbalg completed the translation of the New Testament in 1711, and when he died in 1719 he left behind him a translation of the Old Testament as far as the Book of Ruth. A church was built by his efforts, which is no longer in existence, its site having been undermined by the sea. The mission was manned for many years by men of superior attainments and character, among whom was the great Schwartz, and exerted a profound influence in South India. For a long time it received pecuniary aid from England through the Society for Propagating Christian Knowledge. In 1847 the mission passed into the hands of the Leipzig Evangelical Lutheran Mission, and is still vigorously maintained by that body, who have 418 communicants. Protestants at and near Tranquebar numbered 2,000 several years ago. There are in the same area about 1,200 Roman Catholics. The S. P. G. have a work there also, conducted by 4 native workers, with 1 school and 18 scholars.

**Trans-Caucasian Turki** (Azerbaijan Turkish) **Version**.—The Trans-Caucasian belongs to the Turki branch of the Ural-Altaic family, and is spoken in Trans-Caucasia, Russia, and Northwest of Persia. In 1843 the Gospel

of Matthew was published by the British and Foreign Bible Society, the translation having been made by Dr. Pfander. The work of translation continued with the aid of Mirza Ferookh, who translated the New Testament, save the Epistle to the Romans. The manuscript version, after being revised by his son, the Rev. A. Amirkhanianz, was published in 1878, together with the Epistle to the Romans, which the reviser had translated, under the superintendence of Dr. Sauerwein and Mr. Amirkhanianz. Some years ago Messrs. Rhea, Labaree, and Van Norden, American missionaries in Persia, undertook a translation of the Bible into this dialect. After Mr. Amirkhanianz completed the translation of the Bible in 1883, the American missionaries gave up their version, and united with the translator in a final revision of the Old Testament, so that there should be but one version of the Bible in the Trans-Caucasian language. After all dialectical and orthographical differences between the language as spoken in Northern Persia and other Turki-speaking districts had been satisfactorily adjusted, the British and Foreign Bible Society commenced the publication of an octavo edition of the whole Bible, consisting of 2,500 Old Testaments and 5,000 New Testaments, one half to be bound up with the Old Testament, and one half to be issued separately. The printing was commenced at Leipsic in 1886, proofs being read by the translator at Orenburg (whither he had been exiled by the Russian Government) and Dr. Sauerwein at Banteln, and completed in 1888.

**Transvaal**, is a term which is often used to designate the territory also called the South African Republic, which is described under the article on Africa.

**Travancore**, a native state in India, occupying the extreme southwestern portion of the peninsula. Its limits of north latitude are  $8^{\circ} 4'$  and  $10^{\circ} 22'$ , and of east longitude  $76^{\circ} 12'$  and  $77^{\circ} 38'$ . Its boundaries are: on the north the native state of Cochin; on the east the British districts of Madura and Tinneveli, belonging to the Madras presidency, from which districts it is separated by a mountain range; on the south and west the Indian Ocean. The length of Travancore from north to south is 174 miles, and its greatest breadth 75. It embraces an area of 6,730 square miles, with a population of 2,401,158 in 1881; 73 per cent were Hindus, about 21 per cent (498,542) Christians, and a trifle over 6 per cent were Mohammedans. The Christian population includes a large number of adherents of the old Syrian Church of Malabar,—more than half of the whole; nearly a third are Romanists, and the remainder Protestants. As to language, Malayalim—a Dravidian tongue allied to Tamil—is used by about four fifths of the people, and Tamil by the rest. The chief town and capital is Trivandrum, with a population of 41,173. Travancore has been ruled from time immemorial by Hindu princes of approved orthodoxy. It has never—like all the rest of India—come at any time under the sway of the Mohammedans. In the latter part of the last century it was attacked by Tipu, Sultan of Mysore, but, with the aid of the English, successfully resisted him. Treaties, made early in this century with the English, have firmly cemented this old connection, and made English influence powerful within its borders,

though there was armed opposition in 1809. The relation between the Anglo-Indian Government and the native states like Travancore has been sufficiently explained in the article "Native States." An English resident is maintained at the court of the Maharajah (king) of Travancore, and an annual tribute is paid to the "paramount power." The Government of Travancore, though Hindu, is intelligent, efficient, and progressive. Its native rulers have studied to good advantage the example set them by the English rulers of adjacent regions. There is a good system of education in vogue, as a result of which the people of Travancore show about as high an average of intelligence and as large a proportion of persons able to read and write as many British provinces in India. The people are chiefly agricultural; rice, the cocoanut palm, and pepper are the principal productions, and the exports are largely derived from the cocoanut tree, though pepper, ginger, cardamom, timber, and some other articles are included among them.

The forms of Hindu worship usual throughout India are practised in Travancore, mingled, however, to a greater or less extent, with the rites of demon-worship, which prevails extensively in South India and Ceylon, especially among the aboriginal tribes. This demon-worship was that originally practised by the early tribes of India; and when advancing waves of Aryan conquest drove these primal settlers to the mountains, or pushed them far to the south, their religion was with them concentrated, as it were, in those localities, and has since lingered in them. To a large extent the Aryans (or Hindus) incorporated the aborigines into their own system, assigning to them the low social status of laborers, or *Shudras*; and many of their demon-deities were received into the Hindu pantheon, and their old rites made permissible for Hindus. Thus the Hinduism of Travancore, and indeed of all South India, became mingled and corrupted with these aboriginal notions and rites to a degree not noticed elsewhere. Missionaries in Travancore have had to encounter among their converts far more of the degrading power of these old habits and associations, rooted in this ancestral demonolatry, than their fellow-laborers among Hindus in other regions.

Travancore, and its sister kingdom, Cochin, which adjoins it in the north, are famous as the home of an exceedingly ancient branch of the Christian Church, usually known as the "Syrian Church of Malabar," Malabar being the name applied for many centuries to the strip of coast embracing the kingdoms named and the British district just north of them. The origin of this church is doubtful. The traditions current among the people go back to the preaching of Thomas, in the middle of the 1st century; but scholars suppose that a small colony from Antioch (Syria) may have landed here in the 4th century. The church is Syrian in doctrine and ritual, maintaining the Nestorian type of Christology, and is subject to the Patriarch of Antioch, though the Romanists have tried hard to subject it to the Pope, and did succeed, in 1599, in detaching some 80,000 members from the patriarch, and in thus forming a Romo-Syrian community, which is still allowed, however, to retain the Syrian ritual and language. The remainder of the Roman Catholic population represents chiefly the results of Francis Xavier's

missionary activity in the 16th century. The existence of this ancient Syrian Church attracted the attention of Rev. Dr. Buchanan (then chaplain to the East India Company at Tinneveli), and at his urgent suggestion the Church Missionary Society, in 1816, sent missionaries to labor among its members. At first the Syrian priests co-operated with them, but in 1838 signs of hostility appeared, which culminated in the Syrian *Metran* (or Metropolitan) dissolving all connection with the English missionaries. Since then the Church Mission has devoted its attention to the people at large, with the most gratifying results, drawing their converts from the old church in part, but very largely from Hindus, and especially from certain low castes.

The London Missionary Society's operations in Travancore began in 1806. Rev. Mr. Ringeltaube, a German, joined one of the first companies which this Society sent to India. He resided first at Tranquebar, under the protection of the Danish Government, at a period when the East India Company frowned on all missionary operations within their own territories. His attention was drawn to Travancore by seeing two or three persons from that country, one of whom evinced great interest in Christianity, and begged for the services of a missionary to teach his people. Ringeltaube accepted the invitation, and was greatly assisted in getting a foothold in Travancore by Col. Macaulay, then British resident at Trivandrum. The first station was at Meiladi. Ringeltaube labored until 1816, when, having baptized some 900 persons, he left his work in the hands of a native catechist, and retired from India with broken health. Nothing is known of the end of his life. In 1818 other missionaries arrived. Col. Munro was then resident, and continued the aid of the mission which his predecessor had begun; without such aid from the representative of British power it is hard to see how the mission could have started in the face of Hindu opposition on the part of the Brahmans and the Hindu Government. The converts rapidly increased—largely from among the low-caste Shanars. From 1827 to 1830 violent persecution was experienced; and the low-caste people in Travancore have never, unless perhaps recently, been admitted to the privileges of the public schools maintained by the government. The progress of the mission in late years has been rapid, and its usefulness great. In 1838 it was allowed to begin a station at Trivandrum, the capital; and since 1844 it has drawn many converts from the higher castes. Rev. Samuel Mateer, one of its most distinguished members, published, in 1871, a full account of the country and people of Travancore, with historical sketches of missionary work within its borders, under the title "The Land of Charity."

**Trebizond**, a city on the Black Sea, in Asiatic Turkey, is, by reason of its location, an important centre for the trade from Persia and Central Asia to Europe. The climate is temperate, and its location is picturesque. The city is divided into the old quarter, inhabited by Turks; the more modern, or Christian quarter; and the commercial quarter. The harbor is not very deep, nor is it well protected. Caravans start from here for Persia and Central Asia. The population is estimated at 45,000, Turks, Armenians, and Greeks. Mission sta-

tion of the A. B. C. F. M.; 1 medical missionary and wife.

**Trevandrum**, a town in the Travancore district, South India, near Cape Comorin; has 60,000 inhabitants. Mission station of the L. M. S.; 1 missionary and wife, 4 native pastors, 4 other preachers, 46 out-stations, 1,690 scholars, with an institute for girls of the higher castes.

**Trichinopoly**, a city in Madras, India, on the Caveri River, 56 miles from the sea; 186 miles southwest of Madras City. It is a place of much historic interest, having been the scene of many well-known sieges, etc., of which the fortifications are interesting evidences. It is well known for its cigars, and for its peculiar and beautiful gold jewelry. Population, 84,449, Hindus, Moslems, Christians. Heber, the Protestant Bishop of Calcutta, is buried here (1826), and the place is the scene of great missionary activity. Mission stations: S. P. G.; 2 missionaries, 1 missionary's wife, 1 female missionary, 84 native helpers, 29 schools, 1,118 scholars. Leipsic Evangelical Lutheran Society; 261 communicants, 193 scholars. Wesleyan Missionary Society; 3 missionaries, 5 native helpers, 100 church-members, 6 Sunday-schools, 315 scholars, 9 day-schools, 570 scholars.

**Trichur**, an ancient town in the Travancore district, Madras, South India. A station of the C. M. S. together with Kunnankulam, under the charge of 1 missionary. There are 338 communicants, 5 schools, 229 scholars.

**Trinidad**, a colony belonging to Great Britain, in the West Indies, at the mouth of the Gulf of Paria, off the northeast coast of Venezuela, north of the mouth of the Orinoco. Area, 1,754 square miles. Population, 189,566 (1888). Temperature, 70° to 86° Fahrenheit. Soil fertile. Capital, Port-of-Spain. Mission field of United Presbyterian Church of Scotland; 3 missionaries,—with stations at Port-of-Spain, Arouca, and San Fernando,—3 churches, 379 church-members, 600 scholars. There are 191 schools, 16,000 pupils, under the Government grant of £16,783. The Queen's Royal College has 65 students. The Roman Catholics have also a college with 220 students. Tobago (area, 114 square miles) is included in the administration of Trinidad.

**Trinitarian Bible Society.** Headquarters, 7 St. Paul's Churchyard, London, E. C., England.—The Trinitarian Bible Society was organized in 1831, for the circulation of the Word of God, translated from the originals only, to the exclusion of all versions from the Vulgate. The term "Trinitarian" expresses the religious views of all its members. No person is admitted to the management of the Society who denies the doctrines of the Trinity and the Atonement. The work of the Society is chiefly in those countries in which the Vulgate or Romish versions most abound. It has prepared a Spanish Bible in several editions, and a Portuguese Bible with references. The first translation of the Bible into the Breton language (see Breton Evangelical Mission) was printed by the Society; also Salkinson's Hebrew translation of the New Testament, of which 100,000 copies have already (within three

years) been distributed among Jews in all countries.

The Society avoids colportage as far as possible, its work of distribution being mainly carried on by agents of other societies. In the year 1888 its grants and sales of Bibles, New Testaments, and portions (in 21 different languages) amounted to 93,829.

**Tripatur** (Tirupatur), a town in the Salem district, Madras, India, 137 miles southwest of Madras. Climate dry, hot. Population, Hindus, Moslems. Languages, Tamil, Hindustani, Telugu. Natives prosperous; occupation, agriculture. Mission station L. M. S. (1861); 1 missionary, 18 native helpers, 4 out-stations, 1 church, 42 church-members, 2 schools, 144 scholars.

**Tripoli**.—1. A seaport town of Syria, on the Mediterranean, 40 miles north-northeast of Beirut, 70 miles northwest of Damascus. It is one of the neatest towns of Syria, and is surrounded by many gardens and groves of orange and other fruit trees, but the ground in the neighborhood is marshy, and the climate is unhealthy at certain seasons. Population, 16,000, one half Greek Catholics. Mission station of the Presbyterian Church (North); 3 missionaries and wives, 2 female missionaries, 1 school, 106 pupils.

2. The capital of the Turkish possession of same name in Africa (see Tripoli under Africa); has a population of 30,000. Mission station of the North Africa Mission (1887), with two missionaries, who do evangelistic and medical work. Living is cheap and the climate "splendid; not at all hot, rarely above 87°, never above 90°, Fahrenheit," and more laborers are greatly needed. (See North Africa Mission.)

**Trowbridge, Tillman Conklin**, b. Michigan, U. S. A., January 28th, 1831; studied at Romeo, Mich.; the University of Michigan, Ann Arbor; and Union Theological Seminary. Appointed missionary of the A. B. C. F. M. 1856, and sailed for Constantinople. He made a long tour with Rev. Mr. Dunmore through Northern Armenia. Returning to Constantinople in 1861, he married a daughter of Dr. Elias Riggs. He had charge of the city work of Constantinople for over six years, and in 1868 was transferred to Marash to assist in the instruction of the Theological Seminary. In 1872 he visited England and America to raise funds for the Central Turkey College decided upon for Aintab. Having prosecuted this work with vigor and success, he returned in 1876 to Aintab, and was appointed president of the college. From that time to his death, with the exception of a brief visit to England to solicit funds for the college, he devoted himself with energy to promoting its interests, as well as to the material, moral, and religious improvement of the people of Turkey. Having completed the college examinations and commencement exercises, he attended in July the annual meeting of the Central Turkey Mission at Marash in his usual health, and took part in the celebration of the Lord's Supper with apparent ease. In attempting to leave the room soon after the service, he found it difficult to walk, rapidly grew worse, and in less than half an hour his left side was wholly paralyzed,

and he could utter only half-articulated monosyllables. He died four days after, July 20th, 1888. The remains were taken to Aintab. "An immense congregation of all nationalities and religions listened attentively to the words spoken, and with many expressions of grief followed the body to the grave in the corner of the college grounds." Mr. Fuller of Aintab, speaking of his connection with the college, says: "In this work his wide acquaintance with influential, wealthy, and philanthropic men and women, his well-known integrity and good judgment, his quick and contagious sympathies, his unflinching cheerfulness and hope, his ready and tireless pen, and his persuasive voice have given him a wide and effective influence; and it is not too much to say that the college owes a large share of its present position and hopeful prospects to the efforts he has made in its behalf."\*

He received the degree of LL.D. from Michigan University.

**Tsakoma**, a town in North Transvaal, South Africa. Mission station of the Berlin Evangelical Lutheran Society (1874); 1 missionary, 4 native helpers, 4 out-stations, 94 church-members, 31 scholars.

**Tschoutshun**, a town in Kwangtung, China, northwest of Swatow. Mission station of the Basle Missionary Society; 1 missionary and wife, 8 native helpers, 2 out-stations, 4 schools.

**Tsin-chau**, a prefectural city in the province of Kansuh, China, between Han Chung and Lan-chau. Mission station of the China Inland Mission (1878); 1 missionary and wife, 4 female missionaries, 1 native helper, 1 church, 28 church-members, 1 school, 20 scholars.

**Tsing-chau** (Tsing-chew-fu), a prefectural city in Shantung, China, east of the Hoang Ho, southwest of Chefoo. Mission station of the Baptist Missionary Society; there are in the district 13 missionaries, 55 sub-stations, 1,023 communicants.

**Tsing-kiang-pu**, a station of the Presbyterian Church (South) in the northern part of Kiangsu, China, not far from the Yellow Sea. Medical work, evangelistic work in the country along the Grand Canal as far north as Shantung, and school work are energetically carried on by the 2 missionaries and their wives, 1 medical missionary, and 1 female missionary.

**Tsun-hua**, a city of the second class in Northeast China, in the province of Chihli, 60 miles east of Peking, on the great road to Manchuria. The city is reached by a railroad from Tien-tsin to the Kai-Ping Mines. Mission station of the Methodist Episcopal Church (North), opened in 1882; 3 missionaries and their wives, 1 female missionary, 4 native workers, 35 church-members, 1 school, 21 scholars. Be-

sides the evangelistic work, which extends over a large area, the medical work forms a prominent feature of this mission.

**Tuamotu**, a cluster of small islands east of the Society Islands, Polynesia; is visited by missionaries from the other islands of Polynesia. They were acquired by France in 1880, together with the Gambier Islands, and form part of the French establishments in Oceania. The two groups have an area of 390 square miles and a population of 5,946.

**Tukudh Version.**—The Tukudh belongs to the languages of North America, and is spoken by the Tukudh or Loucheux Indians, on the Yukon River, Alaska. The Rev. R. McDonald of the Church Missionary Society, for many years a missionary among these people, undertook a translation of the New Testament into their vernacular, of which the four Gospels with St. John's Epistles were published by the British and Foreign Bible Society at London in 1874. The printed parts were revised by the translator, and the remaining books of the New Testament translated, and an edition of the New Testament was issued by the same Society in 1885. Mr. McDonald is now engaged on a version of the Old Testament. As for the Indians who speak the language, and for whom the version is made, it may be stated that they are scattered over 100,000 square miles of a desolate region on the confines of the Arctic Circle. They have all been brought under Christian influence, and baptized. Other tribes speak a cognate language, and the version will circulate among them. Up to March 31st, 1889, 4,886 portions of the Scriptures were disposed of.

(*Specimen verse.* John 8:16.)

Kwugguh yoo Vittukoochanchyo nunh kug kwikyt kettinzhin, tih Tinji chihthlug rzi kwuntlantshī chootyln tte yih kyinjzhit rzyet-tetgititelya kkwa, kō shegu kwundui tettiya.

**Tulbagh**, a town in West Cape Colony, Africa, 75 miles northeast of Cape Town. Population, 548. Mission station of the Rhenish Missionary Society; 2 missionaries, 1 single lady, 8 native workers, 395 church-members, 184 day-scholars.

**Tulu Version.**—The Tulu belongs to the Dravidian family of non-Aryan languages, and is spoken in part of South Kanara, in the Madras presidency, by about half a million of people. Till recently there was no literature in the Tulu language, except some legends, written on palm-leaves in the Malayalam character. Mr. Grainer, one of the Basle missionaries who landed at Bangalore in 1834, began a translation of the New Testament. He was afterwards aided by Messrs. Ammann and Bühner. An edition of the four Gospels was lithographed as soon as completed. The remainder of the New Testament was completed in 1847. Mr. Ammann revised his version in 1850, but the MS. was destroyed by fire. His subsequent version was printed in 1858. Inaccuracies in the edition made a revision necessary, and a revision committee was formed in 1884.

\* Since the above was written news has been received of the destruction of a large portion of the buildings of Aintab College by fire. It is to be hoped that they will soon be rebuilt, as the college exerts a most important influence in that section of the Turkish Empire.

In 1888 the revised version was published, under the auspices of the Madras Auxiliary.

(*Specimen verse.* John 3 : 16.)

ದಾಯೆಗಂದಂರಾಕಾ ಯಡೆ ನಂಬನಾಯೆ ಯೆತ್ತಲ್ಯ  
ನಾಕೆನಾಡಮೊಳವಂದೆ ನಿಶ್ಚೆ ಜವಯ್ಯನಾ ಯೆಲಾರು.  
ಮುಕ್ತಿಶೆದೇಲಿರೆನ್ನೆನೊಯೊಡ ಮಟಿಮಗನ ಕಾಂಯೆ.  
ರೀಪಾಳೆನಯಂಬೆ ಪ್ರೀತಿಮುಕ್ತಿ.

**Tunkur**, a town in Mysore district, Madras, India. Mission station of the Wesleyan Methodist Missionary Society (1857); 1 missionary, 1 assistant, 147 church-members, 5 Sunday-schools, 142 scholars, 17 day-schools, 1,048 scholars.

**Tunapuna**, a town in Northwestern Trinidad, due east from Port-of-Spain. Mission station of the Presbyterian Church of Scotland; 1 missionary, 65 scholars. (See Trinidad.)

**Tungeho**.—A city in Chihli, China, at the head of navigation on the Peiho, 13 miles east of Peking. Mission station of the A. B. C. F. M. (1867); 2 missionaries and wives, 1 physician and wife, 2 female missionaries, Gordon Memorial theological school, high school, 37 scholars, hospital and dispensary, 1 church, 110 church-members, 2 out-stations.

**Tungchow**.—A city in Shantung, China, on the coast of the Gulf of Chihli, 55 miles northwest of Chefoo. This city is one of the most healthy places for Europeans in China. Mission station of the Presbyterian Church (North), 1861; 5 missionaries and wives, 1 medical missionary and wife, 4 out-stations, 5 churches, 238 members, theological seminary, 15 students, 6 schools, 198 scholars. Southern Baptist Convention (1860); 3 female missionaries.

**Tuni**, a town and tract of country in Madras, India. Mission station of the Baptist Convention of Ontario and Quebec; 1 missionary and wife, 8 native preachers, 3 teachers, 5 Bible-women, 1 church, 75 church-members, a girls' boarding-school.

**Tunis**, the capital of the country of the same name in Africa (see article on Africa), is situated on the western side of a lake which separates it from its port, Goletta. The population is estimated at from 100,000 to 145,000, of whom 20,000 are Europeans, the rest Moors, Arabs, Negroes, and Jews. Mission station of the North Africa Mission (1884); 2 missionaries and wives, 3 female missionaries. London Society for Propagating the Gospel among the Jews; 1 missionary, 1 school, 108 scholars.

**Tura**, a town among the Garo Hills, Assam, on the Brahmaputra River. Climate hot and unhealthy; 90° to 51° F. Population, 109,548. Race and language, Garo. Mission station American Baptist Missionary Union (1877); 2 missionaries and wives, 2 female missionaries, 17 native helpers, 40 out-stations, 10 churches, 1,168 church-members, a seminary for native teachers, 50 schools, 1,670 scholars.

**Turkestan**, or **Tartary**, are terms which have been loosely applied to all that part of Central Asia which lies east of the Caspian Sea, south of Siberia, west of Manchuria or China, and north of Tibet, India, Afghanistan, and

Persia. These names are gradually falling into disuse as the formerly unknown plateaus and steppes of Central Asia are being more thoroughly explored, but the term *Turkestan* can still be retained as applying to that part of Central Asia which includes three divisions; (1) West *Turkestan*, (2) East *Turkestan*, and (3) *Jungaria*.

West *Turkestan* includes in its territory the highlands of *Thian Shan*, the plains of the *Balkash*, and the lowlands between the *Aral* and the *Caspian Sea*. It is divided into Russian *Turkestan*, including the provinces of *Samarcand*, *Ferganah*, *Semirichensk*, *Syr-Daria*, *Khiva*, *Bokhara*, and *Kokhand*; the Chinese oases of *Kulja*, and some parts of *Afghan Turkestan*. It includes an area of about 1,600,000 square miles, with a population estimated at 8,500,000, of which 793,032 square miles are in the Russian provinces or dependencies, having a population of over 3,500,000. The physical features of this large area vary greatly—from mountain peaks of perpetual snow, to deep gorges and valleys with every variety of climate and vegetation. Prairies and lowlands alternate with deserts, over which the dry winds, at times scorching hot, and then again icy cold, blow sand or snow, and blight all vegetation. The population of this territory is very mixed. Aryans and Mongols are both found, the former principally in the cities, while the latter are wandering tribes. To the *Turanian* group belong the *Turcomans*, *Kirghiz*, *Uzbegs*, and *Sarts*. The *Mongolians* include the *Kalmucks* and *Torgoutes*. To the *Aryan* race belong the *Tajaks*, who are *Sunnite Mohammedans*, *Persians*, *British Indians*, and *Russians*. The principal cities are *Kokhand*, *Marghilan*, *Tashkend*, *Khajend*, *Bokhara*, and *Khiva*. The two latter have each from 30,000 to 100,000 inhabitants.

East *Turkestan* includes that large depression in the plateau of Eastern Asia which lies between Western *Turkestan* and those parts of Asia which have received distinctive names, and whose boundaries have been defined. Its boundary on the northwest is the *Thian Shan* range; on the southwest and south the *Kuenlun* mountains; on the southeast to *Lake Lob-nor*, the *Altyn-Dagh*; and on the northeast the mountains which run east-northeast from the *Thian Shan* range. It includes a territory of about 465,000 square miles, with a population of 1,000,000, of which 431,800 square miles, with a population of 580,000, is part of the Chinese Empire. The climate is severe; there is no great fertility of the soil, and consequently the whole district is very sparsely populated. The few inhabitants are representatives of both the *Aryan* and *Turanian* groups of the human race. The *Mongol* element predominates towards the northeast. Turkish mixed with Chinese is the prevailing tongue. *Yarkand* and *Kashgar* are the chief towns.

*Jungaria* or *Songaria* lies to the north of East *Turkestan*, and is a deep valley leading from the lowlands to the central plateau. It includes 147,950 square miles, with a population of 600,000, and is a dependency of the Chinese Empire.

There are no missionary societies at work in *Turkestan*. The only Protestant work that is carried on is that by the B. and F. B. S. The Scriptures in whole or in part have been translated into the *Kazan-Turki*, *Kazak-Turki*, and *Karass-Turki*.

**Turkey**, or the Ottoman Empire, covers extensive territories of Southeastern Europe, Western Asia, Northern Africa, and the islands of the Eastern Mediterranean and Aegean Seas. In Europe and Africa, however, there are certain tributary states which are only nominally a part of the Empire, being either autonomous, or under the general supervision of European governments.

**Geographical Extent.** Taking first the Empire in its fullest sense, we notice,—

**TURKEY IN EUROPE.** This covers the extent of country stretching from the Adriatic Sea on the west, across the Balkan Peninsula, to the Black Sea on the east, and includes the districts of Albania, Macedonia, and Adrianople, and the Principality of Bulgaria, with Eastern Roumelia.

**TURKEY IN ASIA** is bounded on the north by the Black Sea, on the east by Russia (Trans-Caucasia) and Persia, on the south by the desert of Arabia, and on the west by the Mediterranean and Aegean Seas, and the straits of the Dardanelles and Bosphorus. Both eastern and southern boundaries are somewhat vague, the former because the two empires have not succeeded in drawing a satisfactory line through the mountains of Koordistan, the latter because of the very shadowy nature of the Sultan's authority over the tribes that roam the border land of Syria and Arabia.

**TURKISH POSSESSIONS IN AFRICA.** There is no definite Turkey in Africa, as in Asia and Europe, the Sultan's authority being limited to two countries, each quite distinct from the rest of his dominions: Egypt and Tripoli, including Barca and Fezzan.

**ISLANDS IN THE EASTERN MEDITERRANEAN** include the islands of the Archipelago, Crete and Cyprus. Crete and all the islands of the Archipelago, except Samos, are included in the tables among the Asiatic possessions. Samos is a tributary principality, with an area of 210 sq. miles. Cyprus, with 3,670 sq. miles, is under the British Government, which, however, pays an annual tribute to the Turkish Government, so that the island is fairly included in the Turkish Empire, using that term in its fullest sense.

Tabulating the whole we have the following:—

#### IMMEDIATE POSSESSIONS OF THE EMPIRE:

Europe,	63,850
Asia,	729,170
Africa,	398,873
<hr/> 1,191,893 sq. miles	

#### TRIBUTARY STATES:

Europe,	37,860
Africa,	400,000
Mediterranean,	3,880
<hr/> 441,740	

Total, 1,633,633 sq. miles

It should be remembered that estimates as prepared by different authorities differ very widely, owing partly to the diverse views held in regard to the political relations of the various sections, and partly to the absence of absolutely accurate measurements. In this article the figures are taken in the main from the Statesman's Year Book for 1890.

**Population.** Following the same general

divisions as above, we find the totals as follows:

#### IMMEDIATE POSSESSIONS OF THE EMPIRE:

Europe,	4,790,000
Asia,	16,133,900
Africa,	1,000,000
<hr/> 21,923,900	

#### TRIBUTARY STATES:

Europe,	3,154,375
Africa,	6,817,265
Mediterranean,	276,156
<hr/> 10,247,796	
Total,	32,171,696

Here, too, mere estimates are possible. A census in the East is in a great degree an anomaly, and although the Turkish Government has taken two, its efforts have not been crowned with the greatest success. The fact that in some provinces, especially in Asiatic Turkey, the males were reported as 20–50% in excess of the females, indicates the great difficulty of the census taker. For a division of these totals among the different races and religions, see below.

**Divisions.** Albania, Arabia, Armenia, Bulgaria, Egypt, Koordistan, and Syria are described under their several heads.

**EUROPEAN TURKEY** comprises the provinces of Macedonia and Adrianople, the former being really a continuation of Albania, while the latter includes the great plains extending from the Rhodope to Constantinople.

**ASIA MINOR**, or Anatolia, consists almost entirely of high plateaus, varying from 150 to 300 miles in width, and about 4,000 feet above the level of the sea, extending from the Black Sea on the north to Armenia on the east, and Syria and Mesopotamia on the south.

**General Characteristics.** The natural barriers are rendered the stronger by the facts that the coast lines furnish almost no harbors, the mountains few passes, and those mostly difficult, while the deserts are practically unlimited. In the European and Northern Asiatic provinces, the country is mostly a high tableland, broken by ranges of mountains, and interspersed with alluvial river basins. South from the Taurus lie the great Mesopotamian and Syrian plains, following the course of the Euphrates and Tigris, while the Lebanon helps to raise the western coasts to a higher level. Egypt is one unbroken plain, and in Tripoli the rocks and desert seem to vie with each other as to which shall possess the land.

**Climate.** The Turkish Empire has every variety of climate, from the severe cold of the Balkans and the highlands of Armenia, to the almost equatorial heat of the Dead Sea and Bagdad. In the greater portion, however, it is temperate, not varying very much from that of corresponding sections of the United States. In general, Mesopotamia and Syria may be called hot, and the sections bordering upon them are affected in a great degree by the winds that blow over their plains. Northern and Eastern Asiatic Turkey feel the cold from the Black Sea and the snow-capped peaks of the Zagros. Central Asia Minor is temperate, its great plains being warm in summer and cold in winter, but day and night generally equal-

izing the temperature. The same is true of European Turkey, where Salonica is the only city that can be called hot.

The climate is undoubtedly greatly affected by the almost entire absence of trees over the great plains and even most of the mountains. The soil having to a great degree been washed down into the plains and valleys, the hills and mountain sides are barren, and the reflection of the sun from them in summer is intense. Especially is this true in some places, as Aintab, Oorfa, Mardin, and Erzroom, where the summers are very hot. Wherever there is cultivation about the cities as at Van, Harpoot, Marsovan, Cesarea, there the climate is more equable. Constantinople is temperate, Smyrna is hot.

*Soil and Productions.* The Turkish Empire includes probably some of the most fertile land on the globe. From the plains of Bulgaria to the valleys of the Nile and the Tigris the soil is wonderfully rich. The people of a section of the great central table land of Asia Minor near Cesarea have a proverb: "If the world is hungry, Bozuk can satisfy it, but if Bozuk is hungry the world is not sufficient." The wheat of Bulgaria and Roumelia is well known in the markets of Europe, and America is finding dangerous rivals in Asia Minor and Mesopotamia, as means of communication make it profitable to bring their grain to the sea shore. Mesopotamia is especially rich, and any one who goes down the Tigris by raft and watches the line that marks the depth of the rich loam in the river banks will not wonder that empires succeeded each other with such rapidity in that whole section, or that the mountaineers of Persia looked with such longing eyes on the fields of Assyria. Aside from wheat there is a large amount of barley raised, and in Eastern Turkey a good deal of millet. Near the coast in northern Syria, and within Asia Minor, cotton is raised to some extent, and on the plains of Central Asia Minor there are large fields of poppies for the opium trade. The common vegetables are rice, cabbage, onion, turnip, and okra, but the potato is being largely introduced. Tobacco is cultivated everywhere, the best coming from northern Syria and European Turkey.

Turkey is especially rich in fruits. Grapes, melons, figs, olives, peaches, pears, quinces, pomegranates, dates, etc. are of the finest.

In European Turkey and the western parts of Asiatic Turkey there are large vineyards, and a considerable amount of wine is made. This is generally pure, and is very largely exported to Italy, France, and Austria, where it is fortified, and exported again as French and Italian wines.

Olive groves are especially abundant along the shores of the Mediterranean, and the fig orchards of Smyrna are famous. The dried fig of commerce is a somewhat different variety from the fresh fig that is so largely used by the people of the land. Dates are not found in numbers north of Egypt.

The only sections of forest in Turkey are on the Rhodope and Balkan Mountains in Europe, the shores of the Black Sea, the Zagros about Bitlis and Van, and a portion of the Taurus, and the valleys leading down to Alexandretta. In these forests there is still much fine timber, oak, walnut, and sycamore, but elsewhere almost the only trees, aside from the fruit trees,

are the cypresses of the Moslem cemeteries, and the poplars and willows that line the streams and water courses near cities and villages.

By far the greater part of Asiatic Turkey is pasture-land, and wherever one goes he sees large flocks of sheep and goats generally making their way slowly towards the sea-coast, from the mountains of Koordistan and the plains of Mesopotamia.

The mineral wealth of Turkey is very great, but has never been developed, so that it remains still an unknown, scarcely even an estimated, quantity. Iron, copper, silver, baryta, coal, etc., are mined to a greater or less degree, but mostly in a crude, imperfect way. Foreign capital would gladly take up the business, but the hostility not only of the government, but of the people, is an almost insurmountable obstacle.

*Means of Communication.* Previous to the Crimean war, almost the only roads in Turkey were bridle paths, trodden smooth by the caravans of several centuries. In a few places remnants could be seen of old Roman causeways, but the huge blocks of stone, and the intervening pitfalls were shunned by all, except as the mire by the side was so deep as to be really impassable. In a few instances the Sultans, both Seljuk and Ottoman, made some efforts to repair these causeways, but they were seldom successful, and caravans were forced to find their own way over plains and mountain passes as best they might. Everything was carried on horses, mules, or camels, and such a thing as a cart or carriage was unknown. As the country, however, was opened up to foreign enterprise, one of the first things attempted was the building of roads over the great routes of travel. Of these there were five, four connecting the western coast with Bagdad, and one from Trebizond on the Black Sea, to Persia. The course they took was 1. Constantinople, via Nicomedia, Angora, Sivas, Diarbekir, Mardin, and Moosul. 2. Samsoon (on the Black Sea) via Amasia, Sivas, etc. 3. Smyrna, via Konia, Cesarea, Diarbekir. 4. Alexandretta, via Aleppo, Oorfa, Diarbekir. 5. Trebizond, via Erzroom and Van, to Khoi, and Tabriz. There were numerous other routes, and these varied somewhat, but in general they kept a straight course, and were those followed by caravans and travellers. Along all of these lines work was commenced in sections, but the sections seldom connected. There was little regard paid to culverts on the mountain roads, and the result was that the paths remained. Then a new element came in. After the overthrow of Schamyl (1859), the great Circassian leader, multitudes of Circassians found their way into Asia Minor, bringing with them the rough carts they had used in the Caucasus. These made roads for themselves, and gradually, as renewed pressure was brought to bear upon the Turkish government, road building was recommenced, so that now there are fairly good carriage roads from Trebizond to Erzroom, and from Samsoon to Diarbekir and Mardin; while in not a few places there are branches from these to important cities.

The first railroad in Asiatic Turkey, was from Smyrna to Aidin. That was followed by one from Smyrna to Manisa, and from Constantinople to Nicomedia, and one from Mersine to Adana. All of them have been somewhat extended, but not as yet to any great length.

In European Turkey the first railroad connected the Danube with the Black Sea at Kustendji; that was followed by one between Varna and Roustchuk connecting with one to Bucharest and Vienna; one from Constantinople to Adrianople and Philippopolis, now extended to Sofia, Pirot, Alexinatz, Belgrade, Pesth, and Vienna; and one from Salonica to Uscup.

*Postal and Telegraph Arrangements:*—These are entirely in the hands of the Turkish Government as far as the interior is concerned, the mails being carried on horseback, under the escort of an armed guard. Considering the method of carriage the rates are not excessive. The telegraph bureau is fairly well managed.

The foreign postal service is a curious anomaly resulting from the peculiar treaty relations between Turkey and the various powers. According to the "Capitulations," each foreign community in the Empire has the right to its own postal communication with its own lands. So long as there was no regular Turkish service this was an absolute essential, and the English, French, Austrian, Russian, Italian, and Greek Governments established post-offices of their own in the various seaports, and sent their own bags of mail-matter. Previously this communication was simply with their own countries, but as the international postal system came into vogue, each post-office took mail-matter for every country in the Postal Union. By that time the Turkish Government also had organized a complete postal system, and as it had been admitted to the Postal Union it pressed its claim that the foreign post-offices should retire. Some of them did, but the majority have not as yet done so.

*Social Condition.* To describe in detail the mode of life of the people of Turkey is scarcely within the province of this work. The city life, approaching so nearly in its buildings, its customs, its dress, and food to that of Europe; the country life with its adobe houses, sometimes with a single room, sometimes more pretentious with its upper chambers; the tent life of the Koords,—have all been described over and over again. A few general statements will suffice here.

Except in the poorest parts of the Koordish mountains and in some of the villages of northern Syria, or Mesopotamia, the people live in comparative comfort. To be sure, what is ample for them seems to the foreigner a very meagre supply, but it is still true as a rule that they are in comfort so far as the supply of bodily needs is concerned. Their food is simple, but it is wholesome, and there is ordinarily enough of it. It is rarely the case that they suffer from hunger, except as drought and poor transportation cause famine. It is very seldom that the traveller fails to find bread, rice, milk, and some meat in even the smallest hamlet, or the poorest hut. Their houses are rough, their furniture scanty, their bedding and clothing coarse, but they serve usually to keep them warm. It is when sickness and old age bring weakness and distress that the discomforts principally appear. Taken as a class the Turkish peasant, whether Moslem or Christian, probably fares as well as the peasant class of any non-Christian land; in some respects he is better off. There are few if any in Turkey, even in the great cities, as wretched as are the miners of Europe or many of the poor of London.

If we look now to the relations of the different

classes, we find them exceedingly democratic. There is no aristocracy in Turkey. There is absolutely nothing to hinder a farm-hand or a pedlar from becoming Grand Vizier, if he be a Moslem, or Patriarch, if he be Armenian or Greek; and should he thus rise he will never find his low birth a cause of shame or regret. The castes of India are unknown, and equally so are the ceremonial laws of Persia, which forbid a Moslem to eat from the same dish as a Christian. In every part of the Empire there is the freest inter-communication between the different races, and between the different parts of the same race. Not that this inter-communication involves good feeling. The Turk despises the "dog of a Christian;" the Armenian hates the Greek; and the Jew, Nusairiyeh and Yezidee, are the contempt of all. Intermarriage between Moslems and Christians is unknown, except as a Christian girl is drawn into the harem of a wealthy Turk. There is no social intercourse of the families of different races, yet business relations and social courtesies between the men are common, and in that one is in most cases just as good as any other.

*Races.* The population of the Turkish Empire presents some very interesting features to the student and especially to the missionary. To trace back through the centuries the influences that have converged from all the surrounding countries, and have resulted in the races of to-day, would be beyond the limits of this article. We can only give a sketch of them as they exist.

In a general sense, the inhabitants of Turkey are either Mohammedan or Christian, and if we assume the population of the direct possessions of the empire to be about 22,000,000, we shall have about 16,000,000 Mohammedans and 6,000,000 Christians. Both Mohammedans and Christians, however, include widely different races. Greeks and Armenians are hardly more diverse than are Turks and Albanians; Jacobites and Bulgarians, are as little alike as are Koords and Kabyles. This great diversity gives rise to much of the misconception in regard to the country, its history, and its political relations. We note now these different races very briefly.

I. MOHAMMEDANS. 1. The Turks proper, or Ottomans or Osmanlis, as they call themselves. The word Turk is a general term applied almost indiscriminately to the general Tartar races, that from different sections of Central Asia, and at different periods have poured in upon the richer countries of Asia Minor and south-eastern Europe. They include the Ottomans, Seljuks, Turkomans, etc. We have to do now with that particular tribe of Ottomans or Osmanlis, so called from their leader Ottoman or Osman, who first established them in power, and whose tomb is one of the sacred places of the city of Broosa. As has been said, only estimates are possible, but if the number of Ottoman Turks be put at 9,000,000, it is probably not far from the truth. They are found chiefly in Asia Minor, comparatively few living in European Turkey, or in Koordistan, Mesopotamia, or Syria. The so-called Turks of European Turkey are mostly Albanians or Slavs who have accepted Islam, of Koordistan Koords, of Syria Syrians or Arabs. This fact should be distinctly kept in mind in forming an estimate of the Ottoman Turk. "The unspeakable Turk" of the Batak massacres in

Bulgaria was a Pomak, Moslem Bulgarian; of the Druze massacres of Syria an Arab. The Ottoman peasant of Asia Minor is a man far different from the ordinary conception. As a rule quite peacefully inclined, a hard worker, a faithful servant, courteous and dignified in his bearing, rather proud of his assumed superiority to the "meanesses of his Christian fellows," there is still an inherent element of ferocity in his nature, and when religious fanaticism is roused, his fatalism makes him a most dreaded enemy. The Ottoman of the city is, however, quite a different man; with as much Christian as Tartar blood in his veins, and influenced by the strife of Western with Eastern civilization, studiously polite, easily adapting himself to the circumstances of his associates, he develops a power of intrigue, a facility for deception, an unblushing delight in bribery that makes him the scorn of his sturdy compatriot of Anatolia. There are notable exceptions, but as a rule, and this is the testimony of those who have travelled most in the interior of Asiatic Turkey, the native unadulterated Ottoman Turk is a man with many noble characteristics, and presenting great possibilities for Christian influence. Of the other elements making up the Moslem population the most important races in Asia are the Arabs and Koords, in Europe the Albanians. They are spoken of more fully in the articles on Syria, Koordistan, and Albania. As a rule they are hostile to the Turks, feeling that the latter are oppressors, and even their recognition of the Sultan or Caliph is weakened by the race enmity and the sense of subjection. Next to them in importance are the Circassians, including the Circassians proper and the Lazs who have been driven by Russian rule from the Caucasus to Asia Minor. They furnish the most turbulent element of the population, and by far the greater amount of the depredations committed in Asia Minor are by them. There are also large numbers of Turkomans (another Turkish race), chiefly found in northern Syria. The Druzes and Nusairiyeh of Syria and the Yezidees of Mesopotamia are especially described under those headings. They probably represent the small remnant of the ancient paganism of the Levant which has accepted the form though not the spirit of Mohammedanism. The original races of Asia Minor are represented among the Mohammedans by a number of tribes, of somewhat uncertain extent and character, found chiefly in the mountains of the western part. Such are the Yuruks (or Nomads) of Bithynia, and the Xeibecks of the region of Smyrna. The Kabyles of Tripoli in Africa, of the Berber race (q.v.), are scarcely recognized as Turkish subjects.

II. CHRISTIANS. These include the Armenians, Greeks, Syrians, Jacobites, Copts, Bulgarians and Protestants. The Armenians are a race by themselves, as distinct to-day as at any time in their history. Formerly occupying the northeastern part of Asiatic Turkey, they have spread until they are found all over Asia Minor (see Armenia). The Greeks are found chiefly in western Asia Minor and along the shores of the Black Sea. They too have kept their race distinction very sharp, and retain many of the characteristics of their ancestors who founded the Euxine and Doric colonies. Sharp, keen in enterprise and speculation, the commerce of Turkey is largely in their hands,

while the traders and bankers are chiefly Armenians. Those in the interior are of a higher grade of character than those at the seaboard. The term Jacobite is distinctive of the remnants of the Monophysite Church found in northern Syria about Oorfa (Edessa) and through Mesopotamia. The term Syrian is often a very indefinite one, applied generally to all the Christians of Syria and Mesopotamia. Specifically it refers to those churches in communion with the Roman Catholic Church, such as the Maronites (q.v.), the United Greeks, and sometimes the Chaldeans, who are Jacobites that have left their old communion for the Romish Church. The term Syrian is also applied, though incorrectly, to the Assyrians or Nestorians who are found in the mountains of Koordistan. The Copts are found only in Egypt. The Bulgarians are a distinct race, occupying European Turkey. They belong to the Orthodox or Greek Church, but are independent of the Patriarch. Of these, the only ones whose race distinctions have been preserved are the Armenians, Greeks, and Bulgarians. The rest are not races, properly speaking, but religio-political divisions of the descendants of those of the original inhabitants who accepted Christianity under the rule of the Byzantine Empire.

The Protestants of Turkey can hardly be spoken of as a race, and would not be were it not for the peculiar system of government, which identifies religious and civil authority (see below). They number perhaps 50,000, and include members of all the races mentioned above, though the Armenian element is the largest. Other elements of the population are the Jews, found chiefly in the cities by the seaboard, the gypsies, and the Europeans. Of these there are large numbers, chiefly in Constantinople and Smyrna, though scattered more or less throughout the Empire.

**Languages.**—The languages of Turkey are Turkish, Arabic, Armenian, Greek, Koordish, Bulgarian and Albanian. The Turkish is the official language throughout the empire and is vernacular in Asia Minor and South-eastern European Turkey.

Arabic is spoken in Mesopotamia, Syria and Palestine, Northern Africa, and somewhat on the southern border of Asia Minor.

Armenian is used commonly by the Armenians wherever found except in some sections of Asia Minor, especially in the region of Cesarea, Konia and Adana, and in Northern Syria, Aintab and Marash, where Turkish is the language of every-day life, the Armenian being used only in the church services and schools. Even there, however, as education is progressing, Armenian is rapidly taking the place of the Turkish in the homes. Their use of the Turkish in conversation, together with the preservation of the Armenian as the literary and liturgical language, has given rise to what is often called Armeno-Turkish. This is simply Turkish written in the Armenian character, and differs from Osmanli-Turkish (Turkish as used by the Osmanlis and written in the Arabic character) merely in the use of certain distinctive names and phrases preserved from the Armenian, especially among the uneducated.

The Greeks of the Turkish Empire who live in the interior use chiefly the Turkish, employing however the Greek character in the same way that the Armenians use their own character. This Greco-Turkish, or Caramanlija (q.v.), as it

is sometimes called, differs in practical use from the Osmanli-Turkish more than does the Armeno-Turkish, but is rapidly giving place to the use of the Greek language itself. The Greeks of the seaboard cities use Greek, though with varying inflections, so that one who is conversant with the language of Athens would find it difficult to understand or be understood in many of the towns and villages. In Turkey as well as in Greece there is, however, a constant tendency towards the ancient Greek, except in the intricacies of its syntax.

Koordish is spoken by the Koords in the mountains of Koordistan and wherever they are found in Asia Minor. (See Koordistan.)

Bulgarian is used in Bulgaria, and Albanian in Albania. (See those articles.)

In the seaports of the Mediterranean a great deal of Italian is spoken, and in the commercial and official world French is almost universal. German is often heard, and English is increasing in use everywhere.

The only one of these languages needing special mention here is the Turkish.

*The Turkish language* is a leading member of the Turanian or Ural-Altaic family, which is characterized by the preservation of the roots of words intact through all the changes of inflection and word-building effected by the addition of suffixes, and by a rigid rule of euphony which requires the quality of sound in the suffixes to agree with the quality of the sound of the root to which they are added. It is the language of Central Asia, whose origin is hidden in the misty past. But the Chinese annals of a time 2,500 years before Christ are said to contain the name Turk, while the Turkish vocabulary contains some words that can be identified as Chinese. The less developed character of the dialects of Turkish found in the far East, as well as the refinements of grammatical system which become more visible as the student moves westward, would seem to show that the language had its origin in the most eastern parts of Tartary and found growth and progress by means of that westward rush of the tribes which introduced the Turks to the knowledge of the European peoples.

The Turkish dialects of the present day may be roughly classed in three great groups: the Eastern or Oughour, the Central or Jagatai, and the Western or Osmanli. While the dialects of these groups differ from each other materially in grammar and vocabulary, the names of mountains and rivers found on the map of Asia from China to the Black Sea, and from the Arctic Ocean to the Himalayas, often carry meaning to the mind of one who knows any one of the Turkish dialects. In fact it has been said, almost without exaggeration, that one may travel with the Turkish language from the Adriatic Sea to the Chinese frontier, and be sure of making his ordinary wants everywhere understood.

The alphabet now used for writing the Turkish language is the Arabic-Persian alphabet, to which the Western Turks have added one modified character peculiar to themselves. The earliest Turkish manuscripts are written in the Oughour alphabet, now obsolete, which by some is supposed to have been derived from the Syriac through the Nestorian missionaries of the ninth and tenth centuries. The Arabic-Persian alphabet does not satisfy the Turkish need for the expression of vowel sounds, and

Turkish scholars sometimes use its characters for this purpose in ways quite unacceptable to the Arabic writers. In Russia some Turkish tribes write their language with the Russian characters, while in Asiatic Turkey, Greeks and Armenians who have lost their own vernacular and use the Turkish language alone, write it with the Greek and Armenian alphabets respectively.

The Turkish vocabulary is of limited extent, suggesting the limited range of ideas of pastoral peoples. All the dialects borrow freely from the Persian and Arabic languages. In the Osmanli Turkish, used in the Turkish Empire, this appropriation of Persian and Arabic words and even phrases has been carried to a degree which has raised its classical literature far above the comprehension of the unlearned, and has even sometimes threatened to destroy the very basis of the language. Of late years, however, the revival of the use of purely Turkish words by the best writers has brought the literary language back within the grasp of the masses. The words adopted by the Osmanli Turkish from European languages have a close relation to the history of the Ottoman Empire. Names of winds, currents, fishes, etc., often come from the Greeks who had possession of the coasts seized by the Turks; those of whatever relates to the sailor's craft commonly have an Italian origin, the Genoese and Venetians having been the instructors of the Turks in naval enterprise; words relating to the fine arts and to etiquette often come from the French, while names of machinery bear the impress of English origin.

In etymology the Turkish is remarkable for the regularity of its declensions and conjugations, and for the abundance of the forms of the verb, especially in the Osmanli Turkish. There is, properly speaking, but one conjugation of verbs. In the Eastern Turkish dialects there is no auxiliary verb and hence the compound tenses lack. But in the Osmanli Turkish the verb is conjugated in great fullness of moods and tenses, with great abundance of participial forms and verbal nouns. Moreover, by the incorporation of certain particles the simple verb may give rise to new verbs signifying a reflexive and a reciprocal quality of action. Each of these verbs, whether simple or reflexive or reciprocal, may take another particle and form a second series of new verbs signifying the causing of the action implied by the verbs of the first series. A second causative particle may still be incorporated in the verbs of the second series, giving a third series of new verbs with the signification of the causing another to cause the action implied by the verbs of the first series. And finally, by use of the appropriate particle with each of the verbs of the three series, each one is made to produce a new verb with a negative and one with an impossible signification. Each simple verb may thus give rise to 26 new verbs, each of which can be conjugated in all the moods and tenses, and in the active and passive voices exactly on the model of the simple verb. The variety and compactness of expression thus secured is extraordinary. For instance, the sentence "I was not able to have [them] made to love each other" can be expressed in Turkish by the one word *sevishitirtemedim*, formed from the simple verb *sevmek* [to love] by a rule so regular that any one knowing the rule

and the root *sev* [love] can understand with precision the meaning of the word even if he has not previously met with it.

The principle of agglutination here illustrated has its application also in the formation of adjectives, adverbs, and nouns, giving great breadth of expression in the use of the somewhat limited vocabulary. Most pronouns and all prepositions in Turkish are used in accordance with the same principle, following the noun which they limit as suffixes and having a regular place in the building of the word.

The Turkish language lacks the relative pronoun and the article. It has neither gender nor declension of adjectives, and is also defective in the comparison of adjectives.

In syntax the characteristic of the Turkish is that while the subject occurs at or near the commencement of a sentence, the sense is held in long suspense while qualifying phrases and sentences giving particulars of the most diverse description are brought in, the verb of the predicate, which stands at the very end of all, serving as the key to the whole enigma.

**Religions.**—The religions of the Turkish Empire have been specially noticed under the articles Albania, Armenia, Bulgaria, Koordistan, Maronites, Mohammedanism, Nusairiyyeh, Yezidees. It remains here to note merely the Greek, Roman Catholic, and Protestant churches.

The Greek, or Orthodox, church is the direct descendant of the Byzantine church. In general doctrine, as found in the creeds and confessions, it is in sympathy with the Protestant church, and only separated from the Armenian by a distinction so shadowy that it is claimed by some Armenians that the theological difference was a pretext, rather than an occasion, for the separation, the real reason lying in the effort of the Byzantine church to compel the Armenians to use the Greek liturgy. However that may be, it is certain that the age of theological controversy between the different Oriental churches has passed. The question now is not of "one Nature or two," "one Will or two," but of nationality. Under the rule of the Moslem Caliph every Christian sect has become a native, and every apostate is also a traitor, (see paragraph—"The Government of Turkey"—below). The position of the Greek church in Turkey is thus primarily political. In its religious aspect it is practically on a par with its fellows, and a stranger could hardly tell the difference between the services of each.

Ecclesiastically the Patriarch of Constantinople is the head of the Church in all its different branches, but the Holy Synods of Russia, Greece, and Servia practically ignore him, while the Patriarch of Jerusalem and the Exarch of Bulgaria render a very shadowy reverence to his precedence. In fact the Greek church of to-day is split up into fragments, each fragment claiming absolute independence, and each characterized by the same formalism and absence of spiritual life.

The Roman Catholics of Turkey, aside from the Maronites (q.v.), include sections of the Armenians, Greeks (Uniates), and Syrians (Chaldeans), who, chiefly for political reasons, have made their peace with the Papacy. They have succeeded, by special dispensation from the Pope, in preserving the use of their national language in their liturgy, in return for

their political support, and, except in the dress of their priests, are not distinguishable from their fellows of the old faiths.

The Protestantism of Turkey needs no special description, following as it does closely in the lines of the churches of America and England. Except in rare cases there is little emphasis laid upon creeds. Of the doctrines, perhaps the one that is most prominent is the one that Luther pressed so hard—Justification by Faith—and for the same reason. There has been no effort to establish new dogmas. The new church was a civil even more than a religious necessity. In most cases every effort has been made to avoid antagonism to the old churches, in the belief that the emphasis laid upon truth would crowd out the error. The Protestant churches of Turkey are distinguished from the old churches rather by their conception of sin, its character and heinousness, the absolute necessity of a change of life, and the idea of individual communion with Christ, as a personal Redeemer and Saviour, than by elaborate creeds or confessions. Church services take on the non-liturgical form, partly because that has been the habit of the missionaries, partly because of the natural repulsion of the soul, awakened to a sense of its personal need, to a ritual where personality was lost in forms that had practically lost their meaning.

**Government.**—The Government of Turkey is often called "Theocratic." In the sense that the Sultan as Caliph is the head of the Moslem religion, as well as of the Turkish Empire, and that all civil authority centres in the ecclesiastical, this is correct. Mohammed claimed to derive his power from God by special dispensation through the Archangel Gabriel, and committed his authority to the Caliphs, whose descendant or representative is the Sultan. But as for any personal relations between the Sultan and Deity, they are no more than those of the meanest of his subjects. He is the representative of divine authority, but by no means its medium. To apply the term "theocratic" to it as to the Mosaic government is incorrect.

Both theoretically and practically the Sultan is the head of the government. He has the usual number of Ministers, each responsible for the minutiae of his special department of Foreign Affairs, The Interior, Finance, Commerce, War, Marine, Public Instruction, and Evkaf, all presided over by the Grand Vizier; but any question may be referred to him, and he keeps his eye on all the different lines of governmental policy. So too the Sheik ul Islam and the Ulema guide the affairs of the church, under his supervision, and, whether in civil or ecclesiastical affairs, the Palace is constantly a most potent factor, liable at any moment to interfere with the best-laid plans of subordinates, and assume direct control even of the minutiae of administration. That administration, in its civil department, is in general on much the same plan as that of the European governments, at least in the cities of the seaboard. The interior is divided into provinces, whose boundaries are indefinite and constantly modified to suit political exigencies of many kinds.

Side by side with the civil administration are the judicial and ecclesiastical, and the three are often so intermingled that it is impossible to separate between them. The judicial is based in some respects upon the Code Napoleon,

but in others on the Che'ri or law of the Koran, and where one ends and the other begins it is impossible to decide. Especially does this intermingling become manifest in questions affecting real estate. All landed properties in Turkey are in general divided into two parts, *mulk* and *vacouf*. The former corresponds very nearly to freehold, the latter pays rent to some mosque, or "pious foundation" of some sort, either directly or indirectly through some beneficiary. The former is transferable in full, the latter only on condition of payment of the *vacouf* tax, which also carries with it certain restrictions, imposed by the ecclesiastico-judicial laws of the empire. *Mulk* can be made *vacouf* at any time by the act of the owner, but *vacouf* can be made *mulk* only by securing an exchange with some other piece of equally valuable property or by the payment of a sum of money which shall represent the continued payment of the tax. It will be readily seen what an opportunity is thus offered to those who would hinder or prevent the erection of buildings for missionary purposes, or even the building of a church or school for native Protestants, in places where the local authorities, whether Moslem or Christian, are opposed. That so much has been accomplished in this line is a great tribute to the wisdom and patience of both missionaries and natives.

The peculiar relations between the Moslem Government and the Christian communities, and between the different Christian communities themselves, offer special perplexities. When the Moslem conquered Constantinople, the question arose of his relations to his Christian subjects who refused his faith. To put them to the sword was not only practically impossible, but would deprive the government of much income. It was the natural way for the Moslem to consider that he must deal with them through their religious chiefs, and hence the ecclesiastical rulers of the different sects were appointed their civil representatives. At the same time the special right to judge concerning all relations in any way coming under ecclesiastical jurisdiction was committed to their representatives, and the result was that, except for purposes of general taxation, the Turkish Christian subjects formed nations as distinct from each other as from their Moslem rulers. These distinctions it has been the constant effort of the government to gradually obliterate, and to bring all alike under the full control of the distinctively Turkish courts.

The position of foreigners in Turkey has been somewhat peculiar. When the first treaties were made between Christian governments and the Sublime Porte, the question of jurisdiction over foreign residents was solved by clauses appended to the treaties making such residents amenable solely to their own consular courts. Special privileges of introduction of articles for personal use, of the enjoyment of certain customs, etc., were allowed, and in general the foreigner was absolutely independent in his person and personal property of the Turkish officials. No police officer could lay hands on him, or even enter his door, except as he received special authorization from the consul of the country to which he belonged, and no Turkish court could summon him to its bar. During the first part of the present century the "capitulations," as these clauses were called, continued in full force, but of late they are

gradually being either disregarded or repealed, the Turkish Government claiming that foreigners in its land have the same rights, and no others, that a Turk has in other lands.

**History.**—The history of Turkey is of the utmost importance to the student of Christian missions. Only by a careful survey of it from the time when the Byzantine Empire commenced to decay can he understand how the present condition is but the crystallization of conditions that existed many centuries ago. The capture of Constantinople by the Turks, and the establishment of the internal regulation of the empire on the basis of an absolute union of church and state, or rather of an absorption of the state by the church, for not only the Moslem but the Christian, acted upon the social, civil, and religious condition of the land like a sudden petrifying power, and when the present century opened it found a country which had practically slept for nearly four centuries. The modern era of Turkish history, which is all that space and the general purpose of this article will allow, commences with the reign of Mahmoud II. (1808). More than any, perhaps, of his predecessors, Mahmoud realized the trend of modern progress, and he understood very clearly the situation in which he found his empire. Napoleon had just uttered his famous prediction that Europe was destined to be either all Cossack or all Republican. The French Revolution on the west, Russian aggression on the east, were stirring influences that he felt must be fatal unless they could be checked. Internally there was commotion. The Janissaries had ruled so long that the upturning of their kettles was a more serious affair than a death in the Palace. The feudal chiefs of Asia Minor were growing more and more restive, and the army was in danger of disorganization, through their refusal to send recruits to the order of the Sultan. Greece was feeling the impulse of the strife for freedom. Mohammed Ali was laying the foundation of his power in Egypt, while Albania was practically independent under Ali Pasha of Janina. A less vigorous, indefatigable, progressive man would have succumbed, and the Cossack would have carried the day. Mahmoud set himself to his task with courage, but the forces against him were too strong. He succeeded in overpowering the Janissaries, reorganized his army, and successfully withstood an attack from Russia; but England and France interfered and forced upon him the Treaty of London, 1827, and the Treaty of Adrianople, 1829. Greece was declared free, and the Danubian Principalities were placed under the protection of Russia. Meanwhile Mohammed Ali was increasing in power. The traditional hostility of England and France manifested itself more and more in the Mediterranean. France espoused the cause of the Pasha, while England supported the Sultan. The rivalry became open war, and the Albanian leader threatened the very existence of the Turkish Empire. Just at this crisis Mahmoud died (1839), leaving the Caliph's sword to his oldest son Abd ul Medjid, an amiable but weak and irresolute man. England and France saw at once that the danger foreseen by Napoleon was upon them. The "Cossack" was an immediate probability, the "Republican" (Louis Philippe was then reigning) a remote possibility. Accordingly they united their forces, and by the treaty of 1841

confirmed Mohammed Ali in the possession of Egypt as vassal to the Sultan, and assumed a European protectorate over the Turkish Empire.

No sooner was this settled than intrigues opened again. England, realizing the necessity of the situation as affecting her relations with India, placed one of her strongest men at Constantinople. Sir Stratford Canning (afterwards Viscount Stratford de Redcliffe) was an able, far-sighted, truly Christian man. Not only did he comprehend the general political bearings of the situation, but he understood clearly their social, civil, and religious relations. He realized that for the Christian races of Turkey it was in a sense a choice between two evils—the despotism of a weak Sultan amenable to influence and under obligation to Christian nations, or that of the Czar, secure in his position and utterly beyond the reach of any motives except those of aggrandizement of empire. With marvellous patience and skill he set himself to his task of strengthening his hold upon the Sultan. French and Russian ambassadors alike had to yield to the great "Elchi," as he was called. One after another, reforms were introduced. The Hatti Sherif of Gulhané announced the speedy establishment of institutions "which should insure to all the subjects of the Sultan perfect security for their lives, their homes, and their property, a regular method of collecting the taxes, and an equally regular method of recruiting the army and fixing the duration of service." But proclamation was one thing, enforcement another. Palace intrigues supplemented those of Russia. The Turkish officials saw their opportunities for oppression and bribery disappearing, and offered to the new reforms an Oriental shrug when they did not positively refuse obedience. Genuine advance was, however, made. Torture and the death-penalty for apostasy from Islam were abolished, and the bastinado was forbidden in the schools and finally in the army. Christian evidence in courts of law was rendered legal, if not always actual, and there appeared possibilities for the future where hitherto there had been absolutely no hope. Then came the stirring scenes of 1848 and 1849. Kossuth and some associates took refuge with the Porte, which refused to give them up to the power that had crushed the Magyar government. Nicholas, flushed with his victory, looked forward to the speedy extinction of Turkey, and in 1853 proposed to the British ambassador at St. Petersburg a plan for the division of "the Sick Man's" inheritance as soon as he should expire, and claimed the right of a protectorate over the (then 12,000,000) Christian subjects of the Sultan. This was naturally objected to by the Porte, and was followed by the entrance of the Russian army into the Danubian principalities. England took up the side of Turkey, and France, angered by the Russian claims in a contest between Latin and Greek priests in Jerusalem, added her forces to those of the Sultan, while Sardinia took her place for the first time as one of the allied powers. Austria also entered the Danubian principalities with her army, and hostilities were transferred to the Crimea. The victory of the allied powers resulted in the Treaty of Paris, which affirmed the neutrality of the Black Sea, the independence and integrity of Turkey, abolished the

Russian protectorate over the Danubian principalities, closed the Bosphorus and Dardanelles to foreign ships of war while the Porte was at peace, and emphasized the principles of the Hatti Humayoun, guaranteeing complete religious liberty and the carrying out of the reforms already promulgated, but leaving the administration entirely to the Porte, and forbidding all foreign interference.

In 1858 Lord Stratford was replaced by Sir Henry Bulwer, and English influence at the Porte rapidly lessened. Then commenced a time of national extravagance. Hitherto Turkey had been an almost unknown factor in the markets and Bourses of Europe, but now investors began to crowd in. The adoption of the Code Napoleon in civil courts, and the introduction of customs revenues, etc., necessitated the employment of vast numbers of Europeans, who looked upon the Turks as legitimate prey. Financial propositions of every sort were made; bonds were offered for sale, and the government was fairly launched upon a course of financial management to which it was an utter stranger. When Abd ul Medjid came to the throne he had reversed the usual custom of his ancestors, and spared the life of his brother, Abd ul Aziz; and he on the death of Medjid, in 1861, became Sultan. A morose, selfish man, bent upon gratifying every whim of the moment, he lent a ready ear to the adventurers that thronged Constantinople. Palaces, public buildings of various kinds, sprang up on every hand. A fleet was necessary and it was furnished, while contractors in every department grew rich at the expense of the government, which, elated by the hitherto unheard-of possibility of borrowing unlimited sums of money, on which only interest was payable, went into the wildest extravagancies. Meanwhile the Druze massacres of 1860 had resulted in the French occupation of Syria. Wallachia and Moldavia united in the kingdom of Roumania, and Servia became independent. The Russian Embassy was practically supreme, Sir Henry Bulwer, Sir Henry Austin Layard, and Sir Henry Elliott being utterly unable to cope with Count Ignatieff. The year 1869 saw the completion of the Suez Canal, intensifying England's interest in keeping her connections with India clear, and the collapse of France in the war of 1870 made it possible for Lord Beaconsfield to secure from the feeble Khedive a controlling interest in that great water-way. The abuses rife on every side increased. Internal politics developed two parties, Old Turkey and New Turkey, the former entirely under Russian influence, the latter siding with England. The leader of the latter, Midhat Pasha, an energetic, shrewd man, contrived a plot to replace Abd ul Aziz by his nephew Murad (eldest son of Abd ul Medjid). A deliverance (*fetoah*) was secured from the Sheik ul Islam to the effect that a Caliph who ceased to be capable of reigning could be deposed. There was no question about the incapability of Abd ul Aziz, and the revolution was easily carried through. But Murad was even less capable, and in three months gave place (May, 1876) to his brother, Abd ul Hamid II., the present Sultan. Midhat and his associates were exiled, and Old Turkey remained in the ascendancy. Numerous efforts were made to secure genuine reform, but in vain. Revolt in Bosnia and Herzegovina spread to Bulgaria, and the Bul-

garian massacres gave Russia the pretext for entering the Balkans in 1877. England held aloof, stipulating the neutrality of Egypt. Austria had received her price in Bosnia and Herzegovina, and Russia met Turkey alone. The campaign of the Balkans resulted in placing Constantinople at the mercy of the Czar, and the Treaty of San Stefano made Russia supreme in the Balkan peninsula, and gave her a strong hold on eastern Turkey. This was more than England and Austria could stand. The British fleet entered the Marmora, covering with its guns the Russian camp at San Stefano. Austria gave tokens of hostility, and Russia, ill prepared for a general European war, consented to the Conference of Berlin. This granted the independence of Bulgaria (q.v.), assured Bosnia and Herzegovina to Austria, enlarged the borders of Greece, regained a portion of Eastern Turkey for the Sultan, and guaranteed internal reforms, especially for the Armenians.

Since then there have been no great changes except that Eastern Roumelia was joined to Bulgaria in 1885, and Prince Alexander, who proved not as amenable to Russian influence as was desired, was seized, forced to abdicate, and was replaced by Prince Ferdinand. (See Bulgaria.)

The present (March, 1891) condition of the "Eastern Question," which is still voiced by the famous prophecy of Napoleon, may be briefly summed up.

1st. Internal. The ruling influences among the Turks represent neither of the parties of a few years ago. Taking as his motto "Turkey for the Turks," the Sultan, with a patience, skill, and persistence that mark him as a most important factor in the politics of the day, is endeavoring by every means in his power to strengthen the Turkish as distinct from the Christian element. Christian officials are less and less in favor. Advances are made wherever they seem likely to strengthen Islam, or when they are so vigorously pressed that refusal is unsafe. Little by little the concessions wrung by early treaties, or guaranteed by arrangements many centuries old, are being quietly forgotten or slipped aside in an unnoticeable way. Recognizing that the time of rule in Europe may be limited, and that Asiatic Turkey must be their home, everything is made to tend toward the development of distinctive Moslem rule in that section. Sections that have been distinctively Christian are being occupied by Moslems. The Koords are extending until they are found all through the mountainous regions even of Asia Minor. Circassians and Lazes are located on the plains, and all are suffered with little or no hindrance to persecute, hamper, and distress the Christians, with the evident desire of making them as weak an element in the country as possible. These disturbing forces, however, are by no means always under the control of the government. There is no love lost between the Ottomans and their subject Moslems, not a few of whom are looking forward to a time when the Turk shall be forced to recognize them at least as equals. Of these the Koordish element is undoubtedly the most vigorous. It has representatives high in office in Constantinople, who are ambitious not merely for Islam but for their own race.

The Christians are in a state of turmoil and unrest. Naturally exasperated by the con-

tinued refusal or failure of the government to grant the reforms that have been promised, feeling more keenly the oppression they suffer (even though it be no worse than of old, if indeed as bad), watching with envious eyes the success that has crowned the efforts of Bulgaria, the Armenians besiege Europe with claims for protection. Regardless of the fact that there is scarcely a section of the empire where they are not in an actual minority, certain agitators, for the most part outside of the country, keep up the demand for an autonomous Armenia. Most of the people, feeling the impossibility of this, are content with improving their condition as best they can, protesting against real abuses, of which there is a full supply, and deprecating the conflicts which invariably end in the weakening those who are already weak, and strengthening the strong. Among the Greeks there is less of commotion, though a no less careful and jealous watch is kept upon the efforts of the Turkish Government to deprive them of rights accorded to their church when Mohammed II. captured Constantinople, and assured to them repeatedly by his successors. The Protestants, both Armenian and Greek, recognize the importance to them of the changes that may take place at any time, but hold themselves quiet, not undertaking the impossible; strengthening themselves, careful to accord to law and to avoid every appearance of hostility, while claiming in full the rights that belong to them. Meanwhile certain influences are at work among every class, modifying each, sometimes silently, but not the less surely; often unnoticed, yet which at no distant day may be most potent factors in the political situation.

Of these the most prominent perhaps is Education. The presence of Robert College on the Bosphorus, the American College for Girls in Scutari, the Syrian Protestant College at Beirut, and the many others through Asia Minor, have had a mighty influence in stirring the popular demand, until there is not a city in the empire, scarcely a town or village, where there is not a certain amount of education. This education is not always thorough or complete, but it is opening the eyes of the people to truths that have hitherto been unrecognized, and no efforts of ecclesiastics or government officials can close them. The wide use of the French language has occasioned a great influx of French literature and French phrases, and it is not infrequent to hear some Armenian Greek, or even Turk, boast of being a "libre penseur." Free-thinking is spreading, and with it the ideas of modern socialism. As yet confined chiefly to the cities of the seaboard, they are spreading into the cities and towns of the interior, and are exerting an influence which it is impossible to measure but which is not less potent.

Next to education as a very positive element in influencing the political condition of all classes of the empire is the introduction of European modes of life. The change in this respect is most marked; and though detailed notice is out of place here, the fact that the Oriental simplicity of manners, from which has come in no small degree the vigor of the Ottoman race, is fast becoming a thing of the past, is of most practical import. Parallel with these is the growth of infidelity. This will be especially noticed below, under the head of

Mission Work, but it should be mentioned here as a most important element in politics. The condition of the Turkish Empire, both Moslem and Christian (except the Protestant), is rapidly assuming the complexion of the late Roman Empire. Religion is a good thing for the masses, but for the educated, the leaders, it really has no existence. It continues only as a political bond. In the consciousness of this among the more sincere Mohammedans of Koordistan, Arabia, and Africa lies the ground for such movements as those of the Mahdi, declaring that the Caliph has fallen from his high estate and no longer deserves to hold his position. But not only of the Turk is this true, it is true also of the members of the so-called Oriental churches, Armenians, Greeks, Jacobites, etc. The spirit of nationalism that has grown up within their church life has crowded out in a great measure the spirit of religion, but has brought with it a feeling of contempt for all spiritual life. Thus there is little or no power of real patriotism. They are glad to get outside help if they can, but have in the past been willing to do little or nothing for themselves.

The internal aspect of the Eastern Question then is practically this. The dominant race is straining every nerve to strengthen its hold upon the country, but has largely lost those elements of strength that formed the basis of its early growth, without replacing them by others.

The subject races, divided among themselves, grasping at anything that seems to offer them any help, are waiting, sometimes patiently, sometimes impatiently for the action of the European Powers.

2d. External or European. The Eastern Question as it affects the European Powers has always presented many phases, somewhat complicated, and not infrequently contradictory, according as they are regarded from different standpoints or at different times, which, however, need not be remotely apart. Indeed so shifting are these phases that a statement which is true one day may be very incomplete and unsatisfactory a week later.

The most important single factor is unquestionably Russia. The intentions of the Czar have always been a matter of much discussion. It has been positively affirmed and as vehemently denied that he meditates absorbing the whole Turkish Empire, and cutting off England's connections with India by the Red Sea, while he proposes to make Afghanistan a passage-way to the Punjab. Whatever may be said of these ultimate designs, there has been little doubt of his desire to hold Constantinople, make the Black Sea an inland lake, and utilize the power thus gained to dominate the Mediterranean. The course of events in Bulgaria, Servia, Montenegro, and Greece indicate very clearly that what he failed to secure at Berlin he is striving hard to accomplish by other means. The officering of the Bulgarian army with Russians, and the sudden withdrawal of them all just as Servia had commenced an unprovoked attack; the abduction of Prince Alexander; the repeated snubs to Prince Ferdinand, and the numerous plots against his life; the support of the claims of Karageorgevitch in Servia, indicate very clearly the desire of the Russian Government. It is also claimed, and is positively believed by many, that the repeated disturbances in Erzroom, Con-

stantinople, and Crete have been fomented, if not immediately by Russian agents, at least by committees of Armenians and Greeks acting in concert with Russians. That Russia would at any time within the past five years (1886-1891) have made war had she felt that the time was propitious, and for the purpose of capturing Constantinople and extending her boundaries in Eastern Turkey, hardly admits of a question with most. Russia may thus be considered the radical element.

The conservative elements are England, Austria, Germany, Italy, and Bulgaria.

(1) England. The interest of England in the Eastern Question is primarily occasioned by her commercial relations. For Russia to hold the Bosphorus and the Dardanelles would be a most serious menace to English commerce. Even supposing that Russia cares nothing for India, should any difficulty arise between the two Powers, Russia would be able within thirty-six hours, without any warning, to completely paralyze all passage through the Suez Canal, and render even Malta useless for defence. The far-reaching effects of this need not be detailed. There are other elements—British investments in Turkish securities; interest in the people of Turkey, especially the Christians, whom she would most unwillingly see under the thrall of the Czar; there is also the general importance of not allowing such a preponderance in the councils of Europe to any one government.

(2) Austria. With Austria it is a life and death struggle. The peculiar composition of the political family over which the House of Hapsburg reigns is such that to seriously disturb the balance kept with such difficulty would destroy the whole. Any one who has read the accounts of the Czech movement, centring in Prague in Bohemia, will easily see that to bring a great Slav Power to the very border of the empire would produce a disturbance that would break the empire to pieces. But not only is there the Czech element in the North. There are other kindred races—the Lansenian-Serbs, Slovaks, etc.—that would inevitably be drawn in. Hungary would be almost alone, and the Magyars would feel again the iron heel of the Czar.

(3) Germany. While Germany would not be affected immediately in her territorial possessions by the Czar's conquest of Constantinople, she would feel very much the overwhelming power that such occupation would give. With Austria gone, Germany could hardly hold her own against Russia in any case of rival interests, while liable more than ever to French reprisals. Her interest is a general rather than a specific one.

(4) Italy's interest in the Eastern Question is occasioned by her great coast-line, which would be entirely at the mercy of a Power that could mass a great navy securely behind the Dardanelles, and could hurl it in a few hours at almost any portion of her coast.

(5) Bulgaria. With Bulgaria even more than with Austria it is a question of life or death. When the Treaty of Berlin was signed, Russia was looked upon by the Bulgarians as their national benefactor, and there was no feeling but of profound gratitude. With the course of events, however, that feeling has changed to one of bitter hostility. As it has become evident that, however much the people of Russia may have desired the freedom of the Bulgarian from the Turkish yoke for their own sake, the

Russian government looked upon it simply as a means to an end, and that a purely selfish end, the Bulgarians felt outraged and resolved that they would not give up their independence, no matter what it cost. They have quietly, firmly held their own, refused all bribes, evaded all enticements, repelled all attacks. To them the Eastern Question is simply one of national existence.

There remain two countries directly interested—Greece and France. Greece is divided. She dreads the Colossus of the North, yet has a feeling that even Russia will find it hard to absorb Greece, and watches with divided interest the course of other Powers, glad to avail herself of whatever advantages may fall to her share in a general mêlée. France, alone, appears to have anything to gain by Russia's conquest of Constantinople. Too far removed to have any fear of territorial loss, she feels that there is a possibility that a Russian alliance, under such prestige as that conquest would give, might help her to secure revenge for provinces lost to Germany. Still there are some Frenchmen who realize that a nation's life is not benefited by repeated reprisals, that peace is better than strife, and that such a power as the Czar would then wield might be a constant menace to the peace of Europe. Externally, then, the Eastern Question is summed up in this: When will Russia feel herself strong enough to strike for the prize she covets, and what price will the rest of Europe pay to prevent her success?

As to the solution of the problem, it is scarcely wise to hazard a conjecture. The most popular proposal is to make Constantinople a free city under international guarantees, and leave the Turk to establish himself in Asia Minor with his capital again at Broosa or Konia.

Meanwhile a new element is entering into the question. Mission work is spreading over the empire, carrying in its train education, moral quickening, a growth in the sense of individual responsibility and self respect, and a clearer conception of human rights.

**Mission Work.**—The general history of missions in the Turkish Empire is sufficiently noted elsewhere (see articles on the societies mentioned below, and also Albania, Armenia, Bulgaria, Koordistan, Nusairiyeh, and Yezidees). It is useful here to give merely an outline of the work as a whole, and show its relations to the peculiar problems, political, social, and religious, of this interesting field of foreign missions.

The territory of the Turkish Empire is well covered by the mission societies. The A. B. C. F. M., the oldest in the field, also occupies the largest territory—the whole of European Turkey, together with Bulgaria south of the Balkans, Asia Minor, Eastern Turkey, and Mesopotamia. The Presbyterian Church (North) occupies Syria and a portion of Eastern Turkey, where Nestorians are found in Koordistan. The Methodist Episcopal Church (North) has its work in Bulgaria, north of the Balkans. The Reformed Presbyterian (Covenanters) Church of America has its stations in Northern Syria and Southern Asia Minor, and the Presbyterian Church (South) holds a portion of Macedonia. There are also some congregations under the care of the Foreign Christian Missionary Society (Disciples) in Asia Minor, and a few Baptist Churches, at one time under

the care of the American Baptist Publication Society. The Church Missionary Society has considerable work in Palestine, the Friends of England have a mission in Syria, and a single medical missionary among the Armenians of Constantinople. The Free Church of Scotland has a station at Shweir in Syria, the Reformed Presbyterian Church of Ireland one at Idlib, near Antioch, and the North Africa Mission one at Hums in Syria. There are also a number of schools in Syria supported by the Lebanon Schools Committee and British Syrian Schools Association. The missions to the Jews of the various English and Scotch societies at Constantinople, Smyrna, Adrianople, and in Palestine are specially noted in the article on the Jews.

The Bible work of the empire is carried on by the American and the British and Foreign Bible Societies, and the National Bible Society of Scotland. The American Bible Society occupies the territory covered by the American mission societies, except Bulgaria, while the B. and F. B. S. works Bulgaria, the western coast of Asia Minor, and Palestine. Constantinople and Smyrna are shared by the two societies. The National Bible Society of Scotland has a depot at Salonica in European Turkey.

If we turn now to the population, we find that the work for the Armenians is carried on chiefly by the A. B. C. F. M.; for the Greeks by the A. B. C. F. M. and the Presbyterian Church (South); for the Bulgarians by the A. B. C. F. M. and the Methodist Episcopal Church (North); for the Maronites and Syrians by the Presbyterian Church (North) and the various English and Scotch societies and committees; while the Nusairiyeh are the chosen field of the sturdy Scotch Covenanters. The Turks, Arabs, Koords, Yezidees, etc., have been the care of all the societies, though the C. M. S. is the only one that has made a special effort to establish mission work distinctively for Moslems, if we except an effort commenced but not developed under the auspices of the A. B. C. F. M.

Not merely is the territory thus provided for as a whole, but it is well covered in its different parts. True to the best policy, the missionaries have from the beginning sought the centres. Not always the largest cities on the basis of a census, but those which for one reason or another furnish most opportunities for reaching the widest circle of people. Thus, in Asiatic Turkey, from Trebizond on the Black Sea to Port Said in Egypt there is not an important seaport that has not either a force of missionaries or an established congregation with its pastor or preacher. These include Trebizond, Ordoo, Kerasunde, Samsoon, Constantinople, Banderma, Dardanelles, Smyrna, Mersine, Latakia, Tripoli, Beirut, Sidon, and Jaffa. Other less important places, such as Sinop, Imboli, Edremid (Adramyttium), Adalia, Alexandretta, receive the regular visits of evangelists or colporteurs. In the interior, Erzroom, Van, Bitlis, Harpoot, Sivas, Cesarea, Broosa, Aintab, Marash, Mardin, Mosul, Bagdad, Damascus, Zahleh. Jerusalem, are full mission stations, while Erzzingen, Moosh, Sert, Diarbekir, Arabkir, Malatia, Amasia, Yuzgat, Angora, Konia (Iconium), Afion Kara Hissar, Kutahya, Aleppo, are fully equipped with native churches. These are all centres, and around many of them are grouped numerous

smaller places where there is a successful work being carried on.

If we turn to European Turkey and Bulgaria we find the same true. Salonica, Monastir, Seres, Samakov, Philippopolis, Loftcha, Sisto, Rustchuk, Varna, are mission stations, while Sofia is in special charge of the Bulgarian Evangelical Society. Uscup, Bansko, Yambol, Plevna, Adrianople, Rodosto, are among the most important out-stations.

In all there are over 400 stations and out-stations, with 102 ordained missionaries, 150 organized churches with a membership of 15,128, while nearly 30,000 pupils are enrolled in the various schools, and there is an average annual sale of about 60,000 copies of the Scriptures in whole or in part.

There are of course sections where there is comparatively little accomplished, but those are few. In the main the Turkish Empire is well covered, and it may be truly said that there is scarcely a village, except in the mountains of Koordistan and some parts of Mesopotamia and Syria bordering on Arabia, that does not have at least occasionally the opportunity to hear the gospel, while in some cities, notably Aintab, Marash, Harpoot, the evangelical element is so strong as to be a very important factor in the general life of the people. Mission work in the Turkish Empire thus has passed the exploring introductory stage and reached that of development. It is no longer experimental; it has settled down to the same problems that meet the church in other lands, affected yet by the fact that it is still rejected totally by the immense majority of the people, and looked upon with varying degrees of distrust by the greater part of the remainder.

We will look now at the relations that mission work in Turkey holds to the different classes of people whom it seeks to influence.

I. THE JEWS.—When the first missionaries entered the Levant in 1819, their special message was to the Jews. Not many years passed, however, before that branch of the work was given up by them as manifesting less opportunity for success than others. At present it is chiefly educational. Large schools are supported by the Scotch and English societies, especially in Constantinople, Smyrna, Salonica, and Jerusalem. There are also numerous preaching services, and there is enough of success manifested in the Christian life of converts to keep the laborers from being discouraged in their work or giving up the hope of a redeemed Israel, apart from their faith in the promises of the Scriptures. Mission work among the Jews is, however, so distinctively sectional, and confined to them as a race, that it enters as a comparatively unimportant factor into the question of the conversion of the empire as a whole.

II. THE ORIENTAL CHURCHES.—When missionaries first turned their attention to the Christian churches of Turkey, their one idea was to secure reform within the churches themselves. So close to the creeds and confessions of the Reformation were those of the Armenians, Greeks, Nestorians, that it seemed to them a comparatively easy task to show the incompatibility between those confessions and the actual practices of the church. Thus every effort was made to come into cordial relations with the people, and all idea of a separate com-

munion was specially disclaimed. This course was favored also by the eagerness with which these churches looked for foreign sympathy and aid in their bitter struggles with their Moslem rulers.

It was not long, however, before the ecclesiastics saw that the new ideas would inevitably result in loosening and ultimately destroying their control over their followers. Thus they massed their power against the new doctrines. An excommunicated man had no rights that a Turkish court could recognize. He was nobody; could neither marry, nor be buried; could not buy, sell, or employ. He had absolutely no status as a citizen. The result was that the formation of a Protestant civil community became absolutely essential to the very life of Protestants. Then other influences began to come in. The introduction of Europeans into the commercial and governmental affairs of the empire, brought with it the introduction of French and German thought. With increased ease of access to Europe more and more of Armenian and Greek youth sought education in Paris and Vienna. Returning they brought with them the free-thinking of the day, and the grip of the church, not only on their belief but their life, began very perceptibly to loosen, and the ecclesiastics began to think that perhaps they had not been absolutely wise in their repulsion of evangelism. In the mean time it became evident that these Protestants were no less national in their feeling than the orthodox, indeed had an even clearer conception of what a true national life was. The experiences of Bulgaria assisted in this, and the graduates of Robert College and the Home School (now the American College for Girls) gave very clear proof that the study of the Bible did not make a man or woman less capable of good work for his people. General intercourse also had its advantageous results, and the chasm between the two was less and less marked. The result has been that in very many sections of the empire there is a constantly growing cordiality between the evangelical and the orthodox communities. Bishops, vartabeds, and priests are preaching gospel sermons, in some cases Sunday-schools and Bible classes are started, in order to satisfy the growing desire for religious instruction. With infidelity staring them in the face the leaders of the old churches are coming more and more to look upon the missionaries and the native evangelical churches as allies rather than enemies.

The problem of missions in Turkey in their relations to the old orthodox churches is, on the one hand, so to establish the evangelical churches in faith and life that when a reunion with the others comes they shall not be borne away and swallowed up; on the other, to convince the old churches that their one aim is to establish the kingdom of God, not a temporal organization, and at the same time to set forth in the evangelical churches as clear and accurate an idea as possible of what constitutes a true church life.

III. MOHAMMEDANISM.—The general relations of evangelical missions to Mohammedanism are fully set forth in the article on that subject. It is needful here to note only such points as are specially brought out in the Turkish Empire.

The first feeling of the Moslems of Turkey toward the new sect was one of amused and

rather tolerant indifference. Indeed, in not a few instances Turks who saw the simplicity of the evangelical worship, the absence of ritual, of pictures and priestly rule, the stress laid upon spiritual worship, said: "Why, these are Moslems." The use of the Bible in distinction from the creeds of the church compared favorably in their eyes with the position they accorded to the Koran, and a Koordish chief once said: "Why do not the Bible Societies print and bind the two books together? then we should have the complete revelation." For a while this cordial feeling for Protestants as distinct from the Orthodox rather increased, except when the influence of ecclesiastics (either personal or pecuniary) secured special hardships for those who had dared to brave the power of the church. The missionaries had great influence, both because of their means of access to Lord Stratford and because the Turkish officials recognized, in many cases, their freedom from political motives. Little by little, however, this changed. Shrewd Mollahs saw, as Armenian and Greek bishops had already seen, that these new people were exerting an influence that would in time cut the ground entirely from under their whole system of belief and government. Then commenced a most determined and bitter opposition. Not in appearance, —that was in most cases friendly, —but in the form of hindrance. Censorship of publications was made increasingly stringent. Customs regulations were made more and more onerous. The necessary permits for buildings, churches, schools, and even private dwellings were refused or delayed as long as was possible. Any Turks who manifested a leaning toward or an interest in the Bible were quietly spirited away or arrested on some fictitious charge. Spies were everywhere. Occasionally some one more bold than his fellows, or feeling more secure in his position and relations with Porte or Palace, would give expression to his feeling that the work of the missionaries was really a good thing for the empire, but means were generally found to neutralize the effect of such a statement. In not a few instances laws were promulgated especially directed against the missionaries. Vexations upon vexations were put upon them. The result has been that there have been very few conversions of Moslems to Protestant Christianity. There have come, however, from every side constantly increasing testimonies to the hold that Christianity is getting upon the people of the land. The number of Scriptures sold to Moslems indicates a profound interest in the Bible, which cannot fail to bring forth fruit in Christian life.

Islam in its historic inception was in a great degree a protest against a devitalized polytheistic Christianity. If Moslems are to be brought to Christ, it must be largely through the example and influence of a living Christian church. The problem of missions in Turkey in their relation to Mohammedanism is to develop a native church freed from the errors of the old churches, strong in its belief in the unity of God, manifesting in its daily life an educated Christian faith.

In meeting these problems, missions in Turkey rely upon five special agencies: 1. Evangelical preaching; 2. Bible distribution; 3. Education; 4. Publication; 5. Social influence.

1. *The Evangelical preaching* of Turkey is very largely, in most cases almost entirely, in the hands of the native pastorate. These men,

educated in the different seminaries and colleges under such men as Cyrus Hamlin, George F. Herrick, H. N. Barnum, George Washburn, T. C. Trowbridge, C. H. Wheeler, S. H. Calhoun, Daniel Bliss, J. H. House, and many others, are taking a position of constantly increasing importance. Men of large views, earnest Christian spirit, they have done much, not only to build up the native evangelical churches, but to convince others that Protestant Christianity is a genuine power in the world for good. Not only in the larger cities but in the smaller places they are doing a great though often unheralded work, laying foundations in Christian character for future building.

2. *Bible Distribution.*—There is probably no mission field where this department of mission work is more thoroughly organized so as to reach periodically every portion of it than the Turkish Empire. This has been already spoken of in the articles on the American and the British and Foreign Bible Societies.

3. *Education* in connection with the missionary work has been a normal growth. Free primary schools were first started. Schools, called theological, to educate native ministers and teachers soon followed, and were free to the class for which they were designed. Girls' boarding-schools were also established early, the first in 1840. All this work was rudimentary. In 1863 Robert College was opened on the Bosphorus, and, almost simultaneously, the Syrian Protestant College at Beirut. These institutions mark the beginning of serious educational work in Turkey on the basis of requiring pupils to pay reasonably for their instruction, and on a plan of thorough training with an ample and well-prepared curriculum.

They had much to contend against in the as yet feebly developed desire among even the people of the seaboard for a college education. They had also to meet the opposition of many Christian men, missionaries and supporters of missions, who, in their zeal for the largest development of the evangelistic work, were jealous of an elaborate course of collegiate training. The first years of those colleges were marked by a slow growth. Classes of five, three, two, in one case of only one, were graduated.

In the course of a decade of years the increase was abnormal. There was a plethora of raw material which had to be in part eliminated that what remained might be assimilated.

The institution at Scutari, Constantinople, now known as the American College for Girls, was started at this time, and struggled in its inception, through difficulties and limitations similar to those from which the College on the Bosphorus had emerged.

Between 1871 and 1875 two colleges in the interior of the country were projected, and in the latter year were opened, viz., the Central Turkey College at Aintab, south of the Taurus Mountains, and the Armenia—now Euphrates—College, at Harpoot, east of the Euphrates River. These colleges show points of resemblance and of unlikeness to each other and to Robert College. Their course of study is not quite so full as that of the colleges on the seaboard. German and Italian are not needed in the interior, and much better work is done at Robert College in the physical sciences and in chemistry than is yet possible in an interior college. But the colleges of the interior have the advantage of being in closer touch with the

racés to be reached and moulded by them. Moreover, Robert College has had the unique opportunity of exerting one of the controlling forces in the birth of free Bulgaria.

The colleges of the interior are available to a very large number of youth who could not meet the much greater expense of education at the capital, an expense about fourfold greater.

The Syrian Protestant College at Beirut is specially spoken of in the article on Syria.

In the year 1875 began that remarkable advance movement in female education, undertaken by the Woman's Boards, which has already resulted in sixteen colleges or girls' boarding-schools within the bounds of the three Turkey missions, viz., at Constantinople, Marsovan, Smyrna, Adabazar, Broosa, Cesarea, and Sivas in the western Turkey mission, at Aintab, Marash, Adana, and Hadjin in the Central Turkey mission, and at Harpoot (a department of Euphrates College), Mardin, Erzurum, Bitlis, and Van in the Eastern Turkey mission. This movement, conducted in great quiet, without noise or ostentation, marks a new era, a veritable revolution in education, in Turkey.

In September, 1886, the school at Marsovan formally became known as Anatolia College, and took its place beside the other two interior colleges. This college has the unique advantage of location in the heart of a large Greek and Armenian population and educates the two races together. It has also, as yet,—in 1890,—the unique disadvantage of being obliged to do its work without permanent resources.

In other missions the work has been carried on on a smaller scale. In Bulgaria, Samakov, with its college, seminary, girls' school, and department for manual training, has exerted a marked influence upon Bulgaria, not less potent, if less prominent, than that of Robert College. In Syria, the theological seminary at Abeih paved the way for the Syrian Protestant College at Beirut, with its full collegiate and medical departments. The graduates of both, especially of the latter, are finding their way not only through Syria and Egypt, but through North Africa as well, and will be among the most efficient workers as the Soudan is opened and the great Arabic-speaking world of Africa comes within reach of the Gospel. There are also the numerous English and Scotch schools mentioned above and in the article on Syria. In Egypt there are two centres of educational influence—the College of the United Presbyterian Mission at Assiout, and the schools of the same Board at Cairo. At Assiout there are two departments, for young men and young women, distinct in organization yet really one in influence.

This growth of education, especially within the last seven or eight years, has developed the following noteworthy results:

a. The youth of Turkey can pay for their education, where terms are made light, according to location of the college, and such proportion of aid is given, through scholarships, and by furnishing work, as is done in the colleges of this country.

b. This securing of the privilege of Christian education through strenuous exertion on the part of pupils and their friends is one of the most essential conditions of realizing that growth in manly, self-reliant, aspiring character, and that establishment of a vital, self-propagating Christianity, without which education is

nowhere a blessing. The plan of education now adopted has already yielded excellent results in this way. The more men, or races of men, are held down by the incubus of poverty, the more urgent is the necessity of rousing the will-power to self-help, by every right device and pressure.

c. It is the stand taken and the work done by Americans in the recent years, in the matter of education, which has won the confidence of the best men of all races in Turkey.

d. It is this influence alone which can fit the several races for their future and hold in harmonious relation one to another, all those whose vital interests are identical.

e. These American colleges furnish in large part the models in education for all races, and train large numbers of the teachers. It was after Americans gave the signal that Armenians, Greeks, Bulgarians established for themselves any schools worthy of the name. The Turks have ideal capacity for establishing excellent schools on paper, and ideal incapacity for establishing them in any other way. They also are already recognizing the American leadership, and will, it may be hoped, profit by the example set them.

f. All discussion among missionaries and their supporters relative to the utility of education and to the comparative value of educational and evangelistic work has ceased.

4. *Publication.*—There are two centres of missionary publication in the Turkish Empire, Constantinople and Beirut. The work at Beirut is entirely Arabic, that at Constantinople includes Turkish, Armenian, Greek, Bulgarian, Judæo-Spanish, Koordish, etc. In each place some of the best of missionary strength has gone into the work of providing not only the Bible and religious books, but periodical literature, educational works, and such general literature as a growing Christian community is constantly demanding, and in ever-increasing quantity. Aside from the work of Bible translation in these different languages, the work done in Turkey by Geo. W. Wood, Edwin E. Bliss, I. F. Pettibone, J. K. Greene, H. O. Dwight, T. L. Byington, R. Thomson, and in Syria by W. W. Eddy, H. H. Jessup, C. V. A. Van Dyck, G. E. Post, and many others is work that is telling all over the empire in the correction of erroneous views, not by antagonizing their errors, but by presenting the truth. (See also article Periodical Literature.)

5. *Social Influence.*—This is an ever-increasing power in Turkey. The ready access gained to all classes of people, the power of personal presence and actual acquaintance has done and is doing a great deal towards preparing the way for the entrance of the Gospel. Many old-time prejudices against those that "having turned the world upside down, are come hither also," have quietly but absolutely disappeared before the presence in an Armenian, Greek, Maronite, and Turkish home of a simply dressed, unassuming Christian lady. Many an ecclesiastic has found it impossible to harangue against one whom he knew from personal acquaintance to be a Christian gentleman.

In the Turkish Empire the bars are down, the gates are open. It is only necessary to hold the vantage-ground gained and to make steady advance, in order to solve the deepest problems of the Eastern Question by building up the kingdom of God in the lands where it was first established.

**Turkish Missions' Aid Society.** Headquarters, 32 The Avenue, Bedford Park, Chiswick, London, Eng.

In 1853-4 Rev. C. G. Young, a minister in the North of England, travelling in the East, came into contact with missionaries of the American Board engaged in work among the Armenians in Constantinople, and was greatly impressed with their devotedness and zeal. Much spiritual success had been achieved, and the educational efforts of Dr. Hamlin and others filled him with admiration. He studied the work in all its branches with the utmost care, and returned to England with a burning desire to do something effective toward the support of a mission which was full of promise for the evangelization of the Turkish Empire. He took every opportunity of telling what he had seen, and of urging that an endeavor should be made to associate Christians of all the churches in an effort to co-operate with those already in the field. Other circumstances contributed to awaken interest in the subject. The Eastern question was assuming an acute phase. The Sultan was looking to Britain for support against Russia, and public opinion was ripening in favor of intervention. Sir Stratford de Redcliffe, the astute and able English ambassador at the Porte, had shown himself friendly to the educational efforts of the American missionaries, and sought to influence the Sultan in the direction of a policy of toleration in religious matters. For several years Christians in Britain had watched with sympathy the converts among the Armenians, who had been grievously persecuted. The moment was favorable for an effort of some kind. Mr. Young sought to interest Christian men of various denominations in the matter which lay so near his own heart, and to a large extent he succeeded. In response to an invitation by circular, a large meeting was held to consult how best to take advantage of openings for spreading the gospel among the Armenians and Greeks of the Ottoman Empire. Other meetings followed; and at last, on the 3d of July, 1854, the Turkish Missions' Aid Society was fairly launched at a public meeting held in the Lower Room of Exeter Hall, at which the Earl of Shaftesbury, who had been elected president, took the chair. One of the resolutions adopted at that meeting was as follows: "That the facilities now providentially afforded for circulating the Holy Scriptures and preaching the gospel in the Turkish Empire, and the cheering tokens of success which continue to attend existing missions there, especially that of the American Board, and also the peculiar circumstances of the country at the present crisis, call for special efforts by British Christians to furnish the pecuniary aid required in order to the wider extension of missionary operations." On that resolution the Society was based, and it is entirely undenominational, both in respect of the fact that its supporters and subscribers may belong to any and every branch of the Christian Church, and in respect of its funds being expended without taking account of the ecclesiastical relations of the societies or individuals assisted. The first rule of its constitution runs thus: "The object of this Society is not to originate a new mission, but to aid in the extension of gospel work in Bible lands, especially that carried on by the Americans."

It will thus be observed that the founders de-

liberately preferred to establish an agency for providing pecuniary help to those on the field, then chiefly American, and, by implication, to all such evangelical churches and societies as should at any time thereafter undertake gospel work within that region.

This plan of operations has been faithfully carried out, and the T. M. A. S., although not now so largely supported as formerly, continues to work on the same lines. It makes its special province the assistance of truly Christian work all over the Bible lands, and missionaries in Greece, Bulgaria, Constantinople, Asia Minor, Eastern Turkey, Persia, Syria, and Egypt have borne grateful witness to its importance and value as a factor in the evangelization of the East. During the civil war in America, when the resources of the foreign missionary societies were so seriously crippled, the aid afforded by this Society was particularly helpful, and acknowledged as such.

The organ of the Society is "The Star in the East," published quarterly.

The president is The Earl of Aberdeen; the treasurer, Lord Kinnaird; and the secretary, Rev. T. M. Brown, D.D.

**Turkish Versions.**—The earliest translations of the Holy Bible into Turkish appear to have been two, which were made about the middle of the 17th century. One of these, in one of the Eastern Turkish dialects of Central Asia, was made by the Englishman Seaman about 1666. The other, in the Western or Osmanli dialect, was executed at Constantinople about the same time, by Ali Bey, chief interpreter at the court of Sultan Mohammed IV. This scholar was a Pole, captured by the Turks in childhood, and educated as a Moslem among the slaves of the Sultan's palace. He seems to have made his translation of his own accord; but when it was done he handed over the manuscript to the Dutch Ambassador at Constantinople, who sent it to Leyden to be printed. The manuscript remained in the library of the University in that city a century and a half, when it was unearthed by Baron Von Diez, once Russian Ambassador at Constantinople. Baron Von Diez agreed with the British and Foreign Bible Society to superintend the printing of the book, thus providentially preserved, against the time of the formation of a Society which would take an interest in its publication. He died, however, before he had completed the collation of the manuscript. Professor Kieffer of the University of Paris was then entrusted with the work, and in 1819 he at length brought out the New Testament, which was published on the plan of exact conformity to the ancient manuscript of Ali Bey.

This idiomatic and simple version of the Scriptures might have answered for the need of the different classes of the population of Turkey, had it not been deficient in accuracy of rendering the original. The edition published under the circumstances related above was promptly suppressed on account of this defect, and the British and Foreign Bible Society caused a revision to be made by Professor Kieffer, which was published in 1827. Ali Bey's version, again revised in 1853 by Turabi Effendi, and in 1857 by the lexicographer Redhouse, was freely circulated in Turkey until 1866. The various revisions to which it had been subjected had modified the native sim-

licity of the style of Ali Bey, under the influence of the theory that the language of such a work ought to be modelled on that of works of the Turkish classical period. At the same time the work had not been entirely recast by any one of the revisers. The result was unsatisfactory: the style was not smooth, and too often the meaning of the word was obscured to the intelligence of the common people by the introduction of Arabic or Persian phrases prized by Turkish writers mainly for their sonorous cadences.

In the meantime contributions of material for a Turkish version of the Scriptures had been made on an entirely different line by missionaries of the American Board. With a view to placing the Scriptures in the hands of the large section of the Armenians of Turkey who use the Turkish language but write it with the characters of the Armenian alphabet, Rev. W. Goodell in 1831 published at Malta, in the Armenian characters, his translation of the New Testament into Turkish. He afterwards revised this work, and completed a translation of the whole Bible, which was published in the Armenian character at Constantinople in 1857, a newly revised edition of the same being published in 1863. This Armeno-Turkish version of the Scriptures was notable for the simplicity of its style. It has been for nearly thirty years in the hands of the Armenians of Turkey, and is beloved of multitudes as the very Word of Life, notwithstanding its too evident imperfections in the matter of idiomatic expression. Owing to these imperfections no edition of this version has ever been printed in the Turkish (Arabic\*) characters.

After the Crimean War, with its assistance to Turkey rendered by Christian troops, a strong interest in the Christian Scriptures appeared among the Moslems of Turkey. The version of the Scriptures accessible to them, as has been seen, was a sort of patchwork, which imperatively demanded improvement in the presence of the many Turkish inquirers seeking to examine the teachings of Christ. The British and Foreign Bible Society, with which was afterwards associated in this good work the American Bible Society, appointed Rev. W. G. Schauffler, D.D., formerly of the American Board's Mission at Constantinople, to make an entirely new translation of the Bible into Turkish. Dr. Schauffler brought tried and eminent abilities to this task, which he completed in 1873.

The New Testament of this version was published in 1866; and tentative editions afterwards issued, of the Pentateuch, the Psalms, and the Prophecy of Isaiah, are the only parts of the Old Testament of this version which have been published. The reception given to these parts was not satisfactory. While scholars praised the beauty of its diction, the common people were not moved by its words. The version was a specimen of good classical Turkish; but aside from the Gospels, which were simpler in style, it was unintelligible to people whose education was only moderate in degree. The difficulty lay in the fact that the canons of Turkish

literary style required all serious works to be composed upon a level attained only by the learned. The idea of a book which could be understood by the common people could not exist in Turkey; for the language of books was a separate language, spoken nowhere in the empire save in the ceremonious circles of public official life. The official and literary classes themselves rarely used in social privacy any of those sounding phrases with which they loved to prove their erudition in the artificial atmosphere of the court. And since the highest authorities deemed it impossible to depart from the classical standards, especially in such a work as the translation of the sublime poetry of the Bible, the problem of providing for Turkey a version of the Scriptures that should be respected by the small literary class and fairly comprehended by the illiterate multitude, seemed to be insoluble.

But God was preparing the solution of this difficult problem. The great popular uprising against the Persian and Arabic rhetoricians, which within the last thirty years has completely revolutionized Turkish ideas of literary style, had already begun. A few bold writers among the Turks were already proving that an intelligible style, which should honor simple "Turkish" words much as good English writers honor the Saxon, could possess both grace and dignity. Under the influence of these circumstances, the Rev. A. T. Pratt, M.D., of the Mission of the American Board, made an attempt, with the assistance of the Rev. A. Constantian, pastor of an Evangelical Armenian church in Marash, to improve the style of the Goodell Armeno-Turkish version. This work, begun under the auspices of the American Bible Society, Dr. Pratt did not live to complete; but the success of his revision of the New Testament, tentatively published in 1870, justified the decision of the Bible Societies to delay the publication of Dr. Schauffler's translation until it had been revised by a competent committee in the hope of securing greater simplicity. Upon this committee the two Bible Societies associated together Rev. Dr. Schauffler, Rev. Dr. Riggs, and Rev. G. F. Herrick of the American Mission, Rev. R. H. Weakley of the Church Missionary Society's Mission, and Rev. A. Constantian, they having the aid of two Turks of known literary ability. Dr. Schauffler early withdrew from this committee, which proceeded to make what was practically a new translation, with free use of the work not only of Dr. Schauffler but of that of Drs. Goodell and Pratt.

The committee's version was published in both the Armenian and the Turkish characters in the year 1878. In order to keep pace with the rapid progress of the new school of Turkish writers in the direction of simplicity and strength of style, a revision of this version was made by the same committee, assisted by a score or more of corresponding members in various parts of the empire, and was published in Turkish characters in 1884, and in Armenian characters in 1888. This version is marked by precision in rendering of the original, and by strength and clearness in its Turkish style; ranking in this respect with the best of contemporary literature, and affording at last a version which the literary can enjoy and the illiterate can understand to a large degree. While changes still in progress in the Osmanli Turkish language will naturally call in time for some further

\* The Arabic character is used in a large number of versions, the Persian, Turkish, Hindustan, etc., but varies somewhat in style. The fonts used at Beyrout differ somewhat from those of Constantinople, Teheran or Bombay. Hence it is not as incorrect as it appears to speak of the Persian or Turkish characters, although they are virtually the same as the Arabic.

revision of the text, it seems probable that the two Bible Societies, by placing the work in the hands of this committee, have completed the labor of preparing the Osmanli Turkish version of the Scriptures—a labor commenced almost 250 years ago by the slave Ali Bey.

A version of the Bible for the Greeks of Asia Minor who use the Turkish, writing it in the Greek characters, was prepared under the auspices of the British and Foreign Bible Society in 1856 by Mr. C. Philadelphus. A revision of this version, executed by two native gentlemen, was published by the Society in 1884. This Greco-Turkish version unhappily leaves much to be desired in accuracy of rendering the original.

A version of the Scriptures in the Azerbaijan (or Trans-Caucasian) dialect of Turkish, spoken in the Caucasus and north-western parts of Persia, was undertaken by the American Bible Society, which published a New Testament in 1881, prepared by the Rev. B. Labaree of the American Presbyterian Mission in Persia. A version of the whole Bible in this dialect, under the British and Foreign Bible Society, has been made by Rev. A. Amirkhanianz of Tiflis, and Rev. Mr. Wright of the American Presbyterian Mission. The printing of this version is now (1890) proceeding at Leipsic; a curious and interesting detail of its publication being the fact that the proofs are read in Siberia, Mr. Amirkhanianz having been sent into exile by the Russian Government.

Translations of parts of this Bible have also been made, under the auspices of the British and Foreign Bible Society, into the Kazan, Kirghiz, Uzbek, Jagatai, and Kumuki Turkish dialects in Central Asia, and into the Krim dialect in the Crimea. (See articles.)

**Turton, William**, a native of Barbadoes, who after conversion came to reside at St. Bartholomew in 1785. He had formerly been a preacher in America, and on settling in St. Bartholomew made application to the governor

for the use of the church, which belonged to the Swedes. At about this time the colony had been ceded to Sweden, and it was the only one in the West Indies belonging to that country. Mr. Turton also opened a school in connection with the church. Mr. David Nesbit, an English gentleman, was much interested in this work, and as it was more convenient to meet the Negroes in the evening on account of their employments, he advised Mr. Turton to build a chapel. In 1797 the latter had received such encouragement from those to whom he applied for assistance that he was able to build a chapel, and dwelling-house connected with it. The governor was his friend, and when some inhabitants of St. Eustatius and St. Martin's, who had come there to live, opposed Mr. Turton and appealed to the governor to sustain them, he silenced them by saying, "Every man is at liberty to worship God according to his own conscience." After the completion of the house of worship, the congregation, which at first numbered thirty, was increased to one hundred and ten. On application of Mr. Turton to the British Conference of the Wesleyan Methodists, St. Bartholomew was put on the list of missionary stations. In 1801 Mr. Turton went to Providence, one of the Bahama Islands. Some unfaithful missionaries had been there before him, and had done so much injury to the cause of missions that a law had been passed that no one should preach to the slaves. The governor granted him permission to labor among the slaves, but he had only commenced his work when the clergy objected to his administering the sacrament, and he was obliged to desist. They also tried to prevent his preaching during church hours. He went on with his work, however, and soon, under the patronage of some influential friends, he built another chapel for his now overflowing congregation. The people on the eastern part of the island had been living a long time without the knowledge of God, but under the administrations of Mr. Turton many became true followers of Christ. While the outlook in the country was so encouraging, the ministers of the Established Church in the town had not discontinued their opposition. Mr. Turton's health was much impaired, and he could not on account of this prosecute his work with the vigor the circumstances demanded. In 1804 Mr. Rutledge was sent out from England to help him. He continued to labor, principally in the Bahamas, till his death. Laws were finally passed in 1816 prohibiting the Negroes from attending meetings at all, but after a few years they were repealed. In 1853 the members of the Methodist societies in the Bahamas numbered 2,800.

**Tuticorin**, a large town on the coast of Tinneveli, Madras, India, 65 miles northeast of Cape Comorin. The appearance of the place and its neighborhood is very unattractive, since in parts the subsoil is so shallow that no plants or trees will grow, and elsewhere there is nothing but heavy sand with palmyra palms and a few bushes. During the southwest monsoon the dust is intolerable. In value of its foreign trade Tuticorin is second in Madras and sixth in all India. Its harbor, though shallow, is secure. Population, 16,281. Mission station S. P. G.; 2 missionaries, 18 out-stations, 11 schools, 383 scholars.

**Tutuila**, one of the Samoan Islands, South

Pacific. High and mountainous, of volcanic origin; its west end is covered with luxurious vegetation, and thickly settled. Area, 50 square miles. Population, 4,000. Mission station of the L. M. S.; 35 native pastors, 19 other helpers, 550 church-members, 66 schools, 1,067 scholars.

## U.

**Udayagiri**, a town in Nellore district. Madras, India. Formerly a place of importance, strongly fortified, and containing temples and palaces, the ruins of which still remain. Climate hot, dry. Population, 3,885, Hindus, Moslems. Race and language, Telugu. Social condition poor. Mission station American Baptist Missionary Union (1885); 1 missionary and wife, 25 native helpers, 6 out-stations, 2 churches, 150 church-members, 12 schools, 109 scholars.

**Udipi** (Udapy), a town in South Kanara district, Madras, British India. Considered by the Hindus to be the most sacred spot in Kanarese territory, and much frequented by pilgrims from Mysore. Population, 4,449, Hindus, Moslems, Christians. Mission station Basle Missionary Society; 5 missionaries, 4 missionaries' wives, 29 native helpers, 1,081 church-members, 32 out-stations, 9 schools.

**Udipuri Version.**—The Udipuri belongs to the Indic branch of the Aryan family of languages, and is spoken in the province of Mewar, or Udipur. A translation of the Gospel of Matthew was published at Serampore in 1815, but was never reprinted.

**Ujaini Version.**—The Ujaini also belongs to the Indic branch of the Aryan family, and is spoken in the province of Malwa. A translation of the New Testament into this dialect was made by Dr. Carey, and published at Serampore 1824, but never again issued.

**Ulwar** (Alwar), a city in Rajputana, India, nearly in the centre of the state, 90 miles southwest of Delhi. Climate hot, unhealthy. Population, 52,000, Hindus, Moslems. Language, Urdu. Natives poor, indolent, irreligious. Mission station United Presbyterian Church of Scotland (1877); 2 missionaries and wives, 33 native helpers, 1 out-station, 1 church, 27 church-members, 9 schools, 532 scholars.

**Umanak**, a town in Greenland, on an island at the mouth of the Baals River, 42 miles from New Herrnhut. Mission station of the Moravians (1861); 1 missionary and wife. Formerly an out-station of New Herrnhut, but finding that periodical visits were not sufficient to supply the religious wants of the people, a full station was afterwards organized.

**Umbala** (Ambala), a town of the Punjab, India, 120 miles north-northwest of Delhi, on the route to Lahore. Climate of city dry, healthy. Population, 26,777, Hindus, Moslems, Sikhs, Christians. Language Urdu, Punjabi. Social condition rather low. Mission station Presbyterian Church (North), 1848; 2 ordained missionaries, 1 missionary's wife, 1 female mission-

**Tuwon**, a trading-post for the lower Niger valley, West Africa, at the mouth of the Brass River, on the Bight of Biafra. Mission station of the C. M. S. (1868); 1 missionary and wife, 2 native helpers, 1 church, 262 communicants, 1 school, 107 scholars.

ary, 19 native helpers, 6 out-stations, 3 churches, 70 church-members, 7 schools, 807 scholars.

**Umtata**, a town in Tembuland, Africa, northwest of Buntingville. Mission station of the S. P. G. (1873); 2 foreign missionaries, native preacher, 203 communicants.

**Umtwalume**, a town in Cape Colony, South Africa, 75 miles south of Port Natal, 8 miles from the sea. Climate unusually healthy. Population, 12,000, Zulus or Bantus. Language, Zulu. Religion, worship of ancestors. Mission station of the A. B. C. F. M. (1852); 1 missionary and wife, 23 native helpers, 3 out-stations, 2 churches, 184 church-members, 2 schools, 150 scholars.

**Umvote** (Groutville), a town in Natal, Africa, 40 miles north of Port Natal, on the Umvoté River. It is situated in a well watered and wooded district, with good arable and pasture lands. Mission station of the A. B. C. F. M.; 1 lay missionary, 1 out-station.

**Umzumbe**, a town of Southeast Natal, Africa, southeast of Umtwalume. Mission station of A. B. C. F. M.; 2 missionaries and wives, 1 female missionary, 1 out-station, 60 pupils.

**Undop** (Undup), a town in West Borneo, northeast of Banting and east of Quop. Population, 6,000. Mission station of S. P. G. (1864); 1 missionary, 350 communicants.

**United Brethren in Christ.** The Home, Frontier, and Foreign Missionary Society. Headquarters, Rooms of the Society, Dayton, Ohio, U. S. A.—The first missionary work undertaken by the United Brethren in Christ was located in the home field. For this collections were taken, and expended by the Annual Conferences. The missionary spirit increased until in 1853 a society was organized for the prosecution of home, frontier, and foreign work. Its first foreign mission field was Shaingay, among the Sherbro people, on the west coast of Africa. Work was begun here in 1855. The territory occupied by the Society covers about 7,000 square miles, and its missionaries visit nearly 400 towns. Seven stations have been established: at Rimbee, Shaingay, Manoh, and Boompehtook, on the coast; Mambo, on the Mambo River; Mo-fuss, on the Cargbror River; and Tonchohlop, on the Yaltucker River. At Shaingay is located the "Rufus Clarke Training-school," from which it is hoped that many native missionaries may proclaim the gospel to destitute tribes around them. The Women's Board of the church, organized in 1876, maintains 3 stations,—at Geemah, Samah, and Palla, on the Boompe River. In these stations are now about 5,000 native Christians,

and a large number of pupils in the day and Sunday schools.

A mission to China was entered upon in 1889. Work among the Chinese is also carried on in Portland, Oregon, and Walla Walla, Washington; and the Society hopes at an early day to extend this work to San Francisco and Sacramento, California.

A mission has been established in Naila, Bavaria, and among the Freedmen in Virginia.

**United Methodist Free Churches Foreign Missions.** Headquarters, 17 Wharnclyff Road, Sheffield, England.—The Missionary Society of the United Methodist Free Churches was formed in 1857, by a union of the Wesleyan Association with certain churches of the Wesleyan Reformers. The Wesleyan Association had, at the time of the union, several missions in Jamaica and the Australian colonies, carried on by the united body, which also opened in a few years missionary operations in the new fields of New Zealand, East and West Africa and China.

In the West Indies, the Wesleyan Association had been strengthened by the action of an ex-Wesleyan minister, Rev. Thomas Pennock, who brought certain churches under his care into that body. In 1838, two missionaries had been sent to Jamaica, who made little progress until after the time of the liberation of the people from slavery; but since that period up to the present time the work has made steady progress in spite of some trying circumstances, which have only served to prove the loyalty and faith of its ministers and people.

(a) *Australia, and (b) New Zealand.*—(a) This mission had been commenced in 1849 by the Rev. J. Townsend, and its growth has been very slow. At the time of the union very little progress had been made. Of late, however, the Australian churches have advanced a little. New stations are being opened, with new missionaries; and the time is slowly approaching when the hope of this mission's becoming self-supporting will be realized. The present work in this field is divided into the two districts of (1) Victoria and Tasmania, (2) New South Wales and Queensland. The present missionary staff is composed of 33 ordained ministers, 88 lay-workers, 71 churches and chapels, with 2,343 communicants.—(b) New Zealand was entered in 1864 by the Rev. J. Tyerman. No incidents of special note have checked the slow progress of this work, but of late the mission has suffered from the temporary adverse circumstances of the colony. The numerical loss has been the result of many people having changed their places of residence, but the natural advantages of the country, and the enterprise of the people give good ground for the expectation of a favorable change. There are now in this field 11 ordained ministers, 37 lay-workers, 946 church-members, 22 schools, 2,503 scholars.

*West Africa.*—The admission in 1859 of a body of native Christians of Sierra Leone into the missionary connection turned the attention of the Society to that field. Accordingly the Rev. Joseph New was sent out, and shortly afterwards Rev. Charles Worboys. The work of these two men was of short duration, but of great success. The former died, and the latter was obliged to return home to recover his fast-failing health. Their places in the mission

were not long left vacant, and many noble men have been found willing to risk the climate, so unfavorable to Europeans, and have carried on the work with much success. Churches are being erected, schools opened; and at the Sierra Leone Ministerial Institute two young natives, Messrs. Nichols and Thompson, are fitting themselves for work among their countrymen. The native communicants in this mission now number 2,809.

*East Africa.*—The Christian missionary enterprise in Eastern Equatorial Africa can be traced upward to a most interesting origin, and downward through a most interesting history. To Rev. Dr. Krapf, the enthusiastic missionary, East Africa owes most of its Christian missions, and to the Rev. Chas. Cheetham of Heywood, this particular mission of the United Methodist Free Churches; for Mr. Cheetham brought before his denomination the necessities of this field as represented by Dr. Krapf and so interested his brethren in the object of his own attention, that in 1861 the Methodist Free Churches, who were then seeking to send out missionaries to a heathen field, applied to Dr. Krapf for advice as to a sphere of labor. He promptly replied, recommending East Africa, and volunteered to conduct thither and establish firmly there four young missionaries, if the church would send them; and so in that same year, the Revs. Thomas Wakefield and James Woolner, accompanied by two young Swiss, sailed for Africa. Ere long the failing health of Drs. Krapf and Woolner made their return home necessary, and the two Swiss shortly followed them. Thus Dr. Wakefield was left alone until the latter part of 1862, when he was joined by the Rev. Chas. New. Together these patient missionaries held the ground under those vicissitudes of experience which all pioneers must pass through. In 1868 Mr. Wakefield visited England, and in 1872 Mr. New, and their stirring addresses and eloquent appeals roused much interest in their work. When Mr. New returned to Africa in 1874 he attempted to open a new mission; but he was cruelly treated by a savage chief, and died alone, when trying to return to Ribe, before any one could come to his assistance. He was a missionary of the finest type, and his Society owed much to his life and lost much by his death.

Mr. Wakefield, again alone, continued his work among the Wa Nyika race, dwelling along the coast about twelve miles from the Indian Ocean. In 1886 Revs. John Baxter, John Houghton, and Rev. W. H. During, a colored minister from West Africa, joined the mission, but after a short period Mr. Baxter broke down and was obliged to return home, and the Rev. John Houghton and his wife were murdered, along with a number of native converts, during a sudden rush of raiding savages at a new station on the river Sanaa, where Mr. Wakefield had recently opened a mission to the Gallas. Rev. W. H. During, however, has proved himself a most successful agent of the Society.

In 1887 Mr. Wakefield retired, and his place was filled by the Revs. F. J. Heroe, T. H. Carthew, and W. G. Howe, who were located respectively at Ribé, Jomvu, and Goldbanti in the Galla country, where Mr. During is also at work. The very unsettled state of society in East Africa, and the contests which have arisen during the past year, in the Galla country especially, have hindered the progress of the mis-

sion to a serious extent. It is, however, a cause for gratitude that the stations of the Society have not been assailed, nor their people scattered. The work is steadily and most hopefully increasing, and is one of the best and strongest of the United Methodist missions. An important feature of its work is the successful way in which it has come into contact with slavery.

*China.*—This mission was opened in 1864 by the Rev. Wm. Fuller, at Ningpo. Here he was joined after a short time by Rev. John Mara, and in 1868 the Rev. F. W. Galpin arrived in China, and for ten years served his church most faithfully. For two years of this time, from 1869 to 1871, Mr. Galpin was alone, but at the latter date Rev. Robert Swallow went out as his colleague, and located in Ningpo suburb. A little later a third missionary, Rev. R. I. Exley of Leeds joined them; but his earnest work was ended in a very few years, for he died of consumption before he could carry out his plans for increased usefulness. His place was supplied by the Rev. Wm. Soothill, who was sent to take charge of Wenchow, the opening of which new station was the result of a visit of Mr. Galpin's to England, where his representations of China's need roused the missionary committee to new efforts in its behalf. The work at this place was at first held in great dislike by the Chinese, whom the war with France had made distrustful of all foreign influence. At one time during a riot the mission premises were destroyed, and all missionary operations interrupted and discontinued; but when peace was once more restored the Chinese Government made full compensation for all losses, and work was resumed and grew more successful than ever. In 1886 Mr. Swallow visited England, in order that he might, by acquiring some knowledge of medicine, fit himself more fully for his work, and also to interest the churches in his mission. At the expiration of the time necessary to accomplish both these objects he and his wife returned to Ningpo, where they have carried on their work with ever increasing success, and the efforts prove what three men are able to do among so many millions of heathen, even though they are restricted and their work limited for want of larger means and more helpers. The native converts of this mission number 365.

#### **United Original Secession Church of Scotland, South India Mission.**

Headquarters, Shawlands, Glasgow, Scotland.—The United Original Secession Church had its origin in 1733 in a secession from the Established Church of Scotland, and for a few years the entire seceding body was known by this name; but in 1761 another secession from the Scottish Church took place, which resulted in 1847 in the union of these two sections, giving rise to the United Presbyterian Church of Scotland. A small remnant of the Secession Church, however, did not join the United Presbyterians, but when that church took up their missions in the West Indies (see article on the United Presbyterian Church of Scotland) after a little time commenced new missions in the Central Provinces of India, where the Rev. and Mrs. Anderson are now doing much good work at the town of Seoni. Evangelistic work progresses, and native children are being cared for and instructed at the orphanage and schools.

#### **United Presbyterian Church of**

**Scotland.** Headquarters, United Presbyterian Church Offices, Castle Terrace, Edinburgh.—The United Presbyterian Church of Scotland had its origin in a secession from the Established Church in 1733, and was at that time, and for a long time afterwards, known as the "Secession Church." Another secession took place in 1761, those seceding at that time being called the "Relief Church." These were united in 1847, and since then the church has been known as the United Presbyterian Church. Early in this century two missionary societies were formed—the Scottish Missionary Society, for the purpose of sending missionaries to the West Indies; and the Glasgow Missionary Society, for work in South Africa. A large number of the missionaries connected with these two societies were ministers of the Secession and Relief Churches, so that by the secession of 1733 the United Presbyterian Church has the honor of having kept evangelical truth alive, and the first Scottish missionary to the heathen, Peter Greig, was of this church, although another society sent him out.

*Development of Work.*—1. WEST INDIES. (a) *Jamaica* and (b) *Trinidad*.—(a) The first mission undertaken by the United Secession Church as a body was in Jamaica, where the Scottish Missionary Society had already five missionaries, Revs. George Blyth, James Watson, Hope M. Waddel, John Cowan, and John Simpson, engaged in active work. In 1835 Revs. James Paterson and William Niven, the first missionaries of the United Secession Church to Jamaica, were sent out; and in 1836 the missionaries of both societies united and formed the Jamaica Presbytery. Under the harmonious co-operation in work which this union brought about, the mission prospered wonderfully, and between 1836 and 1840 three new stations, at Friendship (1837), Goshen (1837), and Mount Olivet (1839), had been occupied, with constantly increasing success. In 1846 the negroes in Jamaica had been entirely raised from their degradation, and were so interested in Christianity that they sent some of their own esteemed missionaries to their less fortunate brothers in West Africa, thus commencing the Old Calabar Mission of the United Presbyterian Church.

In 1847 the complete union of the Secession and Relief Churches was consummated. The Relief Church, in anticipation of this union, had undertaken no denominational mission, but it is well known, however, that the Glasgow African Missionary Society was almost exclusively sustained by the Relief Church. The first work of the United Presbyterian Church, formed in May, 1847, was to accept the transference of the stations and agents of the Scottish Missionary Society in Jamaica, and of the Glasgow African Society in Kaffraria.

The stations formerly under the care of the Scottish Society have been greatly strengthened since their adoption by the United Presbyterian Church, though of late years the mission has been subjected to very heavy trials, and for a time disasters swept over it in close and appalling succession.

In 1846 the Rev. Mr. Niven, who had gone to the Great Caymans with a view of seeing Mr. Emslie, a new missionary settled at Georgetown, on that island, perished at sea in a great storm which came upon the ship in which he was returning to Jamaica. He was followed in

a few weeks by his young wife, to whom he had been married less than a year. In the course of a few months the Rev. W. P. Young, Rev. J. Scott and his wife, the Rev. J. Caldwell, and Mrs. Winton, the wife of another of the missionaries, all of whom had been but a short time on the island, were successively laid in the grave; and they were afterwards followed by the Rev. W. Turnbull and Mr. J. Drummond, who had been for some years a very useful teacher at Hampden. The burning of the West Indies steam-packet "Amazon" deprived the mission of the Rev. J. Winton and his newly-wedded wife. Other missionaries suffered in health, and were obliged to leave the country, so that in 1849 very few workers of all the large mission staff were left to carry on the mission. It was some time before new missionaries were sent out to supply the vacant places, and in the meanwhile some of the congregations suffered greatly in their spiritual interests. Things had hardly begun to be settled before, towards the close of 1850, cholera made its appearance, and wrought fearful ravages. At Port Maria about two thirds of the population perished, and the disease, which was of the most malignant form, quickly spread to Kingston and other parts of the island. There was a great want of medical men and medicines in the island, and it was utterly impossible to stay the progress of the disease, and although business was suspended and every precaution taken to prevent its spread, the effort was of no avail, until after some days the force of the disease had spent itself. Strange to say, while the pestilence was sweeping off hundreds, only one of the entire mission staff perished—the wife of the Rev. Adan Thompson, who had been only about a year on the island.

For a time after the panic was over unusual seriousness prevailed. The chapels were thronged, and although many returned to their old life, yet not a few were brought by their trouble to seek comfort of God.

Before long new missionaries arrived, and the work was again in a state of prosperous activity. A first-class seminary was opened in Montego Bay, and is doing successful work. To this seminary a theological branch is attached for the training of native ministry, and this graduates yearly several students of much promise. There are now in Jamaica 31 ordained missionaries (of whom 14 are natives), 16 native evangelists, 46 congregations with 9,131 members.

(b) *Trinidad* was occupied in 1835 by the Rev. Alexander Kennedy, who settled at Port-of-Spain. The progress of the mission has been uneventful, though steadily increasing in its influence and successful work. In 1842 a station at Arouca was opened, and a little later one at San Fernando. At present there are in this island 2 European and 1 native ordained missionaries, and 3 congregations with 379 members, by whose aid extensive work is carried on among the coolies.

2. *Africa*.—(a) *Old Calabar*.—In 1846, sent out by the Jamaica Negroes, the Rev. Hope M. Waddell, accompanied by Mr. Samuel Edgerly, Andrew Chisholm, a brown man, and Edward Miller, a pure Negro, began the Old Calabar Mission and the study of the Efik language. It was originally hoped that this West Africa Mission would be chiefly prosecuted by the Negroes when educated in the Jamaica field, and to some

extent this hope has been realized. Mr. Waddell and his company, on arriving in Old Calabar in 1846, were welcomed heartily by the kings of Duke Town and Creek Town, with both of whom a correspondence had previously been opened on the subject of the mission. They found both the kings and people somewhat advanced in civilization. Many of the people spoke English quite well, and some of the chiefs could also write and read a little in that language, although unable to read a printed book. They were anxious to have their children educated according to English methods, and were willing to be taught the Christian religion, for already the existence of God and of a future state was generally believed by them. They carried on considerable trade with England and with the neighboring regions about them, and thus obtained large quantities of foreign goods, and the handsome furniture and mirrors with which the houses of the kings were crowded.

Yet in spite of this, ignorance, superstition, and cruelty everywhere prevailed. Under these circumstances the missionaries opened stations at Creek Town, Duke Town, and Old Town, and at each placesuitable buildings were erected, schools opened and largely attended in which the elements of a good English education were given, and in a very short time the Efik or Calabar language was reduced to writing by the missionaries, and, by the means of a printing-press, school-books and the Bible soon appeared in the vernacular. The missionaries also preached to the people, at first through an interpreter, and afterwards without one. To facilitate this part of their work, a galvanized-iron church, made in London, was sent out and erected at Creek Town. Some time after its beginning the mission was reinforced by the arrival of the Rev. Wm. Jameson, Rev. Wm. Anderson, and Rev. Hugh Goldie. The first of these, Mr. Jameson, died very soon after his arrival in Africa, but the other two are still at work. Later the arrival of Rev. R. M. Beedie, Rev. A. Cruickshank, Rev. E. W. Jarett, Rev. John Gartshore, Rev. James Luke, and Mr. John Morrison, all of whom are now in the field, raised the number of ordained missionaries to nine. There are at present in Old Calabar 8 stations—at Duke Town, Creek Town, Ikorofiong, Ikunetu, and Adiabo, and the new stations at Ikotana, Umvana, and Emovra-movra; 24 out-stations, 22 native agents, 3 unordained Europeans, 311 church-members, 19 day-schools with 564 scholars. The printing-press is still at work, and a steamer has been provided for working in the interior, where it is expected that other stations will soon be opened.

(b) *Kaffraria*.—This mission was begun by the Glasgow Missionary Society, and in 1837 it was divided, one section joining the Free Church in 1844, and the other joining the United Presbyterian in 1847. Notwithstanding the wars that had ravaged that land, the work of the mission has been steadily carried on. The first missionary was the Rev. Wm. Chalmers. Tiyo Soga, a son of one of Yaika's chief councillors, was trained under Mr. Chalmers, and having completed his education in Scotland, was ordained as a native missionary, but after a brilliant career died at the age of forty-four. The mission has now 4 stations in the Colonial District and 7 in the Transkei; 76 out-stations; 12 ordained missionaries, of whom one is the Rev. Dr. W. A. Soga, eldest son of Tiyo Soga; 60

native agents, 2,307 church-members, 43 day-schools with 1,735 scholars.

3. *Asia.* (a) *India.*—The events of the Mutiny in India in 1857 led this church to open the first mission among the millions of Rajputana and its feudatory states in the heart of Northwestern India, acting in this on the advice of Dr. John Wilson of Bombay. The Rev. Dr. Williamson-Shoolbred, an able student of the Edinburgh University, founded the mission at Beawar in 1860, and it has greatly prospered. Other agents followed him, and stations were opened in rapid succession at Musseerabad (1861), Ajmere (1862), Todgarh (1863), Jaipur (1866), Deoli (1871), Oodeypore (1877), Ulwar or Alwar (1880), Jodhpur (1885). "During the great famine of 1869 two of the missionaries, William and Gavin Martin, devoted themselves with self-sacrificing energy to the help of the sick and dying, and specially to the gathering in of hundreds of orphans who were left in destitution. This had a marvellous effect upon the people, and gave the missionaries generally a firm place in their confidence. The two brothers, first Gavin and then, a few years afterwards, William, were removed by death in the very midst of their usefulness; but their memory is still a power throughout Rajputana." At present the missionaries, ordained and medical, number 16, and the native agents 40. The work is being very successfully carried on by the 85 day-schools of the mission, which have an average attendance of 4,839 scholars. The church-members number 456. A mission press is successfully at work in Ajmere.

(b) *China.* Manchuria.—From 1862 to 1870 the only mission work of the U. P. Church in China was that of a medical missionary in Ningpo, but in 1870 Rev. Dr. Alexander Williamson was sent out, and a station was opened at Chefoo. In 1873 work was begun in Manchuria by the Rev. John Ross and Rev. John Macintyre, and their work was so successful that the Society decided to remove the entire mission to this field, which was done in 1885. Dr. Williamson, however, remained at Shanghai in China proper, and devoted himself to the preparation of Christian literature for the Chinese. The work in Manchuria is largely increasing; nine out-stations have now been opened from the stations of Newchwang, Haichung, and Liaoyang (occupied 1872); Moukden, Tieling, Kaiyeren, and Saiping-Kow (occupied 1875). The desire of the mission is to open work in Korea, and in anticipation of this the Rev. Mr. Ross has prepared a translation of the New Testament in Korean. The mission staff at present employed in this mission includes 5 ordained foreign missionaries, 3 medical missionaries, and 19 native helpers. There are four congregations, with 795 members and 100 candidates.

(c) *Japan.*—The opening up of Japan in 1863 induced the United Presbyterian Church to send out several missionaries to engage in work there. Shortly after the establishment of the work they united with the American Presbyterian Church (North) and the Reformed (Dutch) Church of America in forming the Union Church of Christ in Japan. The missionaries connected with this United Church now number eighty-two. The church-membership is 7,551, and in no previous year has the increase been so great. A large amount of evangelistic and educational work is being done every year. Fifty-nine young men are now in training for

the ministry. The growth of self-support in the Japan Mission is very noticeable, and very soon the work of the Christian church will be largely in the hands of the Japanese themselves. Meanwhile the work advances, and there is every reason to hope that at no distant day the whole land will be won for Christ.

The Society has, besides its home and foreign missions, considerable continental and colonial work (the former devoting most of its interest to Spain), and also a Jewish mission in Morocco, carried on under the superintendence of the Presbyterian Church of England, which is treated under the general head of "Jewish Missions," q. v.

**United Presbyterian Church, Board of Foreign Missions.** Headquarters, Philadelphia, Pa., U. S. A.—The Board of Foreign Missions of the United Presbyterian Church dates from the organization of that church by the union of the Associate and Associate Reformed Churches in the city of Pittsburg, Pa., May 26th, 1858. It had its beginnings in the Board of Foreign Missions which each of these churches had before the above union. Its constitution was issued by the General Assembly in May, 1859. It was formally organized in Philadelphia, June 15th of that year, and was incorporated by the Legislature of the State of Pennsylvania April 12th, 1866, under the title of "The Board of Foreign Missions of the United Presbyterian Church of North America."

This Board consists of nine members, each elected by the General Assembly of the church for a term of three years. The Corresponding Secretary, who is also appointed by the Assembly for a term of four years, is a member of the Board *ex officio*. To this Board is entrusted everything pertaining to the foreign missionary work of the church in the interval of the meetings of the Assembly, and to that body it must every year make a full report of its proceedings, its appointments of missionaries, its fields of operation, its receipts and expenditures, and its general condition and prospects of all the foreign work of the church. Its officers are a president (Rev. W. W. Barr, D.D.), a recording secretary (Rev. D. W. Collins, D.D.), a corresponding secretary (Rev. J. B. Dales, D.D.), and a treasurer (Jos. D. McKee). It is located in Philadelphia, and holds its stated meeting on the second Monday of each month.

For a number of years this Board had under its care missions in Trinidad, Syria, China, Egypt, and India. At length it concentrated, under the direction of the General Assembly, its whole foreign work upon the latter two of these fields—Egypt and India.

The first missionary of the Board in India was the Rev. Andrew Gordon. He embarked for the field with his wife and sister on September 28th, 1854, under the appointment of the Board of the Associated Church, and fixed his first station at Sialkot in the Punjab. In 1856 he was joined by the Revs. E. H. Stevenson and R. A. Hill, and thus the mission was organized and manned as it came under the Board of the United Presbyterian Church in 1858.

From the beginning it had two special methods of operation—evangelistic and educational. Its first effort in the spirit of the great commission, "Go preach the gospel to every creature," has ever been to make the gospel known; and so

it has sought to reach men in the mission stations, in bazaars, in itinerating from village to village, in the zenanas and in every place and way in which the missionary could by any proper means do the work.

Next to this, and almost coexistent with it, has been educational work. Schools have been opened both for males and females wherever opportunity offered and the mission had the ability. These schools have gradually risen in grade from the primary to the collegiate and theological institute, whence young men in increasing numbers are already coming to form a well-trained and able native ministry. For the girls also boarding-schools as well as others are opened, and many are thus in training for the forming and carrying on of Christian homes in their after-lives. In all the schools, from the lowest to the highest, and for both sexes, the Bible is daily read, and the way of life is constantly made known.

**MISSION TO INDIA.**—This mission was commenced at Sialkot in 1855 by Rev. Andrew Gordon. The work now occupies 8 districts: Sialkot, Pasrur, East and West Gujranwala, Gurdaspur, Pathankot, Jhelum, and Zafarwal. The work is carried in four great divisions: 1. Evangelistic. Besides the regular services at the churches, preaching tours are made throughout the villages, in the bazaars, and street corners. Churches have been organized in each of the districts, and in the Pasrur district there are three congregations. The total figures for this branch of the work are: 8 mission districts, 10 congregations, 51 stations, 511 villages containing 6,597 communicants.—2. Educational. At Sialkot there is a theological seminary, a Christian training-institute with 125 students, and a girls' boarding-school with an average attendance of 45. Christian primary schools, boys' and girls' day-schools, and Sabbath-schools are conducted at all the stations and in many of the villages of the districts. In all there are 60 schools, 2,553 male pupils, and 3,164 female pupils.—3. Zenana work. This is carried on in both the city and the villages. In Sialkot, Gujranwala, Gurdaspur, and Jhelum many houses are open to the visits of the faithful women.—4. Medical work. A lady physician has charge of the Memorial hospital at Sialkot City, which was opened with appropriate ceremonies December 30th, 1889. The work among the women is thus made practical and efficient. During the year over 5,000 patients were treated at the dispensary alone. The force of workers for the India Mission is composed of 12 ordained missionaries (11 married), 11 female missionaries, 1 female medical missionary. (See also articles on Punjab and the above-mentioned stations.)

**MISSION IN EGYPT.**—The mission was begun by the arrival in Cairo of the Rev. Thomas McCague and his wife, on November 15th of the year 1854. They were young and zealous, but they had no knowledge of the language at first, and therefore actual work for the first year or more was done by Rev. James Barnett, who joined them on December 5th of the same year, and who had been laboring in Damascus for several years in connection with the same church. It was a favorable time for establishing a mission in Egypt, as Said Pasha, the chief ruler at that time, was favorably disposed towards European civilization, and seemed not the least afflicted with that

jealousy and hatred of Europeans so common among Mohammedan officials. For some years little was accomplished in mission work, except the opening of a school for girls and another for boys, and the observance of regular divine services on the Sabbath, at which, however, very few attended. All the difficulties of beginning such a work were experienced. It was next to impossible to find a suitable building, and few were willing to rent their houses to the propagators of a "new religion;" yet it was some time before the persecutions of the spiritual rulers began. In 1856 Rev. G. Lansing also removed from Damascus to Egypt, taking up his residence first in Cairo and then in Alexandria, in 1851. About the same time Miss S. B. Dales also changed her place of missionary labor from Damascus to Alexandria. Subsequently the work carried on by Dr. Philip at Alexandria, under the United Presbyterian Church of Scotland, and Miss Pringle's girls' school, to the support of which the Ladies' Society of Paisley, Scotland, contributed so long and so liberally, both passed over to the American United Presbyterian Mission, and Mr. John Hogg, then a student of theology, and assisted by Dr. Philip, joined the same mission, and was in May ordained by the Presbytery of Egypt, soon after its organization. Up to the year 1860 the missionary operations of the United Presbyterian Mission were, for the most part, confined to Cairo and Alexandria, in each of which cities were a school for boys and another for girls, in which the missionaries sought to fill the minds of the children with Bible knowledge, and touch their hearts with the love of the Saviour. There were also preaching services, at which however few attended, not more than 15 or 20, in addition to those pupils who could be induced to come. A few evangelistic trips for the sale of Scriptures and other religious books, and for preaching the gospel in an informal way, had been made both north and south of Cairo, and unsuccessful attempts had been tried to open regular mission work at Benisouef, Luxor, and Assiout. At Assiout, Moslem hatred broke out against the mission's native agent there, and thirteen Moslems were imprisoned a year for beating him in open court; and the Coptic hierarchy had begun to traduce and malign the missionaries and decry their labors; while excommunication was threatened against any Copts who were disposed to read Protestant books, or meet with those who had joined the little Protestant church, and all who had professed openly their belief in Protestant principles were made the subjects of the church's anathemas. All this meant not only that truth had been disseminated and had taken root in the minds and hearts of the people, but also that it had begun to exert an influence on their daily life. In 1860 Rev. S. C. Ewing and wife and Miss C. J. McKown, and from that time onward for several years other recruits from America, joined the mission. Revs. Drs. Lansing and Hogg, and their families, and also Miss Dales, were transferred to Cairo station in the autumn of 1861 and the following winter, making a strong missionary force in the capital. From that time the work began to prosper, the schools grew in the number of pupils and in efficiency; the attendance at divine service on Sabbath steadily increased; the property at the "mouth" of the Mooski, given by Said Pasha, was repaired and fitted up as mission premises,

containing residences for the missionaries and rooms for the schools, and a comfortable and commodious place for religious services. The central position of these premises, separated but not distant from the Coptic quarter, and in the very line of traffic and travel, helped to swell the number of visitors and inquirers. The truth began to exert a mighty power: persons from all parts of the country visited the mission book-depot on the Mooski on week-days, and the mission chapel on the Sabbath. Additions by profession of faith were made every few months. A commencement was made in training young natives for mission service. Sabbath-school work was prosecuted with vigor and success, and the organization of the first native Protestant church was effected in Cairo in the year 1863.

From this time the work prospered more than ever before. Assiout was occupied by Dr. Hogg and family and Miss McKown in 1865; Koos, near Luxor, was opened in 1865; Moodeenet, El Fayoom, and Mansura in the Delta, in 1866; Sinoris El Fayoom, in 1868; Mooteea and Nakhaileh, near Assiout, in 1869; Bagore, Fahta, Rhoda, Luxor, and Suft Meedoom, in 1873; Goorneh, near Luxor, and Jawily, north of Assiout, in 1874; Ahnoob, near Assiout, and Sinhere, on the Fayoom, in 1875; Esneh and Erment south of Luxor, Kosair on the Red Sea, and Zerabi near Assiout, in 1876; Dweir, Moosera, Beezadeeza, Marees, and Boolac, in 1877; Beni-Adi and Manfaloot in 1878; Akhmeem and Sanalio, in 1879; Minieh, Deir Abou-Hiunis, and Tanta, in 1880; Azaimah near Esneh, Kinneh, Tameeyah, and El Kome El Akhdar, in 1881; Wasta, Moir, Tanda, and Benisouef, in 1882; Tima, Aboteeg, and Furkus, in 1883; Edfos, Abou-Kerkas, and Daminhoor, in 1884; Deir El-jenadily, Kome-espaht Busra, Menharg, Mahalla, Kafr-Bilmisht, Zagazig, and Mist Elhamr, in 1885; Deir-Birsha, Nezlet-Rooman, Feshi, Gerobee, in 1886; Assouan at the First Cataract, Hammam, Serokina, Nezlet-Nakhly, Dakoof, Tanbody, Safaneezah, and Atf-Haider, in 1887; Girgeh, Sidfeh, Mas'oodah, Shamee'a, Beni-Aleig, Deirroot, Beni-Korah, Hore, Beshoda, Boorzain, Nezlet Abou-Hamis, Supt El-Khumar, Abou-Girgeh, Maidoom, Teeh El-Barood, and Fum El Bohr, in 1888; Deir Mawas, Roda in Assiout Province, Nezlet-Hamzamee, Nezlet-Sultan Pasha, Hilma, Kome Matat, El-Idwa, Fiddameen, Shibleenza, Dronka, and Kome Bedar, in 1829. These places are found all along the Nile valley up as far as Assouan. In many of them meetings for prayer, singing, reading, and study of the Word are held every night in the week. The methods and means employed in the U. P. Mission are those generally employed by American missionaries—school work, book distribution, evangelistic work, zenana work. It has been the policy of the mission to leave to the natives themselves the primary education of their children, and in consequence a large number of parochial or free schools have been established, supported entirely, superintended, and taught by them. The mission restricts its operations in the line of education for the most part to the training of teachers, and to giving instruction in the higher branches. Most of the teachers in the parochial schools were taught in the Mission Training-school or College at Assiout. There are also academies and seminaries for boys and girls at Alexandria, Mansura, Cairo,

and Assiout, where instruction and training are given sufficient to enable pupils to prepare for school-teaching, or for taking positions in the government service. In these, as in all the mission schools, an hour every day is devoted to religious instruction in addition to the opening exercises in the morning. More than 800 Mohammedan boys and girls are on the roll of the schools, and are receiving a Christian education. The Training-school or College at Assiout has a good corps of American and native professors, and has fine premises and a healthy location. The theological classes are taught in Cairo, and are steadily increasing in the numbers, character, and ability as well as piety of the students. Over 6,000 pupils were under instruction in the various schools during 1889.

Having great faith in the power of the Word read in the homes of the people, the mission has given a good deal of attention to the distribution of religious literature, educational, practical, and controversial, and to this end has opened depots for the sale of books in Alexandria, Mansoorah, Cairo, Tanta, Zagazig, Assouan, and Luxor, and employs a large number of col-porteurs, who carry the books to the towns and villages. Over 35,000 volumes are thus distributed yearly in the Nile valley, many of these being Scriptures and other religious books, and all being of a useful character.

Special attention has been given to the instruction of women, because it was seen that they were ignorant and superstitious and oppressed to a degree not understood in civilized countries; and their instruction and elevation are not only needed for themselves and their salvation, but also for the sake of the men, who cannot be enlightened and evangelized without the women.

Opportunities for acquiring knowledge at public meetings are much fewer in the case of the women than of the men. On the Sabbath there is the custom among the men of visiting one another, and the women are expected to stay at home during the day and prepare the dinner for the company; while it is not considered proper for a woman to go out at night, even to religious meetings, unless accompanied by a male attendant. None of the women could read when the mission was established, and at the present time (1890) not more than one in 700 can read understandingly, while a much smaller proportion can write. Under these circumstances the distribution of books among them is of little profit, and therefore it has become necessary to visit them personally in their homes, and read to them out of the Scriptures in order to give them a knowledge of God, themselves, and the way of salvation. This is the necessity for the large and increasing force of unmarried ladies in the Egyptian Mission, in addition to the wives of the male missionaries. With the Bible in hand they go to the houses of the people, sometimes to teach them the art of reading, and always to read to them, and often accompanying the reading with prayer.

Of course direct evangelistic work has produced the best results, especially where the natives themselves have earnestly taken a part in it. It has been the endeavor of the missionaries to enlist the natives in this work, whether in the zenana department or in the wider field of missionary effort among men and women indiscriminately. This has been done by encouraging them to take an interest in the nightly meet-

ings for prayer and the study of the Word, at which very often the natives are the leaders, and by adopting a system of local preachers something similar to that adopted by the Methodists. In many places an earnest Christian who can read intelligently can do good work among his own people in giving them a knowledge of the way of salvation, even though he may never have been inside of a school-house. Men, however, who intend to be permanent pastors are required to pass through a course of training similar to young men in the church at home, except that during their vacations they are sent out as local teachers and preachers to sow the precious seed and use their talents and learning. The missionaries themselves make frequent tours through the valley, visiting new places as well as old stations and organized churches, for the purpose of encouraging the workers, aiding in solving difficulties, stimulating the people, and leading them onward and upward in the Christian life. Curiosity, as well as other motives, generally secures for them large audiences, and great good is always accomplished by these tours. No other means is more blessed than this in rousing the people from their religious indifference and formalism, bringing them to see their need of a Saviour, and leading them to declare themselves on the side of the Lamb of God who takes away the sin of the world. This, with the liberal use of the native talent in all the departments of the work, has been the chief cause of the success of the U. P. Mission in Egypt. If ever Egypt is to be fully brought to Christ, it will be done largely by itinerant evangelists, both foreign and native; both are needed to secure, by the blessing of God, the best results in the salvation of souls and the dissemination of the truth.

The chief difficulties with which the missionaries have to contend in Egypt are: 1st. *The language.* No doubt the Arabic language is difficult. With time and application all may so far learn it as to be able to communicate their thoughts in it, but it will generally be with some faults of pronunciation and many of diction. Few can become fluent in the use of it. It is only by patient study, continual practice, and constant mingling with the people that a person, even with a natural talent for languages, will be able to acquire the easy and effective use of this language. In not a few instances inaccuracy in the use of the language on the part of the missionary grates harshly on the ears of the people, and in the case of Mohammedans acts as a strong hindrance to their willingly listening to the gospel. They say that a man who uses bad grammar cannot have a good religion. 2d. *The formalism of the religions of the people.* All have a religion, but it is only a form. Prayer, repentance, faith, obedience, are all mere forms. There is no life, no reality—at least few persons among the Egyptians are in dead earnest in religion. Religion is a covering, a means of livelihood, an inheritance; and its rites are mere outward ceremonies, and its technical terms are lifeless, meaningless, except for outward effect. The truth preached to such a people is at first a mere sound: pleasant it may be to the ear—indeed sometimes they smack their lips in expression of their admiration; but they have no idea that the preacher means what he says, or that he expects the hearer to accept and live in accordance with gospel precept. At

first they regard the gospel as another religion like their own. 3d. *The character of most of the so-called Christians residing in Egypt.* Frenchmen, Italians, Greeks, Maltese, Germans, British, all bear the Christian name; but, alas! their lives are for the most part in direct contrast with the lives of true Christians, while the character of the Copts is equally bad. It is no wonder that the Moslem deridingly replies, "If these be Christians, I want nothing of Christianity; and if these be not Christians, why do not you convert them first?" 4th. *Add to these the customs and manners of the Egyptians,* formed apparently in direct opposition to the principles and requirements of the gospel of Jesus Christ. The manner of doing business among the various trades; the conditions of government service, requiring work on the Sabbath; and the constant habit of lying and deceit in all the relations of life, render it difficult for a Christian to find employment or earn a livelihood. Such are a few of the many obstacles met with in conducting missionary work in Egypt, but by the Spirit of God quickening the converted soul, and by the grace of God strengthening the powers of the new life, the true Christian can overcome them all; and the gospel is, notwithstanding these obstacles, the power of God to the salvation of souls in Egypt to-day as heretofore.

**United States of America.**—This is one of the greatest mission fields of the world. Ever since the days when the discovery of the New World and the condition of the savage Indians stirred up the Christians of the Old World to send missionaries, the history of Christian effort in the United States has been one of continual and almost unabated zeal and earnestness. The work has gone through the various stages of evangelistic and pastoral agencies in the older and more settled districts of the country, but there are always new regions to be cared for and new people to evangelize.

The urgency, diversity, and magnitude of the work of Christian missions in the United States can best be understood by looking at the different elements which compose the population, and the influences which affect the efforts of the church.

1. *Work for the Native Population.*—Under this head we can consider the term "native" as including that part of the people who are native born or who have been located in the country for a period long enough to be naturalized: the Indians, the Negroes, as well as the native Americans. The work for the Indian has already been treated of in a separate article; the work for the Negro, as well as for others, will be shown in the detailed account of the various Home Missionary societies which follows. The general facts in regard to this element of the population may be dwelt upon but briefly.

The development of the great Territories in the West, and the consequent migration of the inhabitants of the older and more settled States, has caused the growth of mission work and the division of Christian work into two heads, pastoral and evangelistic (see *Missionary Methods*). Pastoral work is carried on in the settled States; in the large cities it is combined with the work of city missions (q.v.) in order that the poor and the rich may have an equal chance to hear and profit by the teachings of the gospel. But as has been well said,

man is kept in the right path as much from fear of the censure of the surrounding community as by the desire and purpose to do right for right's sake; and when the adventurous ones leave the well-ordered communities to go where they will be pioneers of civilization, they too often forget to take their religion with them; amid the freedom and license of the new life the ungodly become more so, while the nominal Christian soon loses even the name. Then the evangelistic methods of the church must be brought to bear upon these migratory multitudes, and the parent churches send out missionaries to look after the stray sheep as well as to claim those who have belonged to no fold. The rapidity with which the Western States are increasing in population may be shown by a few instances from the figures of the census of 1890. The percentage of increase in the population of the North Atlantic States for the decade 1880-90 was 19.95; for the Northern Central States, among which are Michigan, the Dakotas, Kansas, and Nebraska, the percentage of increase was 28.78; and of the Western States, 71.27. The greatest percentage of increase was in the States of North Dakota (385.05), South Dakota (234.60), Montana (237.49), and Washington (365.13). The growth of the latter is phenomenal, as it is almost entirely during the last five years that the increase has taken place. How great a proportion of this increase is due to migration, and how much is properly referred to the arrival of emigrants from other countries, cannot be determined without more data than have yet been furnished by the Census Bureau; but the lessening rate of increase in many of the older States, such as Ohio, Indiana, Idaho, Missouri, and Illinois, is distinctly traced to the migration of the people. Hence a great proportion of the rapidly increasing population of the Western Territories and States is made up of those who have severed family, social, and religious ties by moving into the new districts. Must these ties be left with no new objects around which to cling, until they shrivel up and respond but slowly to any stimulus? Or shall the church keep pace with the world and supply new church ties as soon as the old ones are severed; new places of worship, ere the habit of church-going ceases to exist; new influences for good before the careless or seared conscience fails to respond? These questions indicate the nature of home mission work in so far as it concerns what might be called the peculiar objects of the church's care—her own wandering sons and daughters.

2. *Work for the Immigrants.*—Attracted by the visions of liberty, wealth, freedom; driven out from their home-lands by poverty, increase of population, tyranny, and misrule; aided by cheapness of travel and the short time required for the journey, the emigrants of European countries have poured in upon the United States in a steady stream. According to the tenth census (1880) the total foreign-born population numbered 6,679,943. In "Our Country" Dr. Strong states that at a rate of emigration which the history of the past would give as a basis for the future, the total foreign population in 1900 will be 43,000,000. This influx of foreigners is regarded as the most dangerous element which threatens the civil and religious life of the country. The time is past when the immigrant was hailed with joy. There is now no great urgency for his labor. His morals,

his socialistic, anarchistic tendencies, his conception of liberty as license, his inability to appreciate the honor and responsibility which go with the right of franchise,—all these make the average European emigrant one of the most objectionable of strangers. The results of this immigration are seen distinctly upon the statistics of crime, and these foreigners compose a formidable element to be looked out for and opposed by the church. Many of these immigrants come from Christian communities, but they are influenced in the same way as the native American is when he changes his home; but by far the greater number belong to the bilge-water of the various ships of state in the old countries. Here is a herculean task thrown upon the state and the church. The state is devising means to escape the conflict which is imminent by stopping the inroads; but with strange lack of the sense of proportion, the immigration of the few thousand Chinese has been prohibited, while during the year ending June 30th, 1890, of the total of 455,302 immigrants, 443,225 came from Europe. The church has the greater task, for many of these immigrants come from countries where they have had little religious instruction; and in addition to the difficulties which arise from the nature of the case,—the known character of the people, the isolation of their life,—there are added other factors which complicate still further the problem. These are, as ably set forth in "Our Country," Romanism, intemperance, Mormonism, wealth, and the collection of people into cities. Mormonism has officially abolished polygamy, but it is still the foe to all that is for the best interests of the individual and the state; of the papacy this is not the place to speak; intemperance is so well recognized as an enemy to the church and the commonwealth that it needs no words of description; city life and its dangers are seen on all sides; and the influence of the chase after, or the possession of, wealth is keenly felt by all.

This, in brief outline, is the condition of affairs which makes the field of the Home Missionary societies one of paramount importance by reason of the enormous extent of territory, the number of the people, the interests at stake, and the conviction that the future of this nation, the greatest example of a republican form of government, will depend upon the success with which the church fulfils the obligations thus imposed upon her.

Home missions is the name given to the work of the church for those in her own country, whether it be among freedmen, immigrants, or frontier settlers; and every denomination is actively engaged in this work, whether it is made a separate department or not, and it may or may not be classified and reported separately from the general work of the church. The ways are many but the end is the same, and the means adopted substantially agree. Some of the denominations have a Board of Home Missions, just as they have a Board of Foreign Missions, where the work is put under the charge of a special set of officials chosen by the church to administer this important part of the work. Thus there is the Board of Domestic Missions of the Protestant Episcopal Church, the Missionary Society of the Methodist Episcopal Church (North), and the Board of Home Missions of the Presbyterian Church, and there

are special Boards of Church Election and of Education. Some churches organize special departments, etc., of Home Missions under separate boards or committees; thus the Freedmen are under the care of a special Board in the Presbyterian Church. In some cases the work for the Chinese and Japanese is under the care of the Foreign Board; in others it is part of the Domestic Missions. Sometimes, in addition to or in place of the general society, there are local or State societies which carry on independent work. Individual churches support their missionaries, women's societies or bands support schools and teachers. Thus the total work which is done it is hard to trace or to tabulate, from the fact that the dividing line between home missions and parent-church work is so often vague, impalpable, and constantly shifting.

It has been impossible to give space for a full statement of each of the different organizations. The similarity, too, of their history and work is so great that it has been deemed most satisfactory to give a slight sketch of a few only, and those the older and larger societies.

**AMERICAN BAPTIST HOME MISSION SOCIETY, THE.**—The Baptist churches in some of the Northern and two or three of the Southern States had formed associations or societies about the commencement of the present century, for aiding feeble churches on the frontiers, and for carrying the gospel to the pioneer settlers, who occupied the States and Territories between the Alleghenies and the Mississippi River. Prominent among these were: the Massachusetts Domestic Missionary Society, founded in 1802, which occupied after a time Maine, Lower Canada, Western New York, Pennsylvania, Ohio, Illinois, and Missouri. The Lake Baptist Missionary Society, founded in 1807, afterwards the Hamilton Missionary Society, and eventually in 1825, with other societies, forming the Baptist Missionary Convention of the State of New York. This organization sustained missionaries in New Jersey, Pennsylvania, Ohio, Michigan, Canada, and Wisconsin. The Triennial Convention of the Baptists in the United States for Foreign Missions in 1817 altered its constitution so as to include Home Missions; but the low state of the treasury, the demands of Foreign Missions for immediate help, and other cases, led to the relinquishment of this work by the Triennial Convention to other organizations. Between 1820 and 1836 eighteen State Conventions were in existence, all of them more or less active in Home Mission work, either within their own bounds, or "in the regions beyond." The time was favorable for a combined national movement. At this time there were in all the States and Territories about 5,322 Baptist churches, with a membership of 385,000, distributed as follows: New England, about 65,000; New York, New Jersey, and Pennsylvania, about 75,000; the Southern States, about 213,000; and the Western States, perhaps 32,000.

Such was the condition of the denomination when two men, Rev. John M. Peck, of Rock Spring, Illinois, and Rev. Jonathan Going, of Worcester, Mass., undertook the work of founding the American Baptist Home Mission Society. The convention for this purpose met in the Mulberry Street Baptist Church, in New York City, April 27, 28, 1832, adopted a constitution, and elected officers, and an executive commit-

tee of five clergymen and five laymen. The former, John M. Peck, became its exploring missionary for the West. The field before the Society was vast. The Society was new, and, owing to the poverty of many of the churches the responses to the appeals for funds were not so large or prompt as they were expected to be. There was also a difficulty in obtaining the best men for missionaries, but in 1837 the Society was in a sound condition. Its receipts had risen to \$13,488 per annum; the number of missionaries was 105. They had organized 29 new churches and had supplied 237 churches and stations. At first their work was wholly east of the Mississippi River, but as the great flood of immigration commenced in 1839, the Society's field extended westward to the Pacific coast, including the fast growing Territories, California and the Pacific States, and Texas. The gold discoveries in California were causing an immense home emigration across the continent; railroads were extending in all directions with great rapidity; the Mormon delusion had gathered a host of adherents; there were conflicts with the Indians at many points; the anti-slavery agitation constantly increased in volume, and involved the disruption of churches and benevolent societies, and threatened the dissolution of the Union; the disastrous financial panic of 1837 crippled the resources of all business-men, and the civil war of 1861-5 brought about what seemed the culmination of woes. The growth of the Society was not rapid. The average of the twenty-two years (1840-1862) of Dr. Benjamin Hill's service was only about \$31,000; but during them a large force of missionaries, had been kept in the field, 830 churches had been organized—almost 40 a year—an average of 450 churches had been supplied, and about 950 baptisms per year administered. In 1846, missionary work among the Germans had been commenced, and subsequently enlarged. Aid to the French Mission at Grande Ligne, Canada, had been given from 1849, and in 1848 the first missions among the Scandinavians of the Northwest had been commenced. Missionary work in the Spanish language commenced in New Mexico in 1849, and preparation was made for labor among the Chinese in San Francisco in 1852 and the following years. But amid financial disasters, war, and the languid interest of the people in Home Missions from 1852-62, the treasury of the Society was seriously crippled, and not only were new enterprises abandoned, but many of the old ones were given up. In 1861-62 the receipts of the society had fallen to \$31,144.28, and the number of missionaries to 84.

It was a critical time. The war was in full progress; the expansion of the currency by the great national loans had made money plenty, and the country was ripe for greater enterprises than had hitherto been attempted. The emancipation proclamation of January, 1863, threw a new burden upon Christian men and women of the North. The rapid growth of the new States and Territories necessitated help to the new and feeble churches of the frontiers, not only in the support of missionaries but in aid in erecting houses of worship. Germans, Scandinavians, the Canadian French in New England, and the Indian tribes, were looking to them for instruction and religious care. In the distance, other missionary work, among the Chinese on the Pacific coast, and the

Mexicans, just throwing off the imperial yoke of Maximilian, and rising to the dignity of a free and genuine republicanism, were stretching forth their hands for help. All these calls were coming to the ears of the managers of a society whose receipts had never averaged over \$40,000, and were now but little over \$30,000. But Dr. Backus the new secretary was equal to the emergency. In that twelve years he raised the annual receipts from \$31,000 to \$221,000; the number of missionaries from 84 to 435; the annual number of churches organized from 30 to 166; the baptisms from 473 to 7,236, and the churches supplied each year from 215 to 500.

While the war was yet raging, the Society sent missionaries to gather the members of the colored Baptist churches in the South, to instruct, comfort, and strengthen them, and to bring the unconverted to the truth. Then came the necessity of a native ministry. The Society pledged itself, in May, 1866, to continue its work among freedmen, and declared itself especially in favor of established institutions. Under these instructions, grounds and buildings for training-schools were procured in Washington, D. C., and Nashville, Tenn., and good accommodations for a high school at New Orleans, and schools were opened in a number of cities, and soon the whole training of colored Baptist preachers and teachers came into the hands of the American Baptist Home Mission Society. \$350,000 were secured for this work in the five years 1869-74; and a plan was formed for raising \$500,000 for the permanent endowment of these schools and institutions. The statistics as given in 1889 show that the Society have 13 incorporate institutions, including an Indian university, now at Muskogee, Ind. Territory; 7 unincorporated institutions, of which two are in the Indian territory, and one at Monterey, Mexico. In these there are 137 teachers and 3,741 students enrolled. The Society has also 15 schools, supported wholly or in part for the colored people. These have 131 teachers, 3,106 scholars. The expenditures of the society for educational and missionary work among the colored people in twenty-five years was over two million dollars.

But the Board found themselves confronted by a new difficulty, growing out of the rapid development of new churches in the West, and their need of help in building houses of worship. Rev. E. E. L. Taylor was appointed in 1866 to undertake to raise a permanent fund of \$500,000 for this purpose, as a secretary for the Church Edifice Department. He labored zealously and successfully till his death in 1874, raising nearly \$300,000. Present amount of Loan Fund, 1889, \$119,720; Church Edifice Benevolent Investment Fund, \$88,000. Total amount paid to churches since 1866, \$296,000.

In 1870 the Board took up a mission enterprise inaugurated in Mexico, in 1864, by Rev. James Hickey and Rev. T. M. Westrup. At that time, there were 7 Baptist churches in that State, with about 120 members; there were 4 ordained ministers, three of them native Mexicans. In 1889 there were 44 stations, 25 missionaries, 533 members of the churches; 20 schools, 479 pupils. The fields occupied are in the State and City of Mexico, where there has been recently erected a substantial and extensive building in which are a chapel, the offices necessary for the work, a dwelling for the superintendent, a printing establishment

and depository. There are a church and offices at Monterey, for the numerous stations in Nueva Leon and Tamaulipas, and a new interest in the City of Leon, and another at San Luis Potosi. The annual expenditure was in 1889 about \$11,000.

The transfer of the missions to the Indians, previously belonging to the Missionary Union, to the Home Mission Society, was made in 1865.

The mission to our foreign population distinctively began in 1846, with the calling of a young German minister to labor among the Germans of New York, and Newark, N. J., and were promoted in 1856 and 1858 by the active labors of Prof. A. Rauschenbusch, who, in addition to his services as Professor of Theology in the Rochester Theological Seminary, was appointed by the Board in 1863, 1866, and 1871, to act as a missionary superintendent in the German work.

The missions among the Scandinavians began in 1853, with the Swedes in Illinois, but were successfully continued by Prof. J. A. Erdgren, for the Swedes, from 1858 to 1866; by Hans Valder for the Norwegians in Illinois, in 1848-9; and among the Danes, from 1856 to 1886, in Wisconsin, by Rev. Lewis Jargensen and Rev. P. H. Dau. The whole Scandinavian missionary movement was organized and unified in 1866-69. In 1871 Prof. Edgren was made professor in the Scandinavian Department in the Chicago Baptist Theological Seminary. In 1889 the Germans represented in the Society numbered about 14,000 members, the Swedes about 10,500, and the Danes and Norwegians 4,000.

The missions among the Canadian French in the United States were commenced in 1869 in New England and New York by Rev. N. Cyr. Their success has been great; but desiring to make their converts good and patriotic *American* Christians, the missionaries, as in their Scandinavian and Bohemian work, have not organized distinct French churches, but have encouraged them to unite with the American churches.

The mission to the Chinese on the Pacific coast, though beginning as early as 1854 with the Southern Baptist Convention, first took an organized form in 1870, and was continued with good prospects of success for several years; subsequently it was carried on with the co-operation of the Southern Home Mission Board, and the cordial aid of the Baptist churches in San Francisco, and Portland, Oregon. It is now in a flourishing condition, having 13 stations, and is marked by very zealous labor on the part of the missionaries and the Chinese converts.

In 1879 Dr. H. L. Morehouse was elected secretary, and since then every department of the work has been quickened into new life, and new ones have been added.

Work was begun in Arizona in 1880; resumed in New Mexico and Mexico in 1881; begun in Utah, Montana, and Idaho in 1881; in the City of Mexico in 1883; in Alaska in 1886; co-operation with the Western States conventions since 1879-89; with colored Baptist conventions in the Southern States, in part since 1884, generally in 1888. In the Educational Department the co-operation with the Women's Home Mission Societies had become most thorough and complete.

The mission work among foreign populations has been greatly extended and enlarged, and work among the Bohemians, Poles, Hungarians, and Russian Jews has been commenced.

BOARD OF HOME MISSIONS OF THE PRESBYTERIAN CHURCH IN THE UNITED STATES OF AMERICA. Headquarters, 53 Fifth Avenue, New York City.—The history of this Board is almost identical with the history of the Presbyterian Church of America, for at the same time that scattered congregations were formed in the colonies during the last decade of the seventeenth century, the ministers were actuated with a desire to follow the adventurous spirits who left the settled portions and sought homes in the surrounding wilderness. About the time of the founding of the first Presbytery (1700–1705), the ministers of the early church followed the colonists wherever they went, and the gospel was preached along the Atlantic coast, up to the foot of the Alleghenies and beyond, not only to English but to all settlers, of whatever tongue or faith. Missions to the Negroes and the Indians were established. David and John Brainerd to the Indians in New Jersey and Pennsylvania; Occum to the tribes on Long Island and to the Oneidas, Mohawks, Senecas, Cayugas, and other Iroquois; Gideon Blackburn to the Cherokees, Choctaws, Sanduskiens, and others,—are all examples of the zealous men who were thus early carrying on the work of home missions under the Presbyterian Church. Education was also needed, and the first presbytery and synod founded colleges and schools, notably Princeton College. Records of the synod show that continual demands were made upon it for means to support missionaries and to open missions in destitute places. These “supplications” were met by the proceeds of collections which were ordered to be taken up in the churches. An interesting item is the fact that the first recorded grant of missionary money was made to the First Presbyterian Church of New York City. The synods of Scotland and Ireland were sent to for additional means when the American church felt unable to meet all the demands in the rapidly growing country.

At the first meeting of the General Assembly which was organized in 1789, it was resolved to send forth missionaries to the frontiers to organize churches and attend in general to the religious and educational needs of the people. To meet the expenses to be incurred, the presbyteries were enjoined to take up collections. Books and Bibles were bought or donated, and were distributed by these missionaries.

In 1803 the work had grown to such dimensions that the first regularly constituted Board was formed under the name of the Standing Committee of Missions. Nominations of missionaries were made by it and presented to the General Assembly for confirmation. During the years of revival which marked the beginning of the present century great success attended the labors of its missionaries.

After the War of 1812 the Committee felt unable to cope with the increased needs and opportunities of the work, and the General Assembly in 1816 organized a larger and more comprehensive body to take up the work, called “The Board of Missions.” Its power was such as to enable it to conduct the missions and decide all questions as to the appointment of missionaries and the payment of salaries, without waiting for the approval of the Assembly; it was further empowered to organize branch societies, and the church was urged to co-operate in such organizations.

Under the increased facilities which this Board presented the work grew rapidly. In the mean time the colleges of Hamilton and Auburn had already been established to supply the demand for an educated ministry. Central and Western New York were rapidly growing in population and importance in consequence of the opening of the Erie Canal, and the tide of emigration set in with a strong current toward the Central and Western States. Other churches besides the Presbyterian Church had felt the need of evangelizing these masses thus cut loose from home ties and restraining influences, and in 1826 the American Home Missionary Association was formed. In its directorship were many Presbyterians, and Presbyterian churches contributed to its support and benefited by its aid.

When the division took place in the Presbyterian Church in 1839, the Board of Missions remained in connection with the old-school branch, and in 1857 underwent a change in name, being called “The Trustees of the Board of Domestic Missions of the General Assembly of the Presbyterian Church in the U. S. A.”; the new-school threw in its allegiance for a time with the A. H. M. S. (q.v.), but gradually separated from it. The first step in departure was the organization in 1855 of a Church Extension Committee, which carefully disclaimed all intention of interfering with the work or support of the A. H. M. S.; but the differences grew, until finally in 1861 the new-school Presbyterian Church withdrew entirely from the A. H. M. S., organized a Presbyterian Committee of Home Missions, which superseded the Church Extension Committee and which conducted the home-mission work of that branch of the church, until finally in 1870 the glorious reunion of the two assemblies took place, and the two bodies, the Presbyterian Committee of Home Missions and the Board of Domestic Mission, were merged into the Board whose title is given at the head of this article. At the time of reunion the new-school committee had the names of 530 missionaries on its roll, and the old-school Board 613. The new Board was incorporated in New York in 1872.

Organization.—The members of the Board are appointed by the General Assembly, and number 7 ministers and 8 laymen; one of the ministers is the president of the Board. In addition there are two corresponding secretaries, a treasurer, and a recording secretary. The Board reports annually to the General Assembly, to which it is responsible for its actions, though it has absolute jurisdiction in the interim between the meetings of the General Assembly, but appeal can be had to the General Assembly. Its administrative offices are at 53 Fifth Avenue, New York City, together with the other offices of the various Boards.

*The Work of the Board* is in general the establishment of churches where there are none, whether this object be attained directly, or by the gradual process of first establishing a Sunday-school or street services. Within the last few years the Board has assisted in the organization of churches in the cities. This step was taken in view of the fact that about one fourth of the entire population is found in cities of not less than eight thousand people each, and the local churches or societies were unable to keep pace with the increasing demand. During the year 1890 there were 1,701

missionaries employed, distributed over 48 States.

Among the Mexicans, the Mormons, the Southern whites, teachers have been employed to start and conduct schools which are nuclei from which, in time, churches may be organized. Among the two millions of illiterate whites in the South the work has been most hopeful. The White Hall Seminary at Concord, N. C., the boarding-school for girls at Asheville, N. C., and other institutions of higher education are meeting the urgent demand of the South for education. In 1889 all the missions among the Indians where instruction is given in the English language were turned over to the care of the Home Mission Board. The following tribes of Indians are now under the care of this Board: the Nebraska Omahas, the Sacs, the Foxes, and the Chippewas. Among these Indians there are 164 teachers.

Among the Mormons there are 99 teachers in 37 schools with 2,374 scholars. The Mexicans are reached by 67 teachers, 32 schools, and 1,627 scholars. This school work is under the charge of the Woman's Executive Committee.

RESULTS.—The growth of the church has in the main been steady. From 177 ministers in 1879 there are now, in 1890, 6,158 ministers, 6,894 churches, with a membership of 775,903. The direct work of the Board has grown from a total force of 1,566 missionaries and teachers in 1885-6 to a total of 2,064 in 1889-90, and the funds expended from \$660,000, in round numbers to \$900,000. The magnitude of the work can easily be seen from the following general summary for the year 1890:

Number of missionaries.....	1,701
“ “ missionary teachers.....	368
Additions on profession of faith.....	9,795
“ “ certificate.....	7,091
Total membership.....	100,778
“ in congregations.....	151,366
Adult baptisms.....	3,844
Infant baptisms.....	5,031
Sunday-schools organized.....	578
Number of Sunday-schools.....	2,516
Membership of Sunday-schools.....	160,111
Church edifices (value of same, \$4,657,027).....	1,751
“ “ built during the year (cost of same, \$397,681).....	151
“ “ repaired and enlarged, (cost of same, \$65,178).....	321
Church debts cancelled.....	\$161,838
Churches self-sustaining this year.....	30
“ “ organized.....	200
Number of parsonages (value \$446,684).....	264

DOMESTIC MISSIONS, PROTESTANT EPISCOPAL CHURCH. Headquarters 21-23 Bible House, Astor Place, New York City.—Previous to the year 1820 some efforts had been made, notably by the diocese of Pennsylvania, to establish outposts of the church beyond the Alleghanies. In the year mentioned a project was formed to establish a general society to be known as “The Domestic and Foreign Missionary Society of the Protestant Episcopal Church in the United States of America.” In the following year this project took form and a Board of Directors was appointed. The beginnings were small, but such work as was undertaken was altogether in the home field up to the year 1829, when the first missionaries were appointed for Greece, and with that exception so continued until 1884 and 1885, when appointments of missionaries were made for Africa and China. Under this first organization of the Society, membership was secured by the payment of an annual amount, or life-membership and patronage by the payment at one time of respectively larger sums. For this period the

Society was practically a voluntary association within the church.

At the time of the General Convention of 1835, which was held in Christ Church, Philadelphia, there was a very strong feeling that the underlying principle of the Society was wrong, and upon the 20th day of August of that year a special committee, which had been appointed two days earlier, brought in a report to the “Board of Directors” of the Missionary Society recommending that “the Church herself, in dependence upon her Divine Head, and for the promotion of His glory, undertake and carry on in her character as the Church, and as the Domestic and Foreign Missionary Society, the work of Christian missions,” and that “the appeal of the Church through the Board for the support of missions is made expressly to all baptized persons, as such, and on the ground of their baptismal vows.” Upon this report was based the reorganization of the Missionary Society by the General Convention then in session.

By the constitution as amended it was declared that “this Society shall be considered as comprehending all persons who are members of this church.” For fifty years thereafter this one Society worked through two committees, one of which had the care and oversight of missions established within, and the other of missions established without, the territory of the United States, known respectively as the Domestic and the Foreign Committees.

At the General Convention held in Boston in 1877 the old Board of Missions, meeting annually and to some degree representative of the church at large, was superseded by the General Convention itself becoming such Board, and the appointment of a Board of Managers, to consist of fifteen clergymen and fifteen laymen, all the bishops being *ex-officio* members. In 1886 this arrangement was further modified by the addition of fifteen elected bishops to the Board of Managers, the other bishops still remaining *ex-officio* members. In the previous year the Domestic and Foreign Committees had been discontinued, the Board of Managers itself assuming immediate care of all the work at home and abroad, and meeting more frequently than it had previously met. The principles of the Society as reorganized in 1835 are well expressed by the motto which appeared for many years upon the title-page of “The Spirit of Missions,” its official publication: “It belongs to the calling of a Church of Christ to preach the gospel, not only in Christendom, but to all mankind, for the purpose of leading men to their Saviour.”

This paper, however, is to speak particularly of the Society's work in the home field. In 1835 the Rev. Dr. Jackson Kemper, rector of St. Paul's Church, Norwalk, Connecticut, was consecrated as the first of the long and honored line of missionary bishops, with the title of “Bishop of Missouri and Indiana,” but his jurisdiction was practically without limit, stretching as it did over so vast a tract of new country devoid of facilities or internal improvements. Dr. Kemper lived until 1870, dying as the diocesan of Wisconsin. In those thirty-five years he travelled 300,000 miles, many thousands of them on horseback, hundreds of them on foot, through snow and mud, under cold and burning skies, exposed to all vicissitudes. For the first twelve years he was never at home

except on Christmas Day. He ordained more than two hundred clergymen and confirmed about ten thousand persons. His original jurisdiction was divided and subdivided. At the time of his death seven dioceses had been formed out of it, and missionary jurisdictions had been erected one after another until every portion of the whole country, from the Atlantic to the Pacific, so far as this church was concerned, was under the immediate supervision of some bishop.

From the moment that the church declared herself to be a divinely appointed Missionary Society, she began to grow in a manner that was surprising even to the most sanguine of her members. Statistics cannot easily be compiled which would show the full measure of this growth, decade by decade, for the reason that each new diocese, immediately that it was set up, became itself a missionary society for work within its own limits and all the older dioceses (organized previous to 1835) were greatly stimulated in carrying on the work of diocesan missions, as well as in contributing for the regions beyond. Some idea of the growth of which we speak will be gained from the following facts:

The receipts for Domestic Missions for the fiscal year 1839-40 were \$25,000, and the number of Domestic Missionaries was 71.

For 1859-60 the receipts were \$66,304, and the number of Missionaries 140.

For 1879-80 the receipts were \$165,273, and the number of Missionaries 370.

For 1889-90 the receipts were \$251,502, and the number of Missionaries 640.

At the time of the last report it was estimated that a full computation of all the sums given for missionary work in the United States (exclusive of charities) by members of the Protestant Episcopal Church, including what are technically known as Diocesan Missions and the aid given by the Woman's Auxiliary of the Board of Missions, would exceed three-quarters of a million dollars.

While this work at home has been carried on for the most part as a unit, it has had many phases. At one time, for instance, the Board addressed itself to the Jews. This department has long since been in the hands of a separate society, now a recognized auxiliary, and the contributions for it do not appear in the foregoing figures. Work in later years has been carried on in our large cities among the Chinese population, but this for the most part has not been immediately under the General Board.

Since the close of the Civil War, missions to the colored people of the South have been a definite feature of the Society's labors. In the beginning there was a commission especially created for this duty. In 1877 this was discontinued. Ten years later the present Commission on Work among Colored People, having its centre in Washington, D. C., was appointed by the Board of Managers. The work is now larger than ever before.

From the very earliest history of the Society work has been prosecuted among the Indians. This assumed larger proportions in 1870, and one year later was placed under charge of a commission similar to that created for the Colored work. In 1879 the care of this sub-department was relegated to the Board of Managers. There has been very great vigor in the prosecution of this work afield under the able management of

the Right Rev. Dr. Henry B. Whipple, known as the apostle to the Indians of this generation, the Right Rev. Dr. Robert H. Clarkson, late bishop of Nebraska, the Right Rev. Dr. William Hobart Hare, and others. Bishop Hare was specifically consecrated for the work among the Indians in the Niobrara River district, although in course of time his jurisdiction was changed to include the whole population of what is now the State of South Dakota, together with an Indian reservation in Nebraska.

It is safe to say that no religious body has accomplished more valuable and permanent spiritual results among the Indians than has this church. This has been recognized and publicly acknowledged by independent witnesses not of its communion.

The work among people of our own race, by reason of immigration from all the nations of the civilized world, is most varied. In some of the dioceses the Prayer Book is used in three or more tongues.

There are at present employed in the domestic field twelve missionary bishops and 459 other ordained men, among whom is the bishop-elect of Alaska. Eighty-nine of these are employed in work among the colored people of the South—forty-three being colored men—and thirty-one among the Indians—eighteen being Indians. Sixty-six laymen and women are engaged in educational and other work among the Indians in five boarding-schools and at seventy-five stations—thirty-three of them being Indians. One hundred laymen and women—eighty of them being of the colored race—are employed as teachers in colored schools and otherwise at 132 stations. Eight of the missionary bishops and a large number of the bishops of the newer dioceses are giving earnest and successful attention to the work of Christian education in well-established schools, the training of young men of the soil for the ministry being especially cared for. Among the colored people of the South there are 117 Sunday-schools and seventy-seven day and industrial schools, in which about 9,000 children are being educated.

Looking back to 1835 and comparing it with the present, we may note the increase which, humanly speaking, is directly attributable to missionary work, by the following brief statistics:

In 1835 the Episcopal Church in the United States had 15 bishops, 763 other clergymen, with 36,500 communicants. The population of the country was then about 13,000,000. In 1890 there were 75 bishops and 4,000 other clergymen, with 510,000 communicants; and the population 62,000,000. Thus while the population of the country has increased four and one-half times, and that largely by reason of immigration, which has not, in the first generation at least, very greatly increased the membership of this church, the number of communicants has increased fourteen times. In 1840 the ratio was one communicant in each 308 of the population; in 1890, one in each 122 of the population.

AMERICAN HOME MISSIONARY SOCIETY. Headquarters, Bible House, New York, N. Y.—When this Society was organized, in 1826, several local organizations for home-missionary work were in operation, some of which originated in the last century. The Society for Propagating the Gospel among the Indians and others in North America was founded in 1787; the Mis-

sionary Society of Connecticut, and the Berkshire and Columbia Missionary Society, in 1798; the Massachusetts Missionary Society in 1799. Others of a later origin existed in the other New England States and in New York. Some of them confined their operations within their own geographical limits. Others sent missionaries to the destitute in the new settlements of Northern New England, and the remoter wilderness, even to the banks of the Mississippi. But as these societies acted independently of each other, some sections were over-supplied with laborers and others were left in utter destitution. Moreover, the laborers sometimes came into competition and conflict with each other, and the funds contributed for their support were worse than wasted. It was evident that a more comprehensive and effective system must be devised to supply the destitute portions of the country with gospel ministrations; but no direct steps were taken toward the solution of this problem till 1825, when plans were formed which resulted in the organization of the American Home Missionary Society.

The United Domestic Missionary Society, undenominational in its principles and spirit, was formed in 1822. At an important meeting, composed of eminent New England ministers, held in Boston January 11th, 1826, a resolution was adopted recommending that the United Domestic Missionary Society of New York become the American Domestic Missionary Society. The Executive Committee of the U. D. M. S. cordially responded to the overture from the Boston meeting, and issued a circular to friends of Home Missions in all parts of the United States, inviting them to meet in New York to form an American Home Missionary Society. One hundred and twenty-six individuals, representing thirteen States and four denominations, responded to this invitation, and met in New York (Brick Church) on May 10th, 1826. On May 12th the United Domestic Missionary Society, in responding to the proposition made by the convention meeting in the Brick Church, adopted the following resolution:

*"Resolved,* That the recommendation of the convention be adopted, and the U. D. M. S. now become the American Home Missionary Society, under the constitution recommended by the convention."

Officers were at once elected and the work begun.

*Its Constituency.*—Of the churches co-operating, the Associate Reformed shared but little either in its labors or benefactions. The Reformed Dutch churches withdrew when their own Board was organized in 1832. The New School Presbyterian churches continued to co-operate until 1861, when the General Assembly instituted its Presbyterian Committee on Home Missions. Thus the A. H. M. S., without any change either in its constitution or principles of action, became the organ of Congregational churches only.

*Its object* was "to assist congregations that are unable to support the gospel ministry, and to send the gospel to the destitute within the United States." It was to supply the destitute everywhere, but especially those in the new settlements on the Northern and Western and Southern frontiers, with the privileges of the gospel through the ministry of the Word and the Church of God.

*Its method* has been to supplement the former

plan of mere missionary tours, pursued by the Domestic Missionary Societies, by providing permanent churches and a permanent ministry, entering into partnership with each church in sustaining its minister, stipulating that it shall bear its full share of the burden, an annually increasing share, until the church shall become self-supporting. The stimulating effect of this system is seen in the fact that, during the last ten years, more than 50 churches have been annually brought to self-support; and the average annual expenditure for a year of missionary labor has been but \$263.

Its *Educational Department* was added in 1880, a clause being inserted in the constitution enabling it "to send the means of Christian education to the destitute." Experience has shown that some intellectual training under Christian auspices is essential to the best success of evangelical effort, and should be associated with it.

Through the *Woman's Department* no inconsiderable portion of revenue has been obtained.

The estimated value of gifts sent in "missionary boxes" during the last twenty years has exceeded \$50,000 annually.

Its *Children's Department* has within a few months reported the organization in ten States of 50 Home Missionary Circles of children.

*Its Foreign Department.*—When the Society was organized, our population was being increased by only 10,000 immigrants annually. In 1882 no less than 788,992 immigrants reached our shores, increasing our foreign-born population to more than 8,000,000, and adding the children, the number was increased to 17,000,000, or about one third of our whole white population. In view of the peril to our country involved in this vast increase of foreign immigration, the Society in 1883 entered upon a more distinct systematic effort in behalf of this class of our population. In these four years the work has made rapid progress, and the number of missionaries who have preached in foreign languages during last year (1888) is 136.

*Summary.*—Of the 4,689 Congregational churches in the United States, 3,824, or more than four fifths of the whole, were planted, and many more have been fostered by the American Home Missionary Society and its auxiliaries. Since the organization of the American Home Missionary Society in 1826, 376,961 members have been added to churches under its care.

In 1889-90 1,879 home missionaries were employed, 7,211 hopeful conversions were reported, 10,650 members were received into home-missionary churches, 3,251 churches and stations were regularly supplied with the gospel, 56 churches reached self-support, 184 new churches were organized, 169 houses of worship were built, 86 parsonages were erected, 311 Sunday-schools were organized, 142,000 Sunday-school scholars were cared for, 97 young men connected with home-missionary churches were preparing for the ministry; 181 home missionaries labored among the Germans, Welsh, French, Swedes, Norwegians, Danes, Bohemians, Spanish, Indians, Mexicans, and Chinese.

Total expenditures in 45 States and Territories, \$604,000.

The work of church erection is carried on by a distinct organization, the Congregational Union.

MISSIONARY SOCIETY OF THE METHODIST

**EPISCOPAL CHURCH.** Headquarters, Fifth Avenue and Twentieth Street, New York, N. Y.

The origin of Domestic Missions in the M. E. Church was in 1812. Bishop Asbury about this date began soliciting funds for the support of ministers upon missionary circuits. This was the period of vigorous aggressive work in the Far West and in the New England States.

In 1819 the Missionary Society of the M. E. Church was formed, and in the autumn of 1820 it actively began its operations, sending Rev. Ebenezer Brown of the New York Conference to labor among the French people of Louisiana. In the preacher's meeting of New York, held April 5th, 1819, in the Forsyth Street Church, it was

*Resolved*, That it is expedient for this meeting to form a Missionary and Bible Society of the M. E. Church in America."

Article XIII. of the Constitution provided that the Society should be established "wherever the Book Concern may be located," and the General Conference was authorized to insert articles into the Constitution for such purpose, and to make the book-agents treasurers, and also to provide for the appropriation of funds within the object specified.

The plan of procedure was to organize auxiliaries in all the principal cities. The first auxiliary formed was the Female Missionary Society of New York, about ninety days after the parent Society was instituted, and anticipating all other missionary organizations of woman in the land. The Young Men's Missionary Society of New York was the next in order.

The Conferences of Baltimore, Virginia, Genesee, next in order formed auxiliaries, and the Boston Domestic Missionary Society became an auxiliary. These, with one each at Cortland, N. Y., Columbia, S. C., and Stamford, Conn., constituted all the auxiliaries reported the first year.

The General Conference in Baltimore May, 1820, adopted the report of a committee on organization, and gave the Society and the missionary cause a great and effectual impulse. The existence of the Society really dates from this General Conference of 1820.

The field embraces Arizona with 11 circuits or stations, Black Hills with 14 circuits or stations, Nevada with 25, New Mexico (English) with 10, New Mexico (Spanish) with 22, Utah (English) with 14, Utah (Norwegian and Danish) with 7, Wyoming with 13. Among the Indians there are (1889) 31 circuits or stations.

*Missions Administered by Conferences.*—American Indians; commenced in 1814. Central New York Conference has under its charge the Onondaga Indian Mission; the Columbia River Conference has the Simcoe Indian Mission; Genesee Conference has the church on the Indian Reservation; Puget Sound Conference has under its care the mission in Whatcom County; Wisconsin Conference has the Oneida Mission.

Welsh Missions, began in 1828, are conducted in Northern New York, Rock River, and Wyoming.

Chinese Missions, commenced in 1868, are conducted in San Francisco, Sacramento, San Jose, and Oakland. In addition to these fields the New York Conference opened (May 13th, 1888) a Chinese Mission at Seventh Avenue and

Twenty-third Street, New York; and the Oregon Conference founded a similar mission in Portland, Oregon.

Missions to the Germans.—In September, 1835, a missionary began laboring among the Germans in Cincinnati. In 1836 the field was extended to a circuit of 300 miles, having about twenty-five appointments.

In the next year the work was extended to Wheeling, Va.; then to Marietta and Miami, Ohio; and Pittsburgh, Pa. In 1840 a mission was begun in Louisville, Ky., and much fruit was gathered in. In 1841 the Chester Mission had its beginning, and the same year work was extended to Maysville, Ky.

Work now extended to the entire northern half of Ohio, and steps were taken to enter upon missions in the East. The New York Conference (1841) decided to open a mission in New York City, and in May, 1843, a larger edifice succeeded a small one, which had proved insufficient to accommodate the numbers in attendance.

In the South, work commenced at New Orleans in 1841. Stations were successively established in Indiana (Evansville), in Baltimore, in Newark, in Bloomingdale, in the vicinity of Pittsburgh, and in Iowa in 1844. The work extended to Detroit, and to Northern Ohio, embracing Delaware (1846), Galion, and Lower Sandusky, Cleveland and Liverpool also becoming stations. The same year missions were multiplied in Indiana, and begun in Booneville, Charleston, Madison, Rockford, Indianapolis, Laughtery, and Brookville. Missionaries to the Germans also began their labors in Milwaukee, in Chicago, in Galena, and in Dubuque; also in Buffalo, in Rochester, in Schenectady, in Poughkeepsie, and in Williamsburgh, Long Island.

In 1874 the work, in fact, covered the land, extending to the Pacific coast, in San Francisco, Oakland, San José, Stockton, Los Angeles, and Portland, and has gone on increasing with the opening up of new sections from that time till the present.

*Institutions of Learning.*—A Normal School was opened (November 23d, 1868) at Galena, Ill., whose aim is to furnish Anglo-German teachers for schools, and to fit students for college. The most important schools are at Berea, Ohio, a German department having been opened (1858) in connection with Baldwin University, and it is rapidly expanding into a college.

Another German college was organized (1872) in connection with the Iowa Wesleyan University at Mount Pleasant, Iowa. A nucleus for a fifth (German) institution has been formed in Texas.

Summary by the Report of 1889: Missionaries, 3,325 (in 1888, 3,632); local preachers, 3,594 (in 1888, 3,102); members, 261,981 (in 1888, 242,386); Sabbath-schools, 4,571 (in 1888, 4,977); scholars, 281,157 (in 1888, 241,610); churches and chapels, 4,569 (in 1888, 3,953). Estimated value, \$6,477,095 (in 1888, \$6,017,545).

Appropriations for home-mission work among foreigners, English-speaking and Indians, \$605,511 (in 1888, \$604,189).

**REFORMED (DUTCH) CHURCH IN U. S. A., BOARD OF DOMESTIC MISSIONS OF THE.** Headquarters, 26 Reade Street, New York.—Until the independence of the American Reformed churches in 1772, they were themselves missionary ground. At the close of the Revolution the

list of Dr. Livingston shows 85 churches, 32 ministers serving 53 of these churches, and two licentiates.

In 1786 the old Synod took the first action on the subject of church extension, and appointed Messrs. Westerlo D. Romeyn, H. Schoonmaker, and H. Meyer a committee to devise some plan for sending the gospel to destitute localities, and they reported to the next Synod, and recommended that voluntary collections be taken up in all the congregations, to aid in the extension of the church. This was the first effort made. The moneys collected were to be transferred through the Classes to the Synod.

The subject of church extension is found inserted as an item, in the regular business of each Classis, as early as 1790, and moneys began to come in for this cause. A Classis at this time would collect from £10 to £20 annually. At the close of the century all the Classes were forwarding money (most of the churches contributing), except the Classis of Kingston, for the cause of church extension.

The Synod in 1800 formally appointed the Classis of Albany to take charge of all the missionary operations of the North.

1806-1822. The Synod now appointed a committee of four ministers and four elders, with plenary powers, to whom should be confided all her missionary operations. They were located in Albany till 1819, when, on the final abandonment of the Canadian Missions, they were directed to locate henceforth in New York. They were known as the "Standing Committee of Missions for the Reformed Dutch Church in America."

The committee began their operations on the old plan,—short tours by settled pastors; but such efforts proved unsatisfactory. Settled ministers were wanted.

With the transfer of the committee to New York the Canadian churches were quietly abandoned. Some of the Classes now began to retain their money for their own missionary necessities. At the suggestion of Paschal N. Strong, a number of individuals in January, 1822, organized themselves into a society, to be known as "The Missionary Society of the Reformed Dutch Church." This act was made known to the Synod, and the matter was referred to the Committee on Missions. The birth of the Society was hailed with joy. Its board of managers was made Synod's Committee on Missions, and all the churches were exhorted to form auxiliary societies, both for domestic and foreign operations.

1822-32. The policy of the new Society was to employ as many of the graduates of the seminary as were willing to undertake mission work; to have auxiliary societies in every congregation, and to take up collections at the monthly concerts for prayer. During the ten years of its existence the Society collected more than \$30,000, aided about 100 churches or stations, and 130 missionaries. It also started, in 1826, the "Magazine of the Reformed Dutch Church," which, four years later, was transformed into the "Christian Intelligencer."

The old Missionary Society consented in 1833 to become auxiliary to the Board, and for nine years the Board depended on Classical agents. At this time (1837) the first church of the denomination was formed in the West, at Fairview, Ill. In 1841 there were enough

churches to organize the Classes of Illinois and Michigan, and ten years later the Classis of Holland. The name of the Board was in 1842 changed from the "Board of Missions" to the "Board of Domestic Missions of General Synod."

The Board was reorganized in 1849, was incorporated in 1867, and now holds its own funds, which were previously held by the Board of Corporation. In 1854 the plan of a Church Building Fund was proposed. The aim was to raise funds to aid feeble churches by loans, to enable them to build places of worship.

The Fifty-seventh Annual Report to the General Synod (May, 1889) presents the following facts:

In the two departments there are 120 churches and missions, 93 missionary pastors; \$41,244 given for the support of pastors; \$1,975 to home missions, and \$4,144 to other benevolent objects.

Total receipts for the year, \$32,367.60.

BOARD OF MISSIONS OF THE METHODIST EPISCOPAL CHURCH (SOUTH). Headquarters, Nashville, Tenn.—In the charter of incorporation it is declared: "The object of said corporation is to provide for the support of public worship, the building of schools, churches, and chapels, and the maintenance of all missionary undertakings; to provide for the support of superannuated missionaries, and the widows and orphans of missionaries who may not be provided for by any Annual Conference; to print books for the Indian, German, Mexican, and other foreign missions, under the direction and according to the law of the said Methodist Episcopal Church (South)."

Its charter was obtained according to the laws of the State of Tennessee on the 8th day of April, 1881.

In 1846 the Mission Board reported 24,430 members, while the general minutes gave a total of 124,931. Many of the leading ministers of the South were noted for their devotion to the religious welfare of the slaves, and at an annual conference the presiding elder could pronounce no higher encomium on a pastor than to say: "He is a good Negro preacher." In 1860, when the war disturbed the labors among these people, the Methodist Episcopal Church (South) reported a colored membership of 207,766.

*Indian Missions of the Methodist Episcopal Church (South).*—In 1844 the Indian Mission Conference was organized. It included the Indian Territory and Indians in the Missouri Conference. At its session held in October of that year the work was divided into three districts, with 25 men, several of whom were Indians, and 85 whites, 33 colored members, and 2,992 Indian members.

In the division of the church in 1844 the Indian Mission Conference remained with the Methodist Episcopal Church (South). In 1846 the work was divided into the Kansas River, the Cherokee, and Choctaw districts, with 22 missions, 32 missionaries, 3,404 members, 9 churches, 18 Sunday-schools, and 7 literary institutions. Missions were established among the Pottawattamie, Chippewa, Peoria, Wea, Kansas, Wyandotte, Shawnee, Kickapoo, Quapaw, Seneca, and other tribes or fragments of tribes located on reservations in the Indian Territory.

The cloud of war for several years obscured the missions, and there were no reports. The

records of the Board from 1861 to 1870 remain undiscovered. From the statistical report of 1871 we find the following from the Indian Mission Conference: Itinerant preachers, 17; local, 54; white members, 139; colored, 437; Indian, 3,833. Total, 4,480. Sunday-schools, 12; scholars, 372. Expenditures, \$5,674.30.

Since the last date the work has been carried on steadily through itinerant and local preachers with their helpers, until the report of 1888 shows the following results: Travelling preachers, 45; supplies, 31; local preachers, 129; white members, 3,514; colored, 21; Indian, 5,246. Total, 8,781. Expenditures, \$17,874.60.

The Indian Mission Conference (Indian Territory) furnishes the following summary: Local preachers, 147; Indian members, 4,954; white, 3,616; colored, 17. Total, 8,587. Sunday-schools, 129; officers and teachers, 661; scholars, 4,301. Churches, 90; value, \$36,475. Parsonages, 24; value, \$10,025. Money expended for church purposes, \$4,164.73. Collections for domestic missions, \$1,000; foreign, \$1,171.62.

*Institutions.*—The Board has under its care the following institutions: *Galloway College* (Vinita, Indian Territory); *Pierce Institute* (Indian Territory); *Andrew Marvin Institute*; *Colvins Institute* (near Stonewall, Indian Territory), a manual-labor school; *Harrell International Institute* (at Muskogee, Indian Territory) is under the control of the Woman's Board of Missions of the Methodist Episcopal Church (South), having five departments—collegiate, academic, primary, music, and art.

The Oklahoma country is now open for occupation by the Indian Mission Conference.

*German Missions.*—No record is found of the German missions of this church prior to 1846. The records of that year report missions at New Orleans, Mobile, Charleston, and Galveston, with 5 missionaries, 139 members, 2 Sunday-schools, and 80 scholars. In 1861 there were: Missionaries, 23; members, 1,078; Sunday-schools, 11; scholars, 461.

The war greatly disorganized the German work. A number of the preachers and many members left for the Northern Methodist Church, which in the days of depression following the war was able to contribute more liberally than the South for their support. A number of preachers were true to their mother church.

*Western Work.*—In 1836 Texas gained her independence, and in 1837 the bishops of the Methodist Episcopal Church, in conjunction with the Missionary Society, commissioned Dr. Littleton Fowler superintendent of the Texas Mission. At the division of the church the mission had grown into two annual conferences. These adhered to the Methodist Episcopal Church (South). In 1846 they reported 61 missionaries; 6,817 white and 1,005 colored members. In 1888 they had expanded into five annual conferences, with 564 itinerant preachers, 961 local preachers, 117,652 members. The German Mission Conference and the Mexican Border Mission Conference are also the outgrowth of the old Texas Mission.

October 9th, 1849, three missionaries were appointed to California, who departed in 1850. In 1888 there were reported 108 itinerant preachers, 99 local preachers, and 7,957 members. July 19th, 1870, saw the beginning of that work which now includes the Denver, Montana, and Western Conferences. In 1888 there

were reported 100 itinerant, 64 local preachers, and 6,635 members.

*Columbia Conference* has three districts: (1) Oregon, which reports (1888) 19 charges supplied by 13 itinerant and 2 local preachers, and a membership of 869; (2) Washington, which reports 108 accessions, and a school (at Weston) with 36 students; (3) Spokane, which reports four churches and districts enjoying revivals.

*MISSIONS TO THE CHINESE.*—To give a full account of the work of home missions among all the different classes of foreigners that have come to the United States would be far beyond the limits of this work, originally designed especially for foreign missions. The work among the Chinese, however, is so distinctive and so important that it has been treated below somewhat fully.

Chinese immigrants came to America soon after the discovery of gold in 1848, attracted as were other men by the visions of wealth which that discovery excited in the minds of all. No large numbers came till 1852 and afterward, and at that time the Chinese Government was hostile to emigration. After the "Burlingame" treaty in 1868 the inalienable right of man to change his habitation was officially recognized by China as well as by the United States, and from that time till the first restriction act in 1882 the tide of immigration was a steady stream, and the number annually ran up to the hundred thousand. Since 1882, and especially since the exclusion act of 1888, the number has lessened, until the last census will probably show not more than 80,000 Chinese in the United States; a large decrease as compared with the figures for 1880—105,613. At first the advent of the Chinese was hailed with joy; now, denied the rights of citizenship, hooted at, persecuted, imposed upon, maltreated in many ways at the instigation of prejudice and ignorance, they still remain among us, with a pluck, a perseverance, an endurance worthy of admiration, and figure so little in the police courts, still less in the saloons, that one is oftentimes tempted to think that therein lies their lack of power for assimilation.

Christian work among this class of our immigrant population is fraught with peculiar hindrances for many reasons. (1) They are a migratory people, and return home as soon as they have secured a competence. (2) They know little of our language, and still less of our modes of thought; they ask but to be let alone. (3) The prejudice which they excite in the minds of most people has had its effect in making them doubly suspicious, especially when the man who stones them and the one who offers them Christian instruction is alike a "Christian" to their indiscriminating minds; and too often even those who are Christians refuse to have them baptized into the same church, and to allow them to sit at the same table with themselves. The people who sometimes are willing to send the gospel are very unwilling to have it shared by these strangers at their own doors. (4) The nature of their occupations and the mental capacity of the men, who are of the peasant class, render them somewhat dull to hear and slow to understand the truth given them. But the greatest impediments to the acceptance of the gospel by the Chinese are the inconsistencies which they see in the lives of those whom they consider Christians.

In spite of these hindrances, an important and growing work is carried on among the Chinese which demands particular mention. It is carried on in two ways, and by somewhat varying methods. There is regular missionary work, which is under the care of organized Boards or branches of some Board, and is conducted in the usual manner of all mission work, with missionaries who speak the language, and with preaching, teaching, and other evangelistic work, to which is added rescue work for the girls who are brought over to pander to the lusts of depraved Americans as well as Chinese. Then there is the great work which is carried on by individual churches, which partakes almost entirely of the nature of Sunday-school work, and is undertaken by faithful workers wherever the Chinaman is found. The methods adopted differ materially from those of the former in that English is the only medium of communication, and there is first instruction in English and then in gospel truth.

*Organized Missions.*—These are found mainly on the Pacific coast. The earliest effort of this nature was commenced in San Francisco in 1852 by Rev. W. M. Speer, at one time a missionary of the Presbyterian Board to China. He called the attention of the Presbyterian Church to the need of the Chinese in this country, and labored as their missionary for five years, when, his health failing, Rev. A. W. Loomis came back from China and took up the work. In 1870 the mission was reinforced by the return from China of the Rev. I. M. Condit. In 1877 work was begun in Oakland, and now there are the following stations on the Pacific coast: San Francisco, Los Angeles, Oakland, in California; and Portland, Oregon. Mr. and Mrs. Loomis, Mr. and Mrs. Kerr, are stationed at San Francisco, together with three female missionaries. A home for rescued Chinese women and girls has been in existence for fifteen years, during which time it has sheltered 260 persons, many of whom were saved from a life of the most dreadful slavery, at the risk of danger to the persons of the missionaries, and at the cost of much effort and appeal to the courts of law.

In the church at San Francisco there are 78 members, and much work is done by means of street-preaching, and house-to-house visitation of the women. At Oakland there is a church with 44 members, under the care of a native. One missionary and his wife, together with native helpers, have charge of the work at Sacramento, where there is a church, and Sunday and day schools are conducted. Missions are also conducted under the care of Chinese at Santa Rosa, San José, Napa, and Alameda. Los Angeles has a church of 65 members under the care of a missionary, and the school work is carried on both day and evening, for women and girls as well as for men. The mission at Santa Barbara has ten Christian Chinese, and a female missionary conducts the schools. The work in Portland is under the care of a returned China missionary. There are nineteen Christians, a home for girls (under the care of the North Pacific Woman's Board), and various schools. Two new schools have been opened during the last year—at Ashland and at Salem. The only work in the East under the care of the Board, is the mission in New York. It is the successor of work which was commenced by the Rev. Lycurgus Railsback in the Five Points House of Industry in 1869, and carried on for

many succeeding years by a faithful woman, Miss Goodrich. There is now a commodious mission room at University Place, where a Chinese assistant holds services and takes charge of Sunday-school work. Every Sunday evening a prayer-meeting is held, at which the Chinese Christians take part. Several Chinese have joined the church, and money is contributed toward the support of a church in the native district from which these immigrants come.

*The Methodist Episcopal Church (North)* commenced a mission to the California Chinese in 1868, under the superintendence of Rev. Otis Gibson, D. D. The mission is now under the care of Rev. F. J. Masters, formerly stationed at Canton, China. Since the establishment of the mission up to 1890, 352 were admitted to the church, 230 Chinese women and girls were rescued from slavery, and upwards of 4,000 Chinese have received religious and secular instruction in the schools. There are missions at San Francisco (105 church-members), Sacramento (19 members), Oakland (19 members), and San José (12 members). In Oregon the work is under the care of a missionary and his wife who reside at Portland, and there are 15 church-members. The Society also has a mission in New York, which was opened May 13th, 1888. It was the combination of Sunday-schools which had been carried on in the Eighteenth-street and Seventh-street churches. The rooms are always open for the use of the Chinese, and Sunday-school and prayer meetings are held weekly. Several Chinamen have been baptized from among the students.

*The American Baptist Home Missionary Society* commenced its work in San Francisco in 1870, at which time there were 3 missionaries. The mission at Portland was opened soon afterward. At present the work is carried on in California with headquarters at San Francisco, and in Oregon. A returned China missionary is the superintendent of the missions. In San Francisco there is a Chinese church of 41 members, under the care of a Chinese pastor. In Portland there is also a Chinese church and pastor, with 41 members, and a Chinese missionary, who works among the Chinese in other places in Oregon. There are in addition 6 mission schools. The first church built for the Chinese was dedicated in San Francisco in connection with this mission in August, 1887. The greatest harmony exists in San Francisco between all these missions, and a service is held in the streets, at which the different missionaries preach in turn. The United Brethren have a mission in Walla Walla, Washington.

*The American Missionary Association* carries on a widely extended work among the Chinese on the Pacific coast. Its methods are those which characterize the second division of the work, the Sunday school system, rather than those of the above-mentioned missions. In addition to the Sunday-school, day and evening schools are held, whose teachers are engaged in teaching English and then the gospel. Indeed, it is claimed that the first school work of this kind was undertaken by Mrs. E. L. Lynde, of the Congregational Church in Oakland, in 1867. The mission of the Association was commenced at San Francisco in 1870, under the superintendency of the Rev. John Kimball with 329 scholars. Since 1875 the care of the mission has been placed in the hands of

the Rev. W. C. Pond, pastor of the Bethany (Congregational Church of San Francisco. In 1875 the General Association of the Congregational churches in California organized the California Chinese Mission, auxiliary to the A. M. A., with Rev. J. K. McLean, D.D., as president, and Dr. Pond as secretary. During 1889 the auxiliary raised \$4,299.55 for the expenses of the mission, in addition to the \$7,100 which was appropriated by the A. M. A. for the work. The missions are: 3 in San Francisco—the Central, the Barnes, and the West; and 14 at Oakland, Santa Cruz, Los Angeles, San Diego, Riverside, Fresno, Stockton, Sacramento, Oroville, Marysville, Petaluma, Santa Barbara, San Buenaventura, in California; and Tucson, Arizona. There are 21 lady-teachers, and 10 Chinese, with a total of 1,380 in attendance on instruction. Over 750 conversions are the result of these missions, of which 150 were the gain during one year. At Marysville and Oroville there are Chinese churches; at the other missions the converts join the American Congregational churches. In 1871 the "Congregational Association of Christian Chinese" was organized in San Francisco, and now has a branch at each of the missions. It is a Christian association, to which every Chinese must belong for six months of probation before he is admitted to the church. It is also a missionary organization, and it was in direct response to their contribution of \$500 that the A. B. C. F. M. sent out in 1883 the missionary who has charge of its work in Hong Kong and part of the Canton province. In 1890 these Christian Chinese, together with those of other denominations, raised a sum of money to build a chapel and start a mission in their native district, near San-ui, Kwangtung. One Christian Chinaman has paid the salary of a Christian Chinese physician, and another Christian Chinese supplies the medicines which are dispensed. In all \$2,500 was raised in 1890 by this Association.

*Unorganized Work.*—After the school was started in New York which was afterwards handed over to the care of the Presbyterian Board, it was many years before the churches awoke to the responsibility which was imposed upon them by the presence of these strangers within our gates. The work was so difficult; it seemed such a hopeless task to teach a Chinaman his letters for an hour or two a week; there was no romance of missions, no display of self-denial, in teaching the heathen at home; and it was difficult to overcome the distrust of the Chinese sufficiently to insure their attendance. But godly women took up the arduous work. At first by inviting the Chinese to their own homes one at a time, then gathering them into a secluded corner of the church Sunday-school room, until finally a Sunday-school would be organized—in this way schools were started in the principal cities. In 1876 such a school was started in connection with the Mt. Vernon Church of Boston, which is now the largest school in the country. In 1878 the Trinity Baptist Church in New York City commenced a Sunday-school for the Chinese, and within the last decade such schools have been started in nearly all the large cities along the Atlantic coast, and inland, and also in many small places devout women have gathered the two or three Chinese together for instruction. In the spring of 1890 a monthly magazine was published in New York City for the pur-

pose of establishing communication between the scattered and unorganized workers, as well as for publishing Christian teaching in Chinese.

The "Chinese Evangelist," as it was called, was published in both Chinese and English by Guy Maine, a Christian Chinaman, and J. Stewart Happer, son of the China missionary. It was partially self-supporting with the aid of donations for two years, but had to be relinquished in April, 1890, on account of the lack of sufficient remuneration for the labors of the editors, which had been gratuitous for two years. During its existence a list of the schools was published, together with statistics which, though incomplete, were more full than anything that had yet been compiled. Its subscription books gave a good idea of the extent of the work for the Chinese in the United States. It went to 31 States and Territories and 145 different post-offices. The schools given on the incomplete list numbered 123, with an average attendance, as far as could be ascertained, of 1,600, exclusive of the mission schools on the Pacific coast. There were 217 Christians in connection with these schools.

*Indirect Results.*—In addition to the direct results which the above account shows for the work among the Chinese, there is a result of the work which is no less important, though not so generally recognized. This is the reflex influence on China. It is a notable fact that the mission schools in this country have by disarming prejudice, by the power of kindness, been the direct means of opening fields in Kwangtung province to the labors of the foreign missionary. Men who have never shown any signs of a change of heart under instruction abroad have been so impressed with the spirit of kindness shown by Christians, that they have in many instances made the way easy for the foreigner who comes to their native village after they have returned to their homes, and the opposition of their neighbors has been overcome by words such as these: "The Christians were kind to me in America; these men are Christians: let them come; they intend to do you good." In this way several preaching places have been opened in districts which would otherwise have been inaccessible, and very often the itinerant missionary in the San-ui and Sining districts in Kwangtung is greeted with a "How d'y'e do" in English from a returned immigrant, and an invitation to come and spend the night with him has been the means of opening the way to the preaching of the gospel in that village. The results of the work, which is carried on in faith, though in darkness, can never be adequately represented by any figures save those which are kept in the book of the recording angel.

Some mention should be made of the work of the "St. Bartholomew's Chinese Guild" in New York City. This is an organization in connection with the mission rooms of St. Bartholomew's P. E. Church. On payment of a nominal fee, Chinese of good character may become members; and in addition to the privileges of the reading and meeting rooms at 23 St. Mark's Place, they are at liberty to call on the manager, Mr. Guy Maine, before mentioned, who will act as interpreter for them in any matters of legitimate business, and the services of the Guild's lawyer are available to protect them from impositions, or to defend them from malicious persecution. This Guild was opened

in 1889, and during the year 1890 there were 466 members; 776 cases were attended to. A Sunday-school is held every Sunday afternoon, and 6 Chinese have united with the church. One rescue case was successfully undertaken by the lawyer and manager of the Guild, and the rescued Chinese girl is now under Christian instruction.

The work in Vancouver, B. C., is not strictly within the scope of this article; but mention may be made that the Methodist Church of Canada has there quite a flourishing work under the care of a missionary of Chinese birth, who preaches and teaches in the Chinese language. The Presbyterian Church of Canada is also contemplating commencing work for the Chinese in Victoria in the near future.

### **Universalist General Convention.**

Secretary, Rev. G. L. Demarest, Manchester, N. H.—The Universalist churches of the United States are organized for missionary work, as well as for legislation, into State Universalist Conventions, of which there are twenty-five, and the Universalist General Convention. The work of the former is mainly home-missionary work; the latter has recently inaugurated a mission to Japan.

The General Convention is under a Board of Trustees, consisting of twelve members, of whom John D. W. Joy of Boston is chairman. They represent an organized strength of 934 parishes with about 41,000 families, who during the year 1889 contributed for missionary purposes \$43,000. In April, 1890, a band of missionaries was sent to Japan, and Tokyo was chosen as the field, but the work is as yet in the preparatory stages. For the support of this mission a special contribution of more than \$60,000 for five years was made. The care of the mission is with a standing committee of the Board of Trustees.

Women's Auxiliary Societies have also been formed in several places, one of which supports a mission in Glasgow, Scotland.

### **Universities' Mission to Central Africa.**

Headquarters, 14 Delahay Street, Westminster, London, S. W., England—The Universities' Mission to Central Africa was proposed by David Livingstone in 1857, and undertaken in 1859, after a second appeal by Robert Gray, Bishop of Cape Town. In 1861 Charles Frederick Mackenzie, Archdeacon of Natal, was consecrated bishop of the mission, and by him, under the guidance of Livingstone, the mission was started at Magomero, south of Lake Nyassa, a colony of released slaves forming the nucleus of the mission. The place chosen being found impracticable on account of the climate, the site was twice changed, but both places proving too unhealthy for the European missionaries, Bishop Tozer, who succeeded Bishop Mackenzie in 1862, then resolved to settle in Zanzibar, and there to devote himself to the training of released slave children. In the hope of forming with them Christian settlements on the mainland at a later date.

About ten years of quiet preparatory work was carried on in Zanzibar, under Bishop Tozer and Dr. Steere, in the education of rescued slaves, the preparation of grammars and dictionaries, and the translation of portions of the Scriptures.

In 1874 Bishop Steere succeeded Bishop Tozer, and in 1875 a station was opened at

Magila, on the mainland northwest of Zanzibar, by a colony of released slaves trained by the mission. With a view to the formation of stations in the interior, a half-way station was made at Masisi in 1876, and in 1879 the Rev. W. P. Johnson settled alone on the south shore of Lake Nyassa, but was expelled in 1881 by the chief of the district. In 1883 a station was opened on the east shore of Lake Nyassa, at Chitiji's, and was maintained for eighteen months under great danger, owing to the repeated attacks of the natives.

In 1883 Charles Alan Symthies was appointed bishop of the mission. In 1884, owing to the efforts of the Rev. W. P. Johnson, a steamer was purchased for the use of the mission on Lake Nyassa, and in 1885 a station was begun on the island of Lukoma, in the lake, where are now the headquarters of the Nyassa Mission.

The work is now carried on from three centres: Zanzibar Island, Lake Nyassa, and stations on the mainland between. There are in the field 26 English clergymen, 25 laymen, 20 ladies, 2 African clergy, and 32 native teachers and readers; about 420 children are supported by the mission, and 300 Africans are assisted by it and are under its care. The cost of the work in 1888 was upwards of £17,000; the funds are sent out to and are managed by the bishop himself.

**Unwana**, a town in Old Calabar, West Africa, near the Cross River. Climate tropical. Population, 4,000. Race and language, Ibo. Religion, idolatry. People peaceful, agricultural; polygamy common. Mission station United Presbyterian Church of Scotland (1888); 1 missionary and wife, 1 native helper, 1 Sabbath-school.

**Upolu Island**, one of the Samoan Group, South Pacific. Surface mountainous, covered with luxuriant vegetation. Area, 335 square miles. Chief town, Apia. Population, 300, of which 100 are Europeans. Mission station London Missionary Society; 5 missionaries, 104 native pastors, 4 stations, 209 schools. (See Samoa).

**Urambo**, a town in East Central Africa, between Lakes Tanganyika and Victoria Nyanza. Mission station of the London Missionary Society (1849); 2 missionaries. The missionaries at this station have enjoyed fairly good health, have had the friendship of the native chief; the confidence of the people has been won, and good preparatory work has been accomplished. A medical missionary was added to the force during 1890.

**Uriya Version**.—The Uriya, also called Orissa, belongs to the Indic branch of the Aryan family of languages, and is used in the province of Orissa, the greater part of which is attached to Bengal. Serampore missionaries translated the New Testament, which was published in 1811. The first translation of the Old Testament was made by Dr. Carey, and published in 1819. Shortly afterwards the first Baptist missionaries commenced this work at Cuttack, and as the whole Bible had been translated into the languages of the people, they could in this sense take to themselves the whole armor of God. A revision of the Bible, or rather of the Old Testament, soon became necessary, and Messrs. Sutton, Noyes, and Buckley betook themselves

to the work of translation or revision. The work was published under the care of Dr. Sutton at Calcutta by the Bible Society in 1844, in three volumes. A third was undertaken by the Rev. Dr. Buckley, which was published at Cuttack in 1872. In his work Dr. Buckley was aided by Jagoo Roul, a native minister, who had a more accurate acquaintance with the niceties of the Uriya language than any other native. A fourth edition of the Old Testament was also prepared by Dr. Buckley. His object was to make Dr. Sutton's version something better, and to achieve this, Dr. Buckley availed himself of native opinion on questions of idiom and diction. He had carried on his revision up to the 83d Psalm, when he was suddenly called to rest in 1886. Up to March 31st, 1889, the British and Foreign Bible Society had disposed of 40,000 portions of the Bible.

**Uruguay**, the smallest republic of South America, is situated on the east coast, and is bounded by Brazil on the northeast, the Atlantic Ocean and the La Plata River on the south, and on the west by the Uruguay River, which separates it from the Argentine Republic. The country is divided into 19 provinces, with a total area of 72,110 square miles, and a population of 687,194. Seven per cent of the population are native-born, consisting principally of half-breeds; the remainder are Spanish, Italians, French, Brazilians, and Argentines. Montevideo, the capital, situated at the entrance of the river La Plata, has a good harbor and roadstead, and a population of 134,346. Uruguay was formerly a part of the vice-royalty of Spain, then became a province of Brazil, but declared its independence in 1825, which was recognized by the treaty of Montevideo (1828). By the terms of the constitution adopted 1830, a president, elected for four years, and a parliament, composed of two houses, constitute the government of the republic.

The territory is one vast pasture-land. On the rolling plains great numbers of cattle and sheep are raised, and the principal wealth and exports of the country consist of live-stock, and the resulting products. Agriculture is carried on to a limited extent. The climate is in general healthy. In the coast districts there are no great extremes of heat and cold; in the interior the thermometer ranges from 86° in summer to 35° in winter.

The state religion is Roman Catholic, but there is complete toleration, and the general condition of education is very satisfactory.

Missionary societies at work in Uruguay are: the Methodist Episcopal Church (North), with stations at Montevideo, Colonia, Tacuarembó, and Trinidad, under the charge of 1

missionary and wife, 2 female missionaries, 3 native ordained preachers; 6 chapels with 350 members, 11 day-schools, 700 scholars, 10 Sabbath-schools, 424 scholars. The South American Missionary Society, with stations at Fray Bentos and Salto, and 1 missionary.

**Usamiro**, a station of the C. M. S. on the south shore of Lake Nyanza, Eastern Equatorial Africa. Here it was that the intrepid missionary Alexander M. Mackay, after fourteen years of work, died. One missionary was left in charge, and reinforcements left England in April, 1890, to continue the work in this district.

**Utrecht Missionary Society.** Headquarters, Utrecht, Holland.—The object of this Society was to send the gospel to the Dutch East Indies. It was founded in 1859, and its first missionaries were sent out to Dutch New Guinea, or Papua, in 1863, when Mansinam and Doneh were occupied. In 1865 two more stations were opened—Andai and Rhoon. These stations have now each a resident married missionary, a church, and a school.

In 1865 work was commenced at Almahera, with two stations, Duma and Soakonora. At the former station there is a Christian village, and each station has a married missionary, with church and school work. A mission was begun in 1884 at Boeroe, with one station, Kawiri, under the care of a married missionary.

**Uvea**, one of the Loyalty Islands (q.v.), Melanesia.

**Uzbek-Turki or Sart Version.**—To the Turki branch of languages included in the Russian Empire belongs the ancient Ugur, which covers the varieties of Trans-Caspian Turki spoken by the Uzbek nation scattered over Central Asia southward from Tashkend to near Afghanistan, and westward from Fergana to the Caspian. Of these varieties the Jaghatai Turki of the Tekkes and of Central Turkestan has been treated already. Another variety is the Uzbek Turki or Sart, and into this dialect Mr. Osbrunoff, a Russian inspector of schools, undertook a translation of the New Testament, of which the four Gospels were published by the British Bible Society at St. Petersburg, in 1888. The translator, who is acquainted with the different Turki dialects of Central Asia, believes that the Uzbek, which is used by the more settled and civilized portions of the inhabitants, is certain to become the dominant language of Central Asia. The version, which is in the Sart dialect, was amended by the Rev. A. Amirkhanianz, and printed under the care of Dr. Sauerwein, and Messrs. Radloff and Amirkhanianz.

## V.

**Valparaiso**, an important city of Chili, is situated on a bay of the same name. It has many institutions of learning; the streets are narrow, but usually well paved, and the houses present a gay appearance with their bright colors and overhanging balconies. A railroad connects it with Santiago. Population estimated at 212,810 (1889).

Mission work is carried on by the Presbyterian Church (North); 2 missionaries and wives, 7 out-stations, 90 communicants.

**Van**, a city in Armenia, East Turkey, on the east shore of Lake Van, 145 miles south-east of Erzroom, 350 miles southeast of Trebizond. Climate mild, healthy; elevation

5 500 feet. Population, 50,000, Christians, Moslems. Races, Armenians, Koords, Turks. Mission station A. B. C. F. M. (1872); 1 missionary and wife, 2 other ladies, 15 native helpers, 2 out-stations, 1 church, 37 church-members, 6 schools, 228 scholars.

It is now, as it always has been, the centre of Armenian influence in Eastern Turkey. On the picturesque castle of the city are a large number of inscriptions in Armenian cuneiform, dating back even earlier than many of the Assyrian inscriptions. Near Van is the island of Aghamar, the seat of an Armenian Catholicos, whose spiritual rank is equal to that of the Catholicos of Etchmiadzin. His influence however is small.

**Vanderkemp, John T.**, b. 1747, Rotterdam, Holland, where his father was pastor of the Dutch Reformed Church; studied at the University in Leyden; spent 16 years in the army, where he was captain of horse and lieutenant of the dragoons. After leaving the army he went to Edinburgh, where he became distinguished for his attainments in the natural sciences and modern languages. He then returned to Holland and practised medicine with great success. The accidental death of his wife and child, caused by a sudden storm which capsized the boat in which he was sailing with them, was the means of his genuine conversion, for though a nominal member of his father's church, he had become strongly influenced by infidel opinions. During the war with France he served in the hospital. Hearing of the appeal of the London Missionary Society, he offered himself to the directors, was accepted, and on the 3d of November, 1797, was ordained missionary to South Africa. Before leaving he organized two missionary societies, one at Rotterdam and one at Friesland, in his native country, to co-operate with the L. M. S. In 1798 he sailed with three others for Africa, taking passage in a convict ship. On the voyage he and his companions administered to the spiritual as well as the temporal wants of the convicts. Arriving at Cape Town in March, 1799, Dr. Vanderkemp commenced at once to labor among the natives, while at the same time he awakened a deep interest in missions among the Europeans. In May he left Cape Town for the interior. After a wearisome and dangerous journey he reached Graaf Reinet in June; and though the surrounding country was in a state of anarchy and strife, he pushed farther inland to the Great Fish River, at that time the southern limit of Kaffraria. After a month of waiting he secured an audience with the king, Geika, who gave him permission to pitch his tent, but advised him to leave on account of the unsettled state of affairs. Permission was finally given to start the mission near the Keiskammer River, where in October a station was founded. A school was opened, and in spite of messages from the governor at the Cape entreating him to return, left alone by the departure of his colleague, the doctor labored on for over a year, when the king, growing jealous of the advance which Christianity had already made, ordered the missionary to leave. Accompanied by his people to the number of about sixty, some English, some Hottentot, some Kafirs, some Tambookees, and some of mixed race, Dr. Vanderkemp started across the country, and for more than four months the caravan moved about from place to place, while

the faithful missionary continued the instruction of the people. In May, 1801, he arrived again at Graaf Reinet, and, declining a call to take charge of the church there, continued to give himself to mission work, especially among the Hottentots, of whom he soon collected a congregation of over 200. His efforts in behalf of this despised race aroused the enmity of the colonists, but by his wise conciliatory policy they were pacified, and he continued his work unmolested. Buildings were erected and Graaf Reinet was made a permanent station, but the privileges afforded to the natives at that station bade fair to stir up another rebellion, and Dr. Vanderkemp saw the necessity of removing the Hottentots to a place of safety, where they would form a colony by themselves. The plan was approved by the government, and a grant of land near Algoa Bay was made to the mission. This was occupied early in 1802 by a part of the congregation (160 in all), and though the movement was not attained with complete success, in September, when the governor visited them, he was so impressed with the good they were doing and the dangers they incurred, that he advised them to take up their quarters in Fort Frederick, from which the garrison had been removed, and the missionaries deemed it wise to take his advice. For the next few months the work was most encouraging, and several Hottentots applied for baptism. The doctor was at this time quite ill with rheumatism, so that he was obliged to perform the ceremony while lying on a couch. The country then passed from the rule of the English to that of the Dutch, and the governor, though prejudiced at first, soon became convinced of the good done by the missionaries, and offered assistance in the forming of a new station. In June, 1803, the missionaries and their people moved to a place seven miles north of the Bay, which they named Bethelsdorp, where a flourishing village soon sprang up, and a church and schoolhouse were built. From this time on, until the reoccupation of the colony by the English, the work was carried on with great vigor and success by the doctor. In 1807 great religious interest was manifested among the Kafirs, and the following year an out-station of Bethelsdorp was formed at Stuerman's Kraal. In 1810 the population of Bethelsdorp had become a thousand, and many who had been enemies to the mission had been won over.

The cruelties which the Hottentots had so often suffered at the hands of their Boer masters excited the deepest pity in the heart of the doctor, and it is said that in the course of three years he paid no less than \$5,000 for the redemption of slaves from bondage, and by his exertions, with the help of other missionaries, the Hottentots were finally delivered. Almost the last public service which the doctor was able to render that people was in testifying in the courts at the Cape to the wrongs practised upon the Hottentots.

He died on the 15th of December, 1811, in the midst of active preparation to enter upon a new field of work in Madagascar. One well acquainted with his life, character, and labors says that, "for combining natural talents, extensive learning, elevated piety, ardent zeal, disinterested benevolence, unshaken perseverance, unfeigned humility, and primitive simplicity, Dr. Vanderkemp has perhaps never been equalled since the days of the Apostles." Well does the venerable Moffat say of him: "He came from a univer-

sity to teach the alphabet to the poor, naked Hottentot and Kafir; from the society of nobles, to associate with beings of the lowest grade of humanity; from stately mansions, to the filthy hovel of the greasy African; from the army, to instruct the fierce savage in the tactics of a heavenly warfare, under the banner of the Prince of Peace; from the study of medicine, to become a guide to the Balm of Gilead and the Physician there; and finally, from a life of earthly honor and ease to be exposed to perils of waters, of robbers, of his own countrymen, of the heathen, in the city, in the wilderness."

**Van Lennep, Henry John**, b. Smyrna, Asia Minor, April 18th, 1815. His ancestors on the banks of the Rhine took part in the Thirty Years' War for religious liberty, and later engaged in business in the East. At the age of fifteen Henry was sent to America for an education. At seventeen the reading of the Memoirs of Levi Parsons, missionary in Palestine, and a letter from his mother led him to seek his own salvation "and that of as many others as possible." He graduated at Amherst College in 1837, and Andover Theological Seminary 1839; was ordained at Amherst; and embarked for Turkey the same year as a missionary of the A. B. C. F. M. He was stationed first at his native city, removed in 1844 to Constantinople, and in 1854 was sent as a pioneer missionary to Tokat, Asia Minor. In 1863 he was again stationed at Smyrna, where he remained till his final departure for America. His main work was preaching and education. He was distinguished as a linguist, preaching acceptably in four foreign languages—French, Armenian, Greek, and Turkish. He was a proficient in music, drawing, and painting, which were his favorite sources of recreation. He excelled as an instructor of youth. "Numbers of the most successful professional men among the evangelical Armenians and Greeks of Constantinople and Asia Minor—ministers, physicians, and instructors of youth—were his pupils." After retiring from his work abroad he secured to twenty-five Asiatics facilities for education in the United States. A prominent Armenian gentleman, a native of Constantinople and once a pupil of Dr. Van Lennep, says: "One of his best qualifications as a missionary was that he understood the people among whom he was working, and loved them. In the Bebek Seminary, where he taught for a while, the students looked to him not merely as a teacher and respected him, but also as their companion and friend, and loved him accordingly."

In 1869, blindness coming on and strength failing, he returned home, after thirty years of mission service, and resided at Great Barrington, Mass. He died January 11th, 1889.

Dr. Van Lennep was honored with the degree of D.D. by his "Alma Mater," Amherst College, in 1862.

**Varna**, a city on the east coast of Bulgaria, 160 miles north-northwest of Constantinople. Climate temperate. Population, 261,000, Bulgarians, Greeks, Armenians, Jews, Gypsies. Social condition quite low. Mission station Methodist Episcopal Church (North), 1884; 1 missionary and wife, 1 native helper, 1 out-station, 1 church, 13 church-members.

It is the terminus of the Varna-Rustchuk Railroad, and until the recent opening of the railroad from Constantinople to Vienna direct,

all travellers from Vienna by the Danube passed through it.

**Vaudois Version**.—The Vaudois is a dialect of the French, belonging to the Græco-Latin branch of the Aryan languages of Europe. It is spoken in Piedmont. At a very early period the Vaudois, or Waldenses, as they are sometimes called, had a translation of the Scriptures made into their dialect, at the instance of Waldo, or Waldensis, which was greatly blessed to them, and supported them in the endurance of many cruel persecutions. In 1831 the British and Foreign Bible Society published an edition of the Gospels of Luke and John in the Vaudois dialect, the translation having been made by Mr. Berte, pastor of La Tour. As the French is now the medium of instruction in all the schools, the French version is more generally read by the people than the Vaudois Gospels.

(*Specimen verse.* John 3 : 16.)

Perqué Diou ha tant vourgù Bén ar mount, qu'a l ha dounà so Fill unic, per que quionqu'érén el pèrissé pâ, mà qu'a l abbia la vita éternella.

**Vediarpuram**, a city in India, in the Trichinopoly district, Madras. Mission station of S. P. G.; 1 missionary; 9 native workers, 166 communicants, 2 schools, 98 scholars.

**Vellore**, a city in North Arcot, Madras, India, 15 miles west of Arcot, 89 miles west-southwest of Madras City. Tolerably clean and well built, containing many ancient buildings of interest. Climate very hot, but healthy. Population, 37,491, Hindus, Moslems, Christians. Mission station Reformed (Dutch) Church in America; 1 missionary and wife, 1 female missionary, 16 native helpers, 19 out-stations, 515 communicants, 742 scholars, 1 girls' boarding school, 66 scholars. Established Church of Scotland (1860); 19 native helpers, 1 school, 343 scholars.

**Velpur**, a town in the Godavari district, Madras, India. Population, 6,282, chiefly Hindus; a few Christians and Moslems. Mission station of the Evangelical Lutheran General Council; 1 native missionary, 2 other workers, 1 school, 12 children.

**Venezuela**, the most northerly of the South American republics, lies between British Guiana and Colombia on the east and west, with Brazil to the south and the Caribbean sea to the north. It has an area of 632,695 square miles, which is divided politically into eight large states, two national settlements, and eight territories. In 1888 the estimated population was 2,234,385, of whom the native Indians numbered 326,000. The government is modelled after that of the United States of America, with more freedom given to the provincial and local governments. Education is compulsory and gratuitous, and illiteracy is fast decreasing. In 1888 over 100,000 attended the primary schools. Higher education is applied by 2 universities, 20 federal colleges, 9 colleges for girls, etc. The state religion is Roman Catholic, and though other religions are tolerated, they are not permitted any external manifestations. The people are engaged in agriculture, cattle and sheep raising, and mining; there are very rich deposits of gold and silver, copper, and iron.

Caracas, the capital, has a population of 70,466. Protestant mission work is carried on solely by the American Bible Society, with the circulation of the Bible in Spanish.

**Venyane**, a town of Griqualand, East South Africa, 40 miles from Tinana. Mission out-station of the Moravian Brethren's station at Bethesda. The people are Kafirs of the Hlubi tribe, who are so eager for a minister that whenever the missionary from Bethesda comes there, they tell him they would like to detain him by force; and a small number of Hottentots, who moved there from Silo, who exert a good influence, and have been largely instrumental in making arrangements for a station.

**Vepery**, a town in the Mutyalapad district, Madras, India. Mission station of the S. P. G.; 2 missionaries, 10 native helpers, 373 church-members.

**Victoria**.—1. The principal city and capital of the colony of Hong Kong (q.v.).—2. A town in Tamaulipas, East Mexico, southwest of Ciudad. Hot, but healthy. Race and language, mixed Spanish and Indian. Religion, Roman Catholic. An out-station of the Matamoros Mission of the Presbyterian Church (South), with 1 native preacher.—3. Capital of Vancouver, British Columbia. The Methodist Church of Canada has quite a flourishing work among the Chinese immigrants; 1 missionary and wife, rescue home for girls, 67 church-members.—4. A town in Isupu, West Africa, at the foot of the Cameroon Mountains; has a small Baptist congregation, started in 1860 by Negro missionaries from Jamaica.

**Villupuram** (Wilupuram), (Belpore of the old maps, etc.,) a town in South Arcot, Madras, India, 25 miles west of Pondicherri. Population, 8,241, Hindus, Moslems, Christians. Mission station Evangelical Lutheran Society of Leipzig; 177 communicants, 98 scholars.

**Vinuconda**, a hill and town in the Kistna district, Madras, India. Population, 5,638, Hindus chiefly; a few Moslems and Christians. It contains an interesting hill fort, around which a number of legends cluster. Mission station A. B. M. U. (1883); 1 missionary, 13 native preachers, 6 churches, 3,616 church-members, 34 schools, 250 scholars.

**Vinton, Justus Hatch**, b. Willington, Conn., U. S. A., February 17th, 1806; graduated at Hamilton Literary and Theological Institution, 1828; appointed in 1832 missionary to Burma by the A. B. M. U.; studied with Dr. Wade and two native converts, a Burman and a Karen, who were then in the United States; sailed with Mrs. Vinton July, 1834, reaching Moulmein in December. Having studied the language at home and on the voyage, they began their work at once. Within a week they left for the jungles, traveling for three months from village to village, making known the gospel of Christ. At first they went together, but many calls coming from distant villages, they separated, each taking a band of native assistants: she going in her little boat, with a few of her school-girls, to the villages along the rivers, telling the story of redemption to the crowds who gathered about her; he visiting the mountain villages and places more difficult of access. They were

often in danger from robbers and wild beasts. But they had great success in their work. His labors were not confined to the Karens. He studied the Burmese that he might preach to the Burmans. During the rainy season, when travel is impossible, he labored among the English soldiers in garrison, preaching and distributing tracts among the Burmans, and translating the New Testament into Karen, or writing his commentary. In six weeks he distributed 8,000 tracts, and his labors among the troops resulted in the conversion of many, both among the common soldiers and the officers. In Moulmein Mrs. Vinton had in her school pupils who had come 200 miles for the sake of learning to read God's Word in their own language, threading the forests by night, not daring to travel by day.

The complete failure of Mrs. Vinton's health made a return home in 1847 necessary. Partly for his own health, and partly to arouse the missionary spirit in the churches, he accompanied her. By his earnest addresses and his sweet singing of "Rock of Ages" in Karen and English, and Dr. Brown's "A Missionary Call," he made a deep impression. His labors in Burma between 1834 and 1848 had been confined mostly to the Moulmein district, but on his return in 1850 Rangoon was to be the centre of missionary operations by the providential opening of the Pegu provinces to the gospel. In 1852 the English Government sent an armed vessel from Calcutta to Rangoon to demand redress from the Burman governor for outrages inflicted upon English residents in the Burmese dominions. The Burmans in defiance began preparations for resistance, repairing old fortifications, and erecting batteries on the river-banks. Enraged by the successes of the English, they treated the Karens, whom they considered the cause of their misfortunes, with extreme cruelty. The imploring cry for relief from the seventeen suffering Karen churches in Rangoon reached Mr. Vinton, and, urged by Dr. Kincaid and other missionaries in Moulmein, he went to their help. He found that three native preachers had been crucified, and 5,000 refugee Karens were living in carts and under trees. The Burmese part of the city being in ruins, he and Dr. Kincaid obtained permission to occupy the deserted monastery inside of the stockade, and six weeks after the capture of the city their families joined them from Moulmein. As soon as it was known that "Teacher Vinton" had come, the refugees, who had been driven from their burning homes, and who had been living secreted in the forests and jungles, subsisting on roots and herbs, flocked to the city, filling the monastery occupied by the Vintons, or camping out under the trees. They were not only hungry, but diseased. Mr. Vinton built a hospital for the small pox patients, to whom Mrs. Vinton ministered day and night. During most of the first year, besides the labors of the hospital, she had a school of 200 pupils, men, women, and children, mothers with babes in their arms, fathers and sons sitting on the same bench, learning to read the Word of God. Scarcely a day but many came in from the jungles—some for books and medicine, many for advice and consolation. In 1857 many were converted; 250 Karens, during the rains, learned to read the Bible; and 30 young men received Biblical instruction to fit them to work in the distant vil-

lages as preachers or school-teachers. The English army in its advance having threatened Ava, the king yielded, a treaty was made, and peace proclaimed. An order being issued by the English Government for the vacation of all the religious buildings occupied during the war, the Vintons left the old monastery which had sheltered them, and moved to Kemmendine, two miles from the fort. Here Mr. Vinton put up buildings for his family, and the large school which followed to his new home. Teachers were trained to take charge of the village schools, which were established when quiet was restored. A new trial now fell upon the Karens. War and pestilence were followed by famine. Mr. Vinton, by his earnest efforts to supply the wants of the suffering people, so won their hearts that they gathered about him in crowds, hailing him as their deliverer, and declaring that his religion was the one they wanted. "Thousands were baptized, churches organized, chapels and school-houses built, and the hearts of both Burmans and Karens turned toward God as never before." In 1854, at Mr. Vinton's suggestion, the Karens of the Rangoon district organized the Karen Home Missionary Society, the first of the kind ever formed in Burma, designed for aggressive work among the heathen, the natives already supporting their own pastors and schools. In May, 1855, the corner-stone of a church was laid by Mr. Vinton in the presence of a large assembly of native and English friends. A substantial church of brick was erected, with funds contributed in America, England, and Burma, at Kemmendine, on the Rangoon River, on land given to the mission by Lord Dalhousie, Governor-General of India.

In the mission now settled at Kemmendine Mrs. Vinton had the entire charge of the Pegu High School, numbering from 200 to 250 pupils. Mr. Vinton had during the rains a theological class of young men preparing for the ministry. News having come from the

mountains that many villages in a region never yet reached by missionaries, on account of its being difficult of access, were ready to receive the gospel, he went to survey the field and select the most eligible site for a station. He returned March 24th, complaining of being "very tired." The next day he was ill; fever set in, which was succeeded by dysentery, and he gradually failed, when, on the 31st of March, 1858, he passed away. "He is regarded as one of the most zealous and successful missionaries ever sent to heathen lands by the Baptists of the United States."

Mrs. Vinton remained, doing efficient work in Rangoon. Her daughter Calista, who, when the news of her father's death was received, was about to graduate at Suffield, at once prepared to sail for Burma, and joined her mother on Christmas Day, 1858. In 1861 Brainerd Vinton, having graduated at Madison University, married the daughter of Rev. Dr. Haswell of Moulmein, and sailed in September for Burma, to become the missionary of the Karen churches of the Rangoon district. The health of Mrs. Vinton and her daughter failing, they both embarked for America by the way of England, October, 1862, reaching New York June, 1863. Mrs. Vinton's health being partially restored, she returned to Rangoon, arriving March, 1864, followed soon by her daughter and her husband, Rev. R. M. Luther. Mrs. Vinton was suddenly attacked with an acute form of the disease which had long afflicted her, and died December 18th, 1864.

**Vizagapatam**, a town in Madras, India, situated on a small bay near a remarkable hill, bold and rocky, 1,500 feet in height. It is a military station with considerable trade. Population, 30,291, Hindus, Moslems, Christians, etc. Mission station L. M. S. (1806); 2 foreign missionaries, 1 native missionary, 58 church-members, 5 Sunday-schools, 375 scholars, 5 boys' schools, 481 scholars, 3 girls' schools, 197 scholars.

## W.

**Wadali**, an ancient capital city in Bombay, India, 26 miles northeast of Ahmadnagar. Mission station of A. B. C. F. M.; 1 missionary and wife, 41 native agents, 19 out-stations.

**Wade, Jonathan**, b. Otsego, N. Y., U. S. A., December 10th, 1798; graduated at Hamilton Literary and Theological Institution 1822; ordained February, 1823; embarked as a missionary of the A. B. M. U. for Burma June 22d, 1823; reached Rangoon December 5th following. At the commencement of the first Burmese war, soon after his arrival, he and Mr. Hough were arrested, imprisoned, and put in irons, then dragged to the place of execution, and compelled to kneel before a Burmese executioner, who had received orders to smite off their heads at the discharge of the first British gun on Rangoon. Panic-stricken at the sound of the cannon, the executioner, alarmed for his own safety, left his prisoners and fled. They were afterwards seized by the Burmese officials, but rescued by the advancing British troops. They went to Calcutta, remaining till the close of the war. Mr. Wade

resided at Doorgapore, near Calcutta, occupied in the study of the language, the translation of books, and in superintending the printing of useful works. He preached also in English in the Circular Roads Baptist Chapel, and many persons were converted. At the close of the war he returned to Burmah, making Amherst his home until the transfer of the mission to Moulmein, where he was stationed from 1827 to 1830. In that year he returned to Rangoon. In 1831 he visited Kyook Phyou in Arrakan, and began the work which was continued by Mr. Comstock and others. In 1832, on account of the failure of Mrs. Wade's health, he visited the United States, accompanied by a Burman and a Karen convert, returning to Burma in 1834. In December, 1847, he made a second visit to his native land, being threatened with total blindness. He re-embarked for Burma July 25th, 1850, resuming his work in Moulmein in January, 1851. He received the degree of D.D. in 1852 from Madison, now Colby, University. In the absence of Dr. Binney in the United States he had charge of the theological seminary for Karens at Moulmein. In addition to preaching

the gospel, he performed much literary labor. He reduced to writing the two Karen dialects, Sgau and Pwo, and prepared several important literary, theological, and educational works—among them a Karen Thesaurus, a work in 5 vols., the last volume completed in 1850. This he designed to be for the Karen language what Dr. Judson's Dictionary was for the Burman, and to its revision he devoted his powers as long as he was able to work. Though suffering greatly from an incurable malady, he continued his literary work for the mission with untiring assiduity until six days before his decease. After the death of Mrs. Wade he resided in the families of Mr. Bennett and Dr. Binney. Dr. Binney says that for months, after the labors of the day were ended, he was accustomed to spend an hour in the evening in conversation with him "on the missionary enterprise, the methods of missionary work, the necessities and modes of supply for the Karen field, and the great doctrines of that divine system on which his soul rested." Dr. Binney testifies that he was "edified and delighted with his broad and discriminating views, his ripe judgment, his practical wisdom, and his sound theology." He died at Rangoon June 10th, 1872, of cancer on the lip, after nearly forty-nine years of mission service, aged 73.

**Wakkerstroom**, a town in the Pretoria district, Transvaal, Africa, between Utrecht and Pretoria, north of the Orange River. Mission station of the S. P. G. (1880); 1 missionary, 159 church-members.

**Walfisch Bay**, a harbor of Namaqualand, South Africa, in British territory. (See Africa.) Mission station of the Rhenish Missionary Society; 1 missionary, 1 female missionary, 2 out-stations, 120 church-members, 40 school-children.

**Walker, Augustus**, b. Medway, Mass., U. S. A., October 30th, 1822; graduated at Yale College 1849; studied theology one year at Bangor, two years at Andover Seminary, graduating in 1852; ordained October 13th; sailed as a missionary of the A. B. C. F. M. January 7th, 1853, for the Assyrian Mission, and was stationed at Diarbekir on the Tigris—the field of his labors, his success, and his death. In 1864 he visited the United States for his wife's health, and sailed again with her August 19th, 1865, reaching Diarbekir November 21st. The cholera raging there, he spent some time over one stricken with that disease. He was soon himself attacked, and died September 13th, 1866. "Diarbekir," it is said, "was filled with mourning. Not Protestants alone, but Moslems and Armenians, all were stricken. Such a funeral, as of one who was a father to all, was never witnessed there before." "Mr. Walker had a clear head, a ready understanding, and very correct views of the way the work should be prosecuted. He helped to shape the policy of the mission, and was a strong pillar in it." "It was touching to witness the deep grief of this orphaned people, and to learn how heartfelt was the tie that bound them to a stranger from the far off-West. Singing the hymns he had taught them, they carried his bier on their shoulders two and a half miles."

**Walmannsthal**, a town in the Transvaal, Africa, on one of the sources of the Limpopo, northwest of Botchabelo, and northeast of

Pretoria. Mission station of the Berlin Evangelical Missionary Society (1869); 1 missionary, 8 native helpers, 5 out-stations, 420 church-members, 172 scholars.

**Ward Faith Mission in India.**—In 1880 Rev. Ernest F. Ward, of the United States, went to India with his wife, following a conviction that they must establish a mission there. They located the mission first at Burhanpur, in Berar, where land was purchased and a bungalow built. In 1884 the property was sold and the mission was moved to Ellichpur, where the property of another mission was purchased. There is now in connection with the mission a sanitarium among the hills, where the workers can retire in the hot season.

The property of the mission was purchased with money belonging to the founders. Since that time the work has been well sustained, although a rule of the mission is that no member of it shall ask any person for money or support in any way. Prayer to God is their sole reliance. Additional workers have joined the mission from America and England. Mr. Ward has assisted in reducing the language of the Korkoos to writing. He spends much time in visiting from village to village, and all of the workers carry on bazaar visitation, selling tracts and engaging in personal conversations. A school is conducted in the mission house.

**Warren, Edward**, b. Marlborough, Mass., U. S. A., August 4th, 1786; graduated at Middlebury College 1808, and after studying law entered Andover Seminary; graduated in 1812, and sailed as a missionary of the A. B. C. F. M. for Ceylon October 23d, 1815. His health soon failed from pulmonary disease, and April 25th, 1816, he sailed with Mr. Richards for the Cape of Good Hope, where, August 11th, he passed away. His body was interred by the side of a man supposed to be the first convert from Mohammedanism in Africa, who had died a few days before, aged seventy-seven, in the triumph of faith.

**Wanganui** (Whanganui), a town in New Zealand, on the southwest coast, at the mouth of a river of the same name. Mission station of the Church Missionary Society; 2 missionaries, 2 native pastors, 25 other native workers, 250 church-members.

**Ward, William**, b. Derby, England, October 20th, 1769. After learning the printers' trade, he studied for the ministry, and in 1798 was appointed missionary printer by the Baptist Missionary Society; sailed May, 1799, for Calcutta, but, owing to the opposition of the East India Company to missions in its territory, settled at Serampore, a Danish settlement on the Hoogly, 16 miles above Calcutta. In 1800 he printed Dr. Carey's translation of the Bengali New Testament and afterwards other translations, performing also faithfully other missionary labors. His health being impaired, he visited in 1819 England, Holland, and America, returning to Calcutta in 1821. He died at Serampore March 7th, 1823.

**Warmbad**, a town in Namaqualand, West South Africa, on a short northern branch of the Orange River, northeast of Steinkopf and northwest of Pella. Mission station of the Rhenish Missionary Society; 1 missionary, 1 single lady, 6 native workers, 360 church-members, 100 school-children.

**Warsaw**, a city of Polish Russia, on the Vistula River. Most of the city is well built, and recently many new structures have been erected. Population (1884), 454,898, Catholics, Jews, German Protestants, Greek Catholics. Mission station London Society for Propagation of the Gospel among the Jews; 2 missionaries, 1 native helper.

**Wartburg**, a town in Kaffraria, South Africa, north of Bethel. Mission station of the Berlin Evangelical Lutheran Society (1855); 1 missionary, 5 native helpers, 7 out-stations, 276 church-members, 96 scholars.

**Waterberg** (Waterburg), a town in the South African Republic (Transvaal), the same as Modimolle (q.v.). Mission station of the Wesleyan Methodist Missionary Society; 1 missionary, 1 chapel, 55 communicants, 42 Sabbath-schoolers, 35 day-schoolers.

**Waterloo**.—1. A town in Surinam, South America, is situated in Nickerie, the most western district, on the east bank of the Corentyn River. Mission station of the Moravian Brethren, commenced at the request of several planters, one of whom gave the plot of ground on which the station is built, and another presented the church. One missionary is stationed there.

2. A town in Sierra Leone, West Africa. Mission station of the Wesleyan Methodist Missionary Society; 1 missionary, 3 chapels, 352 communicants, 167 Sabbath scholars, 110 day-schoolers. There is also a native pastorate of the C. M. S.

**Wathen**, a district on the Congo River, West Africa, 80 miles west of Stanley Pool, 220 miles from the river's mouth. Climate tropical. Elevation, 2,000 feet. Race, Bantu. Language, Kikongo. Religion, Fetichism. Social condition low, but improved and improving to some extent, owing to their active trade. Government practically patriarchal, each town being a petty state, but all more or less subject to the Congo Free State. Mission station of the Baptist Missionary Society (1884); 4 missionaries, 1 married, 1 church, 10 church-members, 1 school, 38 scholars.

**Wa-ting**, a town in Shantung, China, north of the Yellow River. Language, Mandarin. Mission station Methodist New Connexion (1867); 2 ordained missionaries, 1 missionary's wife, 27 native helpers, 31 out-stations, 15 churches, 950 church-members, 10 schools, 109 scholars.

**Wazirabad**, a large town in the Punjab, India, 64 miles northwest of Lahore, 21 miles north of Gujranwala. The town is comparatively new, and has only recently risen to importance. It is much better and more regularly built than most native towns, although the houses are mostly made of sun-dried or kiln-burned bricks. Population, 16,462, Moslems, Hindus, Sikhs, Christians, Jains. Mission station Established Church of Scotland (1863); 1 native missionary, 5 helpers, 15 communicants, 9 schools, 480 scholars.

**Weasisi Version**.—The Weasisi, which belongs to the Melanesian languages, is spoken in Tanna, New Hebrides. In October, 1882, the Rev. W. Gray, from South Australia, opened a missionary station at Weasisi, and

translated the first six chapters of St. John's Gospel. These chapters were printed as a tentative edition by the Adelaide Auxiliary Committee, at the request of the Foreign Missions Committee of the Presbyterian Church of Australia in 1888.

**Wei-Hien**, a town in the province of Shantung, China, 150 miles southwest of Tungchow. Mission station of the Presbyterian Church (North), 1882; 4 missionaries (3 married), 2 physicians, 4 female missionaries (2 medical), 29 out-stations; 23 native helpers.

**Wei-hui**, a city in Honan, China, on the north side of the Yellow River. The Presbyterian Church of Canada has selected this place as one of the stations for their mission in Honan, which was commenced in 1889 (see article Presbyterian Church of Canada).

**Weligama**, a town in the Galle district, Ceylon. Mission station of the Wesleyan Methodist Missionary Society; 1 missionary. 1 chapel, 3 Sabbath-schools, 210 scholars, 3 day-schools, 593 scholars.

**Wellington**.—1. A town in Sierra Leone, West Africa. Mission station of the Wesleyan Methodist Missionary Society; 1 missionary. 3 chapels, 360 communicants, 113 Sabbath-schoolers, 210 day-schoolers. There is also a native pastorate of the C. M. S.

2. Town in New Zealand. Mission station of the United Methodist Free Churches; 1 missionary, 73 church-members, 180 Sabbath-schoolers. The Diocese of Wellington of the C. M. S. in New Zealand has at present (1890) two stations—Whanganui and Otaki.

**Welsh Presbyterians, or Calvinistic Methodist of Wales, Foreign Missions**. Headquarters, 28 Breckfield Road South, Liverpool, Eng.—The Calvinistic Methodists of Wales began to take an interest in missionary work at the time when the London Missionary Society was established. They contributed liberally to its funds, and several of the most useful missionaries of that Society had been trained in their churches. But the growing desire that the connection should have a mission of its own led ultimately to the Welsh Calvinistic Methodist Foreign Missionary Society, which was established in Liverpool in January, 1840. The first field, chosen immediately on the formation of the Society, was Bengal; and in 1842 operations in the foreign field were further extended by the opening of a mission among the Bretons in Western France.

The work of the Society is under the direction of an Executive Committee, twenty-one in number, appointed by the General Assembly of the church. This committee meets once a month to consider applications from missionary candidates, make arrangements for the sending out of missionaries, fixing their salaries, etc., to invest the funds of the Society, and prepare reports.

**DEVELOPMENT OF FOREIGN WORK. India Mission**.—In 1834 the British Government completed a treaty with the kings of Khasia, a group of small states in the extreme northeastern part of Hindustan, and a military post was to be established at Cherrapunjee, and a road made across the Khasia Hills to the British territory in Assam. When the Welsh Foreign Mission was established in 1840 the attention of the

directors was called to Khasia as a new and promising field. Accordingly, the plan seeming wise, the first missionary of the Society, the Rev. Thomas Jones, left for Cherrapoonjee in November, 1840. Missionaries were also sent out in 1842 and again in 1845; but at times, owing to various circumstances, defection, illness, and death, only one or two men were left to carry on the work, and the progress for some years was but small, if reckoned by the number of converts, which reached but fourteen in the first decade.

In 1846 a new station was established at Jiwai, the chief village in the Jaintia Hills, and in subsequent years the work was extended to various other parts of the hills. In 1849 the Rev. W. Pryse commenced operations at Sylhet, in the plains of Bengal. Though the work was carried on vigorously, and not without some degree of success, circumstances occurred which made it advisable to limit the operations of the mission to the hills, and until 1887 the large district around Sylhet was left unoccupied, when in that year the mission was again enabled to resume its work there. The mission field in India is divided into seven districts: Cherra, Shillong, Shella, Mawphlang, Khadsawphrah, Jiwai, and Shangpoong. Day-schools, evangelistic work, publishing in the Khasi language, and medical work are all features of the mission, and the beneficial results of the Christian teaching are strongly manifested in the general improvement of the domestic and social life of the entire district in which the mission works. Places for stated preaching, 136; Sabbath-schools, 140; Sunday-school scholars, 7,294; theological seminary, 1; theological students, 8.

*Brittany.*—The work in Brittany is carried on at the three stations, Quimper, Pont l'Abbé, and Douarnenez, with regular meetings at Peu-ar-bout and Treboul, and occasional visits to other villages on the coast of Finisterre.

**Welsh Version.**—The Welsh, which is spoken in Wales, belongs to the Keltic branch of the Aryan family of languages. The earliest reliable reference to a Welsh version of any portion of Holy Writ is contained in a letter of Dr. Richard Davies, Bishop of St. David's, prefixed to the first printed edition of the Welsh New Testament, published in 1567, in which the Bishop states that there was extant about the year 1527 a Welsh version of the Pentateuch, a copy of which he himself saw. The first edition of the New Testament, prepared by William Salesburg, was published at London in 1567. The edition consisted of 500 copies, quarto size, and was printed in black letter. The first edition of the Bible with the Apocrypha was printed in 1588, in one volume folio, and numbered 500 copies. The translation was executed by Dr. William Morgan, Bishop of St. Asaph. He undertook a second revision of the New Testament, which he completed in readiness for the press in 1604, when death put an end to his labors. Dr. Morgan's successor, Dr. Richard Perry, in conjunction with his chaplain, Dr. John Davies, undertook an entire revision of the Old and New Testaments. This revision was made so carefully that it became in fact the standard version of the Welsh Bible. It was first printed at London in 1620, folio size, and dedicated to King James I. In 1630 a small octavo edition was published at the ex-

pense of some Christian philanthropists, citizens of London. From the time of the publication of this edition to the establishment of the British and Foreign Bible Society, nearly 20 editions of the Welsh Bible were printed. Most of the editions were supported by the Society for Promoting Christian Knowledge. The edition published in 1799 was scarcely dry from the printer's hand before it was all sold, and this before a quarter of the demand had been satisfied. The most urgent appeals from all parts of the Principality reached the Christian Knowledge Society for further supplies of the Scriptures, but the state of the finances prevented this society from making any adequate response to the repeated cries for help. At this crisis in the history of the Welsh Bible, the Rev. Thomas Charles of Bala suggested the idea of establishing a large printing society, for the purpose of keeping Wales well supplied with Bibles. He was successful in securing the hearty co-operation of both Churchmen and Dissenters. The original plan was so ordered and developed that it ultimately eventuated in the institution of the British and Foreign Bible Society, which was established in 1804. The Bible Society's first edition left the press in 1800, following the text of the version of 1752 published by the Christian Knowledge Society (the first edition, known as the "Moses Williams" Bible, having been issued in 1718). Ever since, editions have been issued, and up to March 31st, 1889, the British Bible Society had disposed of 2,534,335 portions of the Scriptures, besides 105,994 New Testaments with English in parallel columns. Portions of the New Testament for the blind have also been issued by the same Bible Society.

(Specimen verse. John 3 : 16.)

Canys felly y carodd Duw y byd, fel y rhoddodd efe ei unig-anedig Fab, fel na choller pwy bynnag a gredo ynddo ef, ond caffael o hono fywyd tragwyddol.

**Wen-chau** (Wen-chow), a city on the coast of Chehkiang, China, southwest of Ning-po, 300 miles from Shanghai. Climate sub-tropical. Mission station United Methodist Free Churches (1878); 1 missionary and wife, 8 native keepers, 8 out-stations, 5 churches, 129 church-members.

**Wen-chau Colloquial Version.**—The Wen-chau belongs to the colloquial languages of China, and is used in Wen-chau, Mid-China. In 1888 the British and Foreign Bible Society published an edition of 500 copies of the four Gospels and Acts. The version was made by the Rev. W. E. Scotthill of Wen-chow, and revised by his fellow-missionaries. The style is that adopted by all the missionaries in Wen-chau. The edition is printed in Roman character.

**Wendish Versions.**—There are three dialects of the Wendish, which belongs to the Slavonic branch of the Aryan family of languages, viz., the Upper, the Lower, and the Hungarian. Before the Reformation the Wends had neither written nor printed books in their language. Rome had kept them in intellectual as well as spiritual bondage. But when the true light shone upon them, this darkness, both of mind and soul, was dispelled, and, like so many other races, they became indebted for

their literature and mental development to the publication of the Scriptures in their mother tongue.

1. *Upper Wendish*.—This dialect is spoken in Saxon Lusatia, and in it some portions of the Scriptures were published in the early part of the 17th century. The whole was first published in 1728, at Bautzen; a second and amended edition was issued in 1742, and a third in 1797. The Prussian Bible Society published an edition in 1820; the British and Foreign Bible Society issued one in 1860; and the Saxon Bible Society issued an edition, translated by Immisch, Siebert, and others, in 1879 at Bautzen.

2. *Lower Wendish*.—This dialect is spoken in Prussian Lusatia, and in it the Psalms, translated by Albin Moller, were published in 1574. The Old Testament, translated by Friedrich Fritze, was published in 1796, and the New Testament, prepared by Gottlieb Fabricius, was issued in 1709, and reprinted in 1728 and 1775. An edition of the entire Bible was published by the British and Foreign Bible Society in 1818; the Prussian Bible Society published a revised edition at Berlin in 1822-25.

3. *Hungarian Wendish*.—For the Protestants in Hungary and Carniola Stephen Kugnitz translated the New Testament, which was published by the British and Foreign Bible Society in 1817, together with the Psalms, translated by the Rev. Trplan. In 1882 the same Society issued an edition with a slight revision, limited to orthographical and syntactical errors, prepared by Pastor Berke.

(Specimen verses. John 3:16.)

*Upper.*

Přetohj tak je Boh tón Šmjet lubowal, to won  
šwojeho jenicjeho narobjeného Šýna dal je, to bhyu  
šchjgh, křj do njeho mjerja, šhubeni nebyli, ale tojczne  
žiwjenje mjeli.

*Lower.*

Přetoh tak jo Boh ten šwet lubowal, to won  
šwojogo šadnoporozjonego šýna dal jo, abú šchjgne  
do njogo přezje, šhubone nebyli, ale to njmerne žiwjenje  
měli.

*Hungarian.*

Ar je tak lübo Bög ete szvét, da je Sziná szvo-  
jega jedínorodjenoga dáo, dá vszáki, kí vu nyem  
verje, sze ne szkvari, nego má'ziték vekivecsni.

**Wen-li**, is the term applied to the classical or book language of China, as distinguished from the colloquial. To write in the same natural way as one would talk is contrary to Chinese teaching and practice; and the classical book style so abounds in stilted, condensed, epigrammatic phrases, that a man who has not mastered the literary style is unable to understand the sense, even though he may be able to recognize the characters or ideograms. A variation of the Wen-li is the Easy Wen-li, which is not so severely classical. For further information see Chinese Versions, and the Book Language under China.

**Wesleyan Methodist Missionary Society.** Headquarters, Centenary Hall, Bishopsgate Street Within, London, England.

**History.**—To find the real starting-point of

the Wesleyan Methodist Missionary Society, it is necessary to travel backward for a long distance,—to Wycliffe, from whom we trace it to John Huss, Wycliffe's disciple; thence to Zinzendorf and Francke; from them to Whitefield and John and Charles Wesley; and finally to the first distinctively foreign missionary of Wesleyan Methodism, Dr. Coke. As early as 1744, through the efforts of Whitefield, special hours of prayer for the outpouring of the Spirit of God upon all Christian churches and upon the "whole inhabited earth" were observed, and John Wesley went to North America to preach. From that time onward missions in the British possessions in North America were carried on, and numerous preachers were sent out. These missions, however, were mainly intended for the benefit of British colonists; and distinctively foreign work, i.e., missions to the heathen, was not undertaken until 1786, when Thomas Coke, destined by the Methodists in England for Nova Scotia, was providentially driven to the British West Indies, where a mission to the Negro slaves was at once commenced. In Dr. Coke's hand the conduct of the Wesleyan missions was mainly placed until 1804, when, upon his departure for America, a committee of three was appointed by the Conference to undertake the management of the work. It was at Dr. Coke's instigation that a mission to West Africa was undertaken in 1811, and after crossing the Atlantic eighteen times, when he was 76 years old, he again sailed with six other missionaries, December 31st, 1813, to Ceylon to found there the third Methodist Mission. His death, early in the following year, made necessary other arrangements for carrying on the work; the Society was accordingly reorganized, and in the course of a few years was placed on its present permanent footing.

**Organization of the Society.**—The object of the Wesleyan Methodist Missionary Society is to combine the exertions of the societies and congregations of the Wesleyan Methodists, in the support and extension of the foreign missions established by the Rev. John Wesley, the Rev. Thomas Coke, and others; and any additional enterprises which are now, or shall be from year to year, carried on under the direction of the people called Methodists.

The management of the missions and the collection and disbursement of funds are entrusted to a committee appointed annually by the Conference. The general secretaries of the Society, and two treasurers, a minister and a layman, are also appointed annually by the Conference, in accordance with any regulations which from time to time may be in force touching such appointments.

The committee meets in London once a month or oftener, for the transaction of business; and at its first meeting after the Conference appoints a Finance and General Purposes Sub-committee, to meet weekly to consider and report upon any matter, financial or otherwise, which may be submitted to it, and generally to prepare business for the committee. An annual public meeting for the members and friends of the Society is held in London in May. Missionary societies for the several districts into which the connection is divided in Great Britain, or elsewhere, are entitled Auxiliary Wesleyan Methodist Missionary Societies for the districts in which they are formed; and Societies in the several

circuits of any district are entitled Branch Societies for the circuit, or for the cities, towns, or villages in which they are established.

**Development of Work.**—Before the death of John Wesley, his teachings had been extended into Ireland, Scotland, the Shetland Isles, and the Channel Islands; and the first years of the new century saw the Methodists at work among the French prisoners in England and in the French prisons. As early as 1807 a society of seventy persons was reported at Arras, France, and Methodism rapidly extended to other parts of the country. Work was begun in Germany in 1830 by Christopher Gottlob Müller, who had been converted through the instrumentality of a Wesleyan minister; in Switzerland in 1839, by the Wesleyan missionaries already at work in the south of France; at Gibraltar in 1809, from whence Spain and Portugal were reached; and in Italy in 1860, after the revolution in the civil government had allowed a measure of religious liberty to the people. At an early period of the Society's history several mission stations were commenced at different points on the islands and shores of the Mediterranean, but after a few years were relinquished. In 1766 the first Methodist sermon was preached in America by a Mr. Embury at his house in New York City. In 1780 Methodism was carried to Canada by a local preacher; and not long after, missions were established among the Indians in Canada, and, later, work was commenced in Hudson Bay Territory and British Columbia. Nova Scotia, New Brunswick, Prince Edward's Island, and Newfoundland were early fields of work, and as has been said, it was to the first named that Dr. Coke was appointed by the Conference, when he was providentially driven to the West Indies. Upon Dr. Coke's recommendation a missionary was sent to the Bermudas in 1799. The mission to India at Ceylon was undertaken by Dr. Coke in 1813. The first scheme for the establishment of a mission to West Africa, devised by Dr. Coke in 1769, proved a failure; but in 1811 a second attempt was made at Sierra Leone, which was eventually successful; in 1821 a second station was opened on the river Gambia, and in 1834 a mission to the Gold Coast was undertaken. In the year 1814 the Society sent the Rev. John McKenny to Southern Africa as its first missionary. A little later a station was established in Little Namaqualand, and from this point the work extended by degrees throughout Southern Africa. In 1812 the committee received an appeal from two schoolmasters who were teaching in New South Wales, by order of government, to send out Wesleyan preachers to undertake a mission among the, at that time, desperately and shamelessly wicked inhabitants. Although the funds of the Society were hardly equal to such an undertaking, yet the committee began to look for a suitable missionary, with the hope that their friends would stand by them and provide the necessary money. The right man was soon found in the Rev. Samuel Leigh, who reached Sydney in August, 1815. Missionaries were sent to Tasmania in 1821, to Victoria in 1838, and to Queensland in 1850. The Mission to the cannibals of New Zealand was commenced in 1822; in the same year a missionary was also sent to the Friendly Islands, but it was not until 1826 that a mission was established there. As soon as this work

was on a firm basis, the missionaries endeavored to do something for Fiji, but some years elapsed before the mission to Fiji became an actual fact. Work in China was undertaken in 1853.

**Missions of the Society.**—**THE WEST INDIES.** *Antigua.*—In January, 1758, Mr. Wesley preached in the house of Nathaniel Gilbert, Esq., the Speaker of the House of Assembly in Antigua, who was at that time residing in England. At Mr. Wesley's service several of Mr. Gilbert's Negro servants were also present and appeared much affected by the sermon. Later on two of these slaves were baptized by Mr. Wesley. Mr. Gilbert, too, became identified with the Methodist people, and upon his return to Antigua commenced at once to hold religious meetings for his own people and those of the surrounding estates, and in every possible way labored for their good until his death. There was no one qualified to take his place, but the society he had formed was kept alive by the faithful labors of two Negro slaves named Mary Alley and Sophia Campbell, who were unwearied in their efforts to do good. They held prayer-meetings and other religious services until John Baxter, a shipwright, was sent to Antigua in 1778 on the king's service. Baxter was a Methodist local preacher, and when he found the remnants of Mr. Gilbert's society he immediately began to preach to them, with the most encouraging results. To meet the urgent demands for religious instruction he soon extended his labors to other parts of the island. At the same time he supported himself by his trade.

As the work expanded, application was continually made to Mr. Wesley and Dr. Coke for missionaries for the West Indies, but at that period every available laborer was required to assist in reclaiming deeply degraded populations in England and America. Consequently Mr. Baxter was left to toil alone for eight years, having under his care a congregation of 1,569 members, all black but ten, when help was sent in a way which has few parallels even in the history of missions. About five o'clock on the morning of Christmas Day, 1786, when the lonely preacher was on his way to the rude chapel he had built, he was met by a group of four weather-beaten travellers who had just landed from a half-wrecked vessel in the harbor. The principal person in the group inquired for Mr. Baxter, and his eyes sparkled when he found that he was speaking to the man himself, and understood where he was going at that early hour. This "little clerical-looking gentleman" was Dr. Coke, and his companions were Messrs. Hammett, Warrener, and Clarke, three missionaries with whom he had embarked at Gravesend for Nova Scotia, just three months before, and who had been driven by the violence of the tempest to the West Indies. The whole party went at once to the chapel, where Dr. Coke preached with all his wonted zeal and fire to a large and attentive congregation; and his loving heart overflowed with emotion as he gazed upon the upturned faces of a thousand Negroes anxiously listening to the Word of Life. It was afterwards arranged that Mr. Warrener should continue in Antigua, and that the others of the party should be stationed where their labors appeared to be most urgently needed, several of the West India colonies having already asked for missionaries.

During his stay Dr. Coke preached twice a day to crowded congregations, and on the 5th of January, 1787, accompanied by Mr. Baxter and the missionaries, he set out on a tour among the islands. They visited Dominica, St. Vincent's, Nevis, St. Christopher's, and St. Eustatius, collecting information, and embracing every opportunity to preach to the people. In all the islands but St. Eustatius there seemed to be openings for mission work; Messrs. Hammett and Clarke were left at St. Christopher and St. Vincent's, and Dr. Coke embarked for America February 10th, promising to send missionaries to the remaining islands as soon as possible. From year to year new stations were occupied and the number of laborers was increased, until almost every colony was brought under the influence of the gospel. In Antigua out-stations were formed at English Harbor, Parham, Sion Hill, Freetown, and other other places, in addition to the headquarters at St. John's, where the work commenced.

For Dominica nothing could be done until two years later, when the Rev. W. McCormick commenced a mission there. Within a few months Mr. McCormick died of fever, and Dr. Coke came a third time, leaving more missionaries. Notwithstanding the unhealthy climate and other drawbacks, the mission prospered. Chapels were built and societies formed in Roseau, the capital of the colony, in Lasoye, Prince Rupert's, and in other villages and towns. The little island of Montserrat was also visited several times by Dr. Coke, and in 1820 a regularly organized mission was established there and three stations formed.

A missionary was sent to Nevis in 1787, and from the beginning the work prospered in the stations of Charlestown, Gingerland, Combermere, etc. St. Christopher's (named for Columbus, its discoverer), where Mr. Hammett was left in 1787, soon had spacious and substantial chapels in Basseterre, the capital, at Old Road, Sandy Point, Half-way Tree, and other towns and villages. At St. Eustatius, owing to the determined opposition of the governor and other civil authorities, no mission was begun until 1811, when Rev. M. C. Dixon was appointed to the island, and all resistance having ceased, a flourishing station was soon established, which has now the cordial support of the authorities (Dutch), who have no mission of their own on the island. At St. Bartholomew's (belonging to Sweden) a mission was begun in 1796, which has never been relinquished, though emigration has reduced the population. Upon Anguilla (Snake Island) the gospel was first preached by a converted native, who was afterwards ordained as a minister. A missionary afterwards occupied the station, but owing to the smallness of the population and the pressing demands of other places it has of late years shared a minister with St. Martin's. Tortola, the largest and most important of the Virgin Islands, was visited by Dr. Coke in 1789, and the results of the labors of Mr. Hammett and his successors were such that it is now the head of a circuit. From here the missionaries extend their labors to West End, East End, Spanish Town, Road Town, and other places. The above mentioned islands are all included in the *Antigua District*. The *St. Vincent's District* includes the islands of (1) St. Vincent's, where Mr. Clarke was left in 1787. Many things hindered the work here, and the

Mission to the Caribs failed. After much bitter persecution from the authorities, religious liberty was at length restored to the land, and the work of the mission extended till the whole island was encircled with a chain of stations. (2) Grenada, originally a French colony, also presented many difficulties, notwithstanding which the work has been attended with a considerable measure of success. (3) Trinidad formerly belonged to Spain, and the prevalence of Roman Catholicism placed great obstacles in the way of the missionaries. For a time it was necessary to close the chapels, but an appeal to the Imperial Government brought relief, all restrictions were removed, and the mission was extended from Port-of-Spain to Diego Martin, Couva, San Fernando, and other places.

*Barbadoes.* The Wesleyan mission to Barbadoes was commenced in 1788, but for several years was less prosperous than the missions to the other islands. In 1822 signs of improvement appeared, upon which a storm of persecution burst forth, which culminated in the entire demolition of the chapel and mission-house, and the banishment of the missionary. In 1826 the mission was recommenced, and Barbadoes ultimately became a very important station. Tobago, the only remaining island of the St. Vincent's District, was repeatedly visited before arrangements were made, in 1817, for a permanent settlement. The labors of the missionaries met with varied success until the years immediately following the emancipation of the slaves, when a great revival of religion took place. In Scarborough, at Mt. St. George, Mason Hall, and other places chapels have been built, societies formed, and schools established.

*British Guiana.* Demerara.—In 1815 the Wesleyan Society succeeded in establishing a mission in Demerara, after a previous attempt (1805) had been frustrated by the expulsion of the missionary from the colony. It was with difficulty that the work was recommenced by Rev. T. Talboys, with the aid of two native converts from Nevis. Gradually the zealous efforts of the missionaries were crowned with success, culminating in 1868 in a great revival. From Georgetown the work extended to Mahaica, an ancient village on the coast, about twenty-five miles distant, and from here to many other places on the coast and inland. At a subsequent period a missionary was appointed to Victoria and Golden Grove, new villages formed soon after the emancipation. A mission to Essequibo was commenced in 1836. Out-stations with chapels and schools have been formed at Borg, Queen's Town, Ebenezer, Anna Regina, and other places, including the Island of Wakenaam. Berbice is a comparatively new station, which owes its origin to the removal of a considerable number of Wesleyan converts from the Leeward Islands. In conjunction with the Dutch Reformed Church in that place, the work has prospered, and several out-stations have been formed. A very important feature of this mission is the work among the Coolies, who are brought from the East Indies to supply the lack of agricultural laborers occasioned by the emancipation of the negro slaves (1838), many of whom then became mechanics and shopmen. The principal stations in British Guiana have for many years been entirely self-supporting, and have contributed liberally towards the funds of the parent society to help send the gospel to other lands.

*Jamaica.*—When Dr. Coke had succeeded in establishing Methodist missions in several of the smaller islands of the West Indies, he hastened to Jamaica, the largest and most important of the islands belonging to the British Crown. He preached several times, finding that the Negroes heard him gladly, and receiving from four or five wealthy white families promises of a warm welcome to any missionaries who might be sent to them. Upon his return to England the Doctor sent the Rev. William Hammett. Others were sent later, and Dr. Coke himself paid two more visits to Jamaica. Several of the missionaries fell victims to the climate, and much persecution was endured from the planters and white people generally. Nevertheless the efforts for the good of the Negroes were not relaxed, and the work spread from Kingston to Spanish Town, Morant Bay, Falmouth Bay, St. Ann's Bay, Bath, Clarendon, and other places far away in the interior of the island.

*Honduras*, although in North America, is, like British Guiana, usually classed with the West Indies. The population comprises a strange mixture of Europeans, Spanish creoles, Negroes, and Indians, and all classes were in a fearful state of degradation before Christian missionaries were sent among them. The Wesleyan Mission was commenced in 1825, in the town of Belize and among the scattered settlements of wood-cutters on the banks of the rivers. The climate is very trying, more so than that of the West Indies, to the European constitution, and a few months after his arrival the first missionary died; the second also died within a year from his appointment; but others followed whose lives were spared for a longer period, and the foundation was laid of a good work, which has steadily increased up to the present time. In 1868 a revival of religion took place, and the mission was then extended to Freetown and other places, which are now important stations. To supply as far as possible the spiritual needs of the mixed population, preaching and teaching are carried on in English, Spanish, and Maya, the language of a considerable tribe of Indians. Into the latter, portions of Scripture and other books have been translated, and it is hoped that by means of them access may be obtained to native populations which have not yet been brought under the influence of the gospel. In 1829 a mission was attempted to the wandering Indians inhabiting the Mosquito Coast, but the difficulties were so numerous and the prospect so discouraging that the undertaking was at length relinquished. The Honduras mission was formerly attached to Jamaica, but is now a separate mission.

*The Bahamas.*—The Rev. William Turton, a native of the West Indies, converted in the Wesleyan missions, was appointed to labor at New Providence, in the Bahamas, in 1803. He afterwards went to other islands in the group as openings presented themselves, being assisted by missionaries sent out from England. The gospel was thus carried to Eleuthera, Harbor Island, Abaco, Turk's Island, and other places, and great success attended the work.

*Haiti.*—In the year 1817 the Wesleyan Society sent two missionaries to Haiti to commence a mission. They were kindly received, and for some time labored without opposition; but when their efforts to evangelize the people

began to produce a powerful impression, a spirit of persecution was excited by the Romish priests which resulted in the passing of laws entirely subversive of religious liberty. The following year the missionaries were obliged to leave the country; but the people endured persecution with a patience and steadfastness that were remarkable, meeting together whenever possible for prayer and praise and keeping up communication with their banished pastors. At length it seemed possible to re-establish the mission, and in 1835 the Rev. John Tindall was appointed to Haiti, in conjunction with a converted native who had been instrumental in keeping the people together. For a time the work was prosecuted with cheering prospects of success, and various parts of the country were visited, and stations were established at Jérémie, Cayes, Cape Haytien, and other towns and villages of the republic, in addition to that at Port-au-Prince, the capital; but, in consequence of the instability of the government, the intolerance of popery, and the trying climate, this mission has always been a most difficult one, and, owing to these and other adverse circumstances, is now reduced to one station, although at one time constituting a separate district. In 1869, in the great fire at Port-au-Prince, the entire mission premises, consisting of chapel, school-house, and minister's residence, were entirely destroyed by fire.

*WEST AFRICA. Sierra Leone.*—The first British settlement on the west coast of Africa—the avowed objects of which were the suppression of the slave-trade, the encouragement of legitimate commerce, and the moral and religious improvement of the natives—received the name of Sierra Leone, from a river so called, on the southern bank of which the first town, appropriately named Freetown, was built. To this place a large number of slaves captured by British men-of-war were brought from time to time, for the purpose of settling them upon land bought for their use, so that the population consisted chiefly of liberated Africans, brought from different parts of the continent, and speaking different languages or dialects, who soon became industrious, learned to speak at least broken English, and attended to the instructions given them. A good work has been carried on among them for many years by several missionary societies, the results of which are encouraging. The capacity of the Negro race to receive instruction, and the perfect adaptation of the gospel to meet their case and to raise them in the scale of being, has been proved beyond the possibility of successful contradiction. As has been said, Dr. Coke's first scheme for the civilization of the Fulas, in the neighborhood of Sierra Leone, proved a failure. Some of the company sent out died of fever before reaching their destination, others absconded, and the rest returned home. In the year 1811 the Rev. George Warren and three school-teachers were sent to Sierra Leone. Upon their arrival in the colony they found about one hundred persons who were in the habit of meeting together for religious worship, and who called themselves Methodists. These people were chiefly free blacks from Nova Scotia, who had received the gospel at the hands of the missionaries there. They had already built a chapel, and had sent repeatedly to England for a missionary. After eight months of labor Mr. Warren died of

fever—the first of a long line of Wesleyan missionaries who fell victims to the climate. Many times reinforcements were sent out, many times the same sad story was repeated; nevertheless the faithful, though brief labors, brought forth abundant fruit, assistance was at length afforded by native converts, and after 1840 the European missionaries and their families endured the climate with less suffering from illness and bereavement than formerly. From one point of view the whole history of the Sierra Leone Mission seems but a mournful record of the sacrifice of young lives. There is a brighter side; and they did not labor in vain. Important circuits and out-stations were formed, congregations gathered, churches organized, and schools established, not only in Freetown, but also in Gloucester, Regent, Wellington, Risse, York, Kent, Russell, Wilberforce, Hamilton, and at other villages. At King Tom's Point, near Freetown, a seminary for the training of native ministers is in successful operation.

*River Gambia Mission.*—In 1866 an English settlement was formed on the island of St. Mary, near the mouth of the river Gambia, on the same principle as that at Sierra Leone. Nothing was done, however, for the religious instruction of the people until 1821, when the Wesleyan Society opened a station at a place called Mandanaree, on the mainland, but the dangers and difficulties here were so numerous that the missionaries resolved to remove to St. Mary's, where they might obtain medical aid in sickness, and where the people seemed more willing to attend to their instructions. In 1824, after the death of several devoted workers, the Gambia Mission was placed on a permanent footing. Buildings were erected and a girls' school established. Though suffering greatly from repeated bereavements, the work prospered, and after some native assistants had been trained an attempt was made to reach the Upper Gambia. War interfered; but as soon as peace was restored and the river was consequently open, a piece of land on Macarthy's Island was secured, and a chapel and school-house were erected, a number of little wild, naked children were collected, partially clothed, and put into a mission school. The experiment was a somewhat novel and amusing one, but with patience and perseverance succeeded better than was expected. The missionaries some time later returned to their station at St. Mary's, leaving in charge of the work at Macarthy's a native teacher, who did most faithful and noble work. Subsequently it was strengthened by the appointment of European missionaries, and from this point the Gambia Mission branches out into two divisions, each with a separate history. Important educational and translating work were undertaken at Macarthy's, but up to 1848 the mortality among the European missionaries and their families was so great, that it was deemed advisable to supply the station with native ministers, to act under the direction of a European minister at St. Mary's. These native preachers, who were brought from Sierra Leone, where they had received special training for their work, by their piety, zeal, and intelligence gave general satisfaction, and were very useful. The hope that the Fulas might be benefited by the Macarthy Mission has not been realized to any great extent; but to the multitudes of liberated Africans who settled

there, and to the Mandingoes, the mission has been of untold value. Meanwhile the Mission at St. Mary's made remarkable progress, but, like all missions to West Africa, was subject to many and sad vicissitudes, and for years the record of the mission is one of repeated sickness and death. But, as at Sierra Leone, the work made progress, and from the headquarters at St. Mary's spread throughout the island and to many points on the mainland, where stations were formed, chapels built, and schools established.

*Gold Coast.*—It was at a comparatively recent period that the Wesleyan Society commenced its mission to the "Gold Coast." At the principal British settlement, Cape Coast Castle, a few native youths had learned to read the Bible in the government school. They became so much interested in it that they formed themselves into a little society for its more careful reading and study, sending to England, through Captain Potter, the master of a British merchant vessel, for a supply of Bibles. The captain not only secured the Bibles, but also called at the Wesleyan Mission House, and generously offered to take out a missionary to the Cape Coast free of charge, and if the attempt to introduce the gospel there were not successful, to bring him home again. The committee appointed the Rev. J. Dunwell to sail with Captain Potter, and to commence a mission on the Gold Coast. He was received with kindness by the Governor, and with rapture by the youths who were so anxious for instruction. At Cape Coast and other parts of New Guinea which he visited his labors were greatly blessed, but in a few months he died of fever, the first of a long list who laid down their lives for the sake of the people inhabiting this unhealthy region. In 1845, the Rev. Henry Wharton, a native of the West Indies, offered himself for service in this mission, and about the same time several native missionaries were ready to assist in the work. It was still necessary to send out some European missionaries, but in consequence of some improvement in the sanitary condition of the country, and the assistance given by the native helpers, they were almost all spared to fill their term of service. Of the later reinforcements, some died very soon after their arrival, but others were permitted to labor through the allotted time, and important circuits were formed at Cape Coast Town, Dix Cove, James Town, Lagos, Badagry, Abeokuta, and other places along the coast and far away in the interior. For some time Coomassie, the capital of Ashanti, was occupied by the missionaries, and the gospel was faithfully preached to the king and his people, who delight in human sacrifices. At all the stations congregations have been gathered, places of worship erected, and schools established.

In the course of fifty years sixty-three missionaries had lost their lives through the climate of West Africa, or had died at sea when proceeding to or from their appointments; yet there was no lack of laborers: as one fell another volunteered to take his place, and so the work has gone on. As now organized, the Mission to West Africa comprises (1) the *Sierra Leone and Gambia district*, and (2) the *Gold Coast and Lagos district*, containing the Cape Coast, Aburah, Accra, Apollonia, Yoruba, Porto Novo, and Popo (Dahomey) sections.

*SOUTH AFRICA.*—In the year 1814 the Wes-

leyan Society put forth its first efforts for the evangelization of South Africa. Its first missionary was not permitted to preach in the colony, and was therefore instructed to proceed to Ceylon, but did not. The following year the Rev. Barnabas Shaw was appointed to commence a Wesleyan Mission in Cape Colony. Permission to preach was refused him, but Mr. Shaw took matters into his own hands and preached without the governor's sanction. His congregations, however, were composed principally of soldiers, and his greatest desire being to preach Christ to the heathen, he gladly availed himself of an opportunity which offered, through Mr. Schmelen of the London Missionary Society, to go to Great Namaqualand. In September, 1815, Mr. Schmelen and Mr. Shaw, with their families, attendants, and supplies, set out on their long journey. On the 4th of October, after crossing the Elephant River, Mr. Shaw unexpectedly found his sphere of labor, in meeting the chief of Little Namaqualand, accompanied by four men, on his way to Cape Town to seek for a Christian teacher, so that his tribe, like others, might have the advantages which he had seen follow the introduction of the gospel. Mr. Shaw agreed to go with the chief to his mountain home and to remain with him and his people, while Mr. Schmelen continued his journey to his own station in Great Namaqualand. About three weeks later the chief and his party reached Lily Fountain, on Khan-niesberg, the principal home of the chief of the tribe of Little Namaquas. As the wagon ascended the mountain, and long before it reached the chief's "great place," they were met by a party of more than twenty natives mounted on oxen, and riding at full gallop, who had heard the good news and had thus come to welcome their teacher, and especially to have a good look at the missionary's wife, whom they surveyed with reverence and awe, never having seen a white woman before. On reaching the end of the journey, a council was held by the chief and his head men, when they all entreated Mr. Shaw to remain with them and teach them, promising to assist him in every possible way in establishing a mission. Mr. Shaw therefore began at once to lay the foundations of a mission which, from that day to this, has continued to exercise a most beneficial influence on all around. He preached in the open air, and taught both young and old the elements of religion, and the use of letters, by which they might read for themselves the Word of God. It was hard and trying work, and required much patience; but labor, prayer, faith, and perseverance were at length crowned with success. A number of children and young people learned to read, and a church was formed. As the civilizing influences of Christianity were brought to bear upon the people from year to year, their temporal condition also greatly improved. Among Mr. Shaw's labor-saving inventions were a cross-cut saw and a plough, the latter made chiefly by himself. As the old chief stood upon a hill and watched the plough "tear up the ground with its iron mouth," he exclaimed, "If it goes on so all day, it will do more work than *ten* wives!" Thus was ushered in a new era in agricultural pursuits, as well as in the moral condition of the people. The rapid growth of garden seeds amused them very much, but when they saw the use to which lettuce and other salads were put, they laughed

heartily, saying, "If the missionaries and their wives can eat grass, they need never starve." When the mission was fully organized, the Rev. Edward Edwards came from England to join Mr. Shaw, and arrangements were made to extend the work to various places in the Unter-veldt, and in the Bushmanland. Journeys were also made through Great Namaqualand and a part of Damaraland, with a view to the establishment of permanent missions in those countries, while the work in Little Namaqualand, through the faithful efforts of Mr. Shaw, Mr. Edwards (whose period of labor covered a half-century), and others who were sent out, made good progress in all its branches, notwithstanding difficulties which beset it from time to time. In 1855 a beautiful stone chapel, accommodating six hundred people, the cost of which was £1,000, was erected by the united efforts and contributions of the people, without foreign aid, with the exception of a gift of a pulpit from a few friends in Cape Town. At its opening services the chapel was filled with an attentive and well-dressed congregation, and the collections amounted to £164s. 0d. There were at that time 184 communicants and 300 children in the mission schools.

In 1825 the way seemed to open for the extension of work to Great Namaqualand, and the Rev. Mr. Threlfall and two native teachers were sent thither on a tour of observation. When some distance beyond the Orange River, they were met by a party of Bushmen, who, while pretending to guide them to a place of safety, murdered them, that they might take possession of their effects. This put an end, for the time, to any attempt to establish a mission north of the Orange River. Requests that teachers might be sent there were several times received from chiefs of tribes in this region, and in 1832 another attempt was made at "Warm Bath," now called Nisbit's Bath, and this time with success. This work was nobly carried on, but the migratory habits of the people and other drawbacks prevented as much advance in religious instruction and civilization as had been made in Little Namaqualand. In 1842 the work was extended to Damaraland, and the stations of "Concordville," "Elephant Fountain," and "Wesley Vale" were formed. There were for a time pleasing prospects of success at these places; but afterwards the restless, wandering, and warlike habits of the people, and the great difficulty of obtaining supplies from the Cape for the support of the mission, made the work very discouraging. In the meantime a number of German missionaries connected with the Rhenish Missionary Society had established themselves in Great Namaqualand and Damaraland, and the Wesleyan Society ultimately thought it best to transfer their stations on the southwest coast of Africa, beyond the Orange River, to the Rhenish Society.

*Cape Colony.*—In the year 1820 a second attempt was made to start a Wesleyan Mission in Cape Colony, and Mr. Edwards was directed to proceed thither from Little Namaqualand. With the cordial permission of the governor to preach to and instruct the slave population of the town and neighborhood, he began his work, which he for some time prosecuted with success, and in which he was succeeded by other missionaries sent out from England. Chapels were built in various parts of Cape Town, with which were connected prosperous day and Sun-

day schools. In connection also with this mission are the out-stations established in country places in the neighborhood of Cape Town, and the stations at Simon's Town, Stellenbosch, Somerset, and Robertson, the last a new station, situated in the midst of a dense population, and about one hundred miles from Cape Town. Here a large congregation has been gathered, a prosperous native church formed, and out-stations have been opened in the villages of Lady Gray, Montague, and Newmanville.

**Graham's Town District.** The work of the Wesleyan Society in the eastern province of the Cape Colony began in 1820, and was at first carried on for the benefit of a band of Wesleyans; it was soon extended to all colonists and natives, both Kafir and Hottentot, who could be reached by the missionaries. The work was commenced in Graham's Town, and from thence extended in many directions.

Salem became an important station at an early period, where evangelical and educational work for both Europeans and natives was vigorously prosecuted, but owing to Kafir wars has fluctuated according to circumstances. Fort Beaufort, Seymour, and Alice are out-stations. At Heald Town there was established in the early days of the mission an industrial school under government auspices, for the training of natives in the knowledge of religion and the arts of civilized life. Some years later, when the government grant was withdrawn, the school was converted into an institution for training native missionaries and teachers. The work here has now extended to various parts of the eastern province as well as to Kafirland. At Port Elizabeth (formerly "Algoa Bay") and at Uitehage, a village eight miles distant, the Wesleyan Society labors for the Fingoes, who collect there in large numbers for the sake of employment. Higher up in the country are the stations of Craddock, Somerset (East), Peddie, and Newton Dale. In connection with some of these, extensive circuits have been formed, in which the missionaries itinerate among the scattered farms and villages, preach to natives and settlers, superintend the schools which have been established, and exert themselves in every possible way for the benefit of the people, who are in many instances entirely dependent upon them for religious instruction. Their journeys extend over scores, sometimes hundreds, of miles, and involve much danger and personal discomfort in crossing rivers, deserts, and mountains. At King William's Town the work of the Society has been repeatedly interrupted by Kafir wars, but is now in a prosperous condition; an out-station has been formed at Berkely. Mount Coke and the native station of Annshaw are also included in the Graham's Town district, although geographically related to Kafirland. At the former is the mission press, from which have issued countless numbers of school-books, portions of Scripture, and other publications, in English, Dutch, Kafir, and the Lesuto languages, to the great advantage of the work in all its departments. The Annshaw circuit is very populous and extensive, embracing 60 villages and 80 preaching places. At the respective stations and outposts 102 class-meetings are held each week.

**Queen's Town District.**—The mission stations of the Society comprised in this district are chiefly in Kafirland, and, with the exception of Queen's Town itself, where a number of

Europeans reside, the work is entirely among natives, and is not of the mixed character which is necessary where British settlers reside in considerable numbers. The Rev. William Shaw, who accompanied the before-mentioned colony for East Africa, introduced the gospel into Kafirland, with the further design of establishing, as soon as help should arrive from England, a chain of stations to connect the Cape Colony with Natal. In 1823 he removed with his family to Kafirland, and formed the first station, which he called Wesleyville. In 1825 the second station was established, and named Mount Coke. The third, Butterworth, which now has about 40 preaching places, was formed in 1827. In 1829 a fourth station, Morley, was established for the benefit of a remarkable tribe of people, who seem to have descended from a number of Europeans cast away upon the shores of Kafirland many years before. This station, afterward removed to a healthier locality and called New Morley, is a centre of light to thousands of once degraded natives. The fifth station was commenced in 1830, and called Clarkeburg. Two of the laborers at this station were murdered by the Kafirs, but, notwithstanding this and other adverse circumstances which for a time threatened to impede the work, it has gradually advanced to a very encouraging degree of prosperity. Several important churches have been formed in various directions, and at many additional places the gospel is faithfully preached in the language of the natives. The sixth Kafir station was commenced about the same time as Clarkeburg, by the Rev. W. B. Boyce, who named it Buntingville. Although this station is the most isolated in the list, it is the only one which has never been devastated by wars; all the others have been laid waste at one time or another, and some of them repeatedly. Two more stations have grown out of Buntingville,—Shawbury and Palmerton,—which are on the borders of Natal, and thus complete the "chain of stations," on which the zealous pioneer missionary set his heart when first he penetrated the wilds of Kafirland. Other stations farther inland which have developed from these are: Osborn, Mt. Arthur, Lessey Town, Queen's Town, and others of recent origin.

**Bechuanaland District.**—The first attempt of the Wesleyan Society to carry the gospel to Bechuanaland was made in 1822. This attempt, owing to the sickness of the missionary and the unsettled state of the country, partially failed; and after being many times thwarted in their plans by tribal wars, the missionaries were at length enabled to commence a promising mission at Makwass, in the upper region of the Vaal River. But from this place also they were driven away by the Matebele, a powerful and hostile tribe who made war upon the country from the north. As soon as possible they and their scattered people rallied, and finally settled at a place called Thaba Unchu, to the north of the Orange River. Here the Baralongs, with a few remnants of other scattered tribes who have joined them from time to time, have become a comparatively happy and prosperous people, through the instrumentality of the faithful missionaries who have labored among them for so many years. The Bechuana district includes several other stations, some for the benefit of English, Dutch, and colored people; others for natives alone. Among the latter are

Witteberge and Bensonville. At Bloemfontein and Fauresmith, in the Orange Free State, Wesleyan missionaries are stationed and it is hoped that the work of evangelization may rapidly extend to all classes of the people.

*Natal.*—Wesleyan missions were not undertaken in the colony of Natal until 1841, when a Wesleyan missionary accompanied a detachment of British troops sent from Cape Colony through Kaffraria to Natal, to keep order in the country. He preached to English, Dutch, and natives, being regarded as "the friend of all and the enemy of none," until peace was restored to the land, when a permanent mission was established by missionaries sent out from England. These were after a time assisted by native teachers, and important stations sprang up in many places. At Dunbar, Maritzburg, and Ladysmith, at Verulam and Umhali, the work is of a mixed character; but at Edendale, Kwangubeni, Indaleni, and Inanda it is conducted chiefly for the benefit of the natives. A more recent feature of the work in Natal is the mission to the coolies, begun in 1861.

Much valuable linguistic work has been accomplished in the Wesleyan missions of South Africa; the Scriptures, wholly or in part, hymn-books, catechisms, and other religious publications have been translated into five or six different languages, some of which had never been written before the missionaries undertook the difficult task of reducing them to grammatical form. To the Rev. W. B. Boyce belongs the honor of compiling the first Kafir grammar, and of unravelling the intricacies of one of the most difficult languages of Southern Africa.

Within recent years the missions have been reorganized, and the South African is now comprised in the districts of Transvaal and Swaziland, and Bechuanaland and Zululand.

*AUSTRALIA.*—It is perhaps doubtful whether a mission was ever commenced in any part of the world under more discouraging circumstances than was that of the Wesleyan Society to Australia. With a few exceptions, the colony of New South Wales was a vast community of convicts, with wandering tribes of savage natives on its borders. The free settlers and squatters were widely scattered over a large section of the country, and being entirely destitute of the means of religious instruction, their moral condition was only a few degrees above that of the convict population. Up to the time of the arrival of the first Wesleyan missionary the government had been occupied in erecting jails, barracks, and other public buildings necessary for the civil, military, and convict establishment, but very little had been done for the religious and moral improvement of the people. Indeed, the whole aspect of affairs—the state of society, the mode of government, the discipline adopted in the management of convicts, and the temper and spirit of everything and everybody—appeared cold, cruel, and repulsive in the extreme. Nevertheless, Mr. Leigh, having secured the countenance and protection of the Colonial Government, began to arrange his plans for a vigorous and systematic attack upon the mass of ignorance and immorality by which he was surrounded, and mapped out for himself a wide circuit in which to itinerate. Beginning at Sydney, the capital of the colony, which he made his headquarters, he extended his labors to Paramatta, where he met the Rev. Samuel Marsden, one of the four chaplains ap-

pointed by the government to minister to the troops and convicts, and now widely known as one of the founders of missions in the southern world, who gave him a cordial welcome to his station. Windsor, Liverpool, Castlereagh, Prospect, Concord, Burkham Hills, Castle Hill, and other places were also visited, and never was the transforming power of the gospel more gloriously manifested than in the early history of this mission, in the administration of which Mr. Leigh was from the first assisted by several zealous Methodists who had previously settled in New South Wales, one of whom had been converted in the Wesleyan Mission in the West Indies. Reinforcements were sent from England at various periods, and the mission from its commencement in 1814 made steady progress. At its jubilee, held in Sydney in 1864, £12,000 was subscribed for the purpose of founding a Wesleyan college and for the relief of church property. In Queensland, Victoria, Tasmania, and South and Western Australia missions were also established, which were carried on chiefly for the benefit of the colonists. In Victoria a mission to the aborigines was also undertaken, and carried on for nearly ten years, when, in view of the fact that the efforts put forth were almost fruitless, it was given up. A mission to the Chinese, who came in large numbers to the gold-diggings, was also established some years ago in connection with the Victoria Mission.

*NEW ZEALAND.*—In 1818 the Rev. Samuel Marsden, who had been laboring in New Zealand for several years, persuaded Mr. Leigh, then in Australia as above told, to take a trip thither. While there Mr. Leigh visited many of the native villages, and received from the people assurances that if "white teachers" should be sent to them they would attend to their instructions. Some time after Mr. Leigh went to England, and laid before the committee a proposal for the commencement of a mission to the cannibals of New Zealand. The Society was at that time laboring under a heavy debt, but Mr. Leigh, by forcible appeals to the friends of missions in many parts of England, obtained contributions of goods of various kinds which in New Zealand would be more valuable than money itself, and the Society undertook to commence the new mission without delay. About this time two Maori chiefs arrived in London with Mr. Kendall of the Church Missionary Society; their appearance gave a new impetus to the plans for New Zealand; the necessary preparations were soon completed, and the party of missionaries—consisting of Mr. and Mrs. Leigh, Mr. and Mrs. Horton, appointed to Tasmania, and Mr. Walker—sailed from England on April 28th, 1821. Work was commenced at Wangaroa in 1822. In 1823 Mr. and Mrs. Leigh left on account of failing health to seek restoration to strength in New South Wales, and Mr. and Mrs. Turner, Rev. Wm. White from England, and two colonists from New South Wales arrived and took charge of the work. The subsequent attack on the mission, the enforced flight of the missionaries, the abandonment and re-establishment of the mission, and the ultimate success of the work are treated of under New Zealand (q.v.).

*THE FRIENDLY ISLANDS.*—The Wesleyan Society, seeing that, after a long and gloomy night of toil, the missions of the London Missionary Society in the Society and Marquesas

Islands were beginning to bear fruit, sent a missionary to the Friendly Islanders, in the hope that they too might now be ready to receive the gospel. In June, 1822, about twenty-two years after the last surviving agent of the L. M. S. had escaped from Tonga, the Rev. Walter Lawry, with his family, sailed from Sydney, and in the following August anchored off Tonga. Among the hundreds of natives who came off from the shore in their canoes was one Englishman, named Singleton, who had lived sixteen years on the island, being one of the survivors of the ill fated "Port-au-Prince," whose crew had been massacred in 1806. He had become a thorough Tonga man in manners and language, but became very useful to Mr. Lawry as an interpreter and in other ways, and before long himself accepted the gospel. Mr. Lawry was kindly welcomed by chiefs and people, and for two or three months such a desire for instruction was manifested that when the "St. Michael," which had brought Mr. Lawry, sailed again for home, it carried a request for more missionaries, a surgeon, a printer, teachers, books, and articles for barter. Soon after the departure of the ship, the characteristic fickleness and superstition of the people were shown. One chief, however, remained friendly; and notwithstanding the disadvantages under which Mr. Lawry labored, there were occasions when he had reason to hope that he had made an impression on the minds of some of the natives, and it seemed a matter for regret that, after laboring for about fourteen months, Mr. Lawry was obliged, on account of his wife's health, to return to New South Wales, leaving the work in charge of assistants. In 1826 more missionaries were sent out by the Society. They found that the chief who had befriended Mr. Lawry had turned against and threatened to kill his assistants. Securing the protection of another chief, they endeavored amid many and peculiar trials to build up a mission, and were at length rewarded by seeing some improvement in the people; and as a more general desire for instruction began to be manifested, an earnest request for help was forwarded to England. In 1828 the Revs. Nathaniel Turner (from New Zealand) and William Cross, with their wives, arrived at Tonga, and a second station was commenced at Nukuolofa. Messrs. Thomas and Hutchison continued at Hikifo, the first station. Schools were established at both stations, which were attended by hundreds of children, who were taught chiefly from manuscript translations, but who made rapid progress in learning to read, as well as in committing to memory hymns, prayers, and lessons from the Scriptures. At the Sabbath services there were sometimes over two hundred natives present. Open opposition almost entirely disappeared, and the missionaries were enabled to devote themselves fully to preaching, teaching, and translating, and the acquisition of the language. Urgent calls for their services came in from other islands in the group—from Vavan, Haabai, and from Man, where the chief and his people spontaneously abolished idol-worship and built a neat Christian place of worship in anticipation of the coming of a missionary. These and other remarkable indications of the readiness of the people to receive the gospel induced the missionaries at Tonga to unite in a very urgent appeal to the Committee to send out more mis-

sionaries. The request was readily granted, but from the great distance and the difficulty of finding suitable men for the work a considerable time elapsed before those sent out reached their destination. In the mean time places of worship were erected, schools established, the gospel was faithfully preached, and multitudes of people were turned from the worship of dumb idols to the fear of God. While waiting anxiously for communication from home, not daring to add to the financial burden of the Society by further outlay without the express permission of the Committee, a small box or packet was washed on shore and handed to Mr. Turner. It was found to contain a letter authorizing the missionaries to commence a mission on Haabai without delay. The vessel that bore that letter, a schooner from Sydney, had foundered at sea and all on board were lost. It is said that neither the vessel, nor crew, nor any of the cargo were ever seen or heard of again; that letter alone escaped the general wreck, and was cast on shore just at the right place and time. Mr and Mrs. Thomas immediately started for their new sphere of labor, and reached Lifuka, one of the Haabai Islands, after a stormy and dangerous voyage, January 30th, 1830. A native teacher had been previously sent to this group to instruct the people as best he could in the truths which he himself had just learned. Mr. Thomas was glad to find that the efforts of this pioneer evangelist had not been in vain. Out of eighteen inhabited islands, all but three had embraced Christianity. Many houses, formerly sacred to idol gods, were either used as common dwellings or set apart for the worship of Jehovah. The king took five of the principal idols and hung them up by the neck in one of the principal houses, that the people might see that they were "all dead." The people were anxious to learn to read and write, as well as to worship God, and the work was becoming too much for poor Peter, when the first English missionary opportunely arrived. There was a great work for him to do; the people were absolutely ignorant and required instruction. All that they knew was that they were wrong, and there was one among them who could set them right. On the day following his arrival (the Sabbath) Mr. Thomas preached to about three hundred persons, and from that time on the work prospered. Schools were opened, and Mr. and Mrs. Thomas and Peter were constantly engaged in teaching the crowds of people who came together for instruction—no easy task, even with the aid of books and other school requisites, but, in a country where letters were previously unknown, and where every book had to be written with the pen, the difficulties were increased a hundred-fold. Still they toiled on, preaching, teaching, and translating. Hundreds of young people soon learned to read their own language with fluency, and native teachers were trained to take part in the work, which flourished in all its departments.

In 1831 three missionaries arrived from England, and through their united labors the mission was greatly strengthened; many were added to the church, and the work of education still further advanced among the people. Many of those educated in the mission schools became teachers, and with their aid the work was extended to the islands of the group which had not yet received Christianity.

*Vavau*.—As has been stated, the chief of this island requested that a missionary might be sent to them early in the history of the mission. Finding that he could not be supplied with a teacher, he turned again to his idols; but in 1831 King George of Haabai, a man of remarkable intelligence and strong Christian character, visited Vavau, and after much persuasion the chief, Finan, agreed to give up his idols. His manner of doing so was unique. Having given orders that seven of his principal idols should be brought out of their house and placed in a row, he stood in front of them and addressed them thus: "I have brought you here to prove you, and I tell you beforehand what I am about to do, that you may be without excuse." Then to the first one he said: "If you are a god, run away, or I shall burn you in the fire I have prepared!" The god made no attempt to escape, nor did the others, when spoken to in the same way. As none of them ran, the king gave orders that the sacred houses should be set on fire. His commands were promptly obeyed, and eighteen temples with their gods were burned to ashes. Many of the people, greatly troubled at the king's impious conduct, as they considered it, sat trembling and silent to watch the result. The expected awful calamity not occurring, they came to the conclusion that their gods must be liars after all, and they too joined the "praying people." Two native teachers were immediately sent to Vavau, and Mr. and Mrs. Cross were appointed to take charge of the work. Upon the voyage thither their vessel was shipwrecked; Mrs. Cross was drowned, and her husband was cast upon a desolate island, from which he was rescued by a canoe from Tonga. Embarking a second time, he reached Vavau in safety. His labors and the unwearied exertions of those who joined or succeeded him were richly blessed, and a wonderful change was effected in the whole group. Idol-worship was totally abandoned, native churches were organized, and schools established. The progress of the mission here and in all the Friendly Islands was greatly aided by the arrival of a printing-press from England. Great were the surprise and delight of the natives of Tonga when they saw with what rapidity and neatness copies of school-books and other publications were multiplied by the mysterious machine. Crowds of people eager to get a glimpse of the press in motion besieged the printing-office, and to gratify their curiosity the first sheets which were struck off were distributed. In 1833 Finan died, leaving the government of Vavau to King George of Haabai. To Haabai and Vavau was soon added the dominion of Tonga, and George thus became king of the Friendly Islands—a circumstance very favorable to the development and establishment of Christianity, as he was a man of superior judgment and ability, and of unwavering Christian principle. By his Christian forbearance and the pacific influence of the missionaries the last enemies of Christianity—a band of men in the remote parts of Tonga, who were encouraged in their bitter opposition to the king and the missionaries by abandoned Europeans who had settled among them—were overcome, and in a few years the whole group of the Friendly Islands became at least nominally Christian. Seeing the danger that Christianity might become a mere profession, the

missionaries most earnestly desired a special baptism of the Spirit, and their prayers were answered in 1834 by one of the most remarkably revivals ever known, in which thousands of persons were truly converted, as was shown in their after life. From this period the history of the stations in Vavau and Haabai, and very soon after in Tonga also, was that of regularly organized Christian churches, the whole of the population professing Christianity. For many years the mission depended for its supplies upon the precarious and uncertain visits of trading-vessels from the Australian colonies, or upon the occasional charter of boats to convey goods to the stations. To improve this very trying condition of things the committee provided a vessel expressly for the service of the missions, and in September, 1839, the "Trixton," fitted out for a four years' voyage among the islands, sailed from England, having on board twenty-six persons, chiefly missionaries and their families, appointed to stations in South Africa, New Zealand, the Friendly Islands, and Fiji. After four years of useful service, the "Trixton" was succeeded by the more commodious "John Wesley," whose periodical visits to the different stations were occasions of great joy to the missionaries and their people, great comfort to the mission families, and great saving to the Society's funds. A second "John Wesley" afterwards took the place of the first, which was wrecked on Haabai.

At all the stations on the Friendly Islands special attention is given to educational work. High-schools are numerous, and the training institution at Nukuolofa has developed into Tubon College,—in honor of King George Tubon,—whose course of study embraces arithmetic, algebra, geometry, trigonometry, chemistry, history, geography, Scripture history, and theology.

The liberality of these islanders has always been remarkable, and in 1870 the mission had become not only self-supporting, but also a large contributor to the funds of the Wesleyan Society. A second revival was experienced at Haabai in 1869, and in 1870 it was confidently asserted that there was not one heathen remaining on any of the Friendly Islands.

*SAMOA*.—The Wesleyan Society undertook work in Samoa in 1835; its early efforts were attended with great success and the work has continued to prosper, comprising now several stations, which are carried on, as are the other missions of the South Seas, under the direction of the Australian Conference.

*Fiji*.—One of the results of the revival in the Friendly Islands in 1834 was the commencement of a mission to Fiji, which was undertaken by the missionaries (one of whom, Mr. Watkin, went to England to plead there the cause of "poor Fiji"), seconded by King George and some other zealous disciples from Tonga. The Fijians at that time were atrocious cannibals. Instances of this most appalling and barbaric feature of heathenism, shocking and revolting enough, have been known to occur in New Zealand, the New Hebrides, and other islands, but Fiji earned for itself the greatest notoriety for this abomination; and, in addition, war, polygamy, adultery, murder, suicide, deception, fraud, theft, and many other crimes which cannot be named, were prevalent among the natives. To these people a mission was

commenced in October, 1835, when Messrs. Cross and Cargill, with their families, several converted Friendly Islanders, and a few Fijians returning to their own country, embarked in a small schooner, the "Blackbird," for whose arrival from Australia they had been waiting since March. Landing at Lukemba, they commenced the work destined to be so hard and perilous, but also so blessed. Many and fierce were the conflicts which these brave missionaries and those who came after them had to encounter from the prevalence of war, cannibalism, and superstition. Perhaps there never was another such struggle between light and darkness, truth and error, as that which took place in the course of the Fiji Mission; but the missionaries persevered and pushed forward their noble enterprise with a moral heroism beyond all praise, and they had their reward in the victory which crowned their efforts at last. From point to point, from island to island, they extended their work, the results of which are indicated in the following extract from a recently published account of Fiji as it now is: "Strange indeed is the change which has come over these isles since first Messrs. Cargill and Cross, Wesleyan missionaries, landed here in the year 1835, resolved at the hazard of their lives to bring the gospel to these ferocious cannibals. Imagine the faith and courage of the two white men, without any visible protection, landing in the midst of these bloodthirsty hordes, whose unknown language they had in the first instance to master, and day after day witnessing such scenes as chill one's blood even to hear about. Many such have been described to me by eye-witnesses.

"Slow and disheartening was their labor for many years; yet so well has that little leaven worked that, with the exception of the Kai Tholos, the wild highlanders who still hold out in their mountain fastnesses, the eighty inhabited isles have all abjured cannibalism and other frightful customs, and have *loved* (i.e. embraced Christianity) in such good earnest as may well put to shame many more civilized nations.

"I often wish that some of the cavillers who are forever sneering at Christian missions could see something of their results in these isles. But first they would have to recall the Fiji of ten years ago, when every man's hand was against his neighbor, and the land had no rest from barbarous intertribal wars, in which the foe, without respect to age or sex, were looked upon as so much beef, the prisoners deliberately fattened for the slaughter; dead bodies dug up that had been buried ten or twelve days, and that could only be cooked in the form of puddings; limbs cut off from living men and women, and cooked and eaten in the presence of the victim, who had previously been compelled to dig the oven and cut the firewood for the purpose; and this not only in time of war, when such atrocity might be deemed less inexcusable, but in time of peace also, to gratify the caprice or the appetite of the moment.

"Think of the sick burned alive; the array of widows who were deliberately strangled on the death of any great man; the living victims who were buried beside every post of a chief's new house, and must needs stand clasp ing it, while the earth was gradually heaped over their devoted heads; or those who were bound hand and foot, and laid on the ground to act as rollers when a chief launched a new canoe, and

thus doomed to a death of excruciating agony;—a time when there was not the slightest security for life and property, and no man knew how quickly his own hour of doom might come; when whole villages were depopulated simply to supply their neighbors with fresh meat! Just think of all this, and of the change which has been wrought, and then just imagine white men who can sneer at missionary work the way they do. Now you may pass from isle to isle, certain everywhere to find the same cordial reception from kindly men and women. Every village on the eighty inhabited isles has built for itself a tidy church, and a good house for its teacher or native minister, for whom, also, the village provides food and clothing. Can you realize that there are nine hundred Wesleyan churches in Fiji, at every one of which the frequent services are crowded by devout congregations; that the schools are well attended; and that the first sound which greets your ear at dawn, and the last at night, is that of hymn-singing, and most fervent worship, rising from each dwelling at the hour of family prayer?

"What these people may become after much contact with the common run of white men we cannot, of course, tell, though we may unhappily guess. At present they are a body of simple and devout Christians, full of deepest reverence for their teachers and the message they bring, and only anxious to yield all obedience. . . . It is painfully suggestive to know that the thing chiefly deprecated by all who have the welfare of the people at heart is their acquiring English, or being thrown in the way of foreigners."

The thrilling story of how this mighty work was accomplished—than which no part is more thrilling than the share taken in it by the natives of the Friendly Islands who came as missionaries to the Fijians—we are compelled, from want of space, to leave untold; but surely in the whole history of Christianity there is nothing more wonderful than the transformation of these savages through the power of the gospel, nothing more touching than their readiness to receive, and their eagerness to make known, that gospel to those who know it not.

MISSION TO NEW BRITAIN.—As the mission to Fiji was the outgrowth of the work for the Friendly Islands, so from Fiji has gone forth the first effort to carry the gospel to the desperate cannibals of New Britain. In June, 1875, the idea of this mission was first suggested; and the missionary, Mr. Brown, after fully explaining to all the native teachers the imminent dangers it involved, asked if there were any among them who would volunteer for the work. The response was most cordial; and nine brave, determined men (seven of whom were married, and their wives true helpmeets in this great work) announced their wish to undertake it. On hearing of this the English consul considered it his duty to summon these teachers and lay before them in darkest colors the dangers they were about to incur from the climate and cannibals, and the almost inevitable fate that awaited them should they persist in their rash determination. They replied that they had counted the cost and were ready to accept all risks. One, acting as spokesman for all, said: "We are all of one mind. We know what those islands are. We have given ourselves to this work. If we get killed, well; if we live, well. We have had everything explained to

us, and know the danger. We are willing to go." They added that all dangers had been fully set before them by the missionaries, and that they had determined to go because of their own wish to make known the gospel of Christ to the people of other isles. The native teachers in Fiji receive a salary of £10 per annum, and are supplied with food by the scholars. These men resigned all claim to any definite salary, giving themselves as volunteers, without even the certainty of daily bread, resolved to face whatever hardships might lie before them. With something more than the zeal of the early saints (for we never hear that they went to live amongst cannibals), this band of brave men set sail in the "John Wesley," Mr. Brown having left his wife and children in New Zealand. Sometime after, just as a fresh detachment of teachers was about to start for New Britain, the distressing tidings reached Fiji that four of the first party had been treacherously murdered and eaten by the cannibal people of the Duke of York Island, on which they with their wives and little ones had settled in the hope of forming a separate mission. The murderers threatened also to kill and eat the widows and orphans, and urged the natives of New Britain likewise to dispose of their teachers, especially the white missionary. The latter, being a Christian of the muscular type, deemed it wise, once for all, to teach these murderers that the shedding of blood involves punishment in kind; so mustering his little force of Fijians and Samoan catechists, he crossed over to the offending isle, rescued the widows and orphans, and routed the horde of savages. But notwithstanding all this, the determination of the new teachers was unshaken. One of the wives was asked whether she still intended to accompany her husband to a scene of so great danger. She replied: "I am like the outrigger of a canoe—where the canoe goes, there you will find the outrigger." Later on Mr. Brown returned to New Zealand to announce that the mission was fairly established, and to see his family; his wife, being of one mind with him, resolved to return with him. Placing the elder children at school, and taking only their little baby with them, they stopped at Fiji to enlist fresh volunteers, and then quietly sailed away on their errand of mercy—their departure hardly exciting a passing comment; but there is small doubt that their work will leave an enduring mark on the history of the Pacific Isles. In 1888 missionary meetings were held for the first time in the history of the mission, and £50 were contributed to the funds of the Wesleyan Society. A small seed, from which greater things will surely grow. Portions of Scripture, gospel lessons, hymn-books, and catechisms have been prepared in the Duke of York and the New Britain language, and have given a great impetus to the work. Loud and urgent are the calls for help. None but those who met and handled it, lived in its midst, and have seen its working, can know how fearful, how dark, how repulsive, cruel, and wretched is heathenism; and none but those can fully understand the earnestness of this cry for help.

**INDIA.**—The origin of the mission to Ceylon has been already indicated. It was not until Dr. Coke had offered himself for this mission, and had promised to defray the necessary expenses of its commencement to the amount of £6,000, that the conference which assembled in Liverpool in 1813 consented to undertake the

enterprise, and to send out at the close of the year Dr. Coke and six young missionaries. As is well known, Dr. Coke died on the voyage, and was buried at sea. His young colleagues, thus left without their head, had a difficult task before them, but upon reaching Ceylon they were kindly received by the governor, and several places were named to them as greatly in need of the gospel, and of schools for the training of native children. It was decided to open stations at Colombo, Galle, and Matura, in the south among those of the native population who speak Sinhalese, and at Jaffna and Batticaloa in the north, where the Tamil language was in common use. In a very short time, such was their zeal in studying the language, the missionaries were able to preach to the natives, and also to Dutch and Portuguese colonists. Schools were organized, a printing-press was set up at Colombo, a Sinhalese grammar and dictionary were prepared, and the work flourished in all its departments, literary, evangelical, and educational. In addition to those already mentioned, important stations were established in Southern Ceylon at Negombo, Kandy, Caltura, Pantura, Seedua, Morotto, Wellewatta, and other places; while in North Ceylon, where the Tamil language had been conquered and several native teachers trained for the work, chapels and schools were established not only in the villages adjacent to Jaffna, but also at places at a considerable distance, which were afterwards occupied as separate stations. As the work required, missionaries were sent from England, and the unwearied efforts put forth were rewarded with abundant success.

**Madras.** In 1817 a Wesleyan mission was commenced at Madras, which has ever since been zealously maintained, and has been a great blessing to the people through its evangelical and educational departments. A very important and useful feature of the latter is the girls' school. Other stations of the Society in India are at St. Thomas Mount, Negapatam, Manaragooty, Trichinopoly, Melattam, Warriore, Trivelloor, and Caroor. A very important Indian Mission has its headquarters at Bangalore. It embraces many chapels, schools, and a fine printing establishment. Seringapatam and the city of Mysore are included in the Mysore District. At Calcutta and Lucknow Wesleyan missions have been established, for the benefit of English soldiers and also the native population. At Bombay, the Mauritius (included in the India Missions), and some other points, missions were commenced and hopefully carried on for a time, but were afterwards relinquished.

**CHINA.**—In 1852 Mr. Piercy, who had for some time labored in China at his own expense, offered his services to the Wesleyan Society, was accepted by them, and appointed to Canton, where he remained until the war between England and China forced him, with other missionaries, to take refuge in Macao. During the two years spent there he continued the study of the language with unabated zeal, and upon the restoration of peace, in 1858, reoccupied Canton as a station of the Society. In 1860, upon the receipt of a legacy intended expressly for the India and China missions, the Committee was enabled to largely extend its work. The staff of workers was increased in numbers, and a new station was commenced at Fatsan. In 1862 a mission for North China was established at Han-

know. In addition to the usual departments of evangelical and educational work, a medical mission has been commenced, and is proving itself a most important factor in the success of the enterprise. As at present constituted, the China Mission includes the districts of Canton ("East" and "West") and Wuchang, both comprising many out-stations. Dispensary work is now an important element of the Canton District also.

With the mention only of one more very important enterprise, its "Army and Navy Work," carried on in all parts of the world, we close our account of the Wesleyan Missionary Society.

**West, Henry S.,** b. Binghamton, N. Y., U. S. A., January 21st, 1827; studied at Yale College, and the College of Physicians and Surgeons, New York City; practised medicine for some years in Binghamton; sailed as a missionary of the A. B. C. F. M. January 17th, 1859, for the mission to the Armenians of Turkey. He spent most of his missionary life at Sivas, but his influence was widely extended. He visited the United States in 1868 for the health of his family, but returned to Turkey the following year. While attending one of the poor families in Sivas he contracted from them the typhus fever, which, complicated with pneumonia, resulted in his death. Dr. Barnum of Harpoot wrote: "Dr. West was a noble, cheerful, kind, unselfish man. He was a man of rare skill in his profession. I presume it is no disparagement to others to say that there is probably no physician in the Turkish Empire who enjoyed an equal reputation among the people. He was withal, and best of all, an humble, sincere, and earnest Christian. In addition to his professional services, he trained quite a body of native physicians in a region cursed with ignorant quacks. One of his students is a physician in Harpoot. He is equal to the average of his profession in America, and is the only trustworthy doctor within a hundred miles. When he was examined in Constantinople by the faculty of the Government Medical College for a diploma, his examiners said: 'The Turkish Government is greatly indebted to Dr. West for educating so many young men, and so well, for the medical profession.'" "He attained an eminence reached by comparatively few in his profession. The almost unprecedented number of surgical operations which he has performed have given him celebrity, not only in the East, but also in Europe and America. His lithotomic operations reached the number of 150 or more, of which scarcely half a dozen resulted unfavorably; and other operations were numerous in proportion. The blind eyes he has opened are past counting; the crippled, the deformed, the sick from various diseases, who have been relieved by him, if all assembled would make a great host. Much the larger portion of these cases were attended without pay, and all earnings from patients able to pay were turned over to the treasury of the Board. He received personally nothing but his regular salary, yet many a case which he attended would, in America, have brought him hundreds, even thousands, of dollars. Wherever he went, the diseased, the halt, the lame, the blind thronged him. The natives remarked, 'He is like Jesus.' Pashas and great men would humble themselves to secure the help of this plain, un-

pretending physician. The ignorant would get his prescriptions and hang them about their necks as charms, or dissolve the papers in water and drink them, hoping for healing efficacy. His simplicity and faithfulness were admirable. Without hesitation he would lay his ear for auscultation on chests so foul and squalid that native doctors shrank from them. He never flinched in duty, and never showed a nervous hand in the most difficult operations. When ether was about to be administered before the operation, the doctor would call upon some gray-headed native in the company to offer prayer, then coolly give the ether, take the knife and proceed.

"Dr. West's special duty was the care of the missionaries in sickness, and he never shrank from any hardship, making long and perilous journeys on horseback. All Asia Minor became familiar to him on account of these travels. The mission felt bereaved and downcast at his loss.—Who now will brave storm and wind and winter snow, wolf, Circassians, and Koords, on wild mountain and desolate plain, to minister to our sick, bringing such love and skill to the work?" Mr. Hubbard says: "During the meetings of the Week of Prayer, in addition to his medical practice, he did more than any one of us in pastoral work and conversation. His hard day's work was seldom followed by refreshing sleep at night." He died April 1st, 1876.

**West Indies.**—This group of islands extends in a rude bow-like form from the coast of Florida, U. S. A., to the coast of Venezuela in South America. The larger and more important islands belong to one or other of the great European nations, with the exception of two republics, and this political division will be followed in the more detailed account of the islands, while some facts which are true of all will serve as a preface to the specific description of them as English, Danish, Dutch, Spanish, or French possessions.

The population of these islands is composed of Europeans and Americans, together with Negroes and other Africans, Hindus and Chinese. Diversity of tongue, of character, and of life is consequently so great that there is little attempt at cohesion or federation even where the islands are under the same flag.

From the second visit of Columbus until within the present century these islands have been the scene of sorrow and oppression. In the years just subsequent to their discovery, evil of the most pronounced character was the business of the men who invaded these shores, and all that selfish greed and fiendish cruelty could suggest was done to exterminate the mild aborigines. Hardly a trace of them is now to be found.

Then the islands became the battlefields of the rival powers of Europe. The waters were dyed red with human blood; many an earthly paradise was changed to a scene of desolation, grim and bare. In the early times of British occupancy the streets of London, as well as the wilds of Ireland, were the scenes of many crimes peculiar to that age, for women were stolen and sent to the West Indies to supply the profligate Europeans. So common was the practice that the term "Barbadosed" had a terrible significance, and political enemies and many others were forced against their will to spend their remaining days in a second Botany

Bay in the western seas. Piracy was rife, and the commerce of Europe suffered from the marauding buccaners, who smarted from the wrongs they suffered and retaliated on the innocent as well as the guilty. The slave trade had its origin here, and the hardly less cruel importation of coolies has left its curse on the lands. The occupation of the West Indies has afforded the material for a black chapter in the history of the conquests of European nations. Harmless savages were put to death in the name of Christ. Into this moral sewer was swept the refuse of Europe. Hundreds of Hindus and Chinese were lured to this land of faithless promises. The African was dragged here only to die of pestilence. Is it strange that these lands should have been sunk in the lowest depths of sin and degradation? No wonder that the burden of debt which weighs down the different administrations is the despair of statesmen.

Patient and heroic hands early planted the gospel in this miry soil. From the earliest time when Christians saw the image of God in the sable body, to the present day, the conflict between the forces of good and the powers of evil has been fierce and bitter. Prejudices of the white and superstitions of the black races united to render the work excessively difficult. The faithful preacher of Christ was never free from all the persecutions that malignity and hatred could devise or ignorance and superstition suggest. Even his own race insulted, beat, and imprisoned the missionary, and the people he came to succor betrayed him into the hands of his enemies.

The results which are now seen in the islands are but additional proof that the gospel is suited alike to the moral and the immoral, to the wise and the foolish, to the black as well as to the white man.

**British West Indies.**—THE BAHAMAS.—These are nineteen inhabited and many uninhabited islands off the southeast coast of Florida. The total area is 5,450 square miles. The principal islands are: New Providence, which, with the capital, Nassau (q.v.), is well known as the home of buccaners, pirates, and blockade-runners, and San Salvador, which is supposed to be the island first discovered by Columbus, but that honor is disputed in favor of Watlings. On the west side of the island are quite a number of intelligent Africans. Eleuthera (q.v.) is over 200 miles long. Abaco is the most northerly island, and has a length of 90 miles. Andros is the largest of the group, with a length of 90 miles, and 40 miles across at its widest part. The remaining islands are: Great Bahama, Harbor Island, Long Island, Mayaguana, Great Inagua, Ragged Island, Rum Cay, Fortune Island, Exuma, Crooked Island, Bimini, Acklin's, and Berry. The total population in 1881 was 43,521, of whom 11,000 were whites. In 1888 it was 48,000. The government is in the hands of a governor assisted by an Executive Council of 9, a Legislative Council of 9, and an Assembly of 29 representatives.

**Missions.**—Soon after the occupation of the islands by the English, the Church of England formed each island into a parish, and a bishop was appointed in 1861. There are now about 20 clergymen. The Wesleyan Methodist Missionary Society (see article) took up the work in these islands in 1825. Five islands are occupied:—*San Salvador*—station, Arthur's Town; *New Providence*—Nassau, with 3 chapels

and the superintendent of missions, and Fox Hill; *Eleuthera*—Current Island, East End, Governor's Harbor; *Harbor Island*; *Bimini*—Alice Town and Bayley Town; and *Abaco*. The total statistics for the Bahamas are: 9 missionaries, 28 stations, 3,016 members, 3,000 Sunday scholars. (See also articles Harbor Isl and Eleuthera.)

The Baptist Missionary Society commenced work in the islands in 1833, by opening a mission to the slaves. It has now 1 missionary in charge of the whole work, which is carried on in all of the nineteen islands with 81 stations, 14 native assistants, and 4,320 members. There is a native Baptist church numbering about 1,600 members under the care of native pastors. The Roman Catholics built a chapel at Nassau in 1888, and have opened a school. There is one Presbyterian church in the whole colony; it is at Nassau.

**JAMAICA.**—The island of Jamaica is about 140 miles long, with an average width of 50 miles. On account of its mountainous character the scenery is beautiful, and there is abundance of fresh water. The sagacity of Oliver Cromwell saw the future value of this island, and secured it to the British Government. Its area is 4,200 square miles, with a population (1881) of 580,804, of whom 444,186 were blacks. The capital is Kingston (40,000) and some of the other principal towns are Spanish Town (5,689), Montego Bay (4,651), and Port Maria (6,741). Attached to Jamaica for administrative purposes are the following smaller islands. Turk's and Caicos Islands, area 224 square miles, population 4,778; Cayman Islands—Grand Cayman, Little Cayman, and Cayman Brae—with a total population of 4,000; the Morant Cays and Pedro Cays.

**Missions.**—The Church of England early divided the island into parishes, and its adherents number now 38,945, though its work is more for the owners of the plantations than for the natives. The first missionaries to the natives were the Moravian Brethren, who commenced their work in 1754, and now have in Jamaica 20 stations, 27 missionaries, and 5,792 communicants. In the early part of the present century the Wesleyan Methodist mission was commenced. The members now number 20,700, and Jamaica has been divided into the following districts: Kingston, Montego Bay, Saint Ann's, and Morant Bay. The Baptist Missionary Society followed soon after the Wesleyan Methodist, and after 30 years of missionary work the Baptist churches formed a union, which now has 86 churches in the south side parishes and 63 in the north, which are wholly self-supporting. There are 35,000 church-members. A Jamaican Baptist Missionary Society has also been formed which has stations and missionaries on Turk's Island, Haiti, San Domingo, the Caymans, Cuba, Santa Croix, and Central America. The only branch of the work which is supported by the parent society in England is the Calabar College for the training of ministers and school-teachers. The work of the various Presbyterian churches was consolidated in 1847, and the United Presbyterian Church of Scotland has the direction of the missionary work. There are 46 stations, 14 out-stations, and 9,131 members. The Colonial and Continental Church Society has its agents in the island, and has assisted the Episcopal churches since 1870, when they were thrown

on their own resources. There are 86 clergymen, 95 churches, 52 chapels, 242 day-schools, and 30,000 communicants.

**BARBADOS** lies to the east of the Windward Islands, and has an area of 166 square miles. It abounds in varied and beautiful scenery, and almost the entire island is under cultivation. Population (1881), 171,860, of whom 113,302 were blacks. Bridgetown, the capital, has a population of 25,000, and is beautifully situated on the shores of the bay. The English began to exercise authority here in 1645. Since 1885 it has been separated from the Windward Islands, to which administration it formerly belonged, and has now a government of its own.

**Missions.**—The Church of England has 151,088 communicants, and there is a training college for clergymen, under control of the S. P. G. The Moravian Brethren have 4 stations, 4 missionaries, 7,000 communicants, and 2,362 day-scholars. The Wesleyan Methodist work is organized under the West Indian Conference, with 13,000 church-members. The Roman Catholics also have congregations in Barbados.

**LEEWARD ISLANDS** lie to the north of the Windward Group, and southeast of Porto Rico. The islands, together with their area and population, are: Antigua, 170 square miles, 35,000; Barbuda and Redonda, 62 square miles; Virgin Islands, 58 square miles, 5,000; Dominica, 291 square miles, 29,500; St. Kitt's or St. Christopher, 65 square miles, 45,000; Nevis, 50 square miles, 11,864; Anguilla, 35 square miles, 9,000; Montserrat, 32 square miles, 10,083. Only part of the Virgin Islands belongs to Great Britain; the remainder belongs to Denmark, except Crab Island, which is Spanish. The principal cities are: St. John, Antigua (10,000); Basseterre, St. Christopher (7,000).

Mission work is carried on by the Church of England, 49,000 members; Wesleyan Methodists, 30,000 members; Moravian Brethren, 8 stations in Antigua and 4 in St. Kitt's (q.v.), 4,962 communicants, 2,473 day-scholars. There are also 29,000 Roman Catholics.

**WINDWARD ISLANDS.**—These islands, with their area and population, are: Grenada, 120 square miles, 490,337; St. Vincent (q.v.), 122 square miles, 46,872; and the Grenadines. The principal cities are: Kingston, the capital of St. Vincent, population 5,393; Castres, the chief town of St. Lucia, population 4,555; and St. George, the capital of Grenada, with 5,000 inhabitants.

**Missions.**—S. P. G. (1885), 3 stations on St. Vincent and 1 in Grenada. There are 1,000 communicants under the care of 4 missionaries. The Roman Catholics and the Wesleyan Methodists have also large churches.

**TRINIDAD** lies immediately north of the mouth of the Orinoco. It is an island of extreme beauty and great fertility. In 1802 it was finally handed over to British rule by the peace of Amiens. Its area is 1,754 square miles, with a population of 139,566. Port-of-Spain is the capital (31,900). Tobago was annexed to Trinidad on January 1st, 1889. It has an area of 114 square miles, with a population of 19,937.

**Missions.**—S. P. G., 1 catechist for the coolies. The Moravian Brethren have 3 stations in Tobago, with 2 missionaries, 1,144 communicants, 5 schools, and 437 scholars. Baptist Missionary Society has 2 missionaries stationed at Port-of-Spain and San Fernando, 15 preaching stations,

with 8 evangelists, 862 church-members, and 320 Sabbath-scholars. The U. P. Church of Scotland has 3 stations in Trinidad—at Port-of-Spain, Arona, and San Fernando; 3 ordained missionaries, 3 congregations, 387 communicants, 9 Sabbath-schools, 567 scholars. The Wesleyan Methodists' work is carried on in connection with the West Indian Conference. There are numerous Roman Catholic churches.

**Danish West Indies.**—These are: St. Thomas, St. Croix, and St. Jan (see separate articles). Part of the Virgin Islands also belong to Denmark.

**Dutch West Indies.**—Curaçao is the name given to the colony, which consists of the following islands: Curaçao, 210 square miles, population 25,567; Bonaire, 95 square miles, 4,259; Aruba, 69 square miles, 6,990; the southern part of St. Martin, 17 square miles, 4,198; St. Eustache, 7 square miles, 2,335; and Saba, 5 square miles, 2,505. The colony is administered by a governor, assisted by a council, and all are nominated by the king.

**Missions.**—The Wesleyan Methodists carry on work in these islands in connection with the West Indian Conference. There are 35,676 Roman Catholics.

**French West Indies,** consist of Guadeloupe and dependencies, and Martinique. Guadeloupe is one of the Lesser Antilles, and has an area of 360 square miles, with a population of 182,182, in which administration are included several islands, which make a total area of 720 square miles. These islands were acquired by France in 1634. Point-à-Pitre is the principal town. Martinique was acquired in 1635, and has an area of 380 square miles, and population of 170,391. St. Pierre is the chief commercial town, and has a population of 20,000. The only missions are those of the Roman Catholic Church.

**Spanish West Indies.**—CUBA is the largest and one of the richest of the islands in its natural resources. It has an area of 43,222 square miles. It was discovered by Columbus, and afterwards taken possession of by Spain. Of the original inhabitants, whose name for the island, Cuba, has outlived all the various Spanish names, not a trace is left. The country possesses every variety of mountain, valley, and plateau scenery, and the rivers are navigable, and empty into the ocean in the midst of large and beautiful harbors. The population (1877) was 1,521,684, of whom the majority are Spaniards, and the remainder Negroes, Chinese, and Europeans. The moral and spiritual condition of the inhabitants is worse than in any other section of the West Indies, with the exception of Haiti and Santo Domingo. Pride, insolence, and cruelty are the normal instincts of the people of the higher rank, and the sufferings which the enslaved Negroes and the imported coolies have endured are almost incredible. Slavery was abolished absolutely by a law passed in 1886. Havana, the capital, is a city of great beauty, containing many places of historic interest. The cathedral contains the tomb of Columbus. Population, 198,271. Other important towns with their populations are: Matanzas, 87,760; Santiago, 71,307; Cienfuegos, 65,067. Those contain the great proportion of the educated classes, and are gay with theatres and bull-rings for the national sport. There is freedom of worship in Cuba.

**Missions.**—The Jamaica Baptist Missionary

Society carries on some work in the islands, but the principal work is under the superintendence of a Señor Diaz, who is assisted by the Southern Baptist Convention of the United States. Working from Havana, he has now in all 7 stations, 20 missionaries, and 1,493 members. The American Bible Society also has an agency here.

**PORTO RICO**, area 3,550 square miles, 784,709. It is considered the healthiest of the Antilles. The religion of the island is Roman Catholic, but since the abolition of slavery in 1853 an attempt has been made to introduce other forms of faith. Under the care of the Colonial and Continental Church Society of England there is one clergyman with a congregation.

**Independent Republics.**—The island of Haiti is divided between the two republics of Santo Domingo and Haiti. The republic of SANTO DOMINGO was founded in 1844, and includes the eastern portion of the island, containing 18,045 square miles, with a population of 610,000, composed mainly of Negroes and mulattoes. The capital is the city of Santo Domingo (25,000), and Puerto Plata (15,000) is the chief port. The religion of the state is Roman Catholic, but other forms of worship are permitted.

HAITI became a republic in 1867. It occupies the western portion of the island, with an area of 10,204 square miles. The inhabitants, nine tenths of whom are Negroes, and the rest mulattoes, are variously estimated from 500,000 to 900,000. The capital, Port-au-Prince, has a fine harbor. The religion is nominally Roman Catholic, but the moral and intellectual condition of the people both of Haiti and San Domingo is low in the extreme.

The Wesleyan Methodists and the Jamaican Baptist Missionary Society have a few stations in each of these republics, but the work is hampered, and has not met with very great success. The Protestant Episcopal Church of the United States has quite a flourishing mission in Haiti. During the year 1888-89 it was retarded greatly by the civil war which raged during that year. The missionary staff consists of 1 bishop, 9 presbyters, 4 deacons, 17 lay-readers. The stations or parishes are: Port-au-Prince, Leogane, Gros Morne, Jeremie Aux Cayes, Torbeck, Petit Fond, Trionan; in all there are 382 communicants, 181 day-scholars, 124 Sabbath-scholars.

**Whately, Mary L.**, second daughter of Archbishop Whately, b. Halesworth, in Suffolk, Eng., 1824. After the father's appointment to the See of Dublin the family removed thither. She received the highest educational training, mental, moral, and religious, by her parents, and from her childhood was distinguished for uncommon activity, energy, and intelligence. She early gave herself to the service of Christ in works of kindness to the needy. After the Irish famine, she and her mother and sisters spent most of their time in the ragged schools in Dublin. Subsequently, having acquired Italian, she was much occupied with teaching and visiting the poor Italians, who were numerous in that city. In 1858 she visited Cairo and the Holy Land, and in 1860 was ordered by her physician for her health to a southern climate. In Cairo she opened a school for neglected Moslem girls, the first attempt of the kind in Egypt. Taking

with her a Syrian Protestant matron, she went into the streets and lanes near her home, and persuading the mothers to let their girls come to learn to read and sew, she gathered nine little ones into her school. Later, home duties required her return, and while at home she read to her father the proof-sheets of her second volume of "Ragged Life in Egypt." Her father having died, she returned to Cairo. She soon opened a boys' school also. In 1869, at the suggestion of the Prince of Wales, Ismail Pasha gave her a site just outside the city walls, and friends in England aided her in the erection of a spacious building. The school increased to six hundred, half the boys and two thirds of the girls being Moslems, the rest Copts, Syrians, and Jews. All were taught to read and write Arabic, and all learned the Scriptures and Christian doctrine. In addition the boys received an excellent secular education, and the girls were taught plain and fancy needle-work. Two branch schools have also been established. Pupils of the boys' school are found all over the country, filling important positions in the railway and telegraph offices, mercantile houses, places under government, and in other situations of trust. In 1879 a medical mission was added to the schools, and with her own private means Miss Whately built a dispensary and patients' waiting-room, where several thousands of sick and suffering poor have been treated gratuitously, and where she herself daily read and expounded the Scriptures to such as were willing to listen. Often she was cheered by overhearing the exclamations: "We never heard such words before; they are sweeter than honey." In addition to this varied work, she spent a few days yearly on a Nile boat, which she had hired, and distributed copies of the Scriptures in the villages along the shore to such as could read. These efforts were at first opposed by the ignorant and bigoted, but soon the arrival of the boat was hailed at many a village, and a crowd came to the shore to meet "the people with the book." Women grouped around her to listen to the gospel story. In one of these expeditions a cold which she had taken developed into congestion of the lungs, which resulted in her death March 9th, 1889. Friends had tried to dissuade her from going on this trip on account of her cold, but she said she had hired the boat and must go. For years she had wished to purchase a boat for the mission work, but could not raise the money needed. It is painful to reflect that but for this her highly useful life might have been prolonged.

**Whiting, George B.**, b. Canaan, N. Y., U. S. A., August 30th, 1801; graduated at Union College 1824; taught one year; graduated at Princeton Theological Seminary 1828; sailed in 1830 as a missionary of the A. B. C. F. M. for Syria. There he labored for twenty-five years, with the exception of brief visits to Constantinople and Switzerland for his health, and to the United States in 1837 on account of the protracted illness of his wife. He was stationed at Beirut till the autumn of 1834, when he was transferred to Jerusalem. After laboring there nine years he returned to Beirut in 1843. He died at Beirut of cholera November 8th, 1856.

**Whitney, Samuel**, b. Branford, Conn., U. S. A., April 28th, 1793; entered Yale Col-

lege 1817, remaining two years; offered his services in 1819 to the A. B. C. F. M. as a missionary to the Sandwich Islands, purposing to pursue his theological studies after reaching his field of labor; embarked October 23d, 1819, with the pioneers and founders of the mission, arriving at Hawaii March 30th, 1820. He was licensed to preach February 28th, 1823, by the Hawaiian Association, and ordained by the same November 30th, 1825. He spent most of his missionary life on the island of Kauai, and was a faithful laborer. He was taken ill and died September 21st, at the house of Mr. Alexander, at Lahainaluna.

**Whitman, Marcus**, b. Rushville (Gorham), N. Y., U. S. A., September 4th, 1802; studied with private tutors and at Berkshire Medical College; appointed by the A. B. C. F. M. missionary physician to Oregon. He left home February, 1835, on an exploring tour with Rev. Samuel Parker, arriving at St. Louis in April, Council Bluffs May 30th; crossed the Rocky Mountains, reaching Green River, a branch of the Western Colorado, a rendezvous of the fur-traders, previous to August 17th. The prospect for missionary labor among the Nez Percés and Flathead Indians seemed so favorable, that it was deemed expedient for Dr. Whitman to return and procure associates before establishing a mission among them. For this purpose he directed his way homeward August 27th. In March, 1836, he set out with his wife, Mr. Henry Spalding and his wife, and Mr. Gray, for Liberty, Mo., 1,700 miles mostly by water, then 2,200 miles all by land, and on horseback to Walla Walla, arriving September 3d. Mrs. Whitman and Mrs. Spalding were the first white women that ever crossed the Rocky Mountains. Dr. Whitman established himself at Waiilatpu, among the Kayuses, 25 miles from Walla Walla. The Indians manifested lively interest in their religious instruction. Having frequent occasion to visit the post of the Hudson's Bay Company at that place, he perceived that it was designed to hold that immense and valuable territory as a British possession. To forestall that design in part, and in compliance with a resolve of the mission, he, in October, 1842, crossed the Rocky Mountains in mid-winter on horseback, arriving at St. Louis February, 1843, with fingers, nose, ears, and feet frost-bitten, in spite of furs and buffalo robes. He visited Washington, called on Mr. Webster, Secretary of State, and President Tyler, and by his earnest representations prevailed upon them not to cede Oregon to the British Government (which they were about to do). A personal friend of Mr. Webster remarked: "It is safe to say that our country owes it to Dr. Whitman and his associate missionaries that all the territory west of the Rocky Mountains, and as far south as the Columbia River, is not now owned by England, and held by the Hudson's Bay Company." Dr. Whitman wrote from Fort Walla Walla November 1st, 1843: "I do not regret having visited the States, for I feel that this country must be either American or foreign, and mostly papal. If I never do more than to establish the first wagon-road to the Columbia River, and prevent the disaster and reaction which would have followed the breaking up of the present emigration, I am satisfied." While at the East he published a pamphlet describing the climate and soil of the

western region, and its desirableness for American colonies. After a hurried visit to Boston, he was back again on the Missouri in March, and conducted more than a thousand emigrants in wagons over the Rocky Mountains.

Dr. Whitman, Mrs. Whitman, two adopted children, and ten other persons, American emigrants, who had stopped at the station to winter there, were cruelly murdered by the Kayuse Indians November 29th, 1847. Mr. Spalding narrowly escaped. Forty-eight women and children were made slaves by the murderers, and treated with great barbarity. The mission was broken up. Dr. Whitman was a "diligent and self-denying laborer in the work to which he consecrated his time and energies." In his last letter he described his plans and hopes in regard to the Indians.

**Wilder, Hyman Augustine**, b. Cornwall, Vt., U. S. A., February 17th, 1822; graduated at Williams College 1845, East Windsor Theological Seminary 1848; ordained February same year; sailed as a missionary of the A. B. C. F. M. April 7th, 1849, for the Zulu Mission in South Africa. In 1868 he visited the United States for his health, but returned to his mission field in 1870. Continued ill-health obliged him to retire from his work, and in January, 1877, he arrived home. "For a short time after his arrival in 1849 he had charge of the mission press. He then went to Untwalumi and commenced a new station, where he was very successful in winning souls to Christ. He was our secretary nearly all the time he was in the mission, and was very successful in obtaining funds from the government for the support of our mission schools. He was highly esteemed by his brethren and the natives, as well as by the colonists generally."

**Wilder, Royal Gould**, b. Bridport, Vt., U. S. A., October 27th, 1816; graduated at Middlebury College 1839; taught in Mississippi and Vermont; graduated at Andover Theological Seminary 1845; sailed for India as a missionary of the A. B. C. F. M. in 1846. He was stationed for six years at Ahmadnagar. The seminary, containing from 50 to 80 boys, was put under his care by the mission. In 1852 he went to Kolhapur. On his arrival the Brahmans petitioned for his banishment, but he continued at his post, and after five years had one convert. When he went there he found in a population of 44,000 only one school, in a back street, with twelve boys. When he left in 1857 there was a government college costing \$200,000, and he was requested to make the opening address. In the years 1854-56 occurred the controversy between Dr. Anderson and the missionaries concerning mission schools. Mr. Wilder, in common with all his associates, was a strong advocate of schools for the Hindus; was in favor of employing even heathen teachers, if Christians could not be obtained; and refused to abandon his schools, or curtail school work, as required by Dr. Anderson. Mr. Wilder's health having utterly failed from the severe labor and exposure involved in founding a new mission, he embarked in 1857 for America, the day after the Sepoy mutiny broke out. His health having improved, he offered in 1858 to return to his station, but was informed by Dr. Anderson that the Prudential Committee had

voted to discontinue the Kolhapur Mission. His Presbytery and friends approving his course, he returned to Kolhapur in 1861, and established an independent mission. There he continued to labor for twelve years, receiving no aid from any Society, but sustained by voluntary gifts, Sir Bartle Frere, Governor of Bombay, and other English people, as well as natives, contributing to the work. From 1861 to 1869 he contributed many articles to the Bombay "Times" and "Gazette" on the subject of the system of national education. He also took a prominent part in memorializing Parliament, and inducing the Indian Government to establish the present system. In the "Times of India" appeared from his pen anonymous letters, which were said by those in high official position to have influenced Parliament in adopting measures for the education of the masses. He was offered an influential position in the educational department. When his schools were suspended by Dr. Anderson he had 500 boys and 100 girls under instruction. Before he left Kolhapur in 1857 the schools were reopened. On reaching his Indian home he found his beautiful church had been sold, and turned into a mosque. He received generous aid for a second church. In 1871 he transferred the Kolhapur Mission to the Presbyterian Board of Foreign Missions, and was a missionary of that Board till 1875, when, partly for his health, and partly to educate his children, he left India and returned home, having been engaged in mission work for thirty-two years. During that time he had preached in 3,000 cities, towns, and villages, had distributed 3,000,000 pages of tracts, had gathered into schools 3,300 pupils, of whom 300 were girls. Besides this, he had served on committees for the translation and revision of the Bible, and had written and published commentaries on three Gospels, and had edited and translated many books. The vessel which brought his luggage by sea was wrecked off the Cape of Good Hope, and among his goods that were lost was his manuscript of the Kolhapur kingdom, with full diary of his missionary work. His later years were spent at Princeton, N. J. In 1877 he started the "Missionary Review," which he edited with ability and success. He longed to return to India; and when the "Review" was provided for, he determined, though a great sufferer from an internal malady, to sail for Kolhapur. But his work was done, and on the day when the "Review" was transferred to other hands, and he had sent to the printers proof of the closing number of the last volume, he was called away. He died in New York October 8th, 1887.

**Williams, John**, b. Tottenham, near London, England, June 29th, 1796. At the age of fourteen, while an apprentice to an ironmonger, he showed great taste for mechanics, and acquired considerable experience in mechanical work. At the age of twenty he offered himself to the London Missionary Society as a missionary, and, after some special training, was ordained, and sent with his wife, November, 1816, to the South Sea Islands. He was first stationed at Eimeo, one of the Society Islands, where he soon acquired a knowledge of the native language. Thence he went to Huahine, where he found the natives had generally renounced idolatry. At the invitation of the King of Raiatea, the largest of the Society Group, he went

to that island, which became his permanent headquarters. His success here was remarkable, not only in Christianizing the people, but with Christianity introducing the arts and habits of civilization. In 1823 he visited with six native teachers the Hervey Islands, and after several days' search discovered Rarotonga, the largest of this group. Remaining here for some time, he founded a mission, which was greatly successful; not only Rarotonga, but the whole group of the Hervey Islands being Christianized. He helped the people at their own request to draw up a code of laws for civil administration. He made great use of native teachers whom he had trained. The work accomplished by him on both of these islands for the secular as well as the religious welfare of the natives was useful and permanent. He reduced the language of Raiatea to writing, translated with Pitman and Buzacot the New Testament into it, and prepared books for the schools he had established. Rarotonga being out of the way of vessels, he determined to build one in which he might visit other islands. With the aid of the natives he made the necessary tools, and within four months completed a vessel 60 feet long, 18 wide, the sails of native matting, the cordage of the bark of the hibiscus, the oakum of coconut husks and banana stumps, the sheaves of iron-wood, the rudder of "a piece of a pickaxe, a cooper's adze, and a long hoe." The boat was named "The Messenger of Peace." In this vessel, during the next four years, he explored nearly all the South Sea Islands, and several times visited Tahiti, Raiatea, and Rarotonga. In 1830 he set out in his vessel to carry the gospel to the Samoan Islands, which he had planned to do in 1824, but was deterred by the great distance—2,000 miles—and the ferocious character of the people. In 1832 he made a second visit to the Samoans, and found the people waiting for the gospel. "In less than twenty months an entire change had taken place in the habits and character of the Samoans. Chapels had been built, and everywhere the people seemed waiting to receive instruction." Having completed the object of his voyage, and visited all the islands of the Samoan Group, he returned to his family. With health impaired after seventeen years of toil and hardship, he sailed in 1833 for England, where he remained four years. During this time he had the Rarotongan New Testament published by the Bible Society, £4,000 raised for the purchase and outfit of a missionary ship for Polynesia, wrote and published a "Narrative of Missionary Enterprises in the South Sea Islands, with Remarks on the Natural History of the Islands, Origin, Languages, Traditions, and Usages of the Inhabitants," and prepared plans for the establishment of a college for the education of native teachers, and for a high-school at Tahiti. In 1838 he and his wife again embarked, accompanied by ten other missionaries. After visiting the stations already established by him, and several new groups, he proceeded with one companion to the New Hebrides with the view of establishing a mission, but was met by hostile natives of Erromanga, by whom he was killed, after he had landed, November 20th, 1839. A portion of his bones was recovered from the cannibals. It is supposed they were provoked to the deed by the ill treatment they had received from the crew of a vessel which a short time before had landed there.

**Williams, Samuel Wells**, b. Utica, N. Y., U. S. A., September 22d, 1812; graduated at the Rensselaer Institute in Troy 1832. While there, he was, at the age of twenty, invited by the A. B. C. F. M. to join a mission about to start for China, as superintendent of the press, having learned to some extent the art of type-setting in his father's publishing house. He accepted the invitation, and June 15th, 1833, sailed in the ship "Morrison" for Canton, China. Drs. Abeel and Bridgman were the only Americans to welcome him. He rapidly gained a knowledge of the Chinese language, and published several standard works. He became editor of "The Chinese Repository," begun the year before by Dr. Bridgman, to which many able writers contributed, he himself furnishing 140 distinct articles. The "Celestial Empire," published in Shanghai, says: "The Repository, extending through 20 volumes, is looked upon as of priceless worth, and the name of the editor will be long and honorably remembered by sinologues in connection with it." In 1835 he completed at Macao Medhurst's "Hokkeen Dictionary." In 1837 he was one of a party sent to Japan to restore seven shipwrecked seamen to their home. They were fired upon from batteries of two ports, and returned with the men to Canton. Taking some of these sailors into his own house, he learned their language, translated for them the Book of Genesis and the Gospel of Matthew, and had the joy of seeing them embrace Christianity. This knowledge of the language thus providentially acquired, led to his being appointed interpreter for Commodore Perry, who was sent by our government to Japan fifteen years later. Soon after the press was established at Canton, Chinese interference with his native helpers compelled him to remove it to Macao; thence, later, it was transferred to Hong Kong, and established again afterwards in Canton, where, in December, 1856, his own dwelling and the entire establishment, comprising three presses and many fonts of type, with 7,000 printed books, were destroyed by fire. In 1844 he returned to the United States, passing through Egypt, Syria, and Europe. During the three years spent at home he delivered a course of lectures on Chinese subjects, which were afterwards enlarged and published under the title of "The Middle Kingdom." With the proceeds of the lectures he secured from Berlin a font of movable Chinese type. Soon after the publication of "The Middle Kingdom" the trustees of Union College conferred upon him the degree of LL.D.

Restrictions forbidding foreigners to bring their wives to Canton having been by the treaties removed, he was married, and with his wife sailed in 1848 for Canton, taking with him the new font of type. On arriving at Canton he found to his great joy regular public services in Chinese. His remarkable success as an interpreter led to his appointment to the diplomatic service of the United States from 1858 to his resignation in 1876. In 1857 he was Secretary of the United States Legation in Japan. In 1858 he aided William B. Reed in negotiating the treaty of Tientsin. In 1860-61 he revisited the United States, and delivered lectures before the Smithsonian Institution and elsewhere, returning to China in 1862 as Secretary of the United States Legation at Peking. Besides the "Chinese Repository," which for twenty years

occupied much of his time, he published "Easy Lessons in Chinese" (1841); "An English and Chinese Vocabulary in the Court Dialect" (1843); "The Chinese Commercial Guide" (1844); "A Tonic Dictionary of the Canton Dialect" (1856); "A Syllabic Dictionary of the Chinese Language" (1874), containing 12,527 characters. On this dictionary, a work of great philological value, he spent eleven years. His "Middle Kingdom," the best work extant on Chinese government, geography, religion, and social life, reappeared in 1883 in a revised and enlarged edition. Retiring from the service of the government in 1876, he returned to the United States, took up his residence in New Haven, was appointed professor of Chinese at Yale College, and in 1881 was elected president of the American Bible Society. He died February 16th, 1884.

"Few men," says President Porter, "were better fitted in temperament, intellectual tastes and habits, moral energy and spiritual self-consecration for the constant and unsparing drudgery involved in such a life. He was by himself and in his words a living and speaking witness of the dignity and inspiration of the missionary calling."

**Williams, William Frederic**, b. Utica, N. Y., U. S. A., January 11th, 1818; studied at Yale College, and was subsequently engaged in various employments, mostly in engineering, till 1844, when he entered Auburn Theological Seminary to prepare for the ministry. In November, 1846, he offered himself to the A. B. C. F. M. for the missionary work, in which his elder brother, Samuel Wells Williams, was engaged in China. Was ordained in 1848; sailed January 3d, 1849, for the Syria Mission. In the summer of 1850 he was designated to Mosul, which soon became a station of the "Assyrian Mission." There he remained till 1859, when he commenced the station at Mardin. He died at Mardin, Eastern Turkey, February 14th, 1871.

"There was in Mr. Williams an undue tendency to distrust his own powers and judgment, and to look on the dark side of things, but aside from this he was a rare man. He had great power of self-control. He possessed genuine refinement, and with the marvellous fund of information which he had in almost all departments of knowledge, his fine command of language, his good nature and enthusiasm, he was in his more cheerful moods a fascinating member of the social circle. His clear mind had been carefully cultivated, and his acquisitions were very exact. However much he distrusted his own judgment, his associates confided in it largely. He was enthusiastic in his zeal for the policy of self-support in the missionary work. His students held him in the highest admiration, and very few missionaries have secured the affection of the people for whom they labor, to so great an extent as he. He was withal a devoted Christian."

He was in a sense the mainstay of the mission work among the Arabic-speaking peoples of Northern Mesopotamia during years of trial and perplexity when it seemed often as if the mission would be compelled to withdraw, and to his patient, wise perseverance is very largely due the success that is now attending the labors of the missionaries in that field.

**Williamson, Alexander**, b. Falkirk, Scotland, December 5th, 1829; studied at Glasgow; ordained April, 1855; sailed as a medical missionary of the L. M. S. May 21st, for China, arriving at Shanghai September 24th; was stationed for two years at Shanghai and Pinghoo. His health failing, he returned to England in 1858, and his connection with the Society soon terminated. After some years spent in Scotland, he returned to China as the agent of the Scottish Bible Society, and in connection with the United Presbyterian Mission. He was at first stationed at Chefoo, and travelled extensively, making adventurous journeys into unknown and distant regions. Much valuable information was obtained, which in 1879 was published in two volumes. He was afterwards settled in Shanghai, where he established a Society for the Diffusion of Christian and General Knowledge among the Chinese. He was a frequent contributor to the "North China Daily News." Dr. Williamson was attacked with fever, and died August 28th, 1890.

**Williamson, Thomas S.**, b. Union District, S. C., U. S. A., March, 1800. His ancestors on both the father's and mother's side were slaveholders, but not from choice, and in 1805 his parents removed to Ohio for the purpose of liberating the slaves in their possession. Dr. Williamson inherited a practical sympathy with the colored people. He graduated at Jefferson College, Penn., and at Yale Medical School, and practised medicine for ten years in Brown County, Ohio. After spending one year in Lane Theological Seminary, he was licensed and ordained by the Presbytery of Chillicothe, and April 1st, 1835, left Ripley, O., as a missionary of the A. B. C. F. M., with his family, reaching Fort Snelling, in the country of the Dakotas, in May. He remained in connection with the A. B. C. F. M. for thirty-six years, until 1871, when he and his son, Rev. John P. Williamson, transferred themselves to the care of the Presbyterian Board. He died at St. Peter, Minn., June 24th, 1879.

He fully believed in the capability of Indians to become civilized and Christianized, and also that God had by special providences called him to this work. His great life-work—that of translating the Bible into the language of the Sioux Nation—was continued through more than twoscore years, and was only completed in 1889. In this, as in most things, he worked slowly and carefully. He lived to read the plate-proofs of all, and to know that the Scriptures of the Old and New Testaments were in the language of the Dakotas."

**Wilson, John**, b. Lauder, in Berwickshire, Scotland, December 11th, 1804. At the age of fourteen he went to the Edinburgh University, where he graduated in 1828, taking a high place in the classes of physical science, and in the last two years studying anatomy, surgery, and the practice of physic. The reading of the reports of the Bible Society, he said, first awakened him to the importance of missions, and led him to resolve to devote himself to a foreign field. He was ordained in 1828, and sailed August 30th of the same year for India, under the Scottish Missionary Society, reaching Bombay February, 1829. Remaining there a month, he left for the comparative seclusion of Bankote and then Hurnee, that he might, aided by his brethren, and in the midst of country-people, learn Ma-

râthi thoroughly. In the eight months of the first hot and rainy season he laid the foundation of his Orientalism "with a rapidity, thoroughness, and breadth, due alike to his overmastering motive, his previous training, and his extraordinary memory." In March, 1832, was established an English school, afterwards known as the General Assembly's Institution, and under the immediate superintendence of Dr. Wilson. He gave himself to the acquisition of the vernaculars of a varied population—the Marâthi, Gujarati, Hindustâni, Hebrew, Portuguese, with Persian, Arabic, and Sanskrit in reserve for the learned classes, which he acquired and fluently used. Though aware that for some time and to a great degree his must be the toil of preparation, he from the first expected and worked for baptized converts. So, in February, 1831, two years after landing, he formed a native church in Bombay with eight members, who chose him as their minister. Almost his earliest work in Bombay was the preparation of a Hebrew and Marâthi grammar for the Jews, known there as Ben Israel. He also spoke the Portuguese with fluency. He was thus able early to influence the Hindu, Mohammedan, Parsi, Jewish, and Portuguese communities. His advance in Sanskrit was parallel with his acquisition of Marâthi, so that he was able to confute the Brahmans out of their own sacred books. He soon commenced a series of discourses on Christianity with Hindus, Mohammedans, and Parsis. Having mastered the languages, he mingled with the people who spoke them, and made many tours to Nasik, Poona, the caves of Ellora, and other prominent places. In 1833 was established in Bombay an English college for the Christian education of native youth among Parsis and Hindus, and Dr. Wilson threw the whole weight of his culture and energy into the new institution. He lectured to the students on the Evidences of Christianity, Biblical Criticism, and Systematic Divinity. In 1835, April 19th, his devoted and talented wife died. In 1836 he received the degree of Doctor of Divinity from Edinburgh University. In 1839 he baptized two Parsi youths,—the first proselytes from the faith of Zoroaster,—who are now ordained ministers in the Free Church of Scotland and the Baptist Church. In 1842 he resigned the Presidency of the Bombay branch of the Royal Asiatic Society, which he had filled for seven years. In 1843, after fourteen years of hard work in India, Dr. Wilson left for his native land. Every community vied with each other in its demonstrations of respect, and the government furnished him with letters to the authorities of the countries through which he wished to pass; but he valued none more highly than the honor paid him by the native and non-Christian students of the institution established in 1833. On the way he intended to visit Egypt, Syria, Palestine, and Eastern Europe, not only for scholarly and biblical research, but to report to his church the condition of the Jews, Samaritans, and Eastern Christians.

In the Disruption of the Scotch Church he joined the Free Church, and on his arrival was received with great honor. He addressed large audiences of all the evangelical churches on the missionary claims of India. At Oxford he preached to the *élite* of the university and of the Church of England. At the General As-

sembly of the Presbyterian Church of Ireland in 1844 he was received with "loud acclamations" as the co-founder of the mission to the two millions of Kathiawar. In 1846 he again married, and in September, 1847, re-embarked for India. In 1857 he was appointed by the government Vice-Chancellor of the University of Bombay, and was examiner in Sanskrit, Persian, Hebrew, Marâthi, Gujarati, and Hindustani. He was twelve years secretary to the different translation committees of the Bombay Bible Society. In 1869, when about to return to Scotland, the leaders of all the communities in Bombay, European and Asiatic, resolved to honor him on the fortieth anniversary of his arrival in Western India. The sum of £2,100 was subscribed, and presented to him on a silver salver wrought by native artists, and bearing the inscription in Sanskrit: "This salver was presented to Rev. John Wilson, D.D., F.R.S., at a meeting of the inhabitants of Bombay, as a mark of esteem for his high personal character, and in acknowledgment of his great services to India in the cause of education and philanthropy." The governor presided at a great meeting held in the Town Hall February 15th, 1869, and made the presentation. The Chief Justice assisted, and a loving letter from Sir Bartle Frere was read. The names of the subscribers on the parchment were in many languages, and represented all races, creeds, and classes in the East, and all varieties of Christian sects. Dr. Wilson determined to use the interest only in his philanthropic and literary labors, designating the capital sum to aid the higher studies of the youth of Bombay. The fund was used by the University of Bombay to found the John Wilson Philological Lectureship. The citizens of Bombay in general also presented him with an address, and the Asiatic Society reviewed, with high commendation, his great services for India. While at home he was elected Moderator of the General Assembly of the Free Church. In his closing address before the Assembly on the foreign-mission work, he said that notwithstanding his forty-one years' connection with India, if he lived to the age of Methusaleh, he would consider it a privilege to devote his life to its regeneration. He returned to India in 1871. Frequent attacks of fever after his return ended in 1875 in a chronic breathlessness from weakness of the heart. On attempting to reach Mahabeshwar he was forced by an alarming attack to stop twelve miles short of the sanitarium. To Mr. Bowen, American missionary, he said the day before he died: "I have perfect peace, and am content that the Lord should do what seems good to Him." He died December 1st, 1875. "Governor, council, judges, the vice-chancellor of the university, missionaries, chaplains, and Portuguese Catholics, the converts, students and school-children, Asiatics and Africans, of every caste and creed, reverently followed the remains of the venerated missionary for two hours, as the bier was borne to the last resting-place."

The Rev. George Bowen, who saw much of Dr. Wilson's life and work for thirty years in Bombay, says: "Dr. Wilson was among missionaries *sui generis*, and a law unto himself. There was a many-sidedness about him that made it easy for him to enter into relations with men who cared little for the gospel, and

who were perhaps led to regard with more favor the work of missions, because of the wide range of thought and investigation to which Dr. Wilson lent himself. His capacities determined his spheres. His Orientalism, his archæology, his philosophy, his relations with the rulers or with the university, doubtless interfered with a more direct and simple evangelism, but never suffered him to lose sight of the fact that he was a missionary; he doubtless believed, and the readers of his biography will believe, that he made these things tributary to the advancement of Christ's cause."

**Wilson, John Leighton**, b. Sumter Co., S. C., U. S. A., March 28th, 1809; graduated at Union College 1829, and Theological Seminary of Columbia, S. C., 1833; ordained the same year by Harmony Presbytery, and set apart as a missionary to Africa. In the summer of 1833 he studied Arabic at Andover Seminary, and in the autumn went to Western Africa to explore the coast, returning in the spring. He decided on Cape Palmas as the most favorable place for the mission. In May, 1834, he was married to Miss Bayard of Savannah, and on the 24th of November following sailed as a missionary of the A. B. C. F. M. for Cape Palmas, arriving in December. He was received with demonstrations of joy by the natives, and found the frame house which he had taken out on his first visit erected on the spot he had selected. In 1836 he made three tours of exploration in the interior, journeying mostly on foot. He had while at Cape Palmas, where he remained seven years, a boarding-school numbering fifty, a fourth of whom were females; a church of forty members; 180 youths had been educated, the Grebo language reduced to writing, a grammar and dictionary of the language published, the Gospels of Matthew and John translated and printed, besides several other small volumes. In 1842 he removed to the Gaboon River on the Gulf of Bahia, 1,200 miles south of Cape Palmas, and commenced a new station among the Mpongwe people. This language also was reduced to writing, a grammar and vocabulary published, and portions of the Bible translated and printed. In 1853 he returned home on account of failing health, and became Secretary of the Presbyterian Board of Foreign Missions in New York, editing also the foreign department of the "Home and Foreign Record." He served as Secretary till the commencement of the civil war, when, returning to his Southern home, he organized for the Southern Church a Board of Foreign Missions, of which he was appointed secretary, holding the office till 1885. He established and edited "The Missionary," a monthly magazine. He organized also the Board of Sustentation. In 1854 he published a volume of 500 pages on Western Africa, its history, condition, and prospects, which was pronounced by Dr. Livingstone the best work on that part of Africa ever published. He published also many articles in the "Southern Presbyterian Review." He received the degree of D.D., from Lafayette College 1854. He died at his home near Mayesville, S. C., July 13th, 1886.

**Winslow, Miron, D.D., LL.D.**, b. Williston, Vt., U. S. A., December 11th, 1789; in the sixth generation from Kenelm Winslow, brother of Gov. Edward Winslow, of Plymouth Colony. Having acquired a good English

education, at the age of twenty-one he engaged in mercantile pursuits at Norwich, Ct., and two years later he became so deeply impressed with the importance of foreign missions, that he consecrated himself to the work of a missionary; studied in Middlebury College, Vt.; then pursued special studies in languages at Yale, and graduated at Andover Theological Seminary. For six months he preached on behalf of the A. B. C. F. M., raising large sums of money for its work, and displaying that rare combination of intellectual, business, and religious gifts which so distinguished his subsequent career.

At his ordination on November 4th, 1818, in the Salem Tabernacle, in company with Messrs. Spaulding, Woodward, and Fisk, Professor Moses Stuart preached the sermon, which was widely circulated among the churches. In the same edifice, February 6th, 1812, had been ordained the initial band of American foreign missionaries—Messrs. Judson, Hall, Newell, Nott, and Rice. On January 11th, 1819, he married Harriet W. Lathrop, of Norwich, Ct., and with Messrs. Spaulding, Woodward, and Scudder sailed for India June 8th, 1819; arriving at Oodooville, Ceylon, on July 4th. He remained there till 1833, conducting the boarding and day school, laboring and preaching in the neighborhood, and performing a large amount of literary work. His contributions to the "Missionary Herald" alone would fill, if collected, several large volumes. His observation taught him that education must go hand-in-hand with the missionary chapel and preaching. In this respect he was the pioneer American missionary of his day, and so late as 1856 he advocated his views at the meeting of the A. B. C. F. M. in Albany. His interest in the Batticotta Seminary, established 1823, was great. "The plan—which, seven or eight years later, was adopted in Calcutta by the Rev. Dr. Duff and his colleagues"—was, as he wrote, that "of giving the pupils a good knowledge of English and Western science, in connection with their own vernaculars, instead of Sanskrit." He adds: "The institution had great influence in raising the standard of education in North Ceylon, and affected even the continent." The Madras University conferred its first degrees of B.A. on the seminary graduates. Mrs. Winslow died January 14th, 1833, at Oodooville. The following October he sailed for the United States, where his missionary addresses created a wide and deep interest in India as a mission field. He married April 23d, 1835, in New York, Mrs. Catherine Waterbury Carman, and sailed November 16th, 1835, for Oodooville. On August 18th, 1836, he established the A. B. C. F. M. Mission in Madras, the scene of his labors for the remaining twenty-eight years of his life. Mrs. Winslow died of cholera, September 23d, 1837, and September 12th, 1838, he married Annie Spiers, daughter of Hon. Archibald Spiers of the East India Board, and granddaughter of Lord Dundas. She died June 20th, 1843.

At an early period of his labors in Madras Mr. Winslow was engaged in translating the Bible into Tamil; and as late as 1850 he was much occupied with improvements and revisions of portions of the translations. When not thus engaged, he was occupied three hours daily with a moonshee on the Tamil and English dictionary. In November, 1850, he announced that the printing of the new version of the Tamil

Scriptures was completed. ("Missionary Herald," March, 1865.) He published "occasional reports" of the Madras Mission.

On March 12th, 1845, Mr. Winslow married Mrs. Mary W. Dwight, widow of Rev. Robert O. Dwight, D.D., of the Madura Mission; she died April 20th, 1852. He received from Harvard College the degree of D.D., which his Alma Mater supplemented with LL.D. upon the reception in this country of copies of his Tamil Lexicon.

Dr. Winslow's great literary work requires special notice. Its title-page reads thus: "A Comprehensive Tamil and English Dictionary of High and Low Tamil, by the Rev. Miron Winslow, D.D., etc., assisted by competent Native Scholars: in part from manuscript materials of the late Rev. Joseph Knight and others. Madras: Printed and Published by P. R. Hunt, American Mission Press." The splendid quarto of 976 pages, three columns to a page, with 11 additional pages, attested the capacity of the mission press to execute the highest grade of printing. With the exception of Wilson's Sanskrit Lexicon, it is the most elaborate and complete dictionary of the languages of India, containing 67,452 words with definitions, of which 30,551 for the first time take their place in Tamil lexicography. Said the "Round Table" (N. Y.): "It thus appears that nearly half of all the words in the Tamil language owe their English lexicographic birth and position to the labors of our American Orientalist. The work before us includes both the common and poetic dialects, and the astronomical, astrological, mythological, botanical, scientific, and official terms, together with the names of authors, poets, heroes, and gods. It thus initiates the learner not only into the language, but into its literature, and makes him acquainted with the philosophies, mythologies, sciences, traditions, superstitions, and customs of the Hindus. . . . The learned author has adopted an original arrangement of the verbs. He says that all the other parts of the verbs flow naturally from the imperative singular, and that he finds this the most simple and natural arrangement. He thus makes an important advance on all preceding steps, not only in this but other languages, in the grammatical analysis of this most difficult part of speech. The original introduction of nearly half of the classical words in Tamil literature, in connection with translations of peculiar idioms and phrases, and the scholarly and philosophical arrangement of the whole work, make this the first and only comprehensive and complete Tamil and English dictionary ever published. It is a great honor to American scholarship that one of our own number should have produced this work." The publication of the dictionary elicited the gratitude of scholars and missionaries, as well as the government officials of India.

On the eve of his departure from Madras in rapidly failing health, Dr. Winslow received a formal letter from "The Madras Missionary Conference" (composed of over 40 members from the missionaries of all denominations), in which they said: "The brethren feel that in you they lose one whose place can never be supplied." The native church also expressed its feelings of regret in a lengthy scroll. Dr. Winslow sailed with Mrs. Winslow August 29th, 1864; was landed October 20th, at Cape

Town, South Africa, and died two days later. His body lies in the Cape Town Cemetery, near that of Scudder, with whom he had so long been associated in the missions of India.

**Winslow, Harriet Lathrop**, first wife of Miron Winslow, b. Norwich, Ct., U. S. A. April 9th, 1796; d. at Oodooville, Ceylon, Jan. 14th, 1833, where her body lies by the side of her two sisters, both devoted missionaries, Mrs. Charlotte H. Cherry and Mrs. Harriet Joanna Perry. Distinguished for her lofty missionary spirit and efficient educational labors. Her memoir contains an interesting mass of missionary intelligence, and two poetical tributes from Mrs. Lydia H. Sigourney.

**Wittewater**, a town in South Africa, in West Cape Colony, north of Malmesbury and near Goederwacht. Mission station of the Moravians, with 1 missionary and wife, occupied for the purpose of having a base of operations from which to reach the estate of Goederwacht, where it was impossible for the missionaries to obtain a permanent title to any property (for the reason of this see Goederwacht). From Wittewater Goederwacht was regularly visited until it became a separate station.

**Wittkleibosch**, a village inhabited by Fingoes, 10 or 12 miles from Clarkson, in the Zitzekamma district, Cape Colony, South Africa. Mission station of the Moravians, who began work in this place from their station Clarkson soon after Governor Lord Napier had set it apart for the Fingoes freed by the Kafir war of 1835-36. All their efforts, however, were of no effect until a native Fingo was stationed in the neighborhood as a teacher; and his earnest, patient, faithful work for his people has been wonderfully blessed, so that now there is in this station a large and prosperous congregation, of which he is the pastor.

**Wolff, Joseph**, b. Bavaria, Germany, 1795, of Jewish parentage, the son of a rabbi; early became a Christian; was baptized in 1812 at Prague by a Benedictine monk, taught Hebrew for a time at Frankfort and Halle, studied at Munich, Weimar, and Vienna; went to Rome in 1815, to be educated as a missionary. He entered first the Collegio Romano, and in 1817 the College of the Propaganda. While in Rome he spent his time in studying the Oriental languages. Suspected by the Inquisition of heresy on account of some liberal views he had expressed, he was sent in 1818 to Vienna, then to the monastery of Val Saint in Switzerland, and finally dismissed as incorrigible. He went to London, joined the Church of England, and through the influence of Charles Simeon and others, who perceived his fitness for mission work among the Jews, he entered Cambridge University, where for two years he continued his Oriental studies under Professor Lee. He then commenced his career as a traveller, visiting Malta, Egypt, Palestine, Mesopotamia, Armenia, Bassorah, and Persia, and returning home by the way of Circassia, Constantinople, and the Crimea, reached Dublin, May, 1826. In these travels he became acquainted with learned men of all ecclesiastical relations, everywhere professing Jesus as the Christ, and although he had been imprisoned, and his life

often endangered, showing in all undaunted courage and great presence of mind. In 1827 he married Lady Georgiana Walpole, daughter of the Earl of Oxford, who accompanied him on his second missionary tour as far as Malta. In April he proceeded to Smyrna, the Ionian Islands, and Jerusalem, where he was poisoned by some Jews, and just escaped death. On recovering, he set out for Bokhara by way of Persia, encountering on the journey the plague; was repeatedly robbed, taken prisoner, and sold as a slave, but finally reached Bokhara. After laboring there three months in mission work among the Jews, he went to India, visited the Punjab, Lahore, Lodiana, Simlah, Delhi, Benares, Lucknow, and reached Calcutta March, 1833. He preached everywhere in different languages, distributed the Scriptures, and interested the most prominent men and women in his behalf. From Calcutta he went to Haidarabad, visited the Jews at Cochin and Goa, proceeded to Bombay, whence he sailed for Arabia, and returned to England in 1834. In 1836 he made a second visit to Abyssinia, whence he sailed for Bombay, and there embarked for America, reaching New York August, 1837. He was ordained as deacon in the Protestant Episcopal Church by Bishop Doane of New Jersey, visited the principal cities, preached before Congress, and returned to England January 2d, 1838. Having received priest's orders, he was settled as curate in Lengthwaite, and then for his wife's health he went to York, where he remained five years. In 1843, the news of the imprisonment of Colonel Stoddart and Captain Conolly at Bokhara having reached England, Dr. Wolff, means being furnished by individuals, set out to attempt their release or ascertain their fate. Before reaching Bokhara he learned that they had been beheaded. He himself was made a prisoner and condemned to death, but through the intervention of the Persian Ambassador he made his escape. Reaching England in 1845, he was settled in the parish of Isle Brewers, Somersetshire, where he labored till he died, May 2d, 1862. The most interesting of his publications are "Travels and Adventures of Rev. Joseph Wolff, D.D., LL.D." (2 vols. 1861).

**Wogul Version.**—The Wogul belongs to the Finn branch of the Ural-Altaic family of languages, and is spoken in Western Siberia, Russia. The Gospels of Matthew and Mark were translated in 1820, and were entrusted to the Russian Bible Society for publication. They do not appear to have been printed. The Gospel of Matthew, prepared by G. Popov, was printed phonetically for Prince L. L. Bonaparte in 1868. But this was not intended for circulation, but for linguistic purposes. In 1882 the British and Foreign Bible Society published at Helsingfors the Gospel of Matthew, and in 1883 that of Mark; both were prepared by Professor Ahlquist.

(Specimen verse. John 3 : 16.)

**Woman's Work for Woman.**—The modern uprising of women in behalf of foreign missions had its motive in the social systems of the East. It was primarily the *purdah* and the latticed window, the zenana and the harem, that roused the women of Christendom to attempt an errand of mercy to their sister-women of the heathen world. Experience proved that no nation can be elevated until its women are regenerated; also that no man, whether clerical missionary or even physician, could carry the gospel to the jealously-guarded women of Oriental households. When the degradation and sufferings of Asiatic women and the darkness of their future were revealed to the western world, the conscience of Christian women was aroused. The gospel had developed them and set them in honor; given them security and moral power; made them intellectually free, and queens of happy homes; and English-speaking women recognized the claim of their less happy sisters to the same blessings. They undertook to carry the gospel where without them it could not go.

David Abeel, missionary of the American Board, was the first to suggest a movement of this kind. On his way home from China in 1834 Mr. Abeel told the people of England the facts, which had hitherto been imperfectly known, concerning the condition of women in India and China. He showed that missionaries' wives, who had always done what they could for women and children about them, were neither sufficient in numbers nor sufficiently free to assume the burden of lifting up their sex. Efforts so strenuous and continuous would be necessary as to demand the entire consecration of many lives, and he urged that single ladies should volunteer in Christ's name for this new form of service, and that women of the church at home should organize to secure a base of supplies and to render their labors permanent. Little did Mr. Abeel know what a force he was evoking. The Spirit of God winged his words. That same year the first society was formed in England. It is still in operation,—"The Society for Promoting Female Education in the East;"—and upon whatever others, in the progress of years and under divine control, the burden of leadership may seem to fall, this society is ever to be had in reverence, as the one that ventured first and led the way. Others followed speedily in Great Britain: those connected with the Free Church and the Established Church of Scotland in 1837, the Indian Female Normal School and Instruction Society in 1852, and the Wesleyan Auxiliary in 1859; but none of these were much known across the Atlantic.

Meanwhile Mr. Abeel had brought his plea to America, but hearts were not ready for it. At last, in 1861, Mrs. Doremus of New York City was able to carry out her cherished longing, and the Union Missionary Society was launched. Women of six denominations composed its membership, and it stood alone in America for eight years. This was the period of the civil war in the republic, and in the absorbing demands of that struggle Christian women had no leisure to undertake new departures in missions, but at the same time they were acquiring a training for it in the future. By combining as they did, on a large scale, for work in soldiers' hospitals and in the Sanitary Commission, they learned the possibility of working through organizations, how to handle them, and their

value above that of individual efforts. The end of the war found many women developed in executive ability and at the same time empty-handed, stripped of their dearest cares and plans. Then missions came to the front.

The Woman's Board in Boston was formed in 1868, not like her predecessor, the "Union," to stand alone, but to co-operate with the Church Board already in existence. In the next three years four denominational societies had undertaken their share in the world's conversion. Time has proved the wisdom of this separation of forces for the accomplishment of one end.

Instead of the one society of 1834 there are now in Great Britain, Canada, and America more than sixty such boards and societies, each under its own management; or societies which contribute to forty-nine separate treasuries, besides many others which resemble them more or less in aim and method. Not less than 1,468 English-speaking women, of whom more than 50 are physicians, were maintained in the missionary field in 1889-90 by women's societies, and more than a million and a half dollars were gathered and disbursed by them. If in all these years there have been times when individual societies have halted or stood still, there has never been a day when there was not progress somewhere along the line.

**Organization at Home.**—All the main features of organization necessary in each separate Woman's Board of Missions may be included in three, and in England two are often made to answer.

*First.* There is the local or parish society, made up of individuals from a single local church, or, as often occurs in America, women of two or more churches of the same denomination in one large town unite to form one Missionary Society. This local society is usually called an Auxiliary. It has its own constitution and officers, and is independent in its management; but when it undertakes to carry out its purpose of sending forth missionaries and funds to sustain various forms of missionary work at a distance, it does not try to act alone, but under its Woman's Board, of which it thus becomes an "auxiliary," or helper. An annual fee is the usual requisite for membership.

*Second.* These auxiliaries are grouped, and thus constitute what are usually called Branches. This relation is sectional. Adjacent auxiliaries, sometimes to the number of not more than 20, sometimes covering a county, sometimes a whole State containing 800 auxiliaries, combine with a set of officers elected from the whole territory represented by the branch. This stands between the Board and its auxiliaries. It voices the wishes of the Board to the auxiliaries, and expresses the sentiment of the latter to the Board. A branch assumes the responsibility for some missionary enterprise, and its auxiliaries share it among themselves proportionally.

*Third.* The Board includes all the branches, and requires its own officers. A legal charter is requisite for a Board, but not for auxiliaries and branches. Auxiliaries usually hold their meetings monthly, or oftener; branches quarterly; but the Board meets annually, or, at most, two or three times a year. Business of the Board is transacted throughout the year by its officers, who are elected by the delegates of annual meeting. The delegates are chosen, not from auxiliaries, but from branches. The

Board, or Society (whichever name is given to the inclusive organization), has supervision over an area which varies according to circumstances. If the Society is undenominational, like the English Society for Promoting Education in the East, or the Union Missionary Society in America, it may have its constituency in any part of the country. If the Society co-operates with a Board of some Church, its territory will depend upon the essential organization of that Church. The Society within the Protestant Episcopal Church in America, for reasons which are apparent, is indivisibly one, all over the country. That within the Methodist Episcopal Church has jurisdiction over all the Northern and Western United States. But the geographical spaces are so great in America that in many cases it is found more practicable to have several co-ordinate Boards in one Church. The area of each Board is geographically determined. The Congregational women are massed distinctly under Eastern, Middle, and Western Boards; the Baptist women under the East, the West, and two Pacific Coast Boards.

The advantage of one great undivided Board is offset in the case of several co-ordinate Boards by the following results:

a. A far greater number of responsible, official workers are secured.

b. The work of each Board does not become unmanageably large for its officers.

c. Interest throughout the constituency is augmented by nearness to headquarters.

d. It is possible for a vastly greater number of members to afford the expense and take the journey to attend annual meetings of several Boards than of one Board.

While organization always begins at the top, with the Board the real germ is the auxiliary, and this is the place of growth. Enlargement of an auxiliary by addition of members, one at a time; an auxiliary formed in a local church by gathering a few picked individuals into a little monthly meeting,—this is the unobtrusive way in which Boards grow. Societies of Young Ladies, and Children's Bands, are regarded as only phases of the auxiliary. The former may be wholly or in part independent in management and share delegates to annual meeting with the senior auxiliary, but the branch officers are responsible for the work undertaken both by young ladies and children within its domain.

The existence of more than 30,000 auxiliaries and bands in America, with a membership of several hundreds of thousands, speaks volumes for the patient, persevering, enthusiastic efforts of the women of the church for foreign missions; but it after all represents the efforts of only a fraction of them. The Woman's Board in Boston, Mass. (Congregational Church), having its constituency in New England and the Middle States,—where traditions in favor of foreign missions are exceptionally strong, and where the intelligence of the people and conditions of society would be more advantageous for such an enterprise than in new States,—had in 1889 only 1,182 auxiliaries out of 1,921 churches, and of 190,000 women church-members, about 50,000 belonged to the auxiliaries. There are 600 churches in the borders of the largest Presbyterian Society which are not yet reached by its efforts. Many

other societies cover not more than one fifth of the church-membership.

**TERMS EMPLOYED.**—In Great Britain the name "Ladies' Society" or "Ladies' Association" is common, while in America the phrase "Woman's Board," or "Society" is preferred. Also many societies in Great Britain dispense with the "auxiliary," and appoint "collectors" of funds from the churches; others do not use the term "Branch," but "District Auxiliary" instead. "Presbyterial Secretaries" and "Associations" and a variety of other terms take the place of those explained above.

In the Presbyterian Church in America "Presbyterial Society" corresponds to the term "Branch," and a fourth feature, the "Synodical Society," is introduced in places. The Protestant Episcopal Society is itself called, not Board, but "Auxiliary," and its constituent societies, not auxiliaries, but branches, diocesan and parish respectively.

In Great Britain, societies often have long lists of honorary officers. Such are scarcely known in America, where names heading the official list are those of the actually responsible leaders, who conduct public meetings and control the affairs of their societies. The committees of gentlemen which some societies in the old country appoint are also unknown in America, the office of Auditor of Accounts being the only one among them ordinarily filled by a man.

**INCOME.**—The total income of all these Woman's Societies for 1889-90 was not less than one million six hundred and ninety-two thousand dollars. Whence and how was it gathered, and, above all, does it represent so much gain to foreign missions, or is it only taken out of one treasury and put into another?

1. Some of it came from legacies. A moiety was the income of schools, the gifts of visitors, the profits of publications, the fees of women physicians. Some Sunday-schools made contributions. The large proportion of it was the offerings of women and children of the organized societies. It represents annual fees, or monthly and weekly pledges; the occasional thank-offerings of praise-meetings; the tithing of incomes; earnings for the sake of giving; the results of fairs and other inventions; the superfluities of some, the self denials of others.

2. Little copper or silver offerings from the auxiliary and band were gathered by the branch treasurer, who sent the sums to the treasury of the Woman's Board, which, if independent, disbursed it for its missions, or, if acting with a Church Board, handed it over outright, thus saving that Board infinite labor of collecting, recording, and acknowledging microscopic sums from little children and the mites of the poor.

3. From the beginning of all this woman's work it has been the pronounced aim to gather funds which would not otherwise be given, for the prosecution of foreign missions. At the annual meeting of the Ladies' Committee of the London Missionary Society in 1888, their Hon. secretary said the satisfaction of the committee in seeing the advance in their own contributions during the year was marred by noticing a falling off in those of the parent society, and she recalled to the audience the purpose of the committee not to make their treasury a side-

channel into which to divert contributions from the General Fund.

There would always be devout women in the church who would sustain foreign missions. Some of them still regularly contribute to the general Board alone; some to both its treasury and that of the Woman's Society: but the mass of women would never, without the methods now in use, be sufficiently informed upon missions, nor sufficiently in touch with them, to make many sacrifices for them. Secretaries of influential Missionary Boards in America say without hesitation that a very large proportion of the funds collected through the Woman's Societies are a clear gain to foreign missions.

**MEETINGS.**—Under the auspices of a single one of many of these Woman's Societies hundreds of meetings are held every year. Meetings for both business and prayer are convened at the headquarters of most Boards, at stated times, besides farewell meetings upon the occasion of departure of missionaries, and other meetings specially called; and an annual public meeting is universal. But in both the character and conduct of them great diversity exists.

Breakfast and Tea Meetings, and Working Parties for the purpose of making clothing for native children in orphanages and schools, for filling Christmas boxes and preparing embroidery patterns for classes,—all these are much mentioned in English reports, but are comparatively infrequent in America. There, a limited number of Christmas boxes are sent to the missions, but the general purpose of meetings, in America, is either for the transaction of business, or to impart information and arouse interest in missions, and, whichever its object, it is always partly a devotional service and sometimes strictly such. Many societies have a by-law requiring the opening of all meetings with devotional exercises; and although many printed reports make no allusion to prayer-meetings, it is not supposable that societies often exist without them. When the organization extends to parishes the number of meetings is vastly multiplied. An "auxiliary" is generally understood in America to mean a company of ladies who, among other things, hold a meeting for prayer and deliberate study of missions every month, in the morning, in cities; in the afternoon, in the country; and, perhaps, on Sunday, in rural districts where people live widely scattered.

A Branch, or Presbyterial, meeting means a quarterly meeting, often lasting all day, and which moves from town to town, by invitation. This brings it at some time within reach of every lady in the branch. Those of adjacent towns who can conveniently attend go by carriage or train to the quarterly meeting, and a hearty sight it is, on a pleasant day, in a country town, to see the ladies driving up from every direction, all their horses' heads pointed toward the church. There they spend the day. A little Branch business, Scripture reading, and frequent prayer and song, wide-awake practical papers, inspiring talks, often from missionary ladies on furlough, with a hospitable lunch between morning and afternoon sessions,—these are quarterly meetings. Perhaps their place is most nearly filled in Great Britain by "deputation meetings," where some speaker is sent out to a certain locality by the secretary and holds an appointed meeting, generally in connection with one managed by the parent society.

In the old country, also, annual meetings are

often, but not always, presided over by gentlemen, and sometimes no ladies speak on their own platforms. Such a thing is unknown in America. It is there very exceptional for a gentleman to preside, although occasionally one is invited to speak; and while in the early days of the societies they were rigorously excluded from the audience, gentlemen are now absent chiefly because there is not room for them. Annual meetings of the stronger Boards now occupy two or three days, and attendants upon them are quite familiar with the sight of a large church packed with women.

In October, 1889, one of these woman's meetings was held in New York City, where in a morning service of three hours, in a crowded church, besides devotional exercises, there were short addresses from twelve missionary ladies, all in active service—among them three missionary mothers, each with her grown missionary daughter. All of these ladies were heard to the church door.

**LITERATURE.**—Dr. Arthur T. Pierson has said that "the Woman's Societies are doing a wonderful amount of good by scattering missionary literature broadcast, in light, condensed, and cheap forms." His language well describes those little two to eight page leaflets, given away, or sold for two, three, and five cents apiece, and ten cents per dozen, which have been sent out from the rooms of the Woman's Societies in recent years. Many of them have gone through two editions, and at least one, the popular "Mrs. Pickett's Missionary Box," has passed through four editions. One American society has published a series of "Missionary Annals" in eight or ten small volumes. Others have printed valuable "Historical Sketches" of their missions. They get up missionary calendars, they furnish a column of missionary intelligence regularly for a number of the weekly newspapers. They all publish annual reports and ten years' histories, and most societies on both sides of the Atlantic, issue some monthly or quarterly publication in which to represent their work continuously, both at home and abroad. Of such in Great Britain "The Quarterly News of Woman's Work" appears to have the widest circulation (10,000), while in America there are four monthly publications, each with more than 15,000 subscribers. Two of these are papers, "The Helping Hand" and "The Heathen Woman's Friend," the latter of which issues a German edition of 3,000 additional; the other two, "Life and Light for Women," and "Woman's Work for Woman," are magazines, and all four are fully self-supporting. Two children's papers, also, "Children's Work for Children" and "The Dayspring," have about 20,000 subscribers each, and are monthlies. Besides all that is done with the printing-press, there is frequently a Bureau of Exchange at society headquarters, and a regular business is made of supplying hektograph and type-writer copies of thousands of mission reports and letters yearly, to be read in society meetings. In these and similar ways a great amount of fresh information from the field is constantly kept in circulation.

**CHILDREN'S SOCIETIES.**—Beyond occasional mention of contributions from "pupils" of some lady, or "from a Bible-class" or Sunday-school, the reports of woman's societies in the old country seldom have anything to say of the children's part in the modern missionary cru-

sade. But in America they are a great factor—both in the United States and in Canada. They are organized into Bands, of which they are themselves officers, although superintended by some skilful leader; and they read their little reports with quite as much gravity, accumulate their offerings with equal enthusiasm, and, in general, march to the music, if with a somewhat broken step, as happily as their seniors. There were 10,163 accredited bands in the United States in 1888, for which a membership of 200,000 would be a low estimate.

One of the first momentous duties of a Band is to name itself, and the English language has been explored for the purpose. There are the Carrier Doves and Lookout Guards, Snowflakes and Mayflowers, Busy Bees, Steady Streams, Mustard Seeds, King's Cadets, Up and Readys, Little Lights, Pearl Seekers, Acorns. The Drum Corps, Do What You Can Band, and so on, in endless variety. As one has said, "Each dainty or suggestive name looks out from the record like the glowing face of a child." And no mean sum in hard cash do these children send to the foreign-mission treasury. The American Board is enriched by \$15,000 a year from them.

And what have the children not done to fill their mite-boxes? They have tithed what was given them for Christmas and Fourth of July; they have hemmed towels by the mile, and practised scales by the half-day; they have foregone sweets and even butter; they have picked blackberries in the sun; they have "minded" baby, and submitted to have their teeth drawn, and "buttoned papa's boots, who can't stoop over because he's so fat;" they have bunched flowers and shovelled snow; raised vegetables and chickens; and, after earning their money, some of them have divided with little brother so that he might share the glory of giving. One little girl kept her music-box "which plays with a handle, right by my bank, and I play a tune whenever I put some money in, so I like to put the pennies in oftener than before."

Band meetings are held stately, and the inventiveness of the most skilful leader is taxed to arrange programmes which are at once instructive and entertaining. The children are taught numerous hymns and Scripture passages and many learn to pray in the meetings. They draw maps, recite dialogues, hold African palavers and Indian pow-wows in costume, and give facts about missions and missionary lands in one-minute reports or five-minute papers. They quiz their parents and teachers, and ransack the library and search the atlas for information, because they are "on the committee." Sometimes exercises take a different turn, and they make scrap-books or dress dolls for a mission school, or pick lint and roll bandages for a hospital. In a great variety of ways their childish energies and sympathies are directed into missionary channels, and they are becoming both grounded in principles of giving, and through graphic stories and letters, exhibitions of curios, and talks from missionaries, they are growing up in the churches of America, familiarized with missions as their parents never were; so that, much as the little people now accomplish, it is as nothing compared with what may be expected from them when they come to years of maturity.

**Organization in the Foreign Field.**  
—The departments of missionary labor for

which women ordinarily enlist are Educational, Medical, Evangelistic.

They do not go forth to preach, and are not ordained to that form of ministry, although one occasionally finds herself, like Miss Adele Fielde, "foreordained" to it. An American lady in Siam has so often lent her nimble tongue to the freshly arrived brother that she is quite at home in all of his ministerial functions except that of the marriage ceremony. Some ladies, especially in Turkey, North China, and Japan, preach, as the Master most frequently preached, by the wayside, in the boat, on the mountain,—everywhere but in the pulpit. Some possessing special linguistic endowment engage in important literary labors. Of such more than one has been a "silent partner" in translating the Scriptures. Others have been accredited translators.

One American lady has translated the New Testament into Muskokey for the Creek Indians. Another has assisted upon the Burmese Bible and hymn-book, and edited for a time a Christian newspaper, "The Burmese Messenger," at Rangoon. Another aided the translation of the Bible into the Swatow dialect; another, a missionary daughter, born in Siam and having spent her life there, has an advantage above other members of the mission in idiomatic use of the languages of the peninsula, and, accepting the text of the Revised English New Testament, has put the Gospel of Matthew and Book of Acts into the Laos tongue.

A lady of the Gaboon Mission, West Africa, translated Pilgrim's Progress into Benga; another is doing the same in a Congo tongue, and a considerable number have edited children's papers, prepared instructive books, and translated or aided translations of hymns and text-books for schools.

**EDUCATION.**—But the great majority of missionary women devote themselves to teaching. The schools are of all grades, from the kindergarten up to the high-school and college. Wherever missions are sufficiently developed, foreign teachers confine their direct instruction to institutions of higher grade while superintending groups of village schools in charge of girls who have been trained in the grades above. All these teachers, as a rule, acquire the vernacular and teach in it; the majority confine themselves, as was formerly the case with all, to the tongue or several tongues of their locality. But in the last years, the English language has made such strides in parts of India, Turkey, and the port cities of China and Japan that it is used more or less in teaching advanced pupils. The advantages chiefly urged for the use of English are, that—

It opens the door to a rich and pure literature.

It provides text-books without the expense and labor of translation.

It harmonizes and equalizes pupils of different races, religions, and tongues in such polyglot cities as Constantinople, Beirut, Singapore, Bombay, and Calcutta.

**Boarding-schools.**—Of all educational instrumentalities, missionaries have long looked with special favor upon the boarding-school for girls. The intimate oversight which it permits; the absolute separation of the pupils for a period from the unwholesome, if not vile and idolatrous, surroundings of their homes; the contact which it affords with society at many and its most sensitive points—all these offer rare oppor-

tunities for permanent impress upon character, and some of the best and most lasting work in missions has been wrought through this channel.

Day-schools disarm prejudice and opposition to Christianity, but it is in the boarding-school that girls become Christians. An experienced Methodist missionary in Japan has estimated that while only one to three per cent of day-students in their mission have become open Christians, 25 to 30 per cent of those in boarding-school have been won. The teacher in such a school has a place of great laboriousness and responsibility. Her school-room is a theatre for exercise of all her ingenuity and for unlimited activity. She is at once mother, nurse, counsellor and guardian, as well as instructor and often lifelong ideal to her pupils. It is hers to see them the first thing in the morning and stand by their pillow the last thing at night; to quiet their superstitious fears in thunder-storm, eclipse, and earthquake shock; to transport the games of western childhood to their dull school-yard; to wrestle for them in prayer and, in the hour when they struggle with an accusing conscience, to lead them into the way of peace; to give them in suitable marriage; to create in them the sense of home-making and the sanctities of a Christian woman's life. Such work has been done. Such schools have been pioneers in a country, and their graduates were marked women among their people.

When to the character of their labors is added the length of service which many of these teachers have rendered, the girls' boarding-school may well be considered a choice weapon in the armory of the church for the evangelization of the world.

Miss Agnew taught her school in Oodooville, Ceylon, forty-four years without returning to her native land. A number of teachers have kept their "silver wedding;" and there were in 1890 six ladies in the Turkish Empire who had been teaching there for more than twenty years, and were receiving the children of their earlier pupils. One such teacher at Marsovan, Asia Minor, had six spiritual grandchildren in her school that year. In missions of the Presbyterian Church (North) in America there are 16 ladies in boarding-schools who have given already ten years or more to this work. Six of them have given as many as fifteen years and three over twenty years.

While the influence of the boarding-school has drawn a great number into obedience to the Lord Jesus Christ, and often worked a transformation in the social habits of a community, it has always affected the personal elevation, appearance, and manners of the individual. Even a traveller might divide the women of a Syrian village, from their personal appearance alone, into those who have been to school and those who have not. Let a European light down upon any village in the Turkish or Chinese empires, and choose a place in which to spend the night: the tidiest house in that village, with the cleanest table-cloth, the picture on the wall, the most inviting bed, is the home of a mission-school graduate.

If there are disgraceful exceptions, the rule prevails; and in every field a teacher who has been any considerable time in the service may take up her pilgrim staff and travel from home to home of her pupils, and it is like going from

one green oasis to another in the desert. Gentlemen of the missions are thankful to avail themselves of the home-like comforts of these houses when on touring expeditions. The tenth annual report (1889) of the Women's Association of the Presbyterian Church in England observes with regard to country tours made by their ladies in China: "There is one thing that always cheers them—the visible difference in the homes of their old school-girls, and the women who have not been with them. Both homes and children stand in strong contrast in their neatness and cleanliness to those of the heathen."

*Day-schools.*—In some missions there are day or village schools, without the home schools; but any mission which sustains boarding-schools will soon have a supporting column of the humbler order radiating in all directions from its centre. They are usually taught by a graduate of the boarding-school, and afford a good testing-place of her ability and worth. They are superintended by the missionary at great cost of fatigue in going from one to another. Some of these schools are composed of the children of Christian parents, others are wholly or in part from heathen homes. In the former case they are taught the rudiments, and the brightest and most promising children are taken on farther in the boarding-school; in the latter case they are often the only bit of gospel light in a whole village, and the Scripture verses committed by a single child, or the pure Christian hymn which she sings at home, or her peaceful deathbed, is the starting-point for the introduction of the gospel into a new place. They seem a weak instrumentality, with their lowly buildings, their primitive furnishings, their young "slip of a girl" for teacher, and the crowd of rude children in motley attire; but governments know they are a power, and according as they are favorable or not to the missionary's religion, they, as in the case of the King of Siam, bestow royal patronage upon the children's schools; or, as in the case of the Sultan of the Turkish Empire, they close them by imperial firman, whenever they dare.

Very often the day-schools have justified the saying of the Brazilian mother, who, in withdrawing her little daughter of five years, explained, "If she were older I could leave her in your school—she would forget this Bible teaching; but at her age she will never forget."

Eight English societies reported in 1888, 796 day-schools, with an aggregate of more than 40,000 children.

*Tuition and Industrial Education.*—It has been commonly the case in unevangelized lands that parents would pay something for the education of their sons long before they would do the same for their daughters, so that any tuition received for the latter in mission schools indicates the stage of progress reached by the whole country. In Japan, where Christians support their churches with great readiness, and schools are so popular that the Japanese themselves establish schools for girls, more tuition is received than in most countries; still, the first entirely self-supporting school in Japan is yet to be heard from.

In Asia Minor, where there is an extensive system of mission schools and learning is popular, and Protestant communities have been trained to self-support, there are 15 or more schools for

girls of the higher grades, in all of which there is a fixed price of tuition. Those in provincial towns, where people handle but little money, sometimes receive payment in farm produce. At the college for girls in Constantinople the income from tuition has averaged \$8,000 annually ever since 1879. In that college it is rare to give the value of an entire scholarship to a single pupil, but it is divided between several, and the number of scholarships is limited to twelve. Scholarships are a feature of all mission schools, and it is the business of many little home societies to gather enough money to pay the variable but generally small amounts at which they are rated.

As to industrial education in these schools, the widest divergence obtains among Missionary Boards, and there is almost equal absence of uniformity of practice among different missions of the same Board. It may be said, as a rule, that girls in English mission schools are taught more handicraft than in the American missions. Where government grants are given, as to English schools in India and South Africa, industrial education is especially cultivated, and the most complete experiment in this direction is at Lovedale, in Kaffraria. So, in America, the earliest mission schools among the North American Indians made industrial education a feature, because the Federal Government paid the costs. But where there is no such secular backer, missionary Boards have usually drawn a clear distinction between humanitarian and gospel work. The object in the mission school (especially where education is free) is to send out a girl educated above, but not away from, her people. Accordingly she is generally kept in touch with her home surroundings, by practising in school the characteristic household duties which she will perform all her life. Many glimpses of mission girls at their work are given by travellers' pens.

One went to the Baptist School in Delhi, where "every girl is brought up to use the fan of the country for cleaning every kind of grain." He saw the three large sets of millstones "where nine girls every morning grind flour for the school," and when they go to Agra to take their normal or medical examination these girls "stand head and shoulders above those who never grind at the mill." In a school at the other end of Delhi, in connection with the Society for the Propagation of the Gospel, it was work-day, and the girls were spinning cotton at their wheels, sewing, cutting out, and making garments for the boys. At Sialkot, at the United Presbyterian Mission, the traveller saw the copper boiler for washing, the bucket and well, and the washing drying on the lines—all the work of the school-girls.

A great amount of needle-work is taught in English schools at Lahore and other cities of India, and the dressmaker has been introduced into some schools in Japan since western dress has been adopted, and knitting classes are fashionable.

At the Bridgman Memorial Home, Shanghai, the embroidery class were taking the fine straight stitches which would give them a means of support if need be. "Another class was making shoes for the school, substantial and comfortable."

Through Asia Minor the girls all clean and dry wheat for *bulgoor*. In South Africa, the Zulu girls, who have been accustomed to open-

air life, would pine in the school-room were it not for the trees to be planted and the garden-digging.

A Spanish pastor of Madrid visited the American school at San Sebastian, and wrote of it: "Especial care is given to educate the scholars in the life of a well-organized home. They are taught to do for themselves to-day what to-morrow they will have to do in their own homes. That is to say, they are taught to be good housekeepers—not mere señoritas of the drawing-room."

Nor should Bishop Crowther's story be omitted, for it shows how industrial education induced the payment of tuition.

At Bonny, in the Niger Mission, it was agreed by the chiefs that £2 a year should be paid for each boy and girl who attended the school. When the time came the chiefs objected to pay for the girls, as they could not afterwards earn moneylike boys. The bishop himself then agreed to pay for the girls, who were trained to read, sew, knit, and make bread. A certain day came when the chiefs were entertained, and Miss Susan Jumbo, daughter of Oko Jumbo, made the bread which her father praised without knowing who had made it. When informed, he was greatly pleased, and from that time native scruples as to the utility of investing money on the education of girls disappeared in that mission.

**MEDICAL WORK.**—This agency of mission work is newer than the school, but its importance is universally acknowledged, and its efficiency becomes more and more apparent.

The woman physician is called for on the same grounds as the man: To remove barriers for the gospel; to be a safeguard for the life of the mission; to bear a kind of testimony which the followers of Christ neither have the right to withhold nor the missions can afford to do without. Not only so, but in countries like India and China, there is an additional demand for her service. All those sufferings in illness which are universal from ignorance of medicine, barbarous malpractice of native doctors, and slavery to superstitious fears, dire as they are among people of all ages and stations, bear upon the women with tenfold weight. Whatever alleviation the foreign doctor may be permitted to bring to the enlightened Hindu Babu, it is not for his high-caste wife when she is ill, certainly not in the hour of maternity, when every sentiment of humanity would insure to her consideration and pity. The customs of ages are not to be brushed aside. All the laws of social etiquette which prevent millions of Eastern women from ever hearing the gospel from the ordained missionary apply with equal rigor to his brother physician. "We would rather die," they say, "than go to his hospital, or be seen by him." An incident of the well-known Dr. Valentine's experience in India has been often told: "A curtain was hung between him and his patient. Inside this curtain the lady sat with a slave-girl at her side, and outside the curtain sat the doctor with a slave-girl by his side. Any question the doctor wished to ask had to be put to the slave-girl outside, who repeated it to the slave-girl inside, who in her turn repeated it to her mistress; and the answer came back in the same way."\*

\* Medical Work of the W. F. M. S. of the M. E. Church (Mrs. J. T. Gracey), p. 27.

The medical woman goes under the banner of the missions to these sufferers to save countless lives, to relieve untold and unnecessary pains, and to point the dying to the home beyond.

The practice in America has been to send out only fully qualified women physicians, with, occasionally, a trained nurse to assist. Such a pair are at the Margaret Williamson Hospital, Shanghai; another pair at the woman's pavilion of the An Ting Hospital, Peking; and another two in the city of Madura, South India. But, ordinarily, the number of physicians at the disposal of Boards has not been sufficient to warrant this method, and the doctor has often been unsupported even by a person able to compound her drugs.

In Great Britain a somewhat different course has been pursued. While some thoroughly qualified women have gone out to their missions, others who have taken only a partial course in medicine have often been commissioned. It is common among all societies which send out physicians to aid suitable candidates to obtain their medical education.

Besides her house-visiting, the physician generally has a dispensary, and, often, what is still more satisfactory, a hospital, larger or smaller, where she can secure the treatment necessary for her patients' recovery. There is always Christian teaching in the woman's ward and provision for instructing the patients while waiting their turn in the dispensary. A sample picture is this from Tabriz, Persia: The account of one of our Saviour's miracles of healing is first read in the midst of the waiting company of women, and prayer offered for a blessing on the day's efforts, after which the doctor proceeds to her inner room and the assisting missionary stays with the outsiders to further open to them the Scriptures, while the clinic goes on all the morning.

Sometimes tickets are distributed from the dispensary each with a passage of Scripture on the back, and a lady in Moradabad mentions another device. "Religion is taught," she says, "at every opportunity. I have printed upon small white envelopes, in Hindi and Urdu, texts or sentences of Scripture, and every dose of medicine carried out of the dispensary is enclosed in one of these envelopes, and these messages have found their way into thousands of heathen families." Many, both hospital assistants and patients, have been converted under these varied influences, and have carried the new doctrine back to their homes and neighbors.

The first physician is yet to be heard from who lacked patients. From the time she first appears upon the scene, when she is obliged to hide away to learn the language, till long strain compels her to take refuge in a furlough, the doctor is always in demand; and the proverbial ingratitude of the heathen has had more striking refutation in her experience than in that of any other who tried to do them good. The poor have offered her their best; the rich have made substantial additions to the dispensary funds; and rank has stepped down from its place to do her honor. The poetry of the Orient has been drawn upon to find phrases worthy to inscribe upon a tablet and when it was prepared, people of all conditions in life carried it with processions and fireworks, music and banners and arches, to erect it above their benefactor's door.

English and Scotch medical women have

made their mark in Lucknow, Peshawar, Amritsar, Benares, Madras, Haidarabad, in India; in Hankow, China; at Bethlehem, and other places. Their reports for 1889-90 mention altogether twenty-six such workers. One of the most recent very interesting medical missions opened is that of the Church of England Zenana Society in Kashmir.

The woman's missionary societies in America have 50\* physicians in the service, distributed in eight different countries. Of these, eleven represent the Presbyterian Church (North). One is at Allahabad, where, with but two brief furloughs in her native land, she has labored unremittingly for eighteen years. The same Church has sent the first woman-physician, also a second, to Persia, and the first also to Korea, in the capacity of physician to her majesty, the queen.

The societies of the Congregational churches have seven physicians in the service, two of them at peculiarly isolated outposts—the one at Kalgan on the border of Mongolia, the other at Ponape in Micronesia. The Baptist societies furnish five physicians and the Union has four; the Disciples and the United Presbyterian, two each; the Methodist Episcopal (South), Free Baptist, Protestant Episcopal, Friends, and Lutheran, each have one. But of all societies the Methodist Episcopal (North) has the glory of taking the lead in this department of missionary work. They sent the first regularly graduated medical woman to the continent of Asia; they have sent in all 29 women, and now\* have 14 in the field.

Nearly all of these 50 women physicians conduct one or more dispensaries, and 17 of them have charge of either an entire hospital, or, what is nearly equivalent, a woman's ward, or annex. They are located in the following cities: Bareilly, Allahabad, Madura, and Sialkot in India; Canton, Foochow (2), Peking, Tientsin, Wei Hien, Wuchang, Amoy, and Shanghai in China; Kyoto, Japan; Seoul, Korea; and Oroomiah and Teheran, Persia. Presbyterian women in Canada have also one in progress at Indore, India. Several of these hospitals have been mainly endowed by a single lady, as the Isabella Fisher Hospital, Tientsin, by a Baltimore lady (\$5,000); the woman's pavilion in Peking, by an Albany lady (\$3,000); the woman's ward at Teheran, by a Detroit lady (\$2,000); the fine hospital of the Union Society at Shanghai, where land, building, furnishing, wire-beds, instruments, and salary of a physician and nurse for seven years, were all provided, at an expense of \$35,000, by Mrs. Margaret Williamson of New York (deceased), for whom the hospital is named. A maternity ward is about to be added, at a cost of \$17,000, by two sisters of Princeton, N. J., as well as another ward through a legacy from Dr. Wells Williams.

Some of these hospitals have been largely aided by the population surrounding them, and in others the annual running expenses are largely defrayed (in one case in India, one half) by the voluntary thank-offerings of the in-patients. The first of all, that at Bareilly, was built, together with a dispensary and doctor's house, upon an estate given to the Methodist Mission for the purpose by the Nawab of Rampore, and

\* January, 1891.

valued at \$15,000, the Society meeting the additional cost of \$10,000.

A lady of the United Presbyterian Mission in India has named some reasons for building mission hospitals. One is the economic reason. She says a missionary can do twice the amount of work with a hospital that she could otherwise. She mentions a physician whose "daily attendance at her hospital was from fifty to seventy patients. If she had to visit this number at their homes it would require two days' hard work; but in her hospital she treats them, both physically and spiritually, during the morning hours, and in the afternoon she goes out into the zenanas and does the same work."

"Another advantage of the mission hospital is as a field for training Christian nurses. The government hospital is not such a field, and caste prejudice is never eradicated there. The supreme advantage is, to have a place "where the Great Physician is honored and the grand work of healing body and soul go hand in hand."

The same competent observer urges that, when possible, two physicians should be associated to relieve one another, and that opportunity be secured to the physician for evangelistic work. Upon this point she says: "When, for want of help, a medical missionary's time is occupied in compounding medicines, washing bottles, or in the wards dressing simple wounds, or in the kitchen looking after the meals of the patients, and a hundred other things,—all of which a good nurse and a well-trained compounder could do,—she has not much time, if any, to speak to her patients about the one thing needful."

Brief extracts from the certified reports of some of these hospitals indicate what the labors of the physician are, although no figures can include all her cases, or indeed accurately measure her work.

Shanghai, China. Margaret Williamson Hospital; Dr. Elizabeth Reifsnnyder and assistant.

"More than 60,000 patients were treated from 1886-1888, and more than 80,000 prescriptions filled; 100 cases every day during the month of May, 1887."

Madura City, India. Mission Dispensary; Dr. Pauline Root and assistant. During the year 1888:

Total, new and old cases.....	20,551
New cases.....	12,709
In-patients.....	518
Surgical cases.....	4,832
Europeans and Eurasians.....	235
Native Christians.....	3,181
Mohammedans.....	1,492
Under 6 years of age.....	2,500
Villages from which patients have come.....	216
Canton, China. Mission Hospital; Dr. Mary West Niles and assistant. During the year 1889:	
Out-patients, 4,286 } total.....	4,679
In-patients, 393 }	
Surgical operations.....	683
Professional house visits.....	275

Besides their practice, some physicians in addition to their other duties, by no means light, have been able to train a few students in medicine. Several such from a class at Bareilly have done valuable work in India. The Government Medical School, founded at Agra in 1884 under Dr. Valentine's direction, has classes for women, which girls from English, Scotch, and American

mission schools have already entered. In Kyoto, Japan, a training-school for nurses, in charge of two American ladies, had a class of 14 in 1888.

EVANGELISTIC DEPARTMENT.—This includes the personal hand-to-hand work for souls which may come to any missionary: house visitation; Sunday-school teaching; mothers' meetings; church prayer-meetings; wayside meetings with heathen women, gathered by accident or purposely sought at the threshing-floor, the well, the *mêla*; temperance work; superintendence of Bible-women; and zenana visitation.

Some societies are formed for one special department of effort. In Great Britain the name commonly indicates the particular aim, and five large societies indicate by their names that they are established chiefly for evangelistic labor.

In America, it is more customary to go out under a missionary charter simply, but lend a hand in whatever departments of work providentially open.

The evangelistic department often requires touring over a large area, and as it is done, particularly in Japan, North China, Persia, and Eastern Turkey, it involves much hardship of travel from long hours in the saddle or in jolting carts or by jinrikisha, from fording rivers, nights spent in rude *khans* or country inns, inferior food, the vicissitudes of weather, insects, and other exposures. Such work is fatiguing, and demands health and endurance. On the other hand, it is full of incident, and those who have the tact and power for the spiritual work and vigor for the hardships, are among the happiest missionaries.

English societies have, in some cases, established itinerating village missions around a city station, and make the circuit of them with their travelling tents, magic lantern, and other equipment. In all societies considerable work that is never reported is done by the wives of missionaries, who accompany their husbands more or less in itinerations, and gather the women for instruction at the same time the men are at the preaching service.

Ladies of the American missions in Japan are often called to places where there are enough Christian men to form a church, but no women are instructed, because it is improper for them to assemble in public promiscuous meetings. The missionary accordingly takes a Christian Japanese woman for her companion and goes forth. She is absent from ten days to three weeks at a time; her farthest point perhaps several hundred miles away, taking in many places between. She hesitates not to stop and teach in a town of thousands of Buddhists, where there may be not more than one Christian family.

A Methodist lady, making a trip in 1888 through the Tokyo district, in about three weeks, "visited nine places, held nineteen meetings for women, attended thirty-five services, and found much cause for gratitude and encouragement in many places." Another of the American Board ladies in Okayama is accustomed to take no table comforts with her on these country trips, except coffee, sugar, and salt, and to average not more than six hours nightly sleep during her absence. She travels all day and arrives at evening, and, the message having gone in advance, the meeting with the women is appointed for nine o'clock the same night; it lasts till 11.30. If she stays a

day in a place, callers come before breakfast, and, unless she interrupts them with a service, they continue to come till near midnight; and no matter how late she retires, if she is to depart the following day, horsemen arouse her at early dawn. In towns where there is neither church nor school, a common place of meeting is the upper story of a *sakè* storehouse. One of her by-the-way episodes is given in this missionary's own language:

"We went on by a cross-road and through occasional showers to the house of an official, the mother, wife, and daughter being Christians, but long isolated from Christian society, in a lonely place. The house was full of silk-worms, but the women were delighted to see us. We were seven Christians altogether, and after a little visit we read John 16th, sang 'There is a fountain,' and prayed together. This visit introduced the evangelist to the leading family in a large township."

**BIBLE-WOMEN.**—As soon as a missionary or native pastor has gathered a little church in a new place, he wants a Bible-woman to go about and impart elementary instruction to the women. Or, a missionary lady trying to bring the gospel to bear upon the homes of a great city wants her Bible-women to take her instruction and multiply it manyfold. "Our efforts," wrote a missionary in Travancore, "would amount to comparatively little in such a climate had we not a band of native Christian women to go forth under our direction to labor from day to day." "I am more and more convinced that we must repeat ourselves in our Christian women that our work may live on when we are gone," wrote another.

These Bible-women have generally passed through the mission schools and becomes wives of teachers or catechists; or, they are widows; or, occasionally, blindness or other personal disfigurement has permitted a girl to step aside from the Oriental woman's lot of early marriage and obtain a better education than others, and make herself a very ornament of grace to the mission that she serves. It is especially difficult to find women suitable for this work, and those not drawn to it from worldly motives, out of the first generation of Christians. But many have proved themselves true in life and death.

Training-schools for women evangelists are conducted by American ladies in Japan, at Kobe, Yokohama, Tokyo, and Nagasaki. All Bible-women make regular reports to some missionary, and are under her guidance.

It was estimated that the Bible-women connected with one mission in the Bombay district reached an aggregate of 85,000 persons, by reading the Scriptures or discourse upon them, in the year 1888.

Of American societies, the Methodist has the largest number of Bible-women—308. The Church of England Zenana Society employs 139. A lady wrote from Yokohama: "At a Japanese prayer-meeting in Mrs. Pierson's room about thirty Bible-women offered prayer and expounded the Bible. It is a pleasure to see the young girls so neat and graceful, learning the way of life; but it is a joy to know that these poor, sad-looking women are having opened to them all the consolations of the gospel."

**ZENANA WORK.**—Strictly zenana work is limited to parts of India. And what is a zenana? That part of a native gentleman's house where the women live separate and secluded. The

following description of such a place is published by the Church of England Zenana Society: "These apartments are generally situated in the most secluded and inaccessible part of the building, approached by narrow stairs, dark and dull, with scarcely any windows and these grated and so small and high up in the wall that it is impossible for those inside to look out or for any outsider to look in. The room within is as bare and comfortless as possible, entirely without furniture, except, perhaps, a mat and a *charpai*, or native bedstead, in one corner. In this dreary prison the poor Hindu girl of the upper classes is shut up as soon as she is eight years old; for by Hindu law she ought, if possible, to be married at that age, and certainly before she is ten.

"So rigidly is this seclusion of women of the upper classes maintained, that when a Hindu lady travels or goes to visit her relatives, as she is sometimes allowed to do, she is carried from one house to another in a palanquin, which is closely shut up and entirely covered with a cloth covering, so that it is impossible for her even then to obtain a glimpse of the outer world."

A contrast is furnished by the same pen in a description of a Calcutta zenana, whose occupant was the wife of a wealthy gentleman, holding an appointment under government, and who had been taught in an English mission school: "The lady's boudoir, or study, was a small but pleasant room, well lighted, and containing a sofa, table, and book-shelves filled with English books, against the wall. There was also a piece of wool embroidery, which had been worked by the lady herself, framed and glazed, hanging on the wall, which she pointed out to us with much satisfaction. The lady, who had a gentle, intelligent countenance, received us with evident pleasure, and none of the *mauvaise honte* which is characteristic of Bengali uneducated women. As she was learning English, she read a little very fairly. She also showed us her copy-book, in which her husband was in the habit of setting her a copy, before leaving for his office in the morning. Very remarkably, that morning, without knowing of our visit, the copy he had written for his wife was the text: 'What shall it profit a man if he shall gain the whole world and lose his own soul?' and we were delighted to hear that he had told our friend that he was only waiting till his wife was sufficiently instructed in the Christian religion to come out from Hinduism with her and be baptized—and this, we are thankful to add, he afterward did." (From "Inside the Zenana.")

The method of zenana visitation is partly indicated by this quotation from an English missionary's letter: "The plan of our work is this: A certain number of houses in a fixed locality is appointed for each teacher, who is expected to have about thirty-five women on her list. A daily register is kept, showing the names and number learning, and the lessons taught. These registers are carefully examined at the end of every month when a general review of the work is taken. All women well able to read the Bible are specially visited and conversed with." What zenana visiting really is, Miss Rainy of the Free Church of Scotland has told in graphic language: "The drive through the dusty streets in the heat of the day, ending often in a walk through lanes too narrow for a

carriage and full of evil odors; the climb up steep, narrow stairs; the time spent in close, untidy rooms, trying to teach through the medium of a foreign language, and amid endless interruptions; the exuberance of insect life, which the natives of India seem to regard with non-chalance, but which is a real trial to a white woman,—all these are but the outward difficulties. And there are others of a spiritual kind—the unbelief begotten of anguish and cruel bondage, the frivolity and fickleness of some, the rooted prejudices of others; the national want of straightforwardness, and readiness to agree with you merely from politeness; the necessity of dealing with objections, scruples, doubts, and perplexities, with no aid from minister or elder. These constitute a formidable list; and when we remember that our agents are generally young and comparatively inexperienced, that they are far from many of the helpful influences of home, and that the climate is exhausting and trying, how earnestly we should pray that God's strength may be perfected in their weakness." (From "Our Jubilee," by C. Rainy [A tract], p. 27.)

Opposition to zenana teaching still proceeds from the quarter whence it might be expected. A native gentleman passing the door of a house and hearing some women singing, said: "As we see and hear such things in these days, the world must be coming to an end. A queen is now ruling the whole of this country, therefore women are much cared for." "There is no rain in the country, because women have begun to learn," complained another. But instruction of women goes on, and is destined to honeycomb the fanaticism of India.

The first entrance to what is popularly called a "zenana" was gained in 1851 to the royal household of the thirty wives of the King of Siam. The first true zenana entered was in Calcutta in 1855, and it was accomplished, as was also the case in Siam, at the point of a lady's embroidery needle. In 1881 it was ascertained that between 9,000 and 10,000 zenana pupils were under instruction throughout India, and there have been gains every year since.

In 1889 a single society, the "Union" of America, had 1,000 pupils in Calcutta and 320 zenanas in Allahabad. The Church of England Zenana Society averaged 170 pupils in Amritsar and visited in all India 3,118 zenanas. The Ladies' Committee of the London Missionary Society had 2,209 pupils, and the Zenana Bible and Medical Mission 1,994,—all in 1888. Numbers of zenana pupils are constantly fluctuating, and figures are therefore unsatisfactory except in the mass. The dulness and monotony of teaching in zenanas is enlivened very much by the *bhajan* or Christian hymn set to a native air—a style of music which wins access to the people universally. Several zenana papers are published by different missions. The London Mission Committee prints one in Tamil. The American Methodist women have established an illustrated Christian paper by means of an endowment fund of \$25,000, and it is now printed in four of the dialects of India.

Such efforts and effects as are outlined in the foregoing statements could never have been realized by a host of independent pickets. Organization was needful, and that after a new pattern; for there had been woman's missionary societies before this modern movement.

Of them it may be said in general, certainly of those in America, they were circumscribed and local in character. Most of them had declined, if they had not altogether died out, before 1861, owing to the absence of those very motives which give power to our present organizations.

1. The early societies lacked centralization and provision for perpetuating themselves.

2. They lacked the stimulus of responsibility. They pledged no amounts, assumed neither missionaries nor schools.

3. There was no expectation of large service from them on the part of Churches and Church Boards.

4. Especially, there was no such access for them among the nations, as in these later years has called upon Christian devotion with an ever-increasing volume of appeal.

#### *Outline of Women's Foreign Missionary Societies' Operations in America previous to 1861:*

1800 "Boston Female Society for Missionary Purposes." (Baptist and Congregational.)

1801 "Boston Female Society for Promoting the Diffusion of Christian Knowledge." (Congregational.)

1808 "Female Mite Society," Beverly, Mass. (Baptist.)

1811 "Salem Female Cent Society," Massachusetts. (Baptist.)

About this time, 1808-1812, "Cent a Week" societies were common among women of different denominations in Eastern Massachusetts.

1812 The "Female Foreign Missionary Society" of New Haven, Conn., contributed to the American Board \$177.09.

1813 First legacy to the American Board. \$345.83 out of an estate of \$500, left by Sally Thomas, of Cornish, N. H., a domestic, whose wages had never exceeded fifty cents a week.

1814 April 11th, a woman's missionary society was organized in the Fayette Street Baptist Church in New York City.

1815 Legacy from Mrs. Norris of Salem, Mass., was realized to the American Board—\$30,000, the largest received up to that time or for many years thereafter.

1816 "Female Charitable Society" of Tallmadge, Ohio, contributed \$20 to the American Board—the first received by the Board from west of the Alleghenies, save one dollar from a pastor's pocket.

1818 Woman's Missionary Society formed in Derry, Pa. (Presbyterian.)

1819 July 5th, a society was formed in the Wesleyan Seminary, Forsyth Street, New York City. It issued its last annual report in 1861. During forty years it had contributed to the missionary treasury of the Methodist Episcopal Church the sum of \$20,000.

1821 There were 250 societies in existence (formed from 1812-1820), all contributing to the American Board; many of them were composed exclusively of women.

1823 A society "For the Support of Heathen Youth" was organized in Philadelphia, Pa., and existed until 1874. (Presbyterian.)

1835 A society "For the Evangelization of the

World" was organized in the First Presbyterian Church, Newark, N. J. During the first ten years it contributed \$2,344.76 to the American Board. The Society still lives (having joined the new movement), and celebrated its Jubilee in 1885, one of its original members and 20 descendants of members participating on that occasion.

- 1838 A society was formed in the First Church, Allegheny, Pa. (United Presbyterian), and has celebrated its Jubilee. The original secretary still holds the position.
- 1839 More than 680 "Ladies' Associations," having nearly 3,000 local agents of their own membership, were collecting funds for the American Board. One of these Associations met in Brookline, Mass., at the house of Mr. Ropes, and made regular contributions for Japan, although that empire was then sealed against foreigners. The amount which they forwarded expressly for Japan was \$600, which with the accruing interest became \$4,104.23 before the American Board opened its Mission to Japan, of which the first expenses were paid from the Brookline fund.
- 1847 "The Free Baptist Female Mission Society" was formed in Sutton, Vermont. It continued in operation for over twenty years, and was never formally dissolved.
- 1848 The "Ladies' China Missionary Society" (Methodist) of Baltimore, Md., was formed. It was a thriving Society in 1871, when it merged itself as a Branch of the wider organization of the Methodist Episcopal Church.

The separate accounts of the various societies are arranged in the order in which they are given in Appendix C.

### **Boards working Independently.**

#### UNITED STATES.

**The Woman's Union Missionary Society of America, for Heathen Lands. Organized in 1861.** Headquarters, 41 Bible House, Astor Place, New York City.—The first meeting called to consider organizing a society was gathered in a private parlor in New York, January 9th, 1861, and addressed by a returned missionary from Burma. At a subsequent meeting, January 15th, the organization was effected, with Mrs. Doremus as president.

The basis of the Society was undenominational, and ladies from six divisions of the church were of its first membership. It proposed to send out only single ladies, and the converts to be gathered would naturally unite with such Churches as nearness and fellowship made practicable. So, from the first, the Society undertook to be a helper of many Churches, rather than to establish a monument in its own name.

The original plan was to secure a hundred collectors, who would each be responsible for twenty dollars for five consecutive years. In a twelvemonth from the time of organization the 100 collectors were pledged, and the subscriptions received amounted to more than \$2,000. The Society immediately began to issue a publication, which at first was called "Missionary Crumbs,"

but with the eighth issue was changed to "Missionary Link,"—the name it has carried ever since. It is a monthly; price 50 cents per year. One of the original auxiliaries of the "Union" had formed as an independent society in Boston in 1860. Other auxiliaries have sprung up until they now number 26, and 178 Bands, which are found in fifteen different States and in New Brunswick. A unique feature of this Society is its "Invalids' Auxiliary," to which 91 members were added in 1888, and whose contributions for that year were \$100. Up to 1886 the total receipts of the Society were about a million dollars. They stood for 1890 at \$60,026.88. The Society lost its honored leader in Mrs. Doremus' death, but will never cease to be identified with her memory and name.

The first missionary was sent out in November, 1861, Miss Marston, to Burma. In July, 1863, Miss Brittan (Episcopalian) went to zenana work in Calcutta. At the end of four years the Society had 2 missionaries, 7 Bible-women, and another serving in hospitals in Calcutta.

In 1890 their force had become 63 missionaries, of whom 4 are physicians. All these ladies were located in Calcutta, Allahabad, and Cawnpur, India; Shanghai, China; and Yokohama, Japan.

*India.*—Zenana work has been the strongest feature of this Society's labors from the beginning. In Calcutta it is known as "The American Doremus Zenana Mission." There are the superintendent (always one of the missionary ladies); 16 missionaries; 55 native teachers; zenana pupils, 1,000; schools, 50; suburban schools, in Rajpore, 12; and Entally, 2. In Calcutta is also the orphanage, with superintendent, zenana teacher, Bible-class teacher, and 112 pupils.

The mission has no school-houses in Calcutta, but its 50 schools are taught in rooms which are rented in the houses of Babus. There are 1,500 children in these schools, who learn faster than their mothers, whose solitary lessons are received behind the purdah, as these children's will be as soon as they are married.

Great pains is taken to provide Christian literature for circulation in the zenanas.

"Every month there are 500 copies of the 'Child's Friend' given away, of the 'Christio Bandab' 300, and of the 'Mahila Bandab' 210; part of the last are subscribed for. Besides these, throughout the year, between 6,000 and 7,000 Bengali tracts, and some 3,000 English tracts have been distributed; many are given to the Babus at the stations, on the route to Rajpore, and have been received so pleasantly as to render it an agreeable work."

The children of the orphanage, all girls, divide their time between study, work, and play. Their ages range from two years to eighteen. The youngest have no school. Those above them are taught and trained for teaching in their vernacular,—either Bengali or Hindustani,—with a little English besides. The older girls constitute a higher department, and their work is done wholly in English, with one language of the country also. The most advanced of all are put into a normal training-class and study for the entrance examinations of the University of Calcutta. Several of these upper-class girls are suitable candidates for a medical course, and the superintendent hopes to see them trained physicians. All these girls receiving such ad-

vanced instructions are thoroughly trained in the Bible.

Allahabad.—Superintendent, zenana missionary, 16 missionaries, 6 native assistants, 1,398 pupils, 1,000 in 47 schools, 398 pupils in 320 zenanas.

Cawnpur.—A superintendent, zenana missionary, 13 missionaries, 5 native assistants, 968 pupils, 623 in 37 schools, 345 pupils in 184 zenanas. Among the schools is one for high-caste Hindus taught by a Pundita. It contained 38 girls, in 1889, who were learning Bible verses, catechism, and Scripture lessons. There are also Mohammedan schools in the city.

China.—Shanghai. Medical missionary, medical assistant, missionary teacher, 5 Chinese teachers, 5 hospital helpers.

The Margaret Williamson Hospital (see below) is a fine stone building, which probably has not its superior on mission ground. Patients come 15 miles by boat or wheelbarrow to the dispensary, or walk there from 5 to 10 miles on their bound feet. It is open every day except Sundays. Every new patient is registered, and all who are able pay 28 cash or 2½ Mexican cents; sufficient medicine is given for five or more days. The doctor sees 160 in a day, 175, once even 196; and her assistant, the nurse, stands and puts up 250 prescriptions in one day.

All patients in the hospital are expected, if possible, to pay for their rice 80 cash (about eight cents) a day. Many cannot afford even this. Private patients can be received at \$1.00 (Mexican) per day. Work begins at 8 A.M. with prayer, and a Bible-class meets on Friday evening.

Interesting conversions have taken place at the hospital, a recent case being a nun who has been connected with a temple since her eighth year. She was baptized, and much is hoped for from the good that she may do in her own village. A Chinese woman, who is an hospital assistant, was also baptized in 1888.

The Bridgman Memorial Home contains forty or more girls from five to sixteen years old. Ten were received into the church in February, 1888, and in the summer of 1889 twelve more were preparing for baptism.

Public examinations of the school open with prayer and a hymn. The singing is well spoken of. The girls are not taught English; all are from poor homes, and are trained in sewing, mending, darning, and knitting. They are also taught to wash and iron, and take turns in the kitchen to learn cooking.

There are several day-schools in the city, numbering 70 or more scholars, who join the girls from the Home in Sunday-school, and with women also, bring the attendance up to 150-180. The children are well drilled in both behavior and the Scriptures, and one of the oldest missionaries in China said of it: "In all my forty years of service I have seen nothing so good in the way of a Sabbath-school."

Japan. Yokohama.—The staff includes the superintendent, missionary teacher and evangelist, superintendent of Children's Home, 2 missionary teachers, physician, 6 Japanese teachers, 6 Japanese medical assistants, 21 Bible-women, 140 scholars, 200 in Sunday-school.

Seven girls, all Christians, were graduated from the school in the English course in June, 1888. The music of this school is celebrated

among all those of Japan. On public occasions the girls render such choruses as "The Heavens are Telling" from the "Creation," and Mozart's "Hallelujah Chorus." In all, thirty-five girls had passed the English department up to 1889, some of whom are teaching in mission schools, and others are married to evangelists and pastors.

Morning worship at the school is divided into two services—that for servants and Bible-women conducted in Japanese, and for the students in English.

There is a corps of 21 Bible-women, three of them self-supporting. None of them understand a word of English. They are all under Mrs. Pierson's constant instruction, and, with her, hold 26 weekly meetings. During vacations, besides their city work, two by two, they go out on country trips in different directions, some of them accompanying their leader herself, and going a distance of 200 miles or more from Yokohama. In 1889 the women went to 21 places; 83 persons gave known evidence of conversion through their instrumentality.

The Woman's Foreign Missionary Union of Friends was consummated in 1890. The "Union" was formed from ten independent societies corresponding to as many yearly meetings. The first Society was organized in 1881, the last in 1887. Their contributions for 1888-89 amounted to \$16,703.58. Then came into the Union between 200 and 300 auxiliaries with a membership of over 4,000, but this does not include half the women of any yearly meeting, unless it be that of Canada. Two important standards were set up by the unanimous vote of the first Union conference in resolutions to the effect that:

"We recommend our public meetings be carefully guarded from the introduction of anything that would tend to foster a love for the dramatic; and that

"We will unitedly seek to promote systematic giving, and use our influence to prevent the introduction of methods of raising money for our work upon which we cannot invoke the Divine blessing."

The formation of Mission Bands was a feature of 1889.

The "Friends' Missionary Advocate," formerly a private enterprise, became the property of the Union in 1890. It is published at Center Valley, Indiana. A monthly paper. Price, 50 cents.

The Union is represented abroad by two men and ten women, who are distributed in missions among the Kickapoo Indians; in Jamaica; in Matamoros, Mexico; the Ramallah Mission, Palestine; at Tokyo, Japan; and Nanking, China. The last is but just begun. Land is bought, and buildings will go forward as rapidly as practicable for an orphanage and training-school for Chinese Bible-women, to be under the care of two ladies who have already gone out for the purpose.

The societies co-operate at several points with English Friends. From one of these, Brumana, Mount Lebanon, after fifteen years of mutual work, the Union withdraws to concentrate itself upon Ramallah, ten miles north of Jerusalem. Here a large school-building has been put up at a cost of \$7,000, a house rented for worship, a medical mission opened, and a girls' training-home is projected. Day-schools are also established. Three ladies joined this

mission in the autumn of 1889, of whom one is a physician.

In Tokyo there is a girls' school with a three years' course of study; four of the pupils were recently "savingly converted."

In Matamoras a home for girls has about 25 in training, and Hussey Institute enrolled 150 Mexican girls in 1889.

#### CANADA.

**Canadian Woman's Board of Foreign Missions.** Organized 1871.—This was the first Society of the kind in Canada, and undenominational; but as, one after another, denominational societies have been established, its constituency has gradually withdrawn until the mother society is now chiefly represented by the American and St. Andrew's (Presbyterian) and Emmanuel (Congregational) Churches in Montreal. The receipts for 1888 were \$958.42.

The Society has given at least one of her own daughters to missions in recent years, and contributes towards her salary at Smyrna in connection with the American Board. Contributions have recently been made to Presbyterian missions in India, the Telugu (Baptist) to Labrador, and the China Inland missions. Two noble schools for girls—one at Woodstock, India, the other at Constantinople—have both received gifts from this Society, which has always been known for its intelligent and catholic interest in missions.

#### GREAT BRITAIN AND IRELAND.

**The Society for Promoting Female Education in the East.**—This Society was founded in 1834, and is sustained jointly by Church-women and Nonconformists. All officers, except the treasurer, are ladies. The annual income is about \$35,000. "The Female Missionary Intelligencer," 16 pp., is published monthly, at 48 Paternoster Row, London, E. C.

The number of missionaries, 40; missionary correspondents, 43; schools in connection or correspondence with the Society, 275; scholars, 17,624; zenanas visited, 382; pupils in zenanas (returns imperfect), 2,354.

Seven missionaries of this Society received dismissal at a farewell meeting in the autumn of 1889, of whom some were returning to their fields and some were going out at their own charges. The Society is represented in the Levant, Persia, India, Singapore, China, Japan, and Egypt. The forms of work in which its missionaries chiefly engage are: Orphanages, schools, Bible and sewing classes, mothers' meetings, and zenana visiting. Considerable medical work is also carried on, although not, usually, by graduated physicians.

**Palestine.**—Several institutions are located at places associated with our Lord's earthly life. At Bethlehem is a fine school for girls, a class for the blind, and a dispensary. At Nazareth is an orphanage of "80 lively, healthy girls." Sewing-class record for 1888 showed: "3,967 articles mended, 1,157 marked, 550 altered; 182 pinafores made, also 400 under-garments, 130 dresses; 168 collars were crocheted; caps and pockets, with aprons for the bigger girls."

There are schools in the Galilee Village Mission about Nazareth, one of which, at Shefamer, was opened in 1889.

At Shemlan in the Lebanon is a training-school, of which an American missionary said: "No training-school in Syria, except that of the American Mission in Sidon, has turned out more pupils who have actually engaged in the work

of gospel instruction in elementary and high schools."

**Persia.**—Single ladies have only recently been sent to Julfa.

**India.**—At Agra the zenana workers have a "home," and (in 1889) 250 pupils, mostly Hindus. Thirty villages are open to evangelistic teaching from this centre, and there are eleven girls' schools in the district, for both Hindu and Mohammedan children.

At Delhi are schools and zenana visitation, and near the city is a Christian girls' boarding-school of 40 pupils, in which the teaching includes arithmetic, Urdu, Hindi, and Persian. New work was begun in Faizabad in 1889.

At Mooltan is a small *purdah* hospital. The special feature at Lodiana is village work, and the missionaries here are versed in tent life, sitting on *charpais*, and drinking sweetened milk with straws floating on the surface. They are able to write, "We are often well received and listened to."

At Singapore the Society's work is in its early stages. It is confined to the Chinese population, and depends largely upon native district visitors.

**China.**—This was the first of all Women's Societies to enter Foochow, and the first missionary sent here is still superintending the boarding-school of 50 girls from 10 to 19 years of age. "They are taught to read and write their own language, to do every kind of household work, to make and mend their own clothes; also arithmetic, geography, astronomy, and singing. But the Bible is their chief and constant study." Two small day-schools for heathen children are at Foochow, and the missionaries regularly visit and teach patients in the woman's hospital.

**Japan.**—At Osaka there is some school-work, a small training-class for Bible-women, and especially evangelistic work. Country trips are made, occupying several weeks together; the missionary and her Bible-woman constantly address audiences of 150 to 200 women, and hold afternoon meetings for children. Bible pictures and the little organ are a part of the equipment for these tours. In the city, knitting, English, and Bible classes are conducted.

**Egypt.**—The Society was lately called upon to mourn the loss of their representative for nearly thirty years—Miss Mary Whately. She had taught generations of Egyptian girls at Cairo, and established a medical mission, which at the time of her death in 1889 was in full operation under a Syrian doctor. Miss Whately's reputation is world-wide.

**Indian Female Normal School and Instruction Society.**—This Society was founded in 1852. It originated within the Church of England and is largely supported by its members, but has also a Nonconformist constituency, and co-operates abroad with all orthodox missionary societies. The offices of treasurer and finance committee are filled by gentlemen, and the annual meetings are presided over by gentlemen. The by-laws require a stated Wednesday prayer-meeting, and set apart Monday morning for private prayer on behalf of the interests of the Society.

The home constituency is represented by 170 Associations, of which about 30 are in Scotland and 13 in Ireland.

The income for 1889 was £13,054.

"The Indian Female Evangelist," 52 pp., is published quarterly. Price, 1s. Tracts and

leaflets are issued from time to time from headquarters, at 2 Adelphi Terrace, London, W. C.

The efforts of the Society are confined to India. Three new missionaries were sent out in 1889. During the years 1881-1888 the number of stations, missionaries, and native teachers was about doubled. The Society is represented abroad by 38 European missionaries, of whom 5 are physicians; Eurasian assistants, 23; native teachers and nurses, 125; Bible-women, 58.

The agencies of the Society are:

I. Normal Schools.—These are located at Bombay, Poona, Ahmadnagar, and Allahabad. The "Shaftesbury Memorial," in the latter city, is the largest, having 12 pupils—all Eurasians. A fee is charged, but by means of scholarships is put very low. The Society also supplies teachers for a normal school of 100 pupils, at Benares, belonging to the C. M. S.

II. Zenana Visitation.—Number of zenanas visited, 1,353; zenana pupils, 1,994.

Instances are given in recent reports of baptisms of Mohammedan women at Bombay. Patna, where this Society sent the first lady missionaries, has come into recent prominence through the "Lachmin Case." The zenana missionary here fought a good fight to save two of her pupils who had voluntarily fled to her from a life of degradation. In the case of the younger she was defeated by the mother and the courts, but the other was openly baptized, and has since engaged in Christian work. The "first-fruits" of sixty houses at Ajodhya was a Begum, who was obliged to fly from her husband in order to confess Christ. She was sheltered in the converts' home at Allahabad at the close of 1889. The Lucknow Zenana Mission completed its twenty-second year with the opening of 1890. Of more than 600 pupils, about 400 are Mohammedans, 100 Bengalis, and the remainder Hindus. They learn to read, each her own vernacular, a few learn English, and more, writing, arithmetic, and fancy-work. No houses are entered in Lucknow except by special request. One of the visitors in Nasik says: "In some of the houses the women only care to hear the Scripture lesson. In others they want to learn how to make caps, baby socks, comforters, gloves, stockings, embroidery, besides learning to read and to write."

A varying number of zenanas are visited in other cities, as Jaunpur, Lahore, and Faizabad.

III. Medical Work.—The staff consists of five ladies, of whom four are fully qualified practitioners, and their assistants. Two of these physicians are at Lucknow, where they have temporary hospital accommodations, until a permanent hospital, which was begun in 1890, in memory of the late President, Lady Kinnaird, is completed. The medical report here for 1888 was: In-patients, 94; dispensary attendance, 5,338; patients in their homes, 102. The largest number of in-patients of one class were Mohammedans.

At Benares are two more medical women, and the foundations of the Victoria Hospital were laid at the close of 1889. Funds for its erection have been provided by a lady. A dispensary has been in progress here for over two years, and a temporary hospital for one year, during which 54 in-patients were received. The last physician sent out by the Society is preparing to initiate medical work in Patna.

The Society proposes to increase its facilities in this department sufficiently to require an addition of £2,000 to its annual income, and they hope to train nurses in India, at a cost of £8 per annum.

IV. Hindu and Mohammedan Girls' Schools.—"One of the primary objects of the Society is the promotion of education in India based upon the Bible. Secular instruction is important, but religious instruction is all-important, and in the schools this principle has the first place." Annual Report, July, 1889. Total number of schools, 66; total number of pupils, 2,162.

In Bombay a Beni-Israel school of nearly one hundred calls for a new building, which would require £1,000.

Poona is a strong school centre. The cornerstone of a new building for the Victoria High School was laid in 1888. It receives children of five races, and will accommodate two hundred. No English lady superintends this school, both it and the ragged school for poor children having been for years in charge of Mrs. Sorabji. Thirteen girls have passed out of the Victoria as teachers.

In Lucknow, in addition to zenana teaching, the Society sustains six day-schools, four of which are for Mohammedan *purdah* girls. The pupils receive instruction in Urdu, Hindi, Persian, arithmetic, geography, and Scripture.

At Lahore the Lady Dufferin Native Christian Girls' School is strictly undenominational. Religious instruction is given daily from the Bible. There are about fifty pupils. Rev. E. A. Lawrence, a Presbyterian minister of the United States, visiting Lahore, said: "Nowhere in travelling over India have I seen a finer, more intelligent, more promising class of girls than in this school." The Society maintains also ten day-schools for Mohammedan girls in the city, and one for Hindus. The Society has schools in other cities also.

V. Bible-women.—Of 59 Bible-women connected with the Society, the larger number are at 13 different centres in the Bombay presidency. Thirteen are at Jalna, superintended by Rev. Narayan Sheshadri of the Free Church of Scotland. Support for seventeen of these agents is furnished by the British and Foreign Bible Society.

**British Syrian Mission Schools and Bible Work.**—Founded 1860 by the late Mrs. Bowen Thompson, and since carried on by her sisters, sustained by an influential council in England. Annual income, £5,000.

In the year 1860 Damascus and the towns and villages of the Lebanon and Anti-Lebanon became the scene of fearful massacres. The Druzes rose against the Maronites and Greeks, and having put to death about 11,000 men, they turned adrift 20,000 widows and orphans, who fled to the seaport towns. Their tale of woe called forth sympathy and contributions from many countries, and Mrs. Bowen Thompson, leaving her English home, hastened to Beirut in October of that same year, stirred with desire to supply a deeper than temporal need of the sufferers. Mrs. Bowen Thompson was the widow of a physician, and had spent most of her married life in Syria, where she had learned the Arabic tongue and had acquainted herself with the absolute ignorance and degradation of the women of that country. With the determination to bring the knowledge of the gospel to

these neglected women, she first opened an industrial refuge, where 200 women and children gathered around her the first week. Schools followed in Beirut, one of which has become a training institution, where about 80 girls are now fitting to be teachers. Within a few years the work had spread to other stations; schools were opened in Hasbeiya, Ainzahaleh, Mokhtara, Zahleh, and Damascus, which were attended not only by children of various Christian denominations, but also by Druzes, Moslems, and Jewesses. Mrs. Bowen Thompson was soon joined by her sisters, Mrs. Smith, Miss Lloyd, and Mrs. Mentor Mott, with her husband. With their aid and that of a small staff of native Bible-women and Scripture-readers, the mission was well organized before Mrs. Thompson's death, which occurred in 1869.

The mission now sustains about 30 schools, extending from Damascus to Tyre, and containing more than 3,000 pupils. There are a night-school, which has a large work for Lebanon soldiers; and 28 day-schools, which include 4 for boys, 4 for the blind of both sexes, 2 specially for Moslem girls, and 1 specially for Jewesses; the remaining 17 are attended by girls, who mingle without distinction of creed or rank, princesses and peasants sitting side by side. Every one receives thorough instruction in the Holy Scriptures. Women's classes are held on Sundays and week-days, and attended by large numbers, and Sunday services are conducted in several of the schools.

The corner-stone of a memorial school-building was laid in Baalbec in 1889, and the mission has established a medical work in the same place. "Daughters of Syria" is a quarterly, price 1s., published in the interests of the schools by Messrs. Seeley & Co., Essex Street, Strand, London, W. C. The foreign workers in the British Syrian schools number 3 laymen and 18 women; the native helpers are 20 laymen and 100 women.

**The "Net" Collections.**—The "Net" is a monthly magazine established in 1864. It is self-supporting (address, 22 Upper Montagu Street, Montagu Square, London, W.), and collections are received in its name for any missions mentioned in its pages, and are disbursed without expense. But while other missions are thus regarded, the "Net" is now particularly the organ of the Mackenzie Memorial Mission in the diocese of Zululand, South Africa. This mission was established and its bishopric endowed as a memorial of the lamented Bishop Mackenzie of the University Mission in East Central Africa.

There is an influential body of administrators of the "Net" fund in England, which includes both ladies and gentlemen, and they pledge £1,000 annually for the mission, which is also aided by the Society for the Propagation of the Gospel.

The missionary force consists of the bishop, ten priests, several deacons, and nine lay helpers, of whom one is a lady. They occupy eight stations, and report in 1889: communicants, 488; catechumens on the roll, 77; average number at day-school, 280; confirmed in 1888, 107; total average congregations on Sunday, 1,000.

**The Helping Hands Association.**—This Association, organized by young ladies, is in its eighth year (1891), and publishes monthly "Indian Jewels," price 1s. 6d. There are over 40

branches of the Association, and they raise between £600 and £700 annually.

The object of the members is not to inaugurate or conduct missions themselves, but to be "the handmaidens of larger societies." In 1888 they disbursed their funds through five separate societies, all but one connected with the Church of England.

Each associate is required to pay an annual fee of 1s., and they add to their resources by sales from their Helping Hands Depot, 42 A, Fulham Road, London, S. W. Each associate must contribute once every three months for these sales, in one of the following departments, or send a donation of money in lieu of such contribution: art, music, gardening, wood-carving, wood-engraving, bees, needlework, cooking, waste-paper and scraps.

A "Nurses' Association" and "Sixpenny Scheme" are departments of the Helping Hands.

**The Tabetha Mission.**—This mission is confined to Jaffa, and includes three schools which are carried on by Miss Walker-Arnott, with the co-operation of committees in England, both gentlemen and ladies.

The boarding-school in Jaffa, now in its twenty-ninth year, has about sixty girls resident—Christians, Jewesses, and Moslems. The twenty-fifth anniversary, in 1887, was happily celebrated. Three hundred old pupils sat down to dinner at the school, of whom 70 were Jewesses. About one fifth of the school pay their expenses, and a few provide clothing and beds.

The annual cost of food and clothing is £10 for each child.

Two day-schools aggregate 100 children. The mission is undenominational.

### **Boards working in connection with other Boards.**

#### **UNITED STATES.**

**Woman's Boards of the Congregational Church.**—Woman's Board of Missions; organized 1868; No. 1 Congregational House, Boston, Mass. Woman's Board of the Interior; organized 1868; No. 59 Dearborn Street, Chicago, Ill. Woman's Board of the Pacific; organized 1873; San Francisco, Cal. Woman's Board of the Pacific Islands; organized 1871; Honolulu, Hawaii, S. I.

The first three Boards co-operate with the A. B. C. F. M. in Mexico, Spain, the Turkish Empire, India, Ceylon, China, Japan, Africa (East, West, and South), and the Micronesian Islands. The fourth Board co-operates in the Hawaiian Islands and in Micronesia. Several facts indicate the results of this co-operation. Twenty years ago there was a great disparity in the church-membership of all the A. B. C. F. M. Missions in favor of men; now the number of men and women is very evenly divided. Then their schools for girls (exclusive of those taken by the Presbyterian Church in 1870) numbered: boarding-schools 11, pupils 350; common-schools 352, pupils 3,103. To-day the corresponding facts are: boarding-schools 53, pupils 3,300; common-schools 930, pupils 34,694. Twenty years ago such a thing as a dispensary for women was not heard of, and the few higher school buildings were inadequate; now the largest of these Boards has more than \$200,000 invested in such Christian monuments.

Then the American Board had 43 single ladies in missionary service—a larger number

than had the ten other leading societies of America and Great Britain combined. During its 57 years of previous history it had sent out 170 single ladies. Now it enrolls 173 in a single year.

I. *The Woman's Board (Boston).*—It aims, by extra funds, efforts, and prayers, to co-operate with the American Board in its several departments of labor for the benefit of women and children; to disseminate missionary intelligence and increase a missionary spirit among Christian women at home; to train children to interest and participation in the work of missions.

The initial step in its organization was taken by a handful of women, in a half-day meeting called in Boston (1868). Twelve churches of the vicinity were represented, and they began that day, without a dollar, without an auxiliary, without a missionary.

At the first anniversary of this meeting more than 600 ladies were present and they reported 129 life members, two auxiliaries, an income of \$5,033.13, and seven missionaries in the field, four of whom are still there.

This Board now requires three days for its annual meeting. Its first president held the office till January, 1890, when she resigned. Home force: branches, 23; auxiliaries 1,182, out of 1,921 churches; bands, 549; total 1,731.

The income for 1889 was \$123,218.50, a gain of \$8,000 on the previous year. There are about 15,000 children in its Mission Bands, who have in some years contributed \$10,000.

Abroad, the Board sustains: missionaries 111, of whom 3 are physicians; boarding-schools, 32; day-schools, 228; pupils in all, 10,000; Bible-women, 143.

II. *The Board of the Interior.*—This was constituted only nine months later than the Board in Boston, and its beginning was fostered directly by Secretaries of the American Board acting with pastors in Chicago. The first auxiliary to enroll was a veteran society of Rockford, Ill., dating back to 1838. At the end of four months the Board forwarded \$1,200 to the treasury of the A. B. C. F. M. At the first annual meeting the record ran: 70 auxiliaries, 52 life-members, 6 missionaries, \$4,096.77 received. At the end of twenty years they had given more than half a million dollars, had 70 missionaries in the service, and had multiplied their auxiliaries twenty times, or once for every year.

Home force: Senior Societies, 997; Junior Societies, 355; Juvenile Societies, 648; total, 2,000. Added in 1889, 271; contributions in 1889, \$56,685.26,—a gain of \$7,000 on the previous year. The children of the "Interior" gave over \$6,000 in 1889.

Abroad, the force is represented by: missionaries 82, of whom 4 are physicians (6 went out in 1889); boarding-schools, 12; Bible-readers, 34.

III. *Board of the Pacific.*—The territory covered by this Board is scarcely more than the State of California, which in 1887 contained but 115 Congregational churches, 81 of them being aided by the Home Missionary Society. The Board has 67 auxiliaries, supports 5 missionaries, and contributed in 1889, \$4,490.05.

IV. *Woman's Board of Missions for the Pacific Islands.*—This originated in the efforts of one of the missionaries to Micronesia while she tarried on her way for a visit at Honolulu. Its members are European and American ladies residing at the Hawaiian Islands, and it is almost entirely

officered by descendants of the early missionaries there. Regular societies are established on several islands. Their contributions in the year ending June, 1889, amounted to \$1,015.52. Up to June, 1888, the total amount expended by this Society on the foreign field (chiefly Micronesia) was \$4,510.57. During the same seventeen years there was also expended on the home field (Hawaiian Islands) \$5,598.51.

The Board sustains a missionary in a girls' boarding-school on Ponape, and another among Hawaiian women of the islands, and shares in efforts for the Chinese among them. Its supervision is exercised over schools, Bible-women (6), a hospital, a home, a prison.

Work done by this Board is extended by two juvenile societies: "The Helping Hand," and "Missionary Gleaners." The latter contributed \$200 in 1888 toward the salary of a second lady in Micronesia.

Missionary effort for the Chinese at Honolulu has developed a very interesting society, viz., the *Kituk Nui To U*—a Woman's Christian Association of Chinese Women.

"Life and Light for Woman," the joint publication of the three Boards in the United States, is published monthly in Boston, at 60 cents per annum, and has about 16,000 subscribers. "The Mission Dayspring," for children, is published jointly by the American Board and the Women's Boards. Each of the latter issues annually a variety of leaflets and reports from its own headquarters, and the Board of the Interior, in addition, prints monthly a twenty-page paper, "Mission Studies," and furnishes a column for a weekly paper in Chicago.

While these three Boards are geographically separated and entirely independent in their home management, their relations to the American Board are the same, and their interests and labors abroad are side by side, not only in the same mission, but it may be in the same school.

Their missionary enterprises will therefore be considered in this place as a unit, without reference to that particular Board under whose direction any one enterprise in any particular field may be.

Educational Work.—While not neglecting other departments, these societies, in the outset, gave their first strength to schools, and consequently have a fine array of institutions of all grades. Of fifty-three boarding-schools for girls, several rank as colleges. Such are the American College for Girls at Constantinople, the woman's department of Euphrates College at Harpoot in Eastern Turkey, the College at Marash in Central Turkey, and the Kyoto School, Japan. Courses of study in these institutions are equivalent to those pursued in high schools at home. No Latin is taught, but the classic Greek is, in cases where there are Greek students; and from the circumstances of the case the language department is often the strongest; young children in the entering class, at Constantinople for instance, often speaking three or four languages. Visiting that college on a day of the regular rhetorical exercises, one may listen in turn to essays from young girls, in English, French, Armenian, Greek, Bulgarian, and possibly Turkish. In interior cities like Marash three or four tongues will be in use. In schools in Japan, like the Kobe Home, Japanese, Chinese, and English studies are

pursued. In all these institutions, Bible-teaching is made prominent, and public examinations are conducted in the Scriptures, as in mathematics; while daily prayers, meetings, Sunday-school and church service, are a part of the curriculum that must be accepted by every parent. Musical instruction is usually afforded, and its full cost required. It has become customary to give the students some gymnastic exercises, and they always are kept in practice of such domestic duties as are thought proper in the families from which they come.

Tuition is not free in these higher schools beyond a limited number of part scholarships for those who are to become teachers. The school in Oodocville, Ceylon, is wholly self-supporting. All those in Japan are largely supported by the Japanese, and several, as at Osaka and Niigata, are wholly or in part under their control. That at Adabazar, Western Turkey, is the only one of its kind in that country, and has been a successful experiment for a number of years. It is directed and supported by the Evangelical Armenian community, there being no Americans in the place, except the ladies who teach the school, co-operating with the people, whose confidence they have. The salaries of these ladies are paid in America.

The boarding-schools and colleges are distributed as follows:

South Africa, 2; European Turkey, 2; Asia Minor, 17; India and Ceylon, 11; China, 6; Japan, 7; Micronesia, 2; Mexico, 3; Spain, 1; Austria, 2.

The general style of living in these schools varies with the country and social condition of the pupils. Some of the Zulu girls arrive at school in their blankets directly out of heathen kraals, while those in Smyrna may come from the hands of a French dressmaker. In none of these schools do they sit on the floor at lessons; in several they have pianos, as at Marash College, whither one was carried 90 miles swung between mules. The aim is to develop wants in the lowest, but not to lift any too far above their people to be useful among them.

Industrial Training.—At Inanda, in Zululand, the school-girls in 1888 harvested potatoes, corn, beans, pumpkins, and other vegetables and fruits sufficient to supply one third of the table necessities for a whole year, and planted 138 trees on Arbor Day. A few years ago a teacher on her way to South Africa, upon visiting the Intercolonial Exhibition in London, saw a shirt made by the girls of the Umzumbe Home, to which she was going, bearing the mark "First Prize."

In Turkey, at Sivas, Armenian girls pulled down small barns and assisted in putting up a building. At Van there was a furore over white embroidery; "they do it beautifully—quite equal to the nuns's work at home." At Marsovan the girls cook, wash, clean house, cleanse the wheat and rice, pickle, dry beef and fruits. In Madura City, India, they pound their rice, cook their food, cut and make their own garments, and sometimes for the catechists' families as well. In all the schools in Japan foreign sewing and knitting have been introduced.

As specimens of the numbers of house pupils in these different schools, the following recent figures may be considered representative:

Africa—Inanda, 60-70 (some of whom walk

more than 70 miles to reach the school); Umzumbe, 43. India—Bombay, 35; Ahmadnagar, 84; Battalagunda, 40-50; Otis School, Madura, 75. Ceylon—Oodocville, 105. China—Foochow, 33; Peking, 25. Turkey—Bitlis, 40; Harpoot, 48; Constantinople, 60; Monastir, 43. Japan—Kyoto, 75; Osaka, 100. Micronesia—Kusaie, 26.

Besides these boarding-pupils, all the schools have so many day-scholars as often to double the numbers, as at Sirur, India, where the whole number is 94, as against 42 boarders. Otis school, 143; at Kyoto, 214; and at Osaka, 420, with 27 classes in English daily.

Not every stone has been polished into a gem, but the whole record of these schools makes a history of elevation and piety. The teachers of elementary mission schools and many invaluable assistants in higher grades, the Sunday-school workers, wives of helpers and pastors, the female church-membership, and the Christian motherhood of the country around the missions, have come out of these schools.

It is the common experience in all of them to have some uniting with the church year by year, and few are those which have not enjoyed precious revivals. Very rare are the graduates who are not confessing Christians. A few statistics of conversions may be given from the reports of 1888.

Received to the church: in Turkey: Adabazar, 6, "all the boarders Christians;" Broussa, 7; Euphrates College, 35 conversions. In China: Foochow, over 30 conversions; Bridgman School, Peking, all Christians but two who were "so small and new they couldn't understand;" Pao-ting-fu, 4 confessors. In Japan: received to the church at Kyoto, 26; Osaka, 32; in Niigata, 25 were Christians.

In 1889, at Okayama, 21 girls united with the church. Every girl was hopefully converted at Osaka, and over 60 at Kobe.

The school in the city of Madura was opened in 1837. Up to 1867 more than 300 girls had been educated there. From 1845 to 1866, 77 from it united with the church. In 1886-87 it (now called the Otis School) was visited by a powerful revival, in which "only five or six out of 78 appeared to receive little benefit." The after history proved this a genuine work of God.

A day of prayer has been set apart many times in some schools, and at Harpoot, at the Hadjin Home at Aintab and other places, it has been followed by outpourings of the Holy Spirit.

*Village and Day Schools.*—These are not taught by American ladies but by trained pupils under their superintendence. An exceptional case is at Orfa, Northern Syria, an interesting city of 30,000 people, where the mission has a church, but no resident missionary. A lady went there temporarily from Aintab in 1888, and aided by an Armenian girl, gave a part of her day directly to a school which, beginning with only 12 pupils, has not only developed a large school, but an efficient gospel work through the city.

Tuition in day-schools is nominal. In the city of Adana, Asia Minor, it is 86 cents per term. In Marsovan it is one piastre ( $4\frac{1}{2}$  cents) per week. In the Kindergarten at Mardin the charge is three piastres a month, and more than 50 little people attend. Societies in America are asked to supplement the income of these day-schools at such rates as the following:

Boys' school, Cesarea, Turkey, \$25 per year; village school, Madura district, India, \$40 per year; village school, Sholapur district, India, \$50 per year; village school, Ahmadnagar district, India, \$46 per year; village school, Sirur district, India, \$43 per year.

Attendance at day-schools fluctuates with persecution and good or bad harvests. Ten high-schools on the plains of Cilicia had an aggregate of 356 pupils in 1889. One public school in Marsovan had over 200 pupils. Young business men paid 80 cents a term in the same city for tuition at a night-school.

Five day-schools in the Spanish Mission have a total of 117 scholars; 16 in the Foochow Mission have 240.

*Evangelistic Department.*—Bible Women.—There is no strictly zenana visiting done by the missionaries of these churches, because there are no zenanas proper within the fields of their missions; but in India house visitation among high-caste women is done by 24 Bible-women in the Maratha Mission, and 35 in the large district of Madura, Southeast India, among the Tamil people. The following outline indicates the development of such Bible-work in Madura:

1850.—No special work for women outside of girls' schools in Madura district of two millions of people.

1867.—A woman of respectable caste, educated at the mission-school, daily visited a rich man's house to teach his wife and daughter to read. This opened the door in the city. The same year, at Mana Madura, Mrs. Capron began her first systematic efforts for high-caste Hindu women. The same year, also, a Hindu gentleman, a pleader in the courts, appealed to educated women to visit and instruct in heathen homes of the higher classes.

1875.—Fourteen Bible women, of whom none deserted their posts during the cholera. Annual report of the mission for the first time has a heading "Work for Women and Work by Women." It states that 250 women in the mission now have a fair education, and more than 100 are capable of conducting a religious meeting among their own sex. At Battalagundu the church chose a deaconess. Some women deterred by ridicule from learning to read.

1885.—Ten Bible women in Madura City; 915 pupils, of whom 362 read the Bible. Christian Hindu women contributed to the support of one Bible-woman, of whom there were 24 in the district.

1889.—In the district 35 Bible-women; in the city 13; hundreds under the instruction of the latter, and 10,000 hearers of the Word for the first time.

These women devote their time to Hindu, Roman Catholic, and Mohammedan houses. They are not engaged among the coarse and rough, but generally in homes of the better class, where intelligence, tact, and good breeding are requisite. They visit with Bibles and tracts in their hands, teaching the ignorant to read, and leading the lost to Christ; sometimes reaching even the husbands, who listen to the reader, perhaps from behind a curtain.

In the Ceylon Mission 22 Bible-women are employed, in Asia Minor 58, and smaller numbers in other countries. Their wages are sometimes rated at \$5 per month in Bulgaria; in Mardin, Eastern Turkey, they receive \$35 a year; in places in India about \$30.

In Mexico missionaries take the high ground that they want voluntary workers and not paid women, and they have Christian women at Chihuahua who call themselves "Willing Workers," and pledge an afternoon or more a week to a Bible-woman's proper labors, and their missionary says of them, "I do not know a drone in the hive."

Touring.—Some missionaries combine teaching and touring. Two ladies at Harpoot, Turkey, after teaching for years, are devoting themselves to the arduous life of itinerating among the sixty out-stations of that field. Of them a missionary wrote in 1888: "We have had to hold them back all winter. They have done grand service in schools, women's societies, house-to-house and hand-to-hand work, and not less in evangelistic meetings with women, with audiences of a hundred and fifty to three hundred, and in the superintendence of Bible-women. If they should be compelled to give up, what would become of the work out in the field?"

Of the "woman's societies" referred to above, one of these very ladies reports: "They are accomplishing a quiet work. It is theirs to make the pulpit-seat comfortable with a cushion, to buy carpets for the church, help support the girls' school, buy a communion service, white-wash the chapel, etc." Of the spiritual work she says:

"Daily preaching services and women's meetings are crowded, and the noon-day meetings at stables are of deep interest. Inquirers come to us at all hours, the sunrise prayer-meetings are tender and solemn, and we hope that souls are added to the church of such as shall be saved."

In Central Turkey touring is extensively carried on. In European Turkey one lady gives herself exclusively to evangelistic labors. In Stamboul two carry on city missions in the form of Sunday-schools, coffee-house tract-distribution, mothers' meetings, prayer-meetings, and night school.

In North China, at Kalgan, Tung-cho, Pang Chuang, and Pao-ting-fu, the whole missionary work is in that stage of development when hand-to-hand evangelistic labor is demanded, and several ladies give themselves to it exclusively, and with large success. One of them recalls how timidly the first few women came to Sunday-school in Tung-cho sixteen years ago, and now she sees 158 crowd into the chapel in a morning.

In Japan, evangelistic work is many-sided. It is close at hand in the city; or, it carries ladies on trips hundreds of miles from home, visiting isolated Christians and country churches, and preaching among the heathen. Miss Dudley of Kobe on one such tour met 350 Christian Japanese women, and talked with the majority personally. Listeners are so eager that the missionary's stay is never quite long enough, and her mind and body are kept on a stretch from morning till late at night. Or, evangelistic work is special and unique, as that of Miss Colby at Osaka, who has had classes of men—teachers, policemen, merchants. Referring to her experience of men crowding into her woman's meetings, she says: "A missionary is very much like firemen during a conflagration—each one is on the ground to save as much as possible." Another lady in Kobe taught English to a class of 60 women, preceding the lesson with a half-hour of Bible. The

class soon petitioned to make the Bible lesson an hour long; within this class grew up, besides, a weekly Bible-class.

The Christian Japanese woman who accompanies the missionary on her tours is a very important person. One is thus described: "She has a gift for addressing audiences; she is self-poised, clear, and almost eloquent. We spoke in three places before students of high-schools—in all to 800 young people." Of another, at a time when 80 out of an audience of 100 proved to be men: "My helper is a spirited little woman, and rises to the occasion beautifully. She spoke on temperance wisely and pointedly."

*Medical Department.*—There are three medical centres in China. At Kalgan, under the shadow of the great wall, Dr. Virginia Murdock has a hospital (which is equally an opium refuge), and a dispensary, and teaches women to read, even to embroider.

She "goes off into the country on tours, staying sometimes twenty days. She takes a servant or Chinese helper with her, medicines, books, bedding, cooking utensils and foreign food, and puts in three weeks of arduous work and as much discomfort as can be imagined.

When opium patients come to the hospital she has a plain talk with them. If they are not frightened away, she makes them deposit a sum of money, which she keeps if they run away before the treatment is over; but if they have pluck to stick it out, she gives it back when they go home. For three days, sometimes four, they are in fearful misery, and keep up a series of howls and groans. To go into the hospital in the evening is like stepping into Pandemonium itself. Her patients seldom give out during the process."

A second hospital, at Foochow, is nearly completed. In 1888 Dr. Kate Woodhull treated 3,398 cases, 1,000 being new patients. She took \$246 in fees, and has received unqualified confidence and praise from the Chinese. She is training a class of young women in medicine.

There is also a dispensary at Tung-cho, China.

In Kyoto, Japan, a hospital and training-school for nurses constitute a branch of the Doshisha University. The land was purchased with the gifts of 553 Japanese, and the buildings provided by friends in America, especially young ladies of the "Interior." There is a general ward for 12 patients, an obstetrical ward for 8, a house to accommodate 30 nurses, and other buildings. All were formally dedicated November, 1887. The head of the training-school is Miss Richards, who left the post of superintendent in the Boston Hospital to assume these duties, and the clinics are divided between Dr. Berry and Dr. Sara Buckley. There were five nurses in the first class, all earnest Christians.

Other institutions under care of these Boards are training-schools in Kobe for women evangelists and kindergarten teachers.

An object of special effort in 1889 was an improved school-building for Bombay, for which \$10,000 were contributed.

*Woman's Foreign Missionary Society of the Methodist Episcopal Church.*—On a stormy day in March, 1869, a few Methodist women met in the Tremont Street Church, Boston, Mass., and organized the Society bearing the above name. In May following, at a special meeting, it was voted to send out their first missionary. In November two ladies were sent to India, and have done distinguished service for missions ever since.

The constitution of the Society provides for a General Executive Committee, composed of

delegates from each Branch, who have general management of the affairs of the Society.

It is now composed of ten associated branches, stretching from the Atlantic to the Pacific, and from New England and the Lakes as far as Virginia and Arkansas on the south. Unlike most Woman's Societies, it disburses its own funds, and chooses missionaries without direction of the General Board of the Church. The few salaries paid at home are remarkably small, while those of missionaries are thought to average higher than in other denominations.

The method adopted for raising funds to prosecute the work of the Society was the usual plan of Woman's Boards, viz., every Christian woman to lay aside two cents a week, or pay one dollar a year as a membership fee.

When the first missionary departed there was not money enough in the treasury to provide the entire expense. "Shall we lose Miss Thoburn," said one of the committee, "because we have not the money in our hands to send her? Rather let us walk the streets of Boston in our calico dresses." So they borrowed the money, and in their history of twenty years since have never been in debt, nor has one of their branches failed to meet its obligations.

The twentieth annual meeting of the Society was held in Detroit, Mich., in October, 1889. Its sessions occupied nine days, and the business was transacted in presence of large audiences by three delegates from each of the ten Branches.

The rate of progress within the Society may be indicated by the figures following:

At the end of the first year the number of auxiliaries was 100, money raised \$4,546.86; fifth year, auxiliaries 1,839; \$64,309.25; tenth year, 2,172 auxiliaries; \$66,843.69; twentieth year (1889), 5,531 auxiliaries; \$226,496.15. The total membership is 138,950.

The auxiliaries include 501 societies of young ladies and 748 Children's Bands, which last began to be organized in 1879.

The contributions of 1889 were the largest in the history of the Society, and an advance of \$20,000 over the previous year. The money raised in 1890 amounted to \$220,329.00.

Since 1883 a German constituency has also been growing up, which includes 52 auxiliaries in Europe and 141 in the United States, having a total membership of 4,082. And yet the committee are obliged to report that only one woman in eleven connected with the Methodist Church is a member of the Foreign Missionary Society.

"The Heathen Woman's Friend," issued in 1869, had a subscription list of 4,000 the first year, and paid expenses. It has remained in the same editorial hands ever since, and having been enlarged from time to time, became in 1875 a paper of 24 pp., at fifty cents. It is illustrated, has 19,800 subscribers, and pays, besides its own expenses, for nearly all the miscellaneous literature issued by the Society, which amounts to more than 2,000,000 of pages annually. The paper is published at 36 Bromfield Street, Boston, Mass. A German edition is also published, and has 1,776 subscribers.

An illustrated eight-page zenana paper, "The Woman's Friend," is also printed in four of the dialects of India, and reaches 25,000 women readers. It is carried by an endowment fund of \$25,000. The recent death at Madras of the editor of the Tamil edition was a

great loss. The "Child's Friend" appeared in 1890, a small monthly, fifteen cents per year.

The Society has sent into the foreign field 137 missionaries in all, of whom about 100 are still in active service. Some at home on leave are hoping to return, and 9 have died; 23 went out in 1889. These missionaries are located in India (33), China (22), Japan (20), Korea, Bulgaria, South America, and Mexico. The following outline indicates the order in which different branches of work have been assumed:

- 1870 Third missionary to India.
- 1871 Two ladies to China.
- 1873 Beginnings in Mexico and South America.
- 1874 Beginnings in Japan and Africa; the latter afterwards abandoned.
- 1877 Bible-readers in Italy and Bulgaria.
- 1879 A school for Eurasians opened in Calcutta.
- 1882 Chungking occupied in West China, and a hopeful work carried on until all the mission property was destroyed by a mob in 1886.
- 1884 Chinkiang, on the Grand Canal, occupied.
- 1885 Missionary to Korea.
- 1886 Nanking, China, entered.
- 1887 A lady sent to Singapore.
- 1888 Beginnings in the great heathen city of Muttra, India.

Property held by the Society in its several missions is rated at about \$300,000.

*Schools.*—There are some 250 schools of all kinds connected with the missions, of which the most important boarding-schools are as follows:

In Japan: At Tokyo, where 34 were baptized in 1888; Aoyama high-school, where all but two were Christians in 1889; Nagasaki, which has the finest building in the city, and where 35 were converted in 1889; Hakodate, which allows 55 scholarships, though only 19 pupils are wholly supported; and Nagoya, which had 86 pupils, all self-supporting, and a number converted during 1889.

In Korea: At Seoul.

In China: At Foochow, Chinkiang, Kiukiang, Nanking, and Peking.

In India: Five in the Rohilkund district, of which that at Moradabad has 150 girls from more than 50 villages. There are over 300 intelligent Christian women in this province, more than 500 girls in higher-grade schools, and about 900 in schools of all grades. Fifty young women, students' wives, are in the training-school at Bareilly. In the Oudh district are 4 boarding-schools, including that at Lucknow—the oldest and most notable of all. About half the pupils here are Eurasians, all pay their entire expenses, and the school itself became a chartered woman's college in 1890. In the Kumaon district are four schools, of which Pithoragarh and Naini Tal are the largest. In the former there is scarcely a girl, with the exception of the little ones, who has not become a Christian. They "sew two hours, study four, work in the fields two, and do all their own grinding, cooking, and washing." The Calcutta school is the largest under care of the Society, and occupies one of the largest buildings in India used for a girls' school. It is self-supporting, and requires 13 teachers besides the American ladies. The pupils are of eight or nine races, and out of 200 members 77 have

united with the church. Bombay, Singapore, and Rangoon in Burma, each have a school.

In Mexico: At Puebla, where in 1888 nearly every scholar became a Christian; Mexico City, where was a revival in 1889.

In South America: At Rosario, in Buenos Ayres, where is a "Home."

The number of house-pupils varies from 20 in Puebla and Seoul, to 78 at Cawnpur, 90 at Calcutta, and over 100 in some of the Japanese schools. In all cases day-scholars bring the number much higher. The Bareilly Orphanage has nearly 200 girls. The schools are arranged to reach all classes. There are more than 4,000 children in city and day schools in the North India Conference alone, and 935 girls in the Society's schools in Mexico.

*Evangelistic Department.*—Direct evangelistic work is done in all the missions. From the 70 centres in the North India Conference, 220 Bible-women regularly visit 4,000 houses, and more than 6,000 women are receiving religious instruction. A large itinerating work is prosecuted in the villages of Rohilkund, and about Gonda, in Oudh; and at a camp-meeting held near Moradabad, in the summer of 1889, 300 intelligent and neatly dressed "King's Daughters" were present.

A large evangelistic work is also carried on in the Foochow district, China, where one Bible-woman reported for the year: "There came to me to hear the gospel about 1,700 women," and where one of the missionaries in the spring of 1889 thus summed up a single itinerating trip: "This is a hurried recital of 45 days' work, in which 1,442 heathen women were told 'in all your afflictions He was afflicted,' and men unnumbered; 16 schools were visited, 32 meetings attended, 36 visits made, and 500 miles travelled in Chinese boats and sedan-chairs." There are seven Bible-women employed in Italy.

Other Evangelistic agencies are: The Sunday-school, which is universal, and established at 67 points in Oudh alone; women's meetings, having regular attendance of 58 in Tokyo, sometimes 90 at Seoul; refuges at Lucknow and other places; a widows' home at Lodipore; industrial classes; a women's workshop in Rangoon, where over 30 women are employed in sewing under direction of a forewoman; orphanages at Mexico City, Madras, and other places; and instruction in leper asylums.

A new feature is Deaconess Homes at Calcutta, Lucknow, and Muttra. At the latter evangelists are trained. There are also training-classes for women at several places—notably Yokohama, Japan, and Peking, China.

*Medical Department.*—The Society has a notable record in this line. Its medical women are stationed in four cities of India, four of China, and one in Korea. Medical work is also in progress under other instrumentalities, e.g., at Bithoor, near Cawnpur, where one of the Christian native women who took a medical certificate in India treated successfully nearly 1,000 Mohammedan and Hindu women in one year. Twelve Christian girls are studying medicine at Agra.

Of two physicians of this Society, special mention is appropriate—of Dr. Clara A. Swain, because she was the first of all, and of Dr. Leonora Howard, because it was given to her to be connected with a great providential opportunity, one of the most marked in all the history of modern missions.

The urgent representation of the wife of a missionary at Bareilly, India, led the Society to inaugurate a medical mission there, at its very start, and one of the first two missionaries sent out was Dr. Clara Swain, a graduate of the Woman's Medical College in Philadelphia. She reached Bareilly in January, 1870, and during the first six weeks had 108 patients; during the first year 1,225 were received at the mission house; the second year they built a dispensary, the third year a hospital. The fourth year there were 3,000 dispensary patients with 150 out-door patients; and woman's medical missions were no longer an experiment.

It had been hoped the doctor might unlock zenana doors; 38 new zenanas were opened through the hospital at Bareilly in 1874, and four Bible-women became necessary to the mission. It was faintly hoped that women would emerge from the zenanas to consult the doctor at her dispensary. They came, shut up in their doolies, which were carried into the dispensary, and inside which they stayed, one curtain only thrown aside, while they received their prescription. To quote one instance from a letter from Dr. Swain at the close of 1874: "This morning a Mohammedan lady came in a conveyance which could not be brought into the room. She was young and pretty, and her husband seemed quite perplexed, as there were several men at work on the road in front of the dispensary. I assured him that an umbrella was quite sufficient to protect her from their sight, but he was not satisfied until he got the second one and held it over her while she came in." \*

After fifteen years of valuable labors bestowed at Bareilly, Dr. Swain severed her connection with her Society for the sake of entering what seemed a Providential door to wider usefulness. The Rajah of Rajputana called her to attend his wife at Khetri, and her success led to her remaining as permanent physician there. No restrictions are placed upon her, or the Christian women with her; and they have been for four years scattering Christian books, teaching Christian hymns, talking among the women of the palace and establishing schools,—all at the expense of the rajah.

Dr. Leonora Howard, a graduate of Michigan University, Ann Arbor, reached Peking in 1877, and in the latter part of the next year, while in the full tide of very onerous and useful labors, she was interrupted by a call to Tientsin. Lady Li, wife of the distinguished statesman Li Hung Chang, then governor of the province, was seriously ill, and the viceroy, who was very fond of her, had gone so far as to call in a foreign physician of the London Missionary Society. But the doctor could not overstep the bounds of Chinese tradition to give her suitable care, and the lady from America was suggested. So the man next to the emperor despatched a special courier and a steam-launch, and Dr. Howard was brought to Tientsin. Her remedies were effective, and Lady Li gradually recovered. Dr. Howard was then pressed to remain permanently at Tientsin, which she did by advice of all the mission. Apartments in one of the finest temples in the city were placed at her disposal for a dispensary, the expense of which Lady Li herself defrayed. During

the first five months, 810 cases were treated there, and 1,000 more at a second dispensary in another part of the city. A hospital was built in 1881 under the auspices of the Society, and Dr. Howard continued in charge of it, while also making professional visits in families of the highest officials, and combining religious instruction and medical labors without restraint, until her marriage in 1884, to a member of the Loudon Mission. During all that time her relations with Lady Li remained most cordial, and she had the pleasure of warmly commending to the viceroy one of the treaty commissioners from the United States—the man whose name was on her medical diploma, President Angell of Ann Arbor.

The hospital has been ably carried on by Dr. Howard's successors.

Two things in recent reports from the mission are specially suggestive of the broad results: First: The large number of missionary societies and bands of King's Daughters among the converted women and school-girls. They are to be found in Mexico, Italy, Bulgaria, Japan, China, and there are twenty in India.

Second: The conferences held, composed of native women who have been trained in the missions. Of one such at Foochow, in 1886, a Chinese brother exclaimed, "This is wonderful, and we never thought to see it here; but last year the telegraph came, and this year the woman's conference!"

The women attending read carefully prepared papers on such subjects as, "The importance of the Holy Spirit's aid in preparing for work;" "Can Christian women be admitted to schools?" "The importance of attending prayer-meetings." At Lucknow as many as 600 have met for a day in such a conference.

Some of the events of 1889 were the establishment of a home and orphanage in the city of Rome; purchase of new property at Foochow and Peking; and opening a new school-building, with 50 pupils, at Hirosaki. The Society is making an effort to raise \$50,000 for the college at Lucknow.

**The Woman's Missionary Society of the Methodist Episcopal Church (South)** was organized by General Conference at Atlanta, Georgia, May, 1878. It is composed of thirty-four conference societies. The corresponding secretary of each conference, together with five officers and six managers, constitute the Woman's Board, which is the executive body of the Society.

The Home force consists of: Auxiliary societies 1852, membership 38,203; young people's and children's societies 890, membership 27,263. Total receipts for year ending May, 1890, \$75,486.54.

"The Woman's Missionary Advocate" is published monthly at Nashville, Tenn. Price, 50 cents. It is self-supporting, with a circulation of more than 11,000.

The Society also in 1889 printed and distributed without charge 1,500,000 pages of leaflets.

Abroad the force is represented (January, 1891) by: Missionaries, 32, of whom 14 are in China; assistants 27; native teachers, 27; boarding-schools, 10; day-schools, 24; pupils, 1,248; hospital, 1.

The value of property held by the Board is \$181,000.

China was the first field entered, in 1878; and the following stations were occupied in the

\* "Medical Work," published by W. F. M. S. of the M. E. Church, p. 59.

order given: Shanghai, Nantziang, Soochow, and Kalding.

Boarding-schools are carried on in all of these cities. There are nine church-members in the Clopton School, Shanghai. The teacher at Soochow says in a late report that her school had read the entire New Testament during the year, the older girls were neat and patient needlewomen, and 14 out of a school of 21 were probationers.

At Soochow Dr. Mildred Philips has charge of a woman's hospital, whose whole cost—building, site, and equipment—was \$10,000. It comprises a two-storied home for the medical missionary and others, a dispensary, two wards, and an operating ward, with cheap buildings for servants, kitchen, etc. The hospital was opened in October, 1888.

Several schools in the mission are Anglo-Chinese, and two ladies at Shanghai give their entire time to teaching in the Anglo-Chinese College for young men.

Work at Kahding was opened by a lady of ten years' experience in China, who went, with Chinese assistants only, to make a beginning in that large, walled city. At the end of a year she had six day-schools with 76 pupils, with five Chinese teachers and a Bible-woman at work.

The Society entered Brazil in 1880, and occupies stations at Piracicaba and Rio de Janeiro. They have boarding-schools at both places, with about 100 girls in the former, although only 20 are house-pupils; the latter school receives children from two to thirteen years old. A school for young boys in Rio is also under care of the ladies. The language of all the Brazilian schools is Portuguese.

In 1881 the Society entered Mexico, where it has stations at Laredo and Saltillo. The girls' school in the former place enrolls 144, and a boys' school of 39 is self-supporting. The Laredo Band is a missionary society in the church, which has contributed from \$40 to \$60 in a year. The school for girls at Saltillo closed its first year in December, 1888, having received \$282.15 (Mexican) for tuition, which, aside from the missionary's salary, was sufficient to cover expenses. Instruction is given at both stations in day-schools and Sunday-schools.

Harrell Institute, in the Osage Nation, Indian Territory, is also under care of this Society.

**The Woman's Foreign Missionary Society of the Methodist Protestant Church** was organized in Pittsburg, Pa., in 1879. Before that date moneys raised by local societies had been sent to the foreign field through others, especially the Woman's Union Society of New York.

Administration of the affairs of the Society is vested in a General Executive Board, to represent all the branches, and to meet annually—a plan in harmony with the government of the church.

The first representative of the Society abroad died on her way to Japan.

The home force consists of 20 branches, 320 auxiliaries, 60 mission bands, 3,000 to 4,000 membership. Contributions for 1889-90 were \$3,566.07.

"The Woman's Missionary Record" is a monthly paper, published at headquarters in Pittsburg, at 50 cents.

Abroad.—This Society has five missionaries, all in Japan. They have a prosperous girls' school at Yokohama, which lately moved

into a new and improved home, built at a cost of nearly \$6,000, and said to be capable of housing 150 pupils. They have also a station at Nagoya.

The secretary says: "Besides our regular teachers, we have Bible-readers and assistants among the older pupils, who render good service as interpreters and teachers of primary classes. Our Society is one of the youngest, but it is hopeful. With faith and courage we have entered the 'open door,' and in obeying the last command of our blessed Master, we can confidently claim His promise, 'Lo, I am with you always, even unto the end of the world.'"

**Women's Mite Missionary Society, African Methodist Episcopal Church.** Organized 1874.—The object of this Society is to aid in "the evangelization of the world, and especially the island of Haiti." It is auxiliary to the Missionary Board of the Church, and is centred in Philadelphia, where the officers hold a quarterly meeting.

The Society enrolls 200 auxiliaries. Annual income is about \$1,000.

The general work is managed by the missionary secretary of the church, and the funds are chiefly expended on the salaries of missionaries.

**Woman's Boards of the Presbyterian Church (North).**—Woman's Foreign Missionary Society; organized 1870; 1334 Chestnut Street, Philadelphia, Pa. Woman's Board of Missions of the Northwest; organized 1870; Room 48, McCormick Block, Chicago, Ill. Women's Board of Foreign Missions; organized 1870; 53 Fifth Avenue, New York City, N. Y. Woman's Foreign Missionary Society, Northern New York; organized 1871; 232 State Street, Albany, N. Y. Woman's Board of Missions of the Southwest; organized 1877; 1107 Olive Street, St. Louis, Mo. The Occidental Board; organized 1872; 933 Sacramento Street, San Francisco, Cal. Woman's Board of the North Pacific; organized 1888; headquarters, Portland, Ore.

The last of these Boards is constituted for both home and foreign missions, and its territory is Oregon, Idaho, and Puget Sound. Its third contribution sent to the Mission House for the Board of Foreign Missions was in 1889-90, and amounted to \$944.92. In the general statements following, this Board only, of the seven named, is not included.

All of these Boards and Societies originated in the enlarged life of the Presbyterian Church after the reunion in 1870. They bear a uniform relation towards the Assembly's Board of Foreign Missions, and though they are "sometimes more aggressive in their enterprise than the Assembly's Board, the first instance is yet to be known in which its decisions have not been cheerfully acceded to. Names and testimonials of missionaries are presented, but no appointment is ever made, no salary is fixed, no field assigned, no apportionment of work adopted, except by the central Board in New York, and this uniform policy is cheerfully acquiesced in."

So the president of one of these Boards, referring to the same relation, has said: "Recognition, co-operation, and courtesy from our 'fathers and brethren' we do indeed desire, and we can truly say 'we have all and abound.' The deliverances of every General Assembly in regard to our work have been uniformly

favorable and eulogistic. . . . Our loyalty to the Assembly's Board is unquestioned."

The constituency of these Boards in 1891 is not less than 5,500 auxiliaries and bands. Their united contributions sent to the Mission House in 1889-90 were \$280,285.51, besides many special disbursements.

While independent of one another in their home management, these societies unite in the publication of two monthly magazines, both illustrated, and both fully self-supporting.

"Woman's Work for Woman" is a 32-page magazine published from the Mission House at 53 Fifth Avenue, New York, at 60 cents per year. It has a subscription list of 16,000 to 17,000. It publishes the receipts of every auxiliary and band of these Boards, reports their annual meetings, serves as a means of communication between their several headquarters and the auxiliaries, and, especially, keeps the thread of history of the women missionaries of the church and their varied work abroad.

"Children's Work for Children" is a 20-page paper published at 1334 Chestnut Street, Philadelphia, at 35 cents single copies, or 25 cents club rates.

Each of the larger boards publishes thousands of copies of leaflets annually.

Abroad these societies are represented at the opening of 1891 by 305 missionary ladies in active service, besides many missionary wives who co-operate with them as they are able. Of these missionaries eleven are physicians.

The missions are among North American Indians; in Mexico and Guatemala; in Brazil, Colombia, and Chili; in West Africa; in Syria, Persia, India (three missions), Siam and Laos, China (three missions), Japan, and Korea.

I. THE PHILADELPHIA SOCIETY.—At a meeting called in Calvary Church, Philadelphia, May, 1870, a committee was appointed to draft a constitution and submit it to the Assembly's Board of Foreign Missions. This having been duly presented and accepted, "The Woman's Foreign Missionary Society" was formally organized in October of the same year. The president then chosen retained her position until 1890. The aim was to send out and sustain women in the foreign mission field, and support the work which they might be able to develop. At the end of six months the Society enrolled 48 auxiliaries and 30 mission bands, had raised \$6,870.35, and assumed the care of 14 missionaries.

The income for 1871 was \$10,000; for 1889-90, "twentieth year," \$141,487.88.

The home force in 1890 was: Presbyterial societies, 48; auxiliaries, 1,233; bands, 1,190; total membership (about) 65,000.

Abroad: Missionaries, 141 (of whom 2 are physicians); on furlough, 18; missionaries added during the year, 10; missionaries transferred, 2; missionaries self-supporting, 5; native assistants, 82; missionary teachers, 10; boarding-schools, whole or in part, 33; day schools, 153.

Seven young women are studying medicine preparatory for service under this Society.

The territory covered by this Society is Pennsylvania, New Jersey, Delaware, Maryland, District of Columbia, West Virginia, Tennessee, and all of Ohio except four presbyteries.

II. THE BOARD OF THE NORTHWEST.—This was organized in Chicago by a few ladies, who,

for reasons of expediency alone, withdrew from their Congregational sisters, with whom they were happily associated in labor. At the end of five months the report stood: Auxiliaries, 50; life-members, 24; paid to the treasury, \$2,545.85; missionaries adopted, 7.

The home force in 1890 was: Synodical societies, 10; presbyterial societies, 66; auxiliaries, including young people's societies and bands: 1661. Income for 1889-90, \$80,643.93.

Abroad: Missionaries, 69, of whom 6 are physicians; hospitals, 4.

"El Faro," an illustrated Christian newspaper in Mexico, is supported.

The name of this Board indicates the territory which it covers. Its eastern boundary is in Ohio.

III. THE NEW YORK BOARD.—This was organized in New York City, under the name of "Ladies' Board of Missions of the Presbyterian Church." Its beginnings were fostered by aid and encouragement from secretaries of the Assembly's Boards of Home and Foreign Missions, to both of which it was at first auxiliary.

At the end of the first year it had 22 auxiliaries in New York City, and 25 in other places; its contributions had amounted to \$1,164; and it had assumed the care of eight missionaries, six of whom were abroad.

In 1883 the devoted and honored president, Mrs. Jas. Lorimer Graham, died. To her more than any other was owing the success of the thirteen years previous, and advantageous changes which she had already contemplated were carried into effect that same year. The Home Missions Department was, as a measure of expediency, transferred to the Woman's Synodical Committee of Home Missions, and the original name was changed to Women's Board of Foreign Missions.

Contributions to the Central Treasury, aside from independent disbursements, stood as follows, in the years specified: 1875, \$9,907.74; 1880, tenth year, \$19,099; 1890, twentieth year, \$58,305.27.

The home force in 1890 was: Auxiliaries, 504; young people's societies, 121; bands and contributing Sunday-schools, 358.

The force abroad is represented by 55 missionaries, of whom one is a physician.

Of 100 foreign missionaries who have been for a longer or shorter time connected with this Board, one of the first year, another of the second, and three others of the third year are still in active service. The first treasurer is still gratuitously serving, but the Board was deeply bereaved in 1887 by the death of the second president, Mrs. O. P. Hubbard.

The Board occupies the most of New York State and Kentucky, and has certain societies in New Jersey and in New England.

IV. THE BOARD OF NORTHERN NEW YORK.—This covers four presbyteries in the north-eastern part of New York State, viz., Albany, Champlain, Columbia, and Troy. Its contributions to the central treasury were as follows, for the years specified: 1872, \$1,180.00; 1875, \$4,750.00; 1880, \$5,740.35.

The home force in 1890 was: Auxiliaries, 96; bands, 100; income for the year, \$9,692.35.

Abroad: Missionaries, 4; native pastors, 5; other native assistants, 21; schools and scholarships, 64; besides miscellaneous work.

V. THE BOARD OF THE SOUTHWEST.—This is constituted for both home and foreign missions,

and its name denotes the part of the country from which it draws its constituency.

The home force in 1890 was: Auxiliaries, 191; bands, 123. Total membership, 5,461.

They report out of 15,000 Presbyterian Church women in the State of Kansas only 3,016 in their auxiliaries. Receipts for the foreign fund for 1889-90 were \$7,102.00. Missionaries, 12 in the foreign field and 12 in the home field.

The event of the year is raising \$1,000 for a medical scholarship fund, by which to aid young women to a medical training for the foreign field.

**VI. THE OCCIDENTAL BOARD.**—This was organized in connection with the Philadelphia society, and maintained the relation until 1889, when they separated in the belief that greater efficiency would result.

The Board has 65 auxiliaries and 70 bands, all within 6 presbyteries. The income for 1889-90 was \$9,555.73, an advance of nearly \$3,000 upon the year before. An important charge of this Board is a Mission for the Chinese in San Francisco. It includes four departments—a school; a Mission Home at 933 Sacramento Street; the families of girls who have married from the Home—61 in number; and house-to-house visitation, which has been carried on by the same efficient lady for ten years. The Board is represented abroad by 6 missionaries.

**Work abroad.**—All these Boards and Societies move side by side upon the mission field, and share each new enterprise. They have together built and are running a schooner in West Africa; they have kindergartens at Canton (China), Kanazawa (Japan), São Paulo (Brazil), and other points; they have orphanages at Futtehghurh, Hoshiyapore, and Saharanpur (India), and Seoul (Korea); they meet all the expenses connected with their work at home, and pay unappropriated into the treasury of the Assembly's Board five per cent of their receipts, for contingent expenses connected with their special departments. Societies in one Western State contributed \$1,000 in 1889 to prevent retrenchment in schools. Several individual ladies support a substitute upon mission ground. The largest legacy ever given to Presbyterian foreign missions was given by a lady, and the total contributions of these societies since the beginning (outside of legacies) have been about four million dollars. Their heaviest responsibilities, however, have not yet been named. They are in the usual departments of woman's work—educational, evangelistic, medical.

**Medical Department.**—China.—Six of the eleven physicians representing the societies are in China, where are also three hospitals for women and children. One of the latter is the Mateer Memorial at Wei Hien, in Shantung, where two ladies have lately taken charge. Another is the Douw Pavilion in Peking, built by one lady; a physician and trained nurse have been in charge here since 1887. The third is a woman's ward in the large Mission Hospital at Canton. Dr. Mary Niles has had charge for about eight years, and has also shared with Dr. Mary H. Fulton the care of several dispensaries. The latter lady has repeatedly tried with her medicine case to open the door for her brother (an ordained missionary) into the unoccupied province of Kwong Sai. They were mobbed out in 1886, but have persevered, and are likely to be rewarded with success.

**Persia.**—At Teheran there is an annex for

women in connection with the Mission Hospital, and a physician went out in the fall of 1889 to assume charge. The Howard Annex for Women, also a lady's gift, has been added to the hospital at Oroomiah. In Tabriz another physician is crowded with dispensary and house visits, aiding surgeons in operations, studying Turkish, and teaching boys to compound drugs.

**India.**—Dr. Jessica Carleton, unassisted, has a dispensary in the heart of Ambala City in the Punjab, and is medically caring for a leper hospital as well. At Allahabad the dispensary used for 18 years has been replaced by a new building. The physician is ably aided by assistants.

**Korea.**—In Seoul the lady physician has won goodwill for the mission through her attendance upon the queen, and has practised in country tours.

In several cases societies contribute towards the running expenses of general mission hospitals—as the Westminster at Oroomiah.

There is also a graduated physician among the missionary ladies in Japan, but the jealousy of Japanese doctors has prevented her kind services even among the poor. There are in all the missionary fields other ladies, whose natural gifts and experience make them, though without medical training, useful in administering simple remedies. To one such, in a country-place near Peking, the people knocked their heads on the ground, offering worship as before their idols. Another in Vaga, near Lahore, treated 5,000 cases during ten months of the year 1889.

**Evangelistic Department.**—Bible-women. All missionary ladies living in large cities have opportunity to conduct meetings, teach Sunday-school classes, visit and receive the people in connection with the mission churches. Some of them in addition superintend Bible-women, who are supported from America by salaries of from \$36 annually in Canton to \$50 or \$60 in cities of India. Bible-work is specially developed in Yokohama and Tokyo, where Christian Japanese women presented a Bible to the empress last year; in Petchaburi, Siam; in West Africa; in Central China, especially at Ningpo; at Canton, where are employed twenty Bible-women; but most of all in India.

The memory of one Bible-woman in the Gaboon Mission, Africa, will long be cherished. She could not read, but had a store of Bible-knowledge which she imparted in a quaint and impressive way. She could not write, so she kept a string in which she put knots to indicate the number of meetings held. She died in 1885 "without a stain upon her character."

Mrs. Wilder, a veteran missionary in South India, gives herself to house-to-house visiting, colporteur work, preaching among women, and establishing week-day and Sunday schools. During eight months of 1889 she paid fifty-two visits to villages about Kolhapur City.

About forty Bible-women are employed in the missions in North India.

**Zenana Visiting.**—A young missionary fell heir to 80 zenanas at her entrance upon service at Futtehghurh a few years ago. It was well she was a missionary child, with an Indian tongue already acquired. One of the evangelists of the Furrukhabad Mission, Miss Belz, has been in service 17 years. "In eleven months," said her last report, "I have paid 309 visits to villages, been in 106 zenanas, superintended

zenana schools in towns and villages, attended 13 *mīlas*, and 107 days I devoted to work in the city of Etawah.

In North India there are four strictly "zenana visitors," and many ladies who give more or less time to such work in Lahore, Mainpuri, Furrukhabad, Lodiana, Jhansi, Dehra, and other cities. At Vaga, near Lahore, Miss Thiede, who has given 17 years to India, does itinerant work chiefly among a great group of surrounding villages. The Lodiana Mission lately called for 15 women to devote themselves to evangelistic work alone.

Itinerating is a form of labor in which many wives engage with their husbands, and many teachers devote a part of their vacations in this way.

Miss Cort, who has been 15 years in Petchaburi, is the only lady in the Siam Mission sent expressly for evangelistic work. She oversees 12 day-schools, builds school-houses, directs Bible-women, makes systematic country trips, keeps Sunday-school and temperance and missionary societies going, and is ready to hold a meeting with women any time and anywhere.

In Japan, while over 20 ladies are devoting themselves to schools, none are appointed particularly to the department under consideration, but here and there one has made some time for it. At Takata, 250 miles from Tokyo, a school for girls, two large Sunday-schools, and other means have been used to open the city to the gospel, and it has been done by lady teachers of Tokyo, who have exiled themselves for months together from sight of a European face, for the sake of what they could do in Takata.

In Africa several ladies give their entire time to such labors, and boat journeys and visits to the river towns are a prominent feature in their reports.

One lady at Tabriz, Persia, one at Oroomiah, a third at Salmas (having 30 villages), each give their attention to superintending schools, to visits among out-stations, or to classes of women and children.

In South China but few ladies have taken tours into the provinces. The largest share of itinerant work in China is done in Shantung. A number of ladies living in Chefoo, Che-nan-foo, Tungchow, and Wei Hien have devoted a great deal of time and strength in touring with their husbands. One of the number spent the first three months of 1889 in unremitting labor among the heartrending scenes of the famine district. She and her husband alone administered relief to 6,000 persons on their regular list, besides special cases. Other ladies shared the same work for a shorter period. The large number of Chinese women who are members of the country churches of this mission have generally heard the glad tidings from the lips of missionary ladies.

*Schools.*—The societies maintain scholarships in a large number of boys' schools; build some school-houses for them; pay the salaries of many teachers in their day-schools; and a few missionary ladies teach only boys and young men, as Miss McBeth, who trains a theological class of Nez Percés in Idaho.

But by far the largest item of expenditure in the Society's accounts is girls' schools. A hundred missionaries are devoting their lives to the boarding-school. In most cases it is carried on by two together; in some instances several teachers are required.

A background of time is necessary in order to mark the influence of an institution upon a whole people, and this condition is supplied in the history of the Oroomiah Seminary in Persia. Fidelity Fiske opened it in 1844 with six wild little girls. After sixteen years of labor, just before returning to America, 93 women sat down with her at the table of our Lord. Fifty years ago there was not a woman in Oroomiah who could read. When this mission celebrated its semi-centennial in July, 1885, an eye-witness said: "The attendance of nearly 800 Nestorian women, the most quiet and attentive part of the audience, was the most impressive feature of the occasion. In response to the request that the readers among the women should rise, fully three fourths of them rose to their feet." Contrast the "decorum" and "suitable modest dress of that multitude of women" with their appearance thirty years before, as described by one who lived among them: "If they [the missionary ladies] met the women in large companies they acted like unruly mobs or herds of Bashan, violent enough to frighten gentle ladies; and there was never one single thing attractive or lovely in these coarse women."

Of the first two untutored little girls whom Mar Yohanan led to Miss Fiske's knee with the words, "They are your daughters: no man shall take them out of your hand," one, now a woman of dignified presence and gifted pen, the wife of priest Oshana, was in that jubilee audience.

These Nestorian women, who have been educated in the seminary, hold large quarterly meetings in villages on Oroomiah Plain, when several hundred of them, with a chairman of their own and a literary and devotional programme before them, spend a day together in prayer and worship and discussion, with original essays and evangelistic plans. At such a meeting Oshana's wife gave reminiscences which another present reported for "Rays of Light" (a fortnightly publication to which Nestorian women often contribute), and which filled several columns, closing with the simple words, "These things said our sister Sarra."

Thirty-three boarding-schools for girls are maintained by the societies, in each case occupying property owned by them, and generally in buildings erected for the purpose.

Three of these schools are for Spanish-speaking girls—at Bogotá in Colombia, Mexico City, and Saltillo, Mexico. The latter took possession of a new building in 1890, and that at Mexico City was enlarged and re-dedicated in 1889, when it had forty house-pupils, all over twelve years of age.

A school for Portuguese-speaking girls at São Paulo, Brazil, is limited by its accommodation to thirty house-pupils, but "we could easily double the number." Writing in September, 1889, of the graduates, their teacher says: "Four have charge of departments, eight are assistant teachers, and several more are teaching evangelical schools in the country."

The pupils here recite in connection with large day-schools of both boys and girls under superintendence of a gentleman of the mission.

In Syria are three important boarding-schools for Arabic-speaking girls—at Beirut, Tripoli, and Sidon. In the first of these there are 75 in the upper department, two thirds of whom pay full tuition, or \$60 per year. In religion they are Greeks, Greek Catholics, Maronites, Mos-

lems, Armenians, Jews, Druzes, and Protestants.

At Tripoli, with but about 20 house-pupils there are 100 day-scholars. Income for tuition in 1888 was \$200. Six girls united with the church in May, 1889. Sidon school has nearly 50 boarders, and a good record of contributions and graduates at work.

In Persia, the oldest school is for Nestorians or Syriac-speaking girls, at Oroomiah. At Tabriz and Salmas they are chiefly Armenian-speaking. The children, as they come in their raw state to the latter and smaller of the schools, are described:

"Little girls would come without the remotest idea of sitting still: one minute they would be quiet, book in hand; the next they would be out in the yard or part way home. When we closed, all had learned to sit still and seldom even whispered. Advertising cards should have the credit of most of this, for the children would often cry if they had not been good enough to get a picture."

At Teheran six languages are spoken; the nationalities being represented by Armenians, Jewesses, Mohammedans, and Fire-worshippers. Early Sunday-morning prayer-meeting, woman's meeting at sunset on Saturday, and school-girls teaching in Sunday-school are prominent features here. Equally prominent is the industry cultivated. Besides all kinds of housework, to which the girls are trained, 900 articles of clothing or housekeeping outfit, including some 2,500 button holes, were all the product of their needles during two summer months of 1889.

At Hamadan the Faith Hubbard School, with 40 house-members, is swelled to more than 100 by day-scholars. The girls are Armenian, Jew, and Moslem, speaking chiefly the former tongue. Three learned the whole Gospel by Mark in 1889. The school is a centre of evangelistic influences. Conversions take place in all the Persia schools. More is done for Jews at Oroomiah and Hamadan than at any other stations in the Presbyterian Missions.

In India there is a flourishing school called Woodstock, near Landour, among the Himalayas. It is not for native girls, but for missionary children, American or European, and for Eurasians. The school supports current expenses, aside from missionary salaries. Five American ladies are teachers, and the standard is high. The language is English. At Dehra and Allahabad are large schools, and at Kolhapur, in the south, a smaller one, for native Christian girls. At the latter they speak Marathi; in the others, Hindustani. Eight native teachers assist the missionary in charge at Dehra. At the close of 1888 the teacher said: "During the last four and a half years we have put 24 girls into mission work. Some of them are married; all are doing well."

In the Siamese Peninsula there are two schools, conducted wholly in Siamese. At Bangkok the needle department brings in favor and money, and they have ceased to give clothes to pupils, and are trying to require tuition. In 1888 the girls contributed about \$76 for benevolent purposes.

At Petchaburi the girls grind the rice in the mill, and the governor sends his daughters. At Chiang Mai, in the Laos, both Siamese and Laos are spoken. They have about 50 house-pupils, and the year 1889 was marked by a de-

lightful work of grace, 18 joining the church during one term.

In China the principal schools are at Canton, Ningpo, Shanghai, Nanking, Chefoo, Tungchow, Wei Hien, and Peking. There is general difficulty with bound feet, and some children are sent home, as from Shanghai, because they will not consent to unbind them. The children in these schools commit to memory with facility, and get a store of chapters and hymns. At Nanking a class of eight little girls lately could each recite 2,000 verses of Scripture. Many of the pupils have become Christians.

At Ningpo, eight united with the church in 1888-89, four at Shanghai, and eight at Nanking. There are four departments at Canton: woman's training-school, upper class of girls, primary grade, and kindergarten—about 125 pupils in all, of whom 23 united with the church in 1889. Thirty day-schools cluster about this institution.

In Japan the schools are at Tokyo, Osaka, Kanazawa, and Sapporo. At the last-named, one lady alone has kept her school, and taught besides in a government school for young men. In 1889 she saw 13 of her girls confess Christ. From Kanazawa "all the boarding-scholars went home Christians" in 1889. At Osaka 15 were baptized the same year, making 43 in the seven years' history of the school. It asks for no scholarships, and pays current expenses outside the salaries of two American and two Japanese teachers. Two schools in Tokyo were consolidated in 1890, and erected several new buildings. More than 500 children in two day-schools under Japanese control (at Yokohama and Tokyo) are under the instruction and influence of the missionaries.

There is a school for girls also in the capital of Korea, and several schools among the North American Indians.

Except in Korea, where missions are yet new, and in Japan, where the common-schools are under control of government, all the missions of these societies embrace day-schools. There are many in India and China, but the number is proportionally greatest in Syria and Western Persia, each of which has more than 100. The cost of maintaining one in Syria is from \$100 to \$200 annually, and in the village schools of Persia a scholarship runs from \$10 to \$32. In those cases where they are supported by the Woman's Boards, these sums are raised, not necessarily by apportioning an entire school to an auxiliary, but the salary of a teacher will be assigned to one, the rent of school-room to another, a pupil's tuition to a third, so as to bring a share of the good work within the reach of even weak societies and bands of young children. These missions have now so many branches, and the business of subdividing the expense of each into shares and assigning them to societies has become so taxing, that a special secretary has been appointed at the Mission House in New York to have it in charge. The sum which the Assembly's Board asks of these societies, and which they aim to raise in 1890-91, is \$310,000.

**The Woman's Board of Foreign Missions of the Reformed (Dutch) Church in America** was organized in New York City in 1875. Its business is conducted by thirty managers elected annually, and from them the officers and executive committee are taken. The president first elected still holds the position.

At the end of three years the Board had 52 auxiliaries, and had raised over \$10,000.

At the end of seven years there were 129 auxiliaries, and in that year alone receipts were \$10,000. In 1889 there were 263 auxiliaries. Contributions amounted in 1890 to \$27,932.37. The "Mission Gleaner" is self-supporting, a bi-monthly of sixteen pages, published at 25 cents per year, from headquarters, 26 Reade Street, New York.

Abroad.—There are 35 missionaries, of whom 12 are unmarried. They are in Japan; at Amoy, China; and in the Madras presidency, India.

The oldest and most distinguished institution of the Board is Ferris Seminary for Girls, at Yokohama, Japan. The principal here, one of the gentlemen of the mission, is assisted by his wife and several young lady teachers. In 1889 there were 134 house-pupils, of whom 47 were baptized Christians, and half as many more waited their parents' consent to be baptized. In June the same year an enlargement of the building was dedicated. It is called Van Schaick Hall, and includes chapel, reception-room, dining-room, class rooms, and general accommodation for 120 pupils. The Japanese subscribed \$1,200 towards the cost of this hall, \$750 of it having been obtained through the indefatigable efforts of the Japanese matron of the school.

It is the endeavor to make Ferris Seminary, as far as possible, self-supporting, and a fee of \$3.50 per month covers the Japanese part of the expense.

The girls have sewing-classes, the older ones making their own and their little sisters' clothing, and the younger ones darning beautifully.

The first graduate of the school became one of its valued teachers, until her recent marriage to a gentleman of Tokyo, who has long been interested in the higher education of his country-women.

At Nagasaki is a new boarding-school, Sturges Seminary. Of 20 house-pupils in 1889, 14 were Christian workers. All the pupils study Japanese and Chinese, and receive regular instruction in cooking and sewing.

At Morioka, Japan, one of the ladies, assisted by a young Japanese, edits a monthly paper, "Glad Tidings," which requires an edition of 3,000 copies.

At Amoy, China, is a boarding-school for girls connected with Christian families. The average annual expense for a pupil, outside salaries of American teachers, is brought within \$15. The girls are all taught needlework and cooking.

The Charlotte Duryea Bible School for Women, also in Amoy, has twenty-four women in attendance; and both Amoy schools are in care of two ladies, who by relieving each other are able to also teach patients in the hospital, itinerate among country churches, and supervise several Bible-women.

A monthly newspaper, the "Church Messenger," is edited in the Romanized colloquial by a lady of the mission, and has a circulation of about 700, at a cost of a cent per copy.

The nine missionaries of the Arcot Mission in India are at six different stations; eight of the ladies are named Scudder. Girls' boarding-schools are at Vellore and Madanapalle, at each of which five pupils united with the church in 1889. There are 9 high-caste girls' schools in the India Mission, and the numbers of pupils

are generally large, as at Vellore, 119; at Chittoor, 120. Parents who pay to send their boys to school in this district will object to pay for their girls. "It is only with a great amount of persuasion that we can get them to give even as much as ten or fifteen cents a month for the education of their girls." There are 97 village schools in the mission. A late report mentions a Bible-reader at Chittoor, who explained the Scriptures to over 1,600 of her sisters in the year. Zenana visiting is done at different stations. The Board employs about fifty native assistants. The societies have been recently raising funds to assist a mission hospital at Sio-khe, sixty miles from Amoy.

*The Woman's Board of Foreign Missions of the Cumberland Presbyterian Church* was not organized until 1880, but already the complaint is made that the church as a whole is far behind the women of the church in zeal and offerings. In 1889 from twenty-nine presbyteries more money was sent to the Woman's Board of Foreign Missions than to the Church Board of Missions—both home and foreign. Those who have taken pains to find out these facts publish them in no spirit of rebuke to the societies, for they say at the same time: "Not that the women did too much, but the church did not do enough."

The home force in 1890 was: Auxiliaries 793, membership 9,770; young ladies' societies 8, membership 130; children's bands 138; membership 1,741.

Their contributions for the year amounted to \$9,117.35.

Headquarters are at Evansville, Indiana, and work of the Board is represented in a department of "The Missionary Record," published monthly at St. Louis. They also print a child's paper, "The Missionary Banner."

Abroad.—The Board has eight missionaries in Japan, located at Osaka, Nagoya, Shingu, and other places.

The Wilmena Girls' School at Osaka was opened in 1885; the building was destroyed by fire in 1888, but immediately replaced by a better. The boarding-pupils reported in 1889 were 22, of whom 10 were supported by foreign funds.

Nagoya was opened to the mission through one of the ladies who is teaching Bible and industrial classes there. Another lady itinerates between the stations, and was at Wakayama when the flood wrecked the church there in the summer of 1889. Two sisters joined the mission at the opening of 1890.

The Board has contributed to the Mexico Mission at different times, and recently appropriated \$1,500 to that field, and is now asked by the mission to assume charge of a school at San Pedro. It also has Hogan Institute in Indian Territory. The pupils are whites and half-breeds.

*The Woman's General Missionary Society of the United Presbyterian Church* was organized in 1883, and the same year attained to 335 congregational societies, some of which had already been in existence for fifty years.

In 1889 their home force stood: Presbyterial societies, 45; congregational societies, 737; membership, 18,687. The Society is constituted for both home and foreign missions. The contributions to the latter were as follows for the years named: 1883, \$7,546; 1885, \$10,177; 1888, \$15,619; 1889, \$16,704.

"The Women's Missionary Magazine" is published monthly at Xenia, Ohio. Price, 60c.

Abroad there are twenty missionaries, all single ladies, besides co-operating missionary wives. The missions of this church are in Egypt, and in Sialkot, India, and the missionaries are all located among five stations in each mission.

The recent event in India is the establishment of a Memorial Hospital at Sialkot, for which the societies raised \$5,000 in 1888. The institution is in charge of Dr. Maria White, who during her first three years in India treated 12,000 patients at her dispensary and paid more than 900 visits to houses, and dispensed medicine in thirty different villages. "These poor, suffering ones," she says, "constantly ply me with questions: 'What did you come to India for?' 'Who sent you?' Then I tell them of the love of Christ, who can see how they suffer, and that He has commanded us to come and help them. This answer almost always brings forth the remark: 'Your God must be a very kind, good God to send a doctor to the women; none of our gods ever sent us a doctor. Tell us more about your God.' And so the way before us opens up, and we try to make them feel that it is God alone who makes the medicine give them relief."

The societies are asked to raise \$600 annually for current expenses of the hospital. There is a girls' boarding-school of about 50 at Sialkot, of whom less than a dozen are supported by their friends. The rest depend on scholarships provided in America at \$25 apiece. There is room for zenana work and itinerating in this mission. At Jhelum a Bible-woman has 100 houses, and "plenty to do. We have to coax them to make them hear us. It is all by hard persuasion."

The ladies of the mission have entreated the Society to send them three missionaries at once as an absolute necessity. The mission has been lately affected by the approaches of Roman Catholics upon their fold.

The missionaries in Egypt are located at four stations, and there are excellent boarding-schools in their care at Assiout, Cairo, and Alexandria. In the latter are many Jewesses, and the pupils are praised for their pronunciation of Arabic. At a prize-giving both Mohammedans and Copts will lend their presence. In accordance with the principles of the mission, the girls of these schools "are not only daily taught a Bible lesson, but to use the needle in both plain sewing and fancy-work, to cut and make clothes of all kinds used by their people, to wash and iron, scrub and cook, make beds and clean house. In fact, it is the purpose of the ladies in charge to teach them home work and economy." It is also the purpose to train teachers and zenana visitors.

Women's missionary societies among the Christians in Cairo and Assiout have taught the people to give for the Lord's work. In 1888 four such societies had an aggregate membership of 217, and had contributed the previous year \$165 for missions. Of one Society, that at Boulak, in Cairo, the missionary wrote: "We have many young children who contribute two and a half cents per month. Some of them earn money by sale of fancy-work, or by money saved from the amount allowed them for luncheon. One of our contributors was a slave-woman, but has obtained her freedom. She takes in sewing in addition to daily labor as a

servant, and contributes five cents per month."

The schools between Alexandria and the first cataract of the Nile number about 70, and include from 5,000 to 6,000 pupils. More than 50 of these schools are entirely supported by the Coptic people. The ladies of the mission long for additions to their force in order to permit the more experienced of them to itinerate among villages of the Nile valley. They repeat the inquiry of one woman: "Is it God's will that we must live on year after year, and no one to preach to us or show us how to live?" The missionary asked intelligent women in Upper Egypt if they went to hear the helper preach, to which they replied, "The meetings are held in a room where there is no place for us. On Sabbaths we go and sit on the roof of an adjoining house, from which we can hear the preaching."

The name of Mrs. Sarah B. Lansing, who lately went to her reward, has been for thirty years inseparably associated with the good work of this mission.

**Woman's Work of the Presbyterian Church (South).**—There is no Woman's Board of Missions in this church, but congregational societies directly auxiliary to the Foreign Missions Committee of General Assembly have been quietly forming for fifteen years. There were 537 such societies in 1889, being 78 more than contributed the year before. Two presbyterial societies have also been organized. In 1888 there were reported 150 children's societies, whose contributions aggregated \$5,179.41.

The General Assembly of 1889 recommended the formation of foreign missionary societies in all the churches, although an overture was presented from one presbytery offering arguments against their formation, and deprecating "ladies' presbyterial unions." The Executive Committee of Foreign Missions informally approves the societies, and the women of the church are further heartened to go forward by the outspoken confidence of the secretaries. "For our part," says the organ of the church, "The Missionary," "we think the ladies deserve all encouragement. Let a society be organized in every church; let the representatives of these societies come together in presbyterial unions to devise means by which the life and enterprise of the societies may be best maintained. We are not afraid the ladies will do too much."

The contributions of the auxiliaries were, from January, 1890, to January, 1891, \$30,567.61.

There are about 1,800 churches in which no auxiliary as yet exists.

Abroad the missionary ladies number 39, of whom about half are unmarried. They are in Mexico, Brazil, China, Japan, Greece, and Italy. The Brazil Mission was afflicted in 1889 with the yellow-fever pestilence, especially at Campinas, the largest of the six stations. Schools and evangelistic work were much interrupted, the health of several ladies suffered so as to compel a furlough, and, for the first time in 18 years, death visited the station, taking a little child and a gifted ordained young man, "the flower of the mission." Ten missionaries in China are in four cities of a chain of stations on the Grand Canal, of which Hangchow is the southern terminus. It is also the oldest station, having been opened in 1867. There is a boarding-school here of about fifty

girls, besides day-schools, in charge of one lady. Another itinerates in many villages and towns outlying, walking to some of them and going by boat to others. She directs Bible-women, also visits in the city, and dispenses medicine. By the last means she has won admission to many homes otherwise closed against her. "She has been encouraged in finding that the truth taught to a class of fifty girls some eight or ten years ago has not been entirely forgotten. She has come across them in different parts of the city, in the suburbs and villages, and finds that many of them still know the Ten Commandments, can tell the miracles and parables of Christ, and above all they remember that "there is none other Name under heaven given among men whereby we must be saved." One of these fifty girls within the last year made hopeful profession of faith in Christ, and died trusting in Him as her only Saviour."

In the temporary absence of this missionary in America, another, borrowed from Soochow to fill her place, writes urgently for physicians, "both men and women," for this field.

At Soochow the central feature of woman's work is the Woman's Home, which was occupied by missionaries at the close of 1888. On the same lot with the Home is a chapel, reception-room, and school-room for use of Chinese women.

Miss Safford, who had been connected with this station for seventeen years, died in 1890. She spent the greater part of the last two years of her life in revising and superintending the printing of her series of Chinese books. She also added two new works to the series, viz., "Talks about Anatomy and Physiology," and a "Primer of Physiology," translated from the Mandarin. These raise the number of volumes in the series to ten. They are popular books, not only in the schools of this mission, but in other missions, and have been requested for publication in several dialects.

In the midst of the riot which occurred in 1889 at Chinkiang, 120 miles above Soochow, while property of other missions was destroyed, that of this mission was left undisturbed, owing in part to its location.

The newest station is Tsing-kiang-fu, 140 miles north of Chinkiang. The wife of a missionary here received 700 visits from Chinese women during the year, to all of whom she told something of the Saviour before they left. It is hoped to have a Woman's Home here, and through it open a channel of influence to the crowds of burdened women.

There are but two stations occupied in Japan, Nagoya and Kochi, in both of which there is teaching done in day-schools and in classes of women.

One lady has long aided her husband in Salonica, in Macedonia, a city of 130,000, where the only evangelical preaching for the Greeks is in the little mission chapel.

Another lady has taught a school in Milan, Italy, for twenty years, under the auspices of this church committee.

Information about these missions is to be obtained from the headquarters at Nashville, Tenn., and through the pages of "The Missionary," which devotes a department to woman's work.

**Woman's Baptist Foreign Missionary Society (North).**—Woman's Foreign Missionary Society; organized 1871; Tremont

Temple, Boston, Mass. Woman's Foreign Missionary Society of the West; organized 1871; 122 Wabash Avenue, Chicago, Ill. Woman's Foreign Missionary Society of California; organized 1875. Woman's Foreign Missionary Society of Oregon; organized 1888.

The appeals contained in letters written in 1869 and 1870 by a missionary wife in Bassein, Burma, led directly to the organization of the first of these societies. These letters pictured the missionary and his wife sinking under their burdens; the sacrifices of Karen Christians to provide school facilities; the large number of girls at Bassein, and the tempting opportunities to teach the women. The writer begged for unmarried women, of whom there were only four in the Burma Missions; and "I am not sure," she wrote, "that you have not a work to do in forming women's societies, auxiliary to the Missionary Union. I believe that is the true course."

A few ladies in Newton Centre, Mass., acted upon this suggestion and called a general meeting of Baptist women in Boston, April, 1871. Two hundred responded, and accepted the constitution which was presented; and in the following December their first missionary was on her way to Burma. At the end of the first year they had: Missionaries, 6; auxiliaries, 141; receipts, \$9,172.63. Fifth year: Missionaries, 18; schools, 20; auxiliaries, 750; mission bands, 80; receipts, \$33,260.69. Tenth year: Missionaries, 40; Bible-women, 47; schools, 78; receipts, \$50,010.91. Report for 1889, the eighteenth year: Income, \$70,666.83; circles or contributing churches from ten States and the District of Columbia, 1,377; children's bands, 644. Total membership about 42,000.

Abroad: Missionaries, 51, of whom 2 are physicians; Bible women, 56; schools, 154; pupils, 5,212.

THE SOCIETY OF THE WEST was organized in Chicago only one month later than that in Boston, and they too had a missionary for Burma the next December. This lady met the committee the very day of the great Chicago fire, and her outfit was burned up at the depot. The Society at the East immediately provided for the loss, and the lady went her way with joy. Receipts for the first year were \$4,244.69; auxiliaries, 131. Fourth year, receipts reported were \$11,105.

Record for 1889.—Home force: Circles, 1,321; young people's guilds, 209; bands, 294; total, 1,824; receipts, \$33,722.09.

Abroad: Five new missionaries during the year, making in all 30, of whom 2 are physicians; Bible-women, 43; and 1,500 pupils in schools.

Both the Eastern and Western Societies aid in supporting a Home for Missionary Children at Newton, Mass. "The Helping Hand" is the organ of these two societies. It is published monthly in Boston. Price, 35 cents. "The King's Messengers" is a children's paper, at 25 cents.

THE SOCIETY OF CALIFORNIA was organized in San Francisco, and receipts for the first ten months were nearly \$300.

In 1889 they sent contributions to the treasury of the Union amounting to \$1,012.20. They maintain three missionaries.

THE SOCIETY IN OREGON sent to the central treasury in 1889 \$1,599.83, and is represented by one missionary.

Total number of missionaries under care of

all these societies is eighty-five. The following facts regarding the missions are given without reference to the separate societies, as their work is all part and parcel of one whole.

The missionaries are located in the fields of the A. B. M. U.: in Burma, Assam, South-east India, Siam, China, Japan, and Africa. The six missions in Burma are conducted in six languages, and 90 per cent of the missionary force are women.

Of the schools, 26 are for the Burmans. One of the largest is a girls' boarding-school at Rangoon with 160\* pupils, of whom their teacher says that though all do not become witnessing Christians, they lose faith in idols after a year in school. They are not baptized without their parents' consent, but baptisms take place from time to time.

At Moulmein is a similar school of 110 girls: "No free pupils admitted; all furnish their own books and clothes." There are also an Eurasian and a Karen school, for girls, in each of these cities.

In a day-school at Myingyan, "the boys, besides buying their books, pay one rupee per month tuition; girls, eight annas."

Mandalay has recently passed through great trials, in the death of a missionary at the head of her prosperous school and the destruction of property by fire.

The largest of the Karen schools is at Bassein, where nearly 400 pupils were in the midst of a prosperous term (in 1888-89) when an epidemic scattered them to their homes. Of 72 house-pupils most are professing Christians. One of the teachers here has been 22 years in the service. The teacher at Maubin says: "In accordance with our custom, all boarders have regularly devoted two hours daily to manual labor. The girls, besides doing the necessary work about the house, have woven many yards of cloth. The boys have completed a new fence, and rendered assistance in the erection of their new dormitory."

The missionary lady at Toungoo reports: "We have one Red Karen village on the plains near town, which is composed almost entirely of heathen families that have come down from Karencé to avoid persecution for witchcraft, and to be allowed to worship the true God. We have a large school in this village, and my husband reports the Sunday-school wide-awake, and very much interested. In the day-school grown men and women sit beside the little tots, all learning their letters together."

Among the Karens "jungle schools" are much heard of. Their teachers have been trained in the boarding-schools. Some of the missionaries alternate teaching school with jungle trips, when their work presents all the evangelistic elements known in other lands. One of these ladies is mentioned in the last report, who spent a vacation of two months in this way, visiting fifteen villages, and her helpers nine or ten others. "In most places we were well received, and had interesting meetings every evening when the people were at leisure to attend, sometimes the crowd remaining late after the regular meeting to hear the singing and glad tidings. Many of these Karens said they never heard God's Word before, never saw a white woman, nor even a Christian Karen be-

fore. Some begged me to come again so they could learn more, and be able to enter this religion, which seemed so good."

It is said of the Bghai Karen pupils in the schools, that 85 per cent have been converted. At Henzada is a Karen school of 165 pupils, where 15 girls kept their pledge to abstain from smoking. In a village sixteen miles out, the first day-school was opened in 1889, and the young Karen woman teaching it was paid a monthly salary of seven rupees (\$2.50) by the Henzada Karen Woman's Missionary Society. "This devoted, young woman has done such good work, that the children and young people are urging their parents not to work on Sunday, and not to observe heathen practices, but to become Christians."

There are also schools for Shans and Ch'ins, and at Bhamo, the most northern station of Upper Burma, a neat little bamboo school-house, and a school for Kach'ins, where they teach English and sewing, and read Burmese books, as there are none in Kach'in.

Two ladies in Burma have been correcting proof—the one of the revised Burmese Bible, the other of the recent Shan translation.

Among the Telugus in India is one of the largest and best known missions of the Baptist Church, and many missionaries' wives are very active; but at the opening of 1890 the force of unmarried ladies was reduced to five. One of these, a physician at Ramapatam, reports more evangelistic than medical work.

At Neilore one lady superintends several schools and translates hymns into Telugu for the children; another directs an industrial work, which brought in (last report) 1,100 rupees for sewing, knitting, and crocheting. She has charge of six Bible-women. One of these she describes as an "earnest worker and fearless talker." "She forgets herself entirely, and the other women complain that when they are all out she often forgets the time, and they go without food till very late. The preachers recognize the good the women do, and often ask for them." Bible-women are a feature at all the Telugu stations.

At Ongole are caste schools; at Madras, caste schools again, and zenana visitation; at Kurnool, 300 miles from Madras, in a population of 20,000, there is no mission work for women. A lady from Madras describes her first approaches to these women, who were shy, and ran away from her: "One evening it was to a dozen women, who were bringing home great loads of firewood, and sat down to rest by the roadside; . . . another evening we walked down a street, and talked to the people as they were weaving mats at their own doors. . . . Every Sunday since we have been here, from thirty to fifty have come in, most of them from a village nine miles distant, but quite a number as far as eighteen miles, and they walked. Two Sundays, twenty came from a place called Atmakur, forty miles away. Seven of these were women, two of whom carried infants in their arms. The Christians here, and even some who have not been baptized, every Sunday brought a quarter or half anna each. Some who had no money brought vegetables or grain."

Village schools swarm around Cumbum and Udayagiri, and at the latter place parents are more willing to send their girls to school than the boys—a singular exception to the rule in India.

\* These figures, and all those given by these societies, include day-scholars.

In Assam woman's work is emphasized at Nowgong, Gauhati, and Tura. In the girls' boarding-school at the latter place all but six out of thirty-seven Garo pupils were confessing Christians at the date of the last report. Nearly all are of the second generation of Christians. One lady here devotes herself to the normal school for young men.

At Gauhati the missionary reported a woman's meeting which she conducted in connection with the Association of Native Christians held in that city. "Fifty-eight were present. I called for reports of the mission circles organized last year, and all said they had enjoyed their prayer-meetings and given their pice, and all expressed a desire to continue the circles."

Very difficult touring is done in the Assam field.

In China the societies have a history chiefly at Swatow and Ningpo. Two young ladies were sent in 1889 to Kihwa-fu, 250 miles from Ningpo, where they use the Mandarin dialect.

A leading spirit for the last twenty years at Swatow has been Miss Adele M. Fielde, with her trained Bible-women, of whom fourteen are mentioned in the last report. They are not selected from those offering themselves, but are sought out and invited for their adaptation and Christian character, and then trained and superintended with remarkable thoroughness. The annual report of the Missionary Union for 1874 says: "Miss Fielde has a cottage for her own use, and a house for her Bible-women, which will contain good class-rooms and accommodations for thirty persons while they are studying here." These women are sent out two by two from 50 to 60 miles from Swatow, to the country stations, at each of which there are rooms provided for them in connection with the chapel. From the stations they go forth to pagan hamlets, of which there are always 20 or 30 within a few miles. Sometimes they stay several days in a village, lodging with a friendly heathen. "Once a year," says their instructor, "all the Bible-women return to the school-house in Swatow for about three months' continuous study of the Bible. Perpetual contact with heathenism benumbs their conscience, and they need the quickening influence of a new view of their Lord." These Bible-women receive \$2.00 per month and travelling expenses. They eat and dress as poorly as the women to whom they go, and suffer much exposure and fatigue.

Miss Fielde's literary labors have been important. She assisted in the translation of the Scriptures into the Swatow dialect, and prepared a time-saving dictionary, besides other undertakings. Failure in health obliged her to retire from Swatow and return to America in the summer of 1890.

The educational work around Swatow is carried on vigorously. From the two departments of the boys' boarding-school fees were received for 1887-1890 respectively, \$32.00, \$68.00, \$83.50.

The features at Ningpo are a boarding-school of 40 girls, day-school, Bible-women, and country work. A glimpse of the latter is given in the last report: "The usual three boats left our jetty to scatter the seed broadcast amidst the heathen devotees, thirteen native women in two boats, while I occupied the third. All the

women did excellent work. It did my heart good to see them witness for Christ, though but a handful amongst the crowds. It is a hard trip, and on the following Sunday many of the women told me they were in bed two days after it."

In Japan the societies have seven missionaries, some of whom are fresh arrivals, while one lady has given thirteen years of service there. The stations are Yokohama and Tokyo, and the ladies are occupied with girls' schools and Bible instruction. "All the ladies regretted that our Society had not been more aggressive in the matter of schools, and thought it a great pity that we had not a single boys' school in the country." (From "Helping Hand," January, 1890.)

The first missionaries of the societies, to the Congo, went in 1887. Seven are on the field—at Lukungu and Palabala. They have had the experiences of pioneers. "One morning they took the tent down before I got my hair combed, and when I turned round, all the carriers of one caravan were drawn up in a circle, watching me with awe-struck faces. I believe they were afraid of my hair. I am the only woman up country with long hair."

The name of the hill on which their house at Palabala was built meant "hill of death"—a reminiscence of the time when condemned witches suffered here; but in the new state of things, the king, though not a good man, has requested to have the name changed, "as it is no more a hill of death, but life." One of the missionaries, from whom the people in a new place at first ran away, stayed a few days among them, and "they flocked to her tent to hear more of the 'wonderful words of life.' When she first read God's Word to them in their own language, some ran screaming away, greatly alarmed to know that their own language could be talked from a book. They had never heard such a thing before. They plead with her to remain with them, and teach them."

The ladies at Lukungu are sheltering the nucleus of a girls' home, and teaching 75 children in three classes. Some of the boys have been already received into the church.

The societies support Bible-women in France, Sweden, and Russia.

At the meeting of the Boston Board of Directors in December, 1889, the secretary announced that she had requests "for ten ladies and six medical missionaries, all of which must wait until a deeper consecration in our churches shall greatly enlarge our resources."

**The Woman's Missionary Society of the Free Baptist Church.**—In 1873 the missionaries of this church in India, sadly weakened by sickness and death, appealed to the women at home. Before they called, the answer had been framed, at the yearly meeting held in Sandwich, New Hampshire, in June, that same year. They had met in convention and organized the Woman's Missionary Society. The Board selects and supports its own missionaries.

Home work is carried on among the freedmen at Harper's Ferry and on the frontier.

The home force reported in December, 1889, was: Auxiliaries, 273, besides about 30 quarterly meetings which gave no report of auxiliaries. Receipts, \$5,686.57.

Abroad.—The Board has stations at Midnapore, and Balasore, near Calcutta, India, and

supports four missionaries in full, besides aiding other ladies sent out by the church.

The Sinclair Orphanage at Balasore was the gift of one gentleman and his wife in New Hampshire. It shelters about forty girls. There is also a day-school here for Christian girls, and seven Hindu girls' schools in the city and its suburbs. Eleven zenana teachers are employed.

Seven Bible-women itinerate through the region about Balasore. They visited 178 villages in 1888-89, and through them a number of women have been received into the church. As one of these said, it was "the love in the hearts of the teachers" that first led her to think about Christianity. The support of most of these Bible-women is given by the Indian Female Normal School and Instruction Society of England.

A large ragged school is located at Midnapore, and a girls' English school; while Bible-women and zenana visitation are features at this station.

**Woman's Missionary Union Auxiliary to Southern Baptist Convention.**—The first Woman's Mission Societies were organized in 1884. They were congregational only, and adopted no common constitution until the appointment of the executive committee, who held their first meeting in Memphis, Tenn., in 1889. The societies are auxiliary to both the Home and Foreign Boards of the Convention, and in their constitution expressly disclaim "all intention of independent action." In their "plan of work" they recommend raising money by "setting apart a certain proportion of earnings or spendings," and "deprecate the employment of any method that would put the cause of Christ before the world as a beggar."

The headquarters of the committee are at Baltimore, Maryland.

The constituency are in twelve States, from which a total of 1,259 societies was reported in 1889. Aggregate receipts for the same year were \$30,773.69, of which \$18,716.28 were appropriated to the foreign field.

There are 600,000 women in this church.

While the committee sends out no missionaries, there are 18 unmarried ladies in the foreign service of the church. Of these, 12 are in North, Central, and Southern China; 5 in Mexico, and one in Rio de Janeiro. A society in Virginia has also undertaken the support of a lady missionary in Rome.

The societies also aid work of the Board in Cuba and Africa; and a new mission having been lately opened in Japan, bands and young people are urged to support a missionary in that country.

The Committee, true to their position, proffer no reports of foreign work, which must be looked for in the annals of the Board; but publications of the Board admit monthly reports from the committee to their columns, and the ladies publish a monthly paper, "The Baptist Basket," at Louisville, Ky. Price, 50 cents.

**Woman's Executive Board Seventh-day Baptist Church.** Organized 1884. Headquarters, Milton, Wisconsin. Besides the ordinary officers, there are five associational secretaries. The Board acts for both home and foreign missions.

The church has mission work in China, Holland and amongst the Jews; and the Auxiliary Board sent out its first missionary in November,

1889, to have charge of school work in Shanghai, China.

The woman's societies are not fully in running order, but their secretary says their work "has already proved a spiritual blessing to us all."

The contributions to the missionary fund of the church for 1889 were \$724.76.

**The Woman's Auxiliary to the Board of Missions of the Protestant Episcopal Church of the U. S. of America** was organized by order of the Board October, 1871. It has become organized, on ecclesiastical lines, into diocesan and parochial branches, each responsible only to its own bishop or rector. It had in July, 1889, 54 diocesan branches, 10 of which are in missionary jurisdiction. There are 1,000 to 2,000 parochial, besides juvenile, branches.

Officers of the Auxiliary are called together for conference monthly at headquarters, 21 Bible House, New York, and triennially, with all members of the Auxiliary, at the time and place of meeting of the General Convention. At the last triennial meeting in New York City, October, 1889, there were 371 delegates present.

The Auxiliary is constituted for both domestic and foreign missions. The contributions in 1889 for foreign missions were about \$30,000, besides boxes valued at \$3,456.

"The Spirit of Missions" (published at the Bible House, New York City) is the organ of the Board of Missions, and devotes a department to woman's work. "The Young Christian Soldier" is for the juvenile branches. Besides these, "The Church Mission News" is unofficially published monthly by the ladies in New York: price, 30 cents. Catechisms upon the missions of this church have been prepared for instruction of the children.

The Auxiliary aims to aid the general missionary work of the church through the support of women serving as missionaries, scholarships in foreign and Indian mission schools, contributions for general missions (undesignated) through mite-boxes and regular subscriptions, and by special effort at the close of each working year.

This church is represented abroad by 60 ladies in all, of whom 31 are unmarried. Twelve of these have been sent to Japan during 1887-1890. Several ladies have gone out at their own charges. One is a physician. They are connected with the missions of their church in Greece, West Africa, China, and Japan. Those in China are stationed at Shanghai, Hankow, and Wuchang. At Shanghai one lady teaches English classes in St. John's College for boys, and another with a missionary's wife cares for an orphanage of children and St. Mary's Hall, a school for girls who are received young, and kept in training sometimes as many as eight years together.

A letter written from them at Christmas-time 1888 said: "We opened the new building for St. Mary's School, which has just been completed. It is substantially built, much more roomy than the old one, and a palace compared with it." Scholarships are \$40 per annum.

The Bridgman Memorial and the Emma Jones Schools are both aided by the Auxiliary, and there are also many day-schools in Shanghai. At Wuchang the Jane Bohlen Memorial School cared for fifteen girls in 1889. In this city, Dr. Marie Haslep (wrote Bishop Boone in

the autumn of 1889), "besides the study of the language, has been teaching medicine in English to her one very exceptional pupil, Miss Wong, and has also had her dispensary open for several months past, and seen hundreds of patients."

The ladies in Japan live in Osaka and Tokyo. At Osaka they have the Woman's Institute, comprising three departments—a primary, a school for girls, and women's classes. The ladies teach English extensively here; music also, and foreign sewing. There is interesting evangelistic work in Osaka, and also St. Agnes School of about fifty house-pupils, nearly all of them Christians. Six were baptized and eight confirmed in 1889. Scholarships are \$40.

In Tokyo a school for the higher classes was opened in March, 1889, and in the course of a few months had twenty pupils. The dining-room is ordered in foreign style, to suit the parents of the girls; and a Steinway piano has been sent them by a lady of Tarrytown-on-the-Hudson.

Several ladies are connected with the Cape Palmas Mission, West Africa. One has a primary school of about ninety children at Cape Mount and has organized a Ministering League among them.

The last Sunday of 1888 the bishop baptized 24 persons in St. Mark's Church, of whom nine adults and four children were the fruits of efforts put forth by the Woman's Auxiliary of that church. In 1889 occurred the thirtieth anniversary of the Ladies' Church Aid Society of Trinity Church, Monrovia. Their contributions for the year were \$312.63. The Auxiliary has recently put up a new building for Hoffman Institution of this mission.

Some of the largest gifts made through the Auxiliary have been in behalf of missions to the North American Indians. Among the converted women of South Dakota many societies have been formed, which make regular and large offerings for church work, and even for foreign missions.

**The Woman's Foreign Missionary Society of the Reformed Episcopal Church.**—This Society was organized in Boston, May, 1889. A constitution was adopted, and the usual officers elected. Responsibility for the conduct of business rests with an executive committee, which has met regularly during the first year of the Society's existence. The formation of auxiliaries in different churches has begun. The Society will co-operate with the general council committee of the church to put forth missionary effort for some particular field, which may be chosen by the council.

It is announced that "one of the younger clergy of the church has consecrated himself, with his wife, to work in China," and two ladies from western parishes have gone to India. One of these went at her own charges to Calcutta, where she is engaged in evangelistic work in connection with the Union Society. The other is a zenana missionary at Cawnpur, and is sustained by the Young People's Conference. Both these ladies have received aid for their work from the Society, and a grant has also been made for a training-school in Sierra Leone, Africa. About \$1,500 in all is accounted for by the corresponding secretary in her report for the year. "As a church," she says, "we dare not lag behind our sister churches. Though we are small in numbers we can be great in

faith. Most earnestly do we desire to labor in the Master's service, and to obey His last command."

**The Woman's Missionary Association of the United Brethren in Christ** was organized in 1875. It is under direction of General Conference, and submits quadrennial reports to that body. Business is directed by a Board of Managers, composed of delegates elected annually by the Conference branches. Branches hold annual meetings; local societies and children's bands meet quarterly. The home force in 1890 was: Branch societies, 44; membership, about 10,000; income for 1889-90, \$13,230.90. The "Woman's Evangel" is published monthly at Dayton, O. Price, 50 cents.

The first work abroad was undertaken in Sierra Leone, West Africa, where the General Board had been operating for years, but, by their advice, in a new and unbroken field. The station was located at Rotofunk on the Bompeh River, and a single lady was the pioneer in 1877. She held religious services and opened two schools. Her successor, another lady, doubled the number of schools and superintended building a house. Rotofunk was a slave-traders' station when the mission was opened, but ceased to be within five years after.

In 1882 a man and his wife were sent to the lonely station, and others followed in 1887.

Native chiefs made grants of land to the Association, and the buildings which have been erected, with other improvements, give the property a present valuation of \$15,000.

In 1888 the Mary Sowers Home for Girls was completed at an expense of \$2,000. It is a substantial building, and attracts a great deal of attention in those parts. There are about one hundred pupils, who are taught to wash, bake, cook, and everything pertaining to house-keeping, besides their school-training.

Wars and pestilence have interrupted the progress of the mission, and in 1888 it became necessary for such reasons to consolidate all the schools outside of Rotofunk at Bompeh. This school is fortunate in having the services of Mrs. Thompson, daughter of Bisoap Crowther of the Niger. The number of full communicants here at the opening of 1889 was 37; seekers, 813. Three Sunday-schools had 156 pupils enrolled.

Itinerating is done, under direction of the missionaries, by converts who go two by two through the country, preaching and singing gospel songs, reaching many towns in a single day.

A mission to the Chinese in Portland, Oregon, was assumed in 1882. In 1884 property was purchased at a cost of \$8,000. In 1888 there were 72 converts brought into church-membership out of about 600 who had received instruction. Pupils have paid \$2,700 for tuition, and for church purposes over \$750.

The interest of these converted Chinamen for their people led the Association to project a mission to China, and in 1889 the missionary from Portland, accompanied by two young ladies and a Chinese assistant, sailed for Canton to locate a mission in some destitute part of that province.

The entire foreign force representing the Association is: American missionaries, 10; native assistants, 18; church-membership, 1,484.

**Christian Woman's Board of Missions (Disciples).**—Several local societies

having led the way, a mass meeting of the women of the church was called at the suggestion of one of its ministers. It was held in connection with the General Convention at Cincinnati, O., in 1874, and resulted in the organization of the "Christian Woman's Board of Missions." "Headquarters were located at Indianapolis, Ind., and the general officers chosen with reference to that vicinity."

The annual convention has never been held east of Cleveland, O. The management is in the hands of an executive committee. Twenty-nine States furnish auxiliaries to the Board.

Ever since 1884, bands of children have been organized, under the name of "Little Builders of the Christian Woman's Board of Missions," and to them is assigned erection of chapels, mission homes, and the like. The Board is constituted for both home and foreign missions. The contributions of the first year amounted to \$1,000. In 1890 they were \$45,166.81, of which about one third was expended upon foreign missions.

The home force reported at the fifteenth annual meeting, October, 1890, was: Auxiliaries, 882, a gain of 156 during the year; membership, 15,000; young people's societies, 49; mission bands, 380.

"Missionary Tidings" is published monthly at Indianapolis, Ind. Price, 50 cents.

Home work of the Board is carried on both east and west of the Mississippi.

The first undertaking abroad was the revival of the Jamaica Mission, which had fallen into decay. The Board sustains five men in Jamaica, with day-schools, Sunday-schools, and churches having a membership of over 13,000. Their property is valued at about \$20,000.

A mission to India was begun in co-operation with the Church "Foreign Society" in 1882. Three stations are occupied in the Bilaspur district in the Bombay Presidency. Four missionary ladies are in this field, two of whom are physicians. A new bungalow for the ladies was built in 1889. They have an orphanage in charge, Sunday-schools, a school which opened with 31 girls in October, 1889, and zenana visiting. The event of 1889 was the opening of a medical mission in Bilaspur. Two women physicians who went for that purpose, although chiefly occupied with studying the language, gave out 1,000 prescriptions during the first two months after their arrival. They ask for a hospital, and the \$6,000 proposed for that object was nearly raised in 1890.

A second "Woman's Board for Foreign Missions" of this Church is also reported from New Bedford, Mass. Its specific work is the support of Bible women in connection with a mission in Japan, undertaken by the convention in 1887.

**Woman's Home and Foreign Missionary Society of the Lutheran Church.**—The first impulse toward united woman's missionary work in this church was given by a Swedish pastor in 1874, when he urged upon two Lutheran women to take the initiative in organizing such a society. A year or two later a letter in the "Lutheran Evangelist" called attention to the desire of an eminently fit young woman to go out as a missionary, and to the fact that the Foreign Missionary Board of the church had no money to send her. Inquiry revealed that several worthy women had been refused the same request for the same reason. Women now began in earnest to consider their

duty in the matter. They were blocked, as their first president afterwards expressed it, by "a difficulty so perverse as to seem amusing in retrospect." "We could gain no footing in the churches unless we were willing to become auxiliary to the Home Mission Board as well as the Foreign, and the Home Mission Board did not feel justified in suggesting any work for us."

In 1877 General Synod appointed a committee of gentlemen to forward the organization of such a society. They called a woman's missionary convention at Canton, Ohio, in June, 1879, and in "a spirit of unity and harmony of devotion to the work in hand, with an irresistible conviction that we were called to a life service," the large assembly of women, encouraged by "many well-wishing pastors," launched the Woman's Missionary Society.

The management is in the hands of the church officers, and an executive committee of thirteen ladies, nearly all of whom live in Springfield, Ohio. A general convention is held every two years, at which all societies are represented by delegates. Synodical societies meet every year; auxiliaries monthly.

At the convention in Baltimore, Maryland, 1889, the secretary reported 20 synodical societies, 507 auxiliaries, 13,801 members. Contributions, \$32,331.35. As this was the tenth year in the history of the Society, thank-offerings were invited, which added over \$6,000 to the amount reported by the treasurer. There are about 900 congregations in which is no auxiliary.

The "Missionary Journal" devotes a department to woman's work, which is edited under direction of the ladies.

The Literature Committee of seven ladies reside in Baltimore. They publish tracts, and "Mission Studies," a quarterly, containing readings on the subject of study for each month.

Abroad.—The first missionary was sent out in 1880. The four now sustained by the Society, one of them a physician, are all in Guntur, Madras presidency, India. The Lutheran Church founded a mission here in 1842.

There are 16 high-caste Hindu schools here, with 700 to 800 girls in them. An industrial-school for Mohammedan girls was opened in 1888, and a *gosha* department, having 30 women, added the following year. The day-schools are not confined to Guntur, but spread into the surrounding district. Lastly there is a boarding-school, accommodating about 40, for the daughters of Christian converts. The pupils are supported from America at a cost of \$25 per year. "All the work of the school, cooking, carrying water, cleaning, sewing, is done by them. They are given a good common education, and as much knowledge of Bible truth as possible. We do not change the food, dress or habits of life of these girls, except when necessary for the sake of morality or health. They live on rice and curry in the district. In school we give them rice and curry, or *chollum* (a sort of grain) and curry. We do not Anglicise their dress. They eat with their hands, sitting on the floor, but they sit in an orderly row, and the older ones take turns in asking a blessing.

Zenana helpers to the number of 14 have been employed. The physician of the mission, after six years' labor, is on furlough, but her return is hoped for by the Society and by the people of Guntur, whose confidence she won to a remarkable degree. The report for her last year abroad is as follows: Number of patients treat-

ed at dispensaries, 3,175; number of patients treated at their homes, 302; number of attendances at dispensaries, 7,081; number of visits at homes, 1,295; number of prescriptions compounded, 11,211. The Society raised funds to build a hospital in 1890.

A request for a matron from the mission house at Muhlenberg, Africa, will be granted as soon as the Society can find a suitable person.

**Woman's Board of the Evangelical Association of North America** (German Churches).—In the year 1839, when the Evangelical Association numbered but 8,000 members, a Woman's Missionary Society was organized in the city of Philadelphia, Pa., numbering 60 members, who met once a week for work and prayer; from that time on, women of the Association have been actively engaged in the mission work of the church.

In 1876, when the first missionaries of the Association went to Japan, there went with them the awakened sympathy of the entire church; and women especially felt a new inspiration for missions, since two ladies were of the party.

In 1878 a petition was sent to the Board of Missions from Cleveland, Ohio, for permission to organize a Woman's Foreign Missionary Society. The Board deprecated organization for one branch of church work, and said, "We cannot comply with this request."

In 1880 another petition, sent up from Lindsay, Ohio, met with a partial assent; but societies did not organize rapidly, and a corresponding secretary was appointed who sent letters of appeal throughout the church.

These efforts resulted in forty societies in 1883. The same year a woman's convention was called, and for the third time the Board was petitioned to allow a general woman's society. Permission was now granted on condition: (a) That all local Societies be under supervision of a preacher. (b) That the Society be auxiliary to the Board of Missions, and submit its proceedings to that body.

In 1889 its home force was: Auxiliaries, about 135; membership, 2,400; receipts, \$2,187.67.

"The Missionary Messenger" contains a Woman's Work department. Published monthly at Cleveland, Ohio. Price, 25c.

For a time a missionary was supported in Japan, but at present the Society reports none.

#### CANADA.

**Woman's Foreign Missionary Society of the Presbyterian Church in Canada.** Organized 1876. Western Division: Headquarters, Toronto. Eastern Division: Headquarters, Halifax. Montreal Women's Missionary Society. Organized 1882.

Definite interest in woman's foreign mission work began in the Presbyterian Church of Canada in 1874, when two ladies offered themselves for service in India. The church not having at that time an established mission in India, these ladies were temporarily employed in the American Mission near Futtehghurh, though supported by Canadian funds.

In April, 1877, at the request of the Foreign Missions Committee of the church, the Western Division of the Woman's Society was formed, with a membership of 50. During the first year 18 auxiliaries and 3 mission bands were organized, which in the second year were increased to 28 auxiliaries and 6 bands. The re-

port for 1890 gives the numerical strength as follows: Presbyterial societies, 25; auxiliaries, 437; mission bands, 176; total members, 15,312.

The first presbyterial society was formed in 1879, and ten years after every presbytery in Ontario had its organization, including one composed of 13 auxiliaries in the far Northwest Territory. The Society aims to establish a branch in every Presbyterian congregation throughout the land.

The offerings since the beginning have been, speaking roughly, one, two, three, four, five, six, seven, eight, ten, thirteen, eighteen, twenty-five, twenty-nine thousand dollars, and in 1890 \$31,999.28. These sums, however, are but a faint indication of the real growth of the organization or its direct results for good to the church.

Abroad.—The Society sustains twelve missionaries, of whom two are physicians (and all but two in Central India), besides missionaries' wives. Four ladies went out in 1889. Seven missionaries are also on the Indian reserves in the Northwest.

THE EASTERN DIVISION has a constituency of, auxiliaries, 91; mission bands, 25, and contributed in 1889 \$4,296. The Society has six missionaries in the field.

THE MONTREAL SOCIETY is successor of the "Ladies' French Evangelization Society," and conducts city mission work, French evangelization, and aids foreign missions. Its income for 1889-90 was \$1,615, of which \$700 was devoted to city missions.

The bulk of the revenue of these societies is obtained from voluntary offerings made through envelopes and mite-chests. "In few cases are 'sales' or entertainments resorted to as a means of raising money. Collecting is not included in our methods." The publications of the societies are leaflets, and a monthly letter composed of letters from missionaries; notices from the Board of Management to the branches, and items of special interest to members. The Eastern and Western Divisions are strictly auxiliary to the Assembly's Foreign Missions Committee, and co-operate with them among the Indians of 13 reserves in the Northwest and Manitoba, in the West Indies, British Guiana, China, India, and the New Hebrides.

Indian Reserves.—Connected with this oldest missionary work of the church are five industrial and boarding schools, and two smaller schools, in which day-pupils are received; all largely supported by the societies. The girls in these schools learn to knit, sew, cook, bake bread, and do all kinds of household work. In one, every girl over eight years of age wears stockings of her own knitting, and every girl of sixteen is required to make each year a suit of clothes for herself and one for her brother. The children also show great aptitude for music.

Sending bales of half-worn or new clothing to these reserves has constituted an important factor in the work of the societies for several years. Without this aid the schools could not have been carried on, as the Indians are miserably poor. The supplies are designed chiefly for children at the schools, and for the aged, feeble, and sick.

Central India.—Since 1877 the Western Division of the Society has sent twelve single ladies to India, of whom ten are still in the

service. Two of them have gone distinctively for zenana work.

Five large centres are occupied,—Indore, Mhow, Rutlam, Neemuch, and Ujjain,—all located under the government of native princes, with British garrisons of occupation.

Medical work at Indore, conducted by Dr. Elizabeth Beattie and Dr. Marion Oliver, has been most successful. In 1889 they treated 16,678 out-patients and 67 in-patients, besides 1,192 house-visits paid. A dispensary has been established, and a temporary hospital, which is soon to be replaced by a permanent one. There are schools at all the stations, and where a regular lady missionary is not available, wives of the missionaries have collected the children and taught them very efficiently. A deposit sufficient to cover the cost of erecting a girls' boarding-school stands to the credit of the W. F. M. S., to be applied as soon as local conditions are favorable to begin.

China.—A handsome and complete girls' school-building was erected in Tamsui, Formosa, in 1884. It is under the management of the wife of Dr. G. L. Mackay, missionary of the Canadian Church in Formosa, and herself a Chinese woman.

In Honan, North China, it is proposed to establish hospitals at two centres, and two trained nurses were sent out from Toronto in 1889.

Trinidad.—Mission work is conducted in Trinidad among Hindu coolies, of whom there are about 60,000 on the island. Much attention is given to education, and the schools have been a great means of good. Daily attendance of children is now verging upon 2,000. This mission belongs more especially to the Eastern Division of the Canadian Church, as does also the interesting field of the

New Hebrides.—Women have borne a heroic share in the fortunes of this mission, and one was martyred with her husband. No single ladies have been sent here, but the Society has three married ladies at the islands.

**Woman's Boards of the Baptist Church in Canada.**—Women's Foreign Missionary Society of Ontario; organized 1876. Women's Foreign Mission Society of Eastern Ontario and Quebec; organized 1876. Woman's Missionary Union of the Maritime Provinces; organized 1870.

The Ontario Society is the largest of these, comprising in itself 13 associational societies and about 250 circles and bands.

The "Union" was formed in 1883, by combining aid societies of thirteen years' standing in Nova Scotia, New Brunswick, and Prince Edward Island. At first few in numbers, banded together to support one sister who desired to carry the Gospel of the Redeemer to the perishing heathen, they found that union has strength, and have had the joy of helping a large number of ladies in the work in the foreign field, while their contributions have also secured some most valuable buildings. It is constituted for both home and foreign mission work. Both societies and the Union act in direct connection with their general church boards, to whose treasurers their funds are sent. The receipts reported for the year ending October, 1889, were, respectively: Ontario Society, \$4,924.36; E. Ontario and Quebec Society, \$1,255.90; Maritime Union (for foreign missions), \$3,500.00. Total, \$9,680.26.

These organizations are represented by "The Canadian Missionary Link," a self-supporting monthly paper published at Toronto; price, 25 cents per annum.

Abroad.—There are ten unmarried ladies representing these societies, of whom three went out in 1889. One is a trained nurse, and there is loud call for a woman physician. There are, besides, several missionary wives, who are actively in charge of regular departments of work.

The foreign field of this church is entirely among the Telugus of the Madras presidency, India. The oldest station is Cocanada, where woman's work is developing in several directions.

One lady has charge of the boarding-school for Christian girls. The tuition fee is four annas a month. The records of the school show that, of former pupils, 11 are wives of Telugu pastors, 6 are teachers, 1 is a Bible-woman. One missionary devotes herself to the Bible department, numbering 75 young men, in Samulcotta Seminary, besides doing evangelistic work in vacations.

Instead of 99 zenanas on the visiting list at the beginning of 1889, there were 132 in August of the same year; 14 villages had been visited during the year, and 1,955 visits made in all. Among the mission buildings in Cocanada are a Zenana Home, and a Rest House for missionaries coming from out-stations for medical treatment.

The second station of this mission was Tuni, "dark as night," and "40 miles from English faces and comforts." There is a girls' boarding-school here, of which the brief report runs as follows: "Opened August 1st, 1889, with 12 boarders, big and little, all glad to come and anxious to learn. The little school-house, ready to receive the classes, while the shady church veranda affords a good place for beginners to trace their letters in the sand; 3 teachers, and an old lady to care for them when out of school. Bible lessons, overseeing sewing-classes, and a great many smaller but not less important tasks fall to the lot of the missionary; but it is a pleasure to be busy with such neat little black-eyed girls, who wear little skirts right down to their toes, and sit on the floor." Akidu, 75 miles southwest from Cocanada, was opened in 1881; but ladies have been here so little, that in 1889, as one walked the streets, it was discussed on the verandas whether she were "man or woman." A school for girls, and evangelistic efforts, will soon enlighten the Akidu people in new directions.

Four stations belong to the Board of the Maritime Provinces, viz., Bobbili, Bimlipatam, Chicacole, and Vizianagram. The purchase of the latter property from the London Missionary Society was the financial event of 1889. Two thirds of the cost was paid by the Woman's Union. The features of each station are much alike. Day-school and Sunday-school supervising, taking children into their families, visiting from house to house and touring with their husbands, are all done by the married ladies. A young lady at Bimlipatam went on a tour of 63 days in the summer of 1889, travelling in a bandy, accompanied by a Telugu preacher and his family, a Bible-woman, and one of her pupils. In 50 villages, reached from five centres, she preached and sang the gospel to the women, whom she found more accessible than in the towns. Another young lady at Chicacole reports touring among 30 villages,

and superintends 7 Bible-women, who make over 2,000 visits annually, and went steadfastly on their way through the last cholera season.

***The Woman's Missionary Society of the Methodist Church in Canada.***

—Through the recommendation of the General Conference of 1878, and after some preliminary steps, this Society was organized in Hamilton, Ontario, November, 1881. There had previously existed in Montreal a Ladies' Association for the Evangelization of the French, which subsequently united with this Society, their work being incorporated with its other plans.

The administration is vested in the general officers of the Society and the board of managers, consisting of the president and corresponding secretary, and delegates from each branch. An unusual feature of the Society is that the funds are gathered one year and disbursed the following. While in frequent consultation with the parent missionary society of the church, and in perfect harmony with it, the ladies remit money directly to their own agents.

At the first annual meeting (1882), reports were received from 20 auxiliaries, showing a membership of nearly 800, with 34 life-members, and an income of \$2,916.78.

In October, 1889, there were reported 224 auxiliaries, with about 5,000 members, and 73 missionary bands. The income for the year was \$22,306.28.

Auxiliaries exist from St. John's, Newfoundland, to Victoria, British Columbia, stretching across the continent.

Japan.—The only foreign field occupied is Japan, the missionaries there having sent a request for ladies to come to their help, even before the Society was formed. The first representative landed in Japan, December, 1882. It was soon discovered that a school for girls would contribute more than anything else to the success of the mission, and accordingly she opened one in Tokyo in 1884. In 1885 the school was strengthened by a second teacher. The building facilities have been repeatedly improved. The present accommodation limits the number to 150 boarders, and 100 day-pupils. The fees pay expenses outside of missionaries' salaries, only six girls being supported by the Society.

Over one hundred pupils and some of the Japanese teachers have been converted, and some of them have in turn led their friends to Christ. The general secretary of the parent Society after a trip to Japan reported this as "one of the very best mission schools in the country," and an American lady has called it "a model institution."

Another branch of work in Tokyo is that of training and employing Bible-women under supervision of Japanese pastors. Seven earnest women are thus occupied. A school was opened in 1887 in Shidzuoka, Japanese gentlemen providing the building and assuming the running expenses, the Society being responsible only for salaries of the ladies in charge. This city is in a province of over a million of people, and has been occupied by no other church than the Methodist of Canada. The same may be said of the province of which Kofu is the chief city. Here another school for girls has just been opened. The articles of agreement with the Japanese founders hold it to a strictly Christian standard.

The Society had twelve missionaries in active service in Japan at the opening of 1890.

French Work.—A school for girls has been carried on since 1885 at Actonvale, amidst the concentrated Romanism of the province of Quebec, and a small mission school also in Montreal.

A special effort is being made in connection with the French Institute erected in the west end of Montreal for the education of boys and girls. During 1890 there were 43 pupils (25 male and 18 female), ranging in age from ten to twenty-six.

Indian Work.—There are two Indian Homes to which the Society contributes: the one at Port Simpson, British Columbia; the other near Mosley, Northwest Territory, named The McDougall Orphanage and Training Institution. Each of these shelters from twenty to twenty-five children. The Society has also put up a fine building for a home and school for Indian children at Chilliwack, in the beautiful valley of the Fraser River, British Columbia.

Chinese Work.—In 1877 a rescue work for Chinese girls was undertaken at Victoria. Of nine in residence in the summer of 1889, six gave evidence that they had passed from death to life.

"To summarize," says the secretary, "we are working among four nationalities: Japanese, French, Indians, and Chinese. Our funds go to nine different homes and schools, in which we have eighteen representatives, besides native teachers, and we minister to over four hundred children."

***The Woman's Board of Missions of the Congregational Church in Canada*** was organized in 1886, and constituted for both home and foreign missions.

In 1889 it reported: auxiliaries, 28; bands, 11. Receipts for previous year for foreign missions, \$1,281.56.

The Board has one missionary teaching in Bombay in connection with the A. B. C. F. M. They have also contributed for a memorial school-building in West Central Africa, where the early death of one of their ladies caused heavy mourning.

The Board coöperates with the Missionary Society of the Church in Canada, and is not auxiliary to the American Board, although its missionaries serve under that charter. One of its officers writes that they aim "to awaken interest in woman's work from the Atlantic to the Pacific."

"The Canadian Independent," published monthly at Newmarket, Ontario, allows a "Woman's Board Column" in its pages. Price, \$1.50 per year.

***The Woman's Auxiliary to the Board of Diocesan, Domestic, and Foreign Missions of the Church of England in Canada*** was organized in 1886. In 1889 it reported, Diocesan branches (of which the largest is Toronto), 6; Parish branches, about 200. Total receipts for the previous year, \$18,675.81. This has been chiefly expended upon domestic missions.

Diocesan branches hold annual meetings, and the first triennial meeting of the Auxiliary was held in September, 1889.

The Auxiliary has one missionary among the Blackfoot Indians.

"The Canadian Church Magazine and Mission News," Hamilton, Ontario, devotes a space to the Auxiliary. Price, \$1.00. The Toronto

branch publishes a monthly letter leaflet; price, 15 cents.

#### GREAT BRITAIN AND IRELAND.

**Coral Missionary Magazine and Fund.** For aiding missions at home and abroad.

Besides the Societies organized and conducted by women primarily in behalf of women and children, and doing work which would be nobody's work should the Society withdraw, there are other valuable missionary organizations which equally deserve to be recorded in this connection. Some of these are not strictly "societies;" others support no specific missionaries, but help societies that do; others are either not working expressly for women, or have not a constituency of women.

The oldest of these admirable institutions goes by the name of the "Coral Fund."

The foreign work of this association is in connection with the Church Missionary Society, and its home efforts in aid of London City Missions.

The "Coral Missionary Magazine" (first known as the "Children's Magazine") was founded in 1838, and the "Fund" ten years later; both taking their name from the coral insects, which produce useful results from multiplied small efforts.

The association has raised over £40,000 from the beginning, its average income at the present time being about £1,000 annually.

The "Fund" is under trustees, the editor of the magazine acting as treasurer, and conducting correspondence with mission stations aided by it. It has several working parties and other co-helpers, who collect subscriptions, copy reports, and if possible pack a box annually for the schools.

The chief work of the "Fund" is support of children in the C. M. S. schools and orphanages, and thousands have been maintained by its agency, many of them through contributions of Sunday-schools and Bible-classes, or the proceeds of missionary baskets or sales.

The association has always been ready to provide some special want of a station—a magic lantern, or a harmonium, or an extra catechist's salary; and repeatedly it has come to the rescue in an emergency. Such instances were the store of provisions for the Bishop of Moosonee, when only one uncertain ship a year brought his supplies; the relief of slaves rescued at Freretown, East Africa; and of famine in India.

The Magazine is published monthly, price 1d., by Wells, Gardner, Darton & Co., London. A. L. O. E. is one of the many contributors to the pages of its fifty-three volumes.

**The Ladies' Auxiliary of the Wesleyan Methodist Missionary Society.**

—This Society was formed at the close of the year 1858, in response to appeals from wives of missionaries in India, for help in commencing and carrying on schools for girls, and in instructing women. It is managed by a president who is also treasurer, four honorary secretaries, and a committee of thirty ladies. The committee works in harmony with, and to a certain extent under the direction of, the Wesleyan Missionary Society of England.

The home force is represented by: Auxiliaries, 200; working-meetings, 150; busy bees, 82.

The income for 1889-90 was £8,138 7s. 5d.—the largest ever received.

The "Quarterly Paper" is published at the Mission House, Bishopsgate Street Within, London, E. C., England. Price, 4d.

The force abroad includes: Missionaries, 37; native assistants, 58. Twelve Bible-women (all in India) are supported by the British and Foreign Bible Society. Missionaries' wives (about 40) superintend schools and visit zenanas, but without salary.

**Medical Work.**—Five missionaries are medical visitors, and some of these are full physicians. One of the latter, Dr. Sugden, has charge of a woman's hospital in Hangkow, China, which having been erected at a cost of £1,000, was opened amidst much rejoicing at the close of 1888. At a meeting of the Auxiliary in London the July following, a gentleman of the mission reported that Dr. Sugden "during two and a-half years' work had seen over 13,000 patients, and visited 308 who were unable to attend the dispensary. There had never been such a demand on any foreign medical man. Many a life had been saved, and he trusted many a soul. People came ten, twenty, thirty, even in some cases two hundred, miles to the hospital. Many were now brought to attend the chapel. When it was built one third of the space was allotted to the women, and that was usually nearly empty. Now they were pushing the men out of their places, and the medical work was bringing about freer access to the homes of the people."

There are also hospitals at Madras and in Uva, Ceylon.

**Educational Work.**—The Auxiliary has connected with its missions about 12,000 pupils distributed in some 15 boarding-schools; 6 orphanages; 260 day-schools. The greater number of pupils are in India. One of the Wesleyan missionaries in the Madras presidency wrote to the Auxiliary ("Quarterly Paper," 1889, p. 159):

"In every village, side by side with the boys' school, I want a girls' school. Side by side with the catechist and boys' school-teacher there must be an intelligent, godly woman to work among the women, to teach them to sew and keep themselves tidy and clean, and to instruct them in the simple truths of Christianity. We have a great deal of civilizing work to do."

In the Calcutta district are 24 schools containing about 800 girls. In Mysore there are 3,500 in school. At Bangalore about 50 house-pupils, many of them small, are in the boarding-school. The missionary says ("Quarterly Paper," January, 1890):

"We intend to weed out girls whose friends pay no fees, though we cannot of course turn away destitute children. We have some girls who have been in school for many years, and for whom scarcely anything has ever been paid. We want to raise the school and get a better class of children. I hope we shall get the parents to supply all the children's clothing. I find the girls take so much more care of their 'house clothes,' as they call their own things, than they do of things that I give them."

There are schools in Madras City (sometimes 350 girls in 6 schools), in Lucknow, Faizabad, Haidarabad, Benares, and other cities.

The Ceylon Mission is also strong in schools in the Jaffa, Batticaloa and Kalmunai districts in the north. In 1889 there were 1,470 boys and 353 girls in Kalmunai schools. In South Ceylon there are large schools in Colombo, Uva, Kandy, and the Galle and Matura districts. An industrial school for girls at Badulla demands low fees.

In China the lack of a boarding-school at Canton, and the early removal of pupils at Hankow, are the great hindrances to be overcome.

Africa.—The missions in Africa are at Lagos, on the west coast, and in the south. In the latter they have large schools at three stations, and from one of these, Peddie, nearly 20 day-schools are worked. One of the ladies recently had a catechumen class of 35 out of 106 enrolled pupils.

The Auxiliary also aids Wesleyan missions in Syria, Italy, and Spain.

**Ladies' Association for the Promotion of Female Education among the Heathen.** In connection with the missions of the Society for the Propagation of the Gospel. Organized 1865.—The home organization consists of a committee of ladies meeting monthly at 19 Delahay Street, London, and several sub-committees. The constituency furnish funds through branch associations. The committee appoint a lady in each archdeaconry to be correspondent. She aids in organizing branch associations, and transmits their collections to London. There are 73 correspondents. Funds are also raised by sales of work, which is furnished by some 300 working parties. By the same means about forty valuable boxes are annually sent to the missions. The funds are administered by a committee of ladies aided by two members of the Standing Committee of the S. P. G., and by the Secretary of the Society.

The income of the Association for 1888 was £6,351.

"The Grain of Mustard Seed" is published monthly at 2 Paternoster Buildings, London. Price, 1d.

The missions are in India, Burma, Madagascar, South Africa, and Japan.

The force abroad is represented by: English missionaries, 61, of whom 12 are honorary (at their own charges); foreign assistants, 104; zenana pupils, 3,000; schools, 18; pupils in schools, 1,250.

The oldest and strongest mission is that at Delhi, in the Punjab. The forms of work here carried on by the Association are: Zenana missions in Delhi and seven other towns; Bible-women; the native female normal school; the European normal school; the industrial school (which sometimes supports itself by embroidery); the Christian girls' boarding-school (£10 will cover all expenses for a girl, one year); the Refuge (for women of all religions).

The industrial school is for Mohammedan women, and has become in part a shop as well as school. The Christian girls' school has about 50 boarders. An American visitor there thus describes what he saw: "We entered the school by surprise. It was work-day. Young girls with their native spinning-wheels were spinning cotton; others were sewing; others, larger girls, were cutting out and making garments for the boys' boarding-school. The lady in charge took us to the cook-rooms, where she showed us 160 pounds of extra fine flour that the girls had made from the wheat bought in the bazaar." The standard of the school includes a middle department and the full complement of eight classes. The Mission Report says of it: "There is perhaps no more useful institution in the mission."

There are five day-schools in Delhi, two for Mohammedans and three for Hindus.

There is a woman's medical mission in the Lahore diocese, having two centres. The one is at Delhi, where there is a hospital and dispensary in charge of a medical woman and her

assistant. The in-patients in 1888 numbered 137, and the total number of patients was 12,688.

At Karnal, 75 miles north of Delhi, is the other medical centre, with dispensary and lying-in hospital.

In the summer of 1889 the Delhi Mission appealed for six English women,—“if possible, those having private means.” Two were particularly called for to establish a village mission, and two for a girls' school in the town of Hissar, for which a Hindu gentleman had promised to give twenty rupees a month if it were in charge of a Christian lady.

Other important stations in India are in the Calcutta district, Bombay and Madras presidencies. In all, zenana visiting and schools are prosecuted. In the city of Madras about 90 girls, over 60 being orphans, are cared for in a boarding-school. The Lady Napier Caste School at Tanjore, according to a late report, had but 25 Brahman girls out of 135 children, so that “it is not yet patronized by the class for whom it was intended.” At Trichinopoly there has been a training-school for teachers for nine years. In the Mahratta country there are 100 girls in boarding-school at Ahmednagar, and at Kolhapur 400 high-caste women and girls in eight schools, and a teachers' training-class, the fruit of six years' effort.

Burma.—The mission has schools at Rangoon, Prome, Moulmein, Toungoo (Karen).

Madagascar.—Six or more missionaries are on the island. At the capital they are in schools, where “it is so difficult to make girls that have never seen a train or even a carriage understand geography.” At Mahanoro, a child said she would go a fortnight without food, except a little dry rice, in order to possess a doll.

South Africa.—There are several schools for Kafir children at Cape Town, Graham's Town, and Maritzburg; and in 1888 a new school was opened at Durban for Indian girls, the daughters of coolies from India, who have come in large numbers to work on the plantations in Natal.

Japan.—The mission has two ladies at Tokyo, and a third at Kobe.

**Ladies' Association for Support of Zenana Work and Bible-women in India in connection with The Baptist Missionary Society.**—The Association was formed in 1867 as an auxiliary to the B. M. Society, but is independent in general management and disposition of its income. The home constituency is organized into auxiliaries only in rare cases, and funds are obtained by means of “collectors,” who are appointed in connection with chapels and churches all over the kingdom, and solicit from men as well as women. The income for 1889 was £9,641.

“Our Indian Sisters,” a quarterly magazine, price 8d., and leaflets, may be obtained from headquarters, Farnival Street, Holborn, London.

An annual breakfast meeting is held in London in May, where gentlemen are invited to speak.

Abroad.—The Association has nineteen mission stations, all in India, stretching from Calcutta to Madras. Its missionary staff consisted in 1889 of: Lady zenana visitors, 42; assistants, 30; native Bible-women, 55; native school-teachers, 59. About 50 schools are cared for, with 1,700 children. About 700 zenanas are regularly visited, where 1,200 pupils are taught.

The largest boarding-school, of 60 girls, is at

Delhi, where they are trained to clean and grind the grain daily, as well as to such habits of study that some of them have excelled in the medical classes at Agra. There are also several purdah and other day schools at Delhi.

The Rajghat School in Benares has about 100 children (one fourth of them boys) from twenty-one distinct castes.

Evangelistic work in the villages is the branch of mission work which has most increased of late. During the cold season some of the missionaries have tented for weeks together in the vicinity of their city stations, and moved about within reach of numerous villages, where, in many cases, an English lady has not been seen before. A boat has been built at Barisal, for use in itinerating.

Some special expenditures in 1889 were: the purchase of a piece of land at Delhi, on which a hospital for women and children has since been erected; purchase of a house to accommodate the lady workers in Barisal; houses for Bible-women, and a normal school in Calcutta.

**Ladies' Committee of the London Missionary Society.** Organized 1875.—The constituency of the Committee, like that of the Society with which it co-operates, is undenominational, but largely derived from the churches of the Congregational order.

The secretary of the Committee thus explains their relation to the Society: "Our Committee is entirely subject to control of the Board of Directors, who, however, treat us with full consideration, and almost invariably accept and sanction our recommendations." Candidates apply to the Ladies' Committee, and are selected by them and "recommended" to the Society, and although the Committee does not disburse funds, it "recommends" grants.

No special meetings are held in London, except the annual meeting in May, which is conducted by ladies; but "deputation work" is done throughout the year, in provincial towns, in connection with the Society.

The total contributions received in 1888-89 were £6,471 4s. 2d.

The Committee publish the "Quarterly News of Woman's Work." Headquarters, 14 Blomfield Street, London, E. C. Price, 4d. Circulation, 10,000.

The force abroad is represented by: Missionaries, 36, besides missionaries' wives, who co-operate as they are able; girls' boarding-schools, 6 or more; day-schools for girls, 133; zenana pupils, more than 2,000; pupils in schools, about 8,000.

The missionary ladies are located in the missions of the Society in India, China, and Madagascar, but no single ladies have yet been sent to the missions in Central Africa, to British Guiana, nor, with but one exception, to Polynesia.

**North India.**—Thirteen of the missionaries are distributed in the centres of this mission. At Calcutta, where zenana work is specially strong, not less than 2,000 houses receive religious instruction only, from the Bible-women. At 60 or 70 more houses secular teaching is also given, and for this a fee is usually paid.

Schools comprising 250 caste girls pay annual fees of more than a thousand rupees. A boarding-school for native Christian girls, day-schools, and work among Mohammedan women are all features at Calcutta.

At Berhampur the baptism of a Hindu lady

at the opening of 1889 resulted in closing most of the zenanas. Other centres are Benares; Mirzapur, where there is an orphanage; Bangalore; and Almora, where a "Home" for women was lately erected.

**South India.**—There are 39 schools for girls in this mission, of which several centre at Madras. Among them are two caste-schools, and a Christian girls' boarding-school. In the latter domestic work is taught, and nearly all pay a fee. Some zenana pupils in Madras buy their own Bibles. Ten Bible-women visit in the suburbs.

**Travancore.**—Woman's work is largely developed here, although the missionary ladies are few. The death of Mrs. Knowles in 1889 was a heavy loss to the mission.

An illustration of the great changes which have taken place in public opinion in Travancore during the last twenty-five years was given by a missionary in a paper presented to the annual meeting in London, May, 1889.

One Sunday morning, soon after she had started a Hindu girls' school, her husband was addressed by a man who passed the door. "All this is quite a new thing," he said. "It may seem good to Europeans to educate girls, but our opinion is just the reverse. No woman of respectability amongst us would ever dream of learning to read—only Temple women stoop to that. And, besides, if women are to be taught such arts as reading, writing, and arithmetic, we men will be ruined." "How so?" "Oh!" said he, "if my wife were to know arithmetic I certainly should soon be a ruined man. It is in this way. As things now are, I send her to the bazaar to buy certain articles, giving her so much money in hand. When she returns from the market I make her lay down the various articles bought. She tells me the price of each. I add up the account, and the exact balance is duly handed over. You see, my wife has not got it in her power to cheat me; but if you teach her arithmetic, see what it will be. She will go to the bazaar, pay five *coslo* for an article and write it down seven; for another, ten *coslo* will be given, but she will put it down fifteen. Before she comes to the house all will be fair and square, and the wrong balance she will be ready to hand over to me, retaining ever so much in her own possession. I should be a ruined man. No, no. It is very needful for men and boys to have book knowledge, but women and girls must learn to cook, to stay at home, and obey their husbands."

Four Hindu girls' day-schools, a fifth for Christian girls in a fine building, and a prosperous boarding-school for the outlying districts, all now stand within a radius of a mile from that doorway. There is a band of 18 Bible-women in Nagercoil, the most southerly mission station in India.

**China.**—The stations occupied are Hong-Kong, Amoy, Shanghai, Tientsin, and Peking. Visits are made to hospital patients in the first two cities, and some medical work among women is done in the last two cities. Boarding-schools are at Amoy, where are 34 house-pupils and a fine new building; and at Peking, where the industry of the girls, their aptitude in handiwork, and interest in the Scriptures are all manifest. A Ladies' Home, recently built at Tientsin, has a hall accommodating 60 to 70, for the use of the Chinese women.

**Madagascar.**—There are girls' boarding-

schools at Antananarivo and Fianarantsoa. In the latter the pupils, to the number of 40, are wives of students in the normal school. Much attention is given here to needle and domestic work. At the beginning of 1889 two pupils were known to be Christians; at the close of the year 29 were members of the church. Hundreds of girls in Madagascar attend mixed schools.

The event of 1889 was sending out a lady to establish a training-school for women and girls at Samoa, in the South Seas.

The secretary says of this step: "Work in the South Seas has been more or less at a standstill during the past few years, from marked inferiority, intellectual and spiritual, of the women to the men. Education of the women has been too much neglected, while that of the men has made rapid strides; the home life of native pastors has suffered."

**Woman's Committee on Christian Work in France.** Under the care of Friends.—The work of the Committee was instituted in 1871. They have collectors in the different monthly meetings of Great Britain and Ireland, and even receive contributions from America. The collections of 1888 amounted to £587.

The Committee sustain meetings in Paris (several stations), Marseilles, and nine other cities of France. Their special instrumentality is mothers' meetings. They have also evangelical industrial schools for girls, Bible-nurses, meetings for children, and tract distribution. At a Sunday-meeting for young washerwomen, in Paris, all being Roman Catholics, seven out of twenty-two had never heard the word "Bible."

Other aids employed are lending libraries, savings-banks, clothing-clubs, and Bible-depots.

**The Woman's Missionary Association of the Presbyterian Church of England** was founded in 1878, Synod having previously expressed its conviction of the desirability of some such action. It is in immediate connection with the Foreign Missionary Committee of the church, and its appointments of missionaries are subject to the approval of that committee. Membership requires a minimum subscription of one shilling per annum.

There are 11 presbyterial secretaries, and 148 congregational associations, representing as many churches; but nearly 150 churches have not yet joined the Association. The income for 1889-90 was £2,603 15s.

"Our Sisters in Other Lands" is published quarterly, at 14 Paternoster Square, London, E. C. Price, 6d. per year.

"The work undertaken abroad is girls' boarding-schools, country visiting, and day-schools, Sunday-schools, visits to women in their homes and in the hospitals, Bible-classes, training Bible-women, and preparation and distribution of gospel leaflets in Chinese character."

The missionaries of the Association number 17, of whom 10 are in China, 3 in India, 2 in North Africa, and 2 in Singapore; Bible-women, 12 or more; boarding-schools, 4; day-schools, 6. The principal centres in China are Swatow, Amoy, and Formosa, in each of which there is a girls' boarding-school; the largest, of over forty, at Amoy. Here there is also an orphanage.

At Swatow there is a training-class for Bible-

women, and a boat belonging to the mission carries the ladies to their country stations. In the seven day-schools about the city the girls are taught sewing and knitting along with their books.

The first missionary of the Association was sent out here in 1878, and has been laboring ever since. Writing from Swatow of the progress she has noted, she says: \* "I have been pleased to see the increasing cleanliness of the Christian homes, notably the pastor's house at P—— and the chapel at N——. In the pastor's study a shelf of books, all carefully dusted and neatly arranged, gives the room a comfortable air, contrasting happily with the chaos and filth which distinguish most heathen dwellings. The pastor's daughter is married to a nice young student. Their house is spotlessly clean, and a foreign clock encourages punctuality, being a better guide to the time of day than the cat's eye at noon, or a guess how many bamboos high or low the sun is in the heavens."

The missionaries at Formosa include 15 villages within their field. One lady with medical training has opened a new centre for woman's work at Chin-Chew, and another is, with missionaries of the general society, laboring in the Hakka country.

The only station in India is Rampore Baulah, among four millions of people whom no other society is helping, and where the Association sent its first "agent" in 1881. The ladies divide their time between schools and zenanas.

Through the aid of one gentleman there are two ladies in Singapore; one devoting herself to Malay-speaking women, the other to the Chinese.

A new work was entered upon by two ladies in November, 1890, at Rabat, Morocco, where a physician and his wife, of the general society, have been conducting a medical mission for some time.

**The Church of England Zenana Missionary Society**, in co-operation with the Church Missionary Society, was founded in 1880, upon the separation of the zenana workers from the Indian Female Normal School and Instruction Society. The president, vice-presidents, and most members of the committee are ladies, but treasurers, finance committee, and some other officers are gentlemen. The constituency of the Society is represented by 842 associations, and many working parties and sales of work also add to the income.

In 1888-89 the total income amounted to £27,653, the largest received in any year up to that time.

"India's Women" is published bi-monthly. Price, 1s. 6d. Leaflets are also issued from headquarters, 9 Salisbury Square, London, E. C.

Abroad.—The Society originally withdrew from the I. F. N. S. 31 missionaries and 17 stations, all in India. The plan of development has been to accept calls to new stations, as they have been made from time to time by local conferences or the committee in London, according as funds of the Society warranted enlargement. In conformity with this plan, missionaries were sent to China in 1883, to Japan in 1885, and to Ceylon in 1889. The mission staff in 1890 was as follows: Missionaries in home connection 117, of whom 18 are honorary (i.e. at their own

\* See "Our Sisters in Other Lands," April, 1889.

charges); assistants in local connection, 57; Bible-women, 139; native teachers, 368.

**Medical Work.**—There are hospitals and dispensaries at Amritsar and Peshawar, in the Punjab; at Haidarabad and Trichur in South India; and at Srinagar in Kashmir, where the valued physician died in 1889, after nine years' service with the Society. The report in 1889 mentioned that 32,469 patients were seen at the St. Catherine's Hospital in Amritsar the previous year, and 205 in-patients had been received. Five English ladies are connected with this hospital. At both Peshawar and Trichur over 4,000 patients were recorded in the register, and at the former place 84 received hospital treatment, of whom 58 were Afghans. At many other points much suffering is relieved by missionaries who have had some medical training.

**Educational Department.**—The Society occupies 46 stations in India, 3 in China, 2 in Japan, and 1 in Ceylon, and some form of school-work is prosecuted at almost every station. The total number of schools is 183.

**Calcutta.**—A normal school here for European and Eurasian girls has connected with it a training-class of about 30 Bengali girls. The "Central School" has over 100 Hindu girls, and there are not less than 13 other day-schools in the city and its suburbs. Some are attended by girls from families of high social position, while one is exclusively for sweepers.

A widows' training-class at Chupra, and a convert's home at Barrackpore, 15 miles from Calcutta, are noticeable institutions.

**Amritsar.**—The Alexandra School for girls, here, has had a record of 13 years, and numbers about 80 pupils, one of whom won the prize of a gold medal conferred by the lieutenant-governor in jubilee year. A school for the blind, with a blind Christian teacher, is a branch of St. Catherine's Hospital. Other schools are: in North India at Peshawar; at Sukkur in Sindh; and Haidarabad, the latter said to be "one of the best of its kind in India." In the south there are schools in the Madras presidency and in Travancore. In and about Masulipatam more than 1,200 children are gathered into 20 schools.

**Evangelistic Department.**—The Society aimed at zenana visitation from the first, and has always given its chief strength to that. Village missions are also coming into prominence of late. This claims to be the only zenana society for Mohammedans in the Calcutta district. In addition to the Moslem branch, they have many Hindu houses and purdah schools. Zenana pupils in Bengal sometimes pay a tuition fee. There is a large zenana work at Peshawar, where "the ladies have the *entrée* of every zenana in the city;" in Amritsar and Batala, in the Punjab; but a still larger in Tinnivelly in the Madras presidency, and at Trevandrum in Travancore. There are about 900 houses visited in these two places.

Village missions are strongest in the Punjab about Jandiala, Narowal, and Ajnala; within a day's visit of the latter are 85 villages. The staff here includes more than a dozen persons.

At Tarn Taran the people themselves contributed 600 rupees towards buildings required by the ladies.

The only stations belonging to the Society in China are Foochow, Shanghai, and Ningpo. In some places of the Foochow field 90 per cent of the Christians are men.

The Society sent two ladies to Osaka, Japan,

in 1888, where they engage in evangelistic work.

The committee during 1889 accepted the following calls for new work, to be taken up as soon as suitable workers and sufficient means are available, viz., a normal school for female teachers at Amritsar; a boarding-school for village girls in the Krishnagar district; a boarding-school for Christian girls at Kandy, in Ceylon; the establishment, in conjunction with the C. M. S., of the Buchanan Institution for training female workers in the diocese of Travancore and Cochin.

**Woman's Societies of the Church of Scotland (Established).**—Ladies' Association for Foreign Missions, including zenana work. Organized 1837. Ladies' Association for the Christian Education of Jewish Females. Organized 1845. The Fellow-workers' Union for Jewish and Foreign Missions. Headquarters, Edinburgh. Organized 1889.

The last of these is composed of young ladies. It affiliates with the Associations, to whose treasures the Union contributed £10 during the first year of its existence.

THE ASSOCIATION FOR FOREIGN MISSIONS has a home constituency of 32 presbyterian auxiliaries and 482 contributing congregations. The income reported for the year ending July, 1889, was: Income in Scotland, £6,690 13s.; income in India, £967 11s. Total, £7,658 4s.

The "News of Female Missions" is published quarterly, at 8d. per annum. A quarterly leaflet, "Fellow-workers," is also issued; and tracts and leaflets may be had from headquarters, 22 Queen Street, Edinburgh. The office-bearers, except the treasurer, are all ladies.

The force abroad is: Missionaries appointed in Scotland, 15; missionaries appointed in India, 11; native Christian agents, 82; non-Christian agents, 24; pupils enrolled in schools, 2,500.

The methods of work adopted by the Association are five in number, viz., orphanages and training institutions, schools, zenana-visiting, village teaching, medical work. There are two kinds of zenana work: (1) In fee-paying zenanas, where instruction in ordinary subjects of education is given, as well as the Bible-lesson; (2) in zenanas where no fees are paid, and the Bible only is taught. There were 283 zenanas of the first class, paying fees of 1,632 rupees, and 160 of the second class, mentioned in the last report.

The chief difficulty in school-work is to secure regular attendance. This the missionaries in India are trying to overcome by enforcing fees, so that parents may use authority to make their children attend. In Africa the parents think they should receive payment for sending their children to school. The lady missionary has charge of the industrial training as well as elementary education of the girls in the Blantyre Mission. The scale of salaries to native teachers in India varies from 7 rupees to 35 rupees per month. Young teachers trained in the mission, board in the institutions.

Work of the Association is located at Calcutta, Madras, Poona, Darjeeling, Gujrat, Sialkot, and Chamba, in India; and Blantyre, East Africa.

The largest share of school-work is in Calcutta, where are 890 pupils in 12 schools, viz., one institution for Christian girls, comprising orphanage, boarding-school, and normal class; ten

Hindu schools, and one Chamar. The superintending missionary spends one day a week in each school.

Of four schools in Poona, one in the most bigoted part of the city has 80 to 90 girls, mostly Brahmins. In each day-school there is a Sunday-school, in which a treat is allowed but once a year. In the Sialkot district three schools are for Mohammedans only, and one for Sikhs. In Chamba, one school is for high-caste Hindus, and another for both Mohammedans and Christians.

*Medical Work.*—The only undertaking as yet in this department is at Poona, where there has been one physician for several years. She has a dispensary in the city open on certain days of the week, and on other days dispenses in neighboring villages. Total attendance in the city in 1889 was 4,348. The greater number of cases were Hindus, of the middle and trading castes, with a proportion of Jews, Mussulmans, and a few Christians. The following picture of country dispensing is taken from Dr. Lettice Bernard's report:

"That in Bamboorda is held in the veranda of the school and a small room opening out of it. This is very convenient. I sit in the little room, and the patients come in turns and stand in the doorway; and when I have seen them all, I can just shut the door and make up the medicines quietly, while my sister speaks and sings to the women outside. Lately she has had a little American harmonium, which proves a great help in keeping their attention."

A hospital was opened in Poona in 1889.

*East Africa.*—The only lady at present in Blantyre went from Aberdeen in 1889.

*THE ASSOCIATION IN BEHALF OF THE JEWS* has five stations: Alexandria, Beirut, Constantinople, Salonica, and Smyrna. Of 950 girls taught in the schools, 778 are Spanish Jewesses. A nurse is called for in Smyrna.

At Alexandria there are two schools—one of them for the poor alone. The missionaries are called upon to teach a variety of subjects—English, Italian, needlework, besides reading German with German Jewesses. Bible lessons are given in Arabic and other tongues. The receipts of the Association for 1889 were £524 10s. 2d.

*Woman's Societies of the Free Church of Scotland.*—Ladies' Society of the Free Church of Scotland for female education in India and South Africa. Founded 1837. Ladies' Association in connection with the Free Church Mission to the Jews. Ladies' Continental Association in correspondence with the Free Church.

Appointments for India are made by an Edinburgh committee of ladies, and for Africa by a Glasgow committee, while the presidents and secretaries of the Society are all gentlemen.

The constituency of the Society was represented in 1889 by: contributing congregations, 627; contributing Sunday-schools, 77. Over 300 congregations did not aid the Society.

The income covered fifteen months, and amounted to a little above £9,000.

The publications of the Society are reports and quarterly papers, and "Woman's Work in Heathen Lands," a small quarterly, price 1d. J. & R. Parlane, Paisley, publisher.

The force abroad: European and Eurasian agents in India, 21; European and Eurasian agents in Africa, 13; native Christian agents 181; total pupils under instruction, 6,738.

*India.*—The work of the Society in India is conducted in eight different languages, and at five large centres: Calcutta, Madras, Bombay, Poona, and Nagpore.

*Schools.*—There is a boarding-school for Christian girls in each of these cities, in which "they are brought up as much as possible in native style." "They are all trained to household work, and to habits of cleanliness, punctuality, modesty, truthfulness, and kindness to one another. . . . They are all educated in their own vernacular, and almost all learn English also." The Madras and Calcutta schools are the largest, each numbering over 90 pupils. Several graduates of the latter school have taken University degrees, and hold influential positions. There is a boarding-school in Pachamba (Bengal) for girls from the jungle whose arrangements are accordingly primitive; numbers, about 50. Caste day-schools are in all the cities, those of Madras (including a day normal school) having a special reputation. Of both city and village day-schools the Society maintains fifty, with an attendance of 4,000 pupils. Most of them are held in hired houses. The great majority of pupils are from well-to-do Hindu families, but there are small schools for Mohammedans at Poona and Madras, and Ben-Israel schools in Poona and the Madras presidency. A training-home for widows was opened with two members, at Calcutta, in 1889.

*Zenana Visitation.*—A new zenana home, accommodating fourteen workers, was erected at Calcutta in 1888. The number of pupils in the city that same year, in houses and zenana schools, was 727. In Madras, where the mission is 52 years old, the house-pupils are about 170, with four visitors. One of the latter recently retired, to the great regret of the mission, after 33 years of service. A Jubilee bungalow for zenana workers was built at Bombay, where a few of the pupils visited are Parsis. The common experience at all the stations is described by one of the workers at Nagpore: "The zenana teacher has disappointment as well as encouragement in her daily rounds. . . . When the application of the [Bible] lesson is being gone through, we notice that attention flags; but at other times, again, the interest is kept up to the end, and the questions that follow show real desire to know more of Christ." Secular as well as religious instruction is given.

*Medical Work.*—Several stations have called for fully qualified medical women, and a beginning has been made in this department, with the intention of developing it as soon as practicable. Two medical ladies fully qualified are stationed at Madras.

*South Africa.*—At Lovedale, in Kaffraria, the girls' boarding and training school has over 100 pupils, and carries on both the educational and industrial departments, which have been features of that well-known institution. A class for musical drill was an innovation of 1888.

In Transkei a great many sewing-schools are reported, and mending, darning, knitting, and cutting out clothes. One of the missionaries says: "I know some people give the things sewn in these schools to the pupils. I do not in any case, for I do not wish to spoil these people or their children. Many of them are better off than most of the people that keep up the funds of our foreign missions. . . . I do not believe in letting the ladies' money go to

pay for work that should be paid for by government."

In Natal, there are "Homes" for Zulu girls at Pietermaritzburg, Impolweni, and in the Gordon Memorial Mission, all of which furnish interesting reports. At the first, we hear of weeping and praying girls, and a children's Bible and singing class; at the second, there is now and then "a wild Maria," but most of the fifteen girls are interested in the Bible: one of them made the bread for a social meeting of the temperance society. At the Gordon Mission women are coming on faster than the men. The 30 members of the Home go to day-school in the forenoon, and in the afternoon learn sewing, household and garden work. Some of the girls are refugees from heathen homes.

The New Hebrides.—The Society has never sent single ladies to the South Seas, but has a married missionary on both Anietyum and Futuna. They train a few girls at a time in their own homes, and lead church-singing, superintend schools as they can, and bear up many parts of the general work, while making a Christian home, forty miles from another white family and six months from the post-office.

THE JEWISH ASSOCIATION has had a school for German Jewesses in Constantinople for forty years. In 1889 there were 250 pupils, and "as many tokens of the Lord's blessing." While this school is under care of the Edinburgh Association, another at Tiberias is supported by Glasgow ladies.

THE CONTINENTAL ASSOCIATION contributes £100 per annum to the funds of the general society.

**The Scottish Episcopal Church. The Central Committee and Church-women's Association for Foreign Missions.**—This Committee was formed in accordance with a resolution of the Board of Missions in 1875. The management consists of a central committee of ladies, a convener, general secretary, and treasurer. The aim is to have a correspondent in every diocese, and a congregational correspondent in every congregation. The Committee meets once a month. Membership of the Association is over 3,000. An annual fee of 2s. 6d. is required of each member. The annual income amounts to about £750, and boxes and needlework of as much value are also sent abroad.

The Association publishes the "Mission Chronicle." Office, 122 George Street, Edinburgh.

Efforts abroad are in aid of the church missions in the diocese of St. John's, Kaffraria, and in Chanda, Calcutta district, India.

A juvenile guild is a branch of the association.

**Zenana Mission of the United Presbyterian Church of Scotland.** Organized 1880.—A Missionary Prayer Union was formed in 1889, with purpose to pray daily for the zenana missions. There are now congregational committees (corresponding to auxiliaries), 200 to 300; presbytery and district committees (corresponding to presbyterial societies), 33. The income in 1889 was £4,307 12s. The "Quarterly Record" is published at College Buildings, Castle Terrace, Edinburgh; price, 4d.

The mission has 18 agents abroad, of whom 1 is a physician. Of the whole number, 11 are in Rajputana, India; 1 in Manchuria, China; and 6 in Old Calabar, West Africa. The na-

tive assistants are about 50, schools for girls 12.

India.—The stations are Ajmere, Nusseerabad, and Jeypore, in all of which many zenanas are visited. In Ajmere are the only physician and hospital of the society. The largest of the Christian girls' boarding-schools is at Nusseerabad, and numbers over 50 boarders. There is an industrial department, and the girls can make all their clothes without help.

Manchuria.—The only agent of the mission here is the wife of the missionary physician at Hai-chung, who, while the doctor treats the patients medically, herself imparts religious instruction in a small woman's ward fitted up in her apartments.

Old Calabar.—The stations are Creek Town, Duke Town, and Ikorofiong. One of the missionaries, who has taken hospital training, has charge of a dispensary at Duke Town. The teaching at all these stations is very elementary.

**LADIES' KAFFRARIAN SOCIETY.**—Three missionary agents (one of them unsalaried) are laboring at two stations in Kaffraria as representatives of this Society. Their most important undertaking is a girls' boarding-school at Emgwali. The school is supported by local contributions as well as funds of the Society, but is under joint management of the Ladies' Society and the Foreign Mission Board.

**Female Association of the Presbyterian Church of Ireland for Promoting Christianity among the Women of the East.** Organized 1873.

—The management of the Association is in the hands of secretaries, treasurer, and a large general committee (all ladies), consulting and examining committees (gentlemen), and an executive committee (ladies and gentlemen).

The income for 1890, including offerings from Sunday-schools, was £3,906.

"Woman's Work," a small quarterly, is printed at 16 Howard Street, Belfast; price, 2d.

Abroad.—The force in 1889 was represented by: missionaries, 9, of whom 1 is a physician; native helpers, 56; schools, 19; pupils, about 1,100. Three stations are occupied in Western India,—Surat, Borsad, and Ahmadabad,—from each of which the district is worked.

In Surat are a normal class for training Christian teachers, an orphanage, an Anglo-vernacular school, and 5 heathen day-schools. In one of the latter the majority of the girls are Parsis, who, having fewer holidays than the Hindus, make greater progress. At Ahmadabad Dr. Mary M'George had an average daily attendance of 50 at her dispensary during the year 1888, of whom more than 600 were under three years of age. Some patients came 25 miles for treatment, and four came from a village where the year previous every woman had died from the missionary. Four girls' schools are connected with Ahmadabad station, one containing many daughters from Jain families, one for Mohammedans, and one for Christian girls. A medical work has been opened at Borsad.

The Association has one missionary doing Evangelistic work in Newchang, China, and sent its first lady to join the new mission in Manchuria in 1889.

#### GERMANY.

**Berlin Woman's Missionary Association.**—This has been in existence nearly

fifty years. It is represented by six missionaries in India, at Secundra and Benares. It also pays the salary of the superintending sister at an orphanage, the Talitha Kumi, in Jerusalem.

**The Berlin Woman's Mission for China.**—This operates entirely by itself, has an annual income of about \$4,000, and sustains one or two missionaries.

Other women's societies, among which is one at Stockholm, Sweden, send grants in aid for China through the Basle Mission, and to North Africa through the North Africa Mission.

**Woodstock.**—(1) Mission station of the S. P. G. (1855) in Cape Colony, South Africa, near Cape Town, with 1 missionary.

(2) A town in Landour, Punjab, India, 15 miles east of Dehra. A seminary for girls, both foreign and native, was commenced here in 1874 by the Presbyterian Church (North). Five missionary ladies are now in charge of the work, which is almost self-supporting.

**Worcester,** a town in Cape Colony, South Africa, 80 miles by rail northeast of Cape Town. Population, 3,788. Mission station of the Rhenish Missionary Society; 1 ordained missionary, 1 female missionary, 2 native workers, 2,568 church members, 633 day-school children; S. P. G. (1885); 1 missionary.

**Worcester, Samuel Austin,** b. Worcester, Mass., U. S. A., January 19th, 1798; graduated University of Vermont, 1819; Andover Theological Seminary, 1823; ordained August 25th, 1825; left as a missionary of the A. B. C. F. M., August 31st, for the Cherokees, reaching Brainerd October 21st, 1825. Through his labors and those of other missionaries, the Indians had made great progress in Christian knowledge and the arts of civilized life. They had become largely a nation of farmers and artisans, had organized with the advice of the United States Government a regular and creditable government, were to a considerable extent supplied with schools and religious institutions, and many were members of Christian churches.

Georgia had long coveted the lands of the Indians. Some had been relinquished by the owners, some had been obtained from them by artifice, and the Indians removed beyond the Mississippi. But those who remained at this time were utterly unwilling to leave their comfortable homes, their cultivated fields, and the graves of their fathers, and remove to a distant and unknown wilderness. In spite of repeated treaties which recognized them as a nation, and which were declared to be "binding on the State of Georgia, her government and citizens, forever," the legislature in 1830 passed a law extending complete jurisdiction over the Cherokee nation, forbidding any white man residing within the limits of the Cherokee nation without a license or permission from the governor, and requiring an oath to submit to and support the jurisdiction of Georgia, declaring also that whoever violated this law should be considered guilty of a high misdemeanor, and imprisoned in the penitentiary at hard labor for four years. The law also disqualified the Cherokees from testifying in any court of justice. Copies of this law were sent to the missionaries at the four stations. They, considering this unconstitutional law not only against their rights, but the rights of their people, resolved to seek protection from the Supreme Court of the United States, and con-

tinued their work. On March 12th, 1831, Mr. Worcester, Mr. Thompson, and Mr. Proctor had been arrested and made prisoners by a detachment of the "Georgia Guard," consisting of 25 armed and mounted men. They were released by the judge on the ground that they were agents of the general government. The governor, on May 6th, wrote to Mr. Worcester and Dr. Butler requiring them to leave the country "with as little delay as possible," under the penalty of arrest. Both replied that they could not in conscience obey the law enacted for their expulsion. On July 7th they were arrested and treated with great indignity. The details of the shocking treatment they received from the military, both on the march and in the filthy prison where they were kept for eleven days, are given in a letter written by Mr. Worcester, and published in the Annual Report of 1831. They were released on a writ of *habeas corpus* under bonds to appear for trial before the court in September. On September 25th they were tried, and Mr. Worcester, Dr. Butler, with eight others, were sentenced to four years in the penitentiary with hard labor. On arriving at the prison they were offered a pardon by the governor if they would take an oath to support the government in its measures against the Cherokees, or abandon their missionary work and leave the Cherokee country. Mr. Worcester and Dr. Butler, believing that obedience to such laws would be treason against God, refused, and were shut up in prison with felons. The case was brought before the Supreme Court of the United States in 1832, and Chief Justice Marshall declared that the laws of Georgia extending her jurisdiction over the Cherokee country were repugnant to the Constitution, to treaties, and to the laws of the United States, and therefore null and void. The court issued a mandate ordering all the proceedings against the prisoners to cease, and that the missionaries be dismissed. Georgia refusing to obey the mandate, the missionaries gave notice that they would move the Supreme Court for further proceedings in their case. Owing to the excitement in South Carolina over the revenue law of the United States, and the fear that if the missionaries should persevere in their suit, and the Supreme Court endeavor to enforce its decision in their favor, not only Georgia but Alabama and Mississippi would join the South Carolina nullifiers; as the governor had promised that if they withdrew their suit they should be unconditionally discharged; as, moreover, the decision of the Supreme Court established the right of the missionaries to a discharge from confinement, and the right of the Cherokees to protection by the President from the aggressions of Georgia; and finally as the law under which they had been imprisoned had been repealed, they, acting under advice of friends, in which the Prudential Committee concurred, withdrew their suit. After sixteen and a half months' imprisonment, they were released, January 14th, 1833, returned to their stations, and resumed their missionary work. While in prison they were permitted to read the Scriptures and pray with the prisoners confined in the same building; and during the last six months Mr. Worcester preached every Sabbath to the prisoners. A spirit of inquiry was awakened, and many, it is believed, were savingly benefited.

Mr. Worcester removed, in April, 1835, with the press to Dwight, and spent the summer

among the Cherokees of Arkansas, mostly in making arrangements for printing. He afterwards was stationed at Park Hill among the Cherokees in the Indian Territory, to which they had been removed, and here he died April 20th, 1859.

**Wotyak Version.**—The Wotyak belongs to the Finn branch of the Ural-Altaic family of languages, and is spoken in the provinces of Wiakta and Orenburg, Russia. The Wotyaks profess adherence to the Russian Church. The four Gospels were translated in 1823, or soon after, by a learned Wotyak, and the printing of St. Matthew was begun by the Russian Bible Society. But the work was broken off and left unfinished through the suspension of that Society. A version of Matthew was published by Prince Lucien Bonaparte in phonetic type in 1863. In the year 1878 the British Bible Society authorized Dr. Aminoff to prepare a version of Matthew. With the assistance of a Wotyak teacher he executed the work, which, after a careful revision by the Academician Wiedermann, was published in 1882.

(*Specimen verse. Matt. 5:16.*)

Ози медъ пишѣдѣзъ югытъ-ты тилѣдъ  
адѣмпиѣсѣзѣинъ, собѣзъ медъ адѣдѣзъ  
дѣдѣзъ уждѣсѣ тилѣдъ, сѣ-но медъ сѣдѣзъ  
Аилъ, кудѣзъ, пѣзъ. выльнъ.

**Woyenthin**, a station of the Berlin Missionary Society in South Transvaal, Africa (1884); 1 missionary, 240 communicants.

**Wray, John**, missionary of the L. M. S. to British Guiana, South America, from 1807 to 1837. Sent to Demerara in 1808, at the request of a wealthy planter, and made his home on the plantation. Here his labors were so much blessed that a great reformation took place among the Negroes, not only on this estate, but also on the surrounding ones. They changed their ways of living, and became earnest and attentive listeners to his preaching. He married in 1809. It soon became apparent that the local government of Demerara was not in sympathy with the religious work among the Negroes, and it placed so many obstructions in the way of the missionaries that Mr. Wray was sent to England to obtain, if he could, a modification of the laws of the country. He partially succeeded, and returned to Demerara in 1811, where he continued his work for two years, when he was succeeded by Mr. John Smith.

After this he divided his time among the crown Negroes at the stations of Georgetown and Berbice. The laws which he had secured for the amelioration of the condition of the Negroes being misunderstood and not carried out, he found it necessary to go a second time to England in their behalf. Although the mission work progressed, the Negroes were very much hindered in their religious worship. Their books were taken from them, and overseers accompanied some of them to their meetings "to judge of the doctrines held forth to the Negroes."

Their persecutions irritated them beyond endurance, and a serious insurrection broke out, many of them leaving the plantations and going into the back country. On Mr. Wray's return to Berbice he was requested by the governor to explain to the slaves the new laws, so

that there might be no further trouble. He seems to have succeeded, and quiet was restored in his mission, where he remained for 13 years, when, worn out with his work, he with his wife sought rest and health in England. In 1832 he returned to Berbice and continued his work for eight years longer, when he died of yellow-fever at New Amsterdam. In 1834 the emancipation of the Negroes removed the obstacles to the progress of the mission work, and many stations and schools became self-supporting.

**Wright, Alfred**, b. Columbia, Conn., U. S. A., March 1st, 1798; graduated Williams College 1812; Andover Theological Seminary 1814; ordained, December 17th, 1819, at Charleston, S. C.; and appointed by the A. B. C. F. M. as a missionary among the Choctaw Indians, arriving at Elliott, Choctaw Nation, December, 1820. For more than thirty years he labored among the Choctaws, and died at Wheelock, March 31st, 1853. He held meetings for prayer or preaching at different places, though feeble in frame, never without pain, and for twenty years unable to walk more than a few rods, or raise with his hands more than a few pounds' weight without bringing on severe distress from heart-disease. He was emphatically a man of prayer. This was the secret of his success. After a long day's ride of ten hours, staying at a miserable hut, wearied and sick, he would call all the family together, read a chapter in the Bible by firelight, sing a hymn from memory, and offer a prayer. "Few ministers of Christ," says one, "have labored more faithfully or more successfully."

**Wright, Asher**, b. Hanover, N. H., U. S. A., September 7th, 1803; studied one year at Dartmouth College and three in Andover Theological Seminary; ordained October 12th, 1831; joined the Mission to the Senecas, November 9th, 1831, and continued to labor faithfully for that people till his death at Upper Catteraugus Station, April 13th, 1875, in connection with the A. B. C. F. M. till 1870, and then in connection with the Presbyterian Board. "He was a transparently good man, and gained in a remarkable degree the confidence of the red men and the high esteem of the whites in this vicinity. The Indians feel that they have lost a wise counsellor and true friend."

**Wright, Austin H.**, b. Hartford, Vt., U. S. A., November 11th, 1811; studied at Dartmouth College and Union Theological Seminary, N. Y., and in the medical department of the University of Virginia, Charlottesville, preaching during his term of study to the destitute population of the "Ragged Mountains;" sailed March 9th, 1840, as a missionary of the A. B. C. F. M. for Smyrna, to join the Nestorian mission and take the place in Orooniah of Dr. Grant, whose impaired health and large plans for the Mountain Nestorians led him to seek a residence in one of the mountain districts of Koordistan. His perfect acquaintance with the Turkish, Syriac, and Persian languages, coupled with his knowledge of medicine and his kind, gentle courtesy of manner, gave him much influence among all classes of the people, and the business connected with the authorities, and intercourse with the higher classes, was to a great extent in his hands, or

carried on through him. The Persian officials and other gentlemen appreciated very highly the courteous, dignified, yet simple ease and grace with which he met them, so that, as a Nestorian preacher said, "the Khâns used to love to see him."

In 1860 he returned to the United States, but, though feeble, he engaged in labors for the Nestorians. In the early part of 1863 he began the revision of the New Testament in Syriac, preparatory to its being electrotyped and printed by the A. B. S. in pocket form. To this the Psalms were added, and he took back with him on his return in 1864 the first few copies, which were hailed with delight by the people. A short time before this it was determined to undertake the translation of the Bible into Tartar-Turkish for the Mohammedan population of Azerbaijan. This work was assigned to Dr. Wright in conjunction with Mr. Rhea, and he entered upon it "with great zest, amounting to enthusiasm." But in three months he was called to a higher service. He died January 14th, 1865, of typhoid fever, after an illness of twelve days.

"The long period of his service, and the great amount of labors which he performed during that time as a preacher, physician, coadjutor in the department of the mission press, and last, not least, as an effective shield to succor the poor oppressed Nestorians,—standing as a daysman between them and the Mohammedans, by whom he was profoundly respected,—as well as the scrupulous fidelity, the marked ability and almost unerring judgment, though so modest in his bearing, and the untiring

energy and endurance with which he cheerfully met and discharged all his multifarious and arduous duties, rendered his death a loss to the mission which seemed to them entirely irreplaceable."

**Wuchang**, the capital of Hupeh, China (see article), is situated on the south bank of the Yangtze River, near Hankow (q.v.). Mission station of the Protestant Episcopal Church (1867); 2 missionaries (1 married), 1 female physician, 100 communicants, 77 day-scholars, 40 boarding-scholars. L. M. S. (1865); 1 missionary, 2 native preachers, 90 church-members, 20 Sunday-scholars, 24 day-scholars. Wesleyan Methodist Missionary Society; 1 missionary, 1 chapel, 75 church-members, 35 Sabbath-scholars, 2 day-schools, 35 scholars. C. I. M. (1874); 3 missionaries and assistants, 11 communicants.

**Wuhu**, a city in Nganhwui, China, on the Yangtze River, 50 miles above Nanking. Mission station of the Methodist Episcopal Church (North), 1884; 2 missionaries and wives, 2 female missionaries, 1 out-station, 2 churches, 36 members, 3 schools, 40 scholars. Protestant Episcopal Church; 2 native pastors, 15 communicants, 46 scholars.

**Wupperthal**, a town in Western Cape Colony, South Africa, near the coast, on the Olifant River, a little southeast of Clan-William. Mission station of the Rhenish Missionary Society; 1 missionary, 1 female missionary, 8 native workers, 750 church-members, 150 school-children.

## Y.

**Yahgan Version.**—The Yahgan belongs to the languages of South America, and is spoken by the inhabitants of Tierra del Fuego, about 3,000 in number. The Rev. Thomas Bridges of the South American Missionary Society, who has been working for more than a decade among the Fuegians, translated the Gospel of Luke, which was published in an edition of 1,000 copies by the British and Foreign Bible Society, printed according to Ellis' phonetic system, in 1880. The Acts of the Apostles were published by the same society in 1883, and in 1884 the Gospel of John was issued. Up to March 31st, 1889, 2,529 portions of the Scriptures were disposed of.

**Yang-Chow**, a prefectural city in Kiangsu, China, 75 miles southeast of Nanking. Mission station of the China Inland Mission (1868); 1 missionary and wife, 5 female missionaries, 87 church-members, 1 girls' school, 23 scholars.

**Yao Version.**—The Yao belongs to the Bantu family of African languages, and is spoken by the Yaos, who occupy the country to the east and south of Lake Nyassa, including the Scotch stations of Blantyre and Livingstonia. A translation of the Gospel of Matthew was made by the Rev. Chauncey Maples, of the Universities' Mission, who has been laboring several years at Masasi, in Africa, with Bishop Heere. On the recommendation of the

latter, the British and Foreign Bible Society published in 1879 an edition of the Gospel of Matthew under the editorship of the translator, who had gone to England to read the proofs. As Mr. Maples' translation contained many Swahili words, the British Bible Society published in 1888 a version of the four Gospels and the Acts, made by the Rev. A. Hetherwick of the Blantyre Mission of the Presbyterian Church of Scotland, in pure Yao. The translator carried the translation through the press in England.

**Yates, William**, b. Loughborough, Leicestershire, England, December 15th, 1792; educated for the ministry at Bristol College; ordained August, 1814, and sailed for Calcutta as a missionary of the Baptist Missionary Society April 16th, 1815. He joined the mission at Serampore, devoting himself to preaching and assisting Dr. Carey in the translation of the Scriptures. After Dr. Carey's death he gave himself to translation and preparation of textbooks. He visited England and the United States 1827-29, re-embarking for India in 1829. After his return he was stationed at Calcutta. He translated the whole Bible into Bengali, the New Testament into Hindi and Hindustani, and the New Testament and large portions of the Old Testament into Sanskrit. He was engaged in preparing the latter for the press, and a large part had been already printed. He hoped by the close of another year to complete

the translation of the Scriptures into this sacred and learned language of the East. But his health failing he sailed for England in 1845, but died on the passage up the Red Sea, July 3d. A few years before his death the East India Company offered him a salary of \$6,000 if he would enter their service, and prepare books for the government schools. On his declining it, he was offered \$3,000 for half of his time, but he refused this also, preferring the work of a missionary on less than half the salary offered.

**Yezidees, The.**—**ORIGIN.**—The Arabs who accepted Mohammed called those who did not "el johaleen," i.e., the ignorant ones. Among the latter was Yezeed ben M'awe, who refused to accompany M'awe his father, who, as an attendant upon his person, followed the fortunes of Mohammed. Many of "the ignorant ones" rallied around Yezeed, and he became the nucleus of the sect which appropriated his name. The Yezidees possess a lineage tree by means of which they trace their religious origin back to him.

They seem to have existed as a very loose organization until about 1106 A.D., when there arose among them one called Sheikh Hâdi (elderly guide), from the region of Damascus. He removed to the district of Hakkari in Koordistan, and dwelt in Mount Lalish, which is eleven hours from Mosul. He died in 1162 A.D. (558 A.H.), and his tomb, called Sheikh Âdi, is hard by the village of Ba'adri, where also is the temple of the Yezidees. This place, as their religious centre, is by them esteemed superior to Mecca.

Sheikh Hâdi gave more consistency to their religious system,—still very confused and illogical,—and greater stability to its organization, by committing to writing its tenets and traditions. His work, which is the authority for their belief, is named "El Jilweh," i.e. "The Revelation." The original is the only copy existing, and it is esteemed as most holy, and is guarded at Sheikh Âdi with the most scrupulous care. It is in the Arabic language and character, and speaks in this wise of the origin of the Yezidees: "'O angels!' said the great God, 'I am going to create Adam and Eve. They will become mankind, and from the lines of Adam's palm (?) shall proceed Shehr ben Jebr, and of him a separate community will appear upon the earth, that of Azazâel, i.e., of Tâoos Melek, which is the sect of the Yezidees.' Then He sent Sheikh Hâdi ben Musaffer from the land of Damascus, and he came and dwelt in Mount Lalish." Sheikh Hâdi was an Arab, and was held in high repute for his piety and devotion. He holds among the Yezidees the same place that is given to Moses by the Jews, and that is claimed by the Moslems for Mohammed.

**NUMBER AND LANGUAGE.**—This degraded yet interesting people number probably about 200,000 souls, but they are scattered over a belt of territory 300 miles wide, extending in length from the neighborhood of Aleppo in northern Syria to the Caucasus in southern Russia. The mass of them, however, are to be found in the mountains of Northern and Central Koordistan, and among the Sinjar hills of Northern Mesopotamia.

While it originated with the Arabs, this religion was not confined to them, but in the course of centuries received adherents from

Koords and the nominally Christian sects. We cannot otherwise account for their wide dispersion.

Though the mysteries of their religion are in the Arabic language, Koordish is more generally spoken by the Yezidees than Arabic; while those about Mosul and in the Sinjar hills use both.

**GENERAL CHARACTERISTICS.**—They are an agricultural people and live in fixed abodes. As a rule they are neater and cleaner in their homes, and in respect to person and dress, than either Arab or Koord; while their style of dress follows the fashions of the people by whom they are surrounded, except that the shirt has a square-cut opening in front.

Generally speaking they are quiet and industrious, but in the regions of Redwan and Midyat they are given to house-breaking and highway robbery, and also hire themselves to Moslems and Christians for the commission of deeds of blood, so that they are the terror of those districts. In the Sinjar hills, where they constitute almost the entire population, they are restive and refractory. Everywhere they entertain a deep-seated hatred of Moslems, whether Arabs or Koords, who treat them in return with contempt and oppression. Polygamy is allowed among them to the limit of six wives, but its practice is not so general as with the Moslems, who are limited to four wives. The drinking of raki (a mild alcohol) is enjoined as a religious rite in connection with the worship of Melek Tâoos, and accordingly intemperance is common.

**CIVIL ORGANIZATION.**—They are recognized by the Turkish Government as a distinct religious community. Their civil head is an Emir whose title is hereditary, and who is of kingly origin,—if "El Jilweh" is to be believed. It says: "Then Melek Tâoos came down to earth for our sect, i.e., the Yezidees, the disturbed, and appointed kings for us, besides the kings of ancient Assyrians, Nisroch, etc. . . . And after that we had two kings,—Shâboor (Sapor) First and Second,—who reigned 150 years; and our Emirs, until this day, have descended from their seed."

The Emir never marries outside of this royal line. He is lord of the persons and affairs of the Yezidees, and his power over them is absolute. His person is considered holy, and all his acts are regarded as righteous. To him belongs administrative power and dignity, as well as ecclesiastical, and all the dealings of the Turkish Government with the Yezidees are through him. For this reason he resides most of the time in Mosul. The present Emir is Meerza Beg.

The Yezidees have written laws and statutes which are read and interpreted only by the members of one family—that of Mella Haider, the Bussovahite. The secretary of the Emir is always chosen from this family.

**RELIGIOUS SYSTEM.**—*Doctrine.*—They believe in God as the supreme deity and the first cause of all things; but they have nothing to do with Him either in the way of worship or service.

They believe in one Melek Tâoos, or King Peacock, who is eternal, an emanation from God, became incarnate as Lucifer, deceived Adam and Eve as Satan, is one of the seven gods who in turn rule the world for 10,000 years (some affirm 7,000) and who, having now

governed it for the last 6,000 years, has yet 4,000 years in which to reign.

They believe in one Sheikh Hâdi, called also in "El Jilweh" 'Abd Tâoos (servant of Tâoos). They call him the god of that which is good, of day and of life; say that he is descended from the divine nature, or, at least, is so honored of God that whatever Sheikh Hâdi wills comes to pass; and that when upon the earth he revealed to his disciples revelations, secrets, a knowledge of the unseen and of prophecies. In his book he claimed to be sent both of God and of Melek Tâoos. The second assertion of "El Jilweh" is: "He (Melek Tâoos) sent 'Abd Tâoos to this world that he might separate truth from error and make it known to his people; and the first step to that is by tradition, and afterward by this book 'El Jilweh' which the uninitiated must neither read nor behold." His claim to have been sent of God is made farther on in the sentence quoted at length when stating the origin of this sect. They say also of him, "The Yezidees' god descended in this era and both taught and established us." Sheikh Hâdi associated himself with God in stating farther on in his book that "He afterwards came and dwelt in Lalish." Is there in Sheikh Hâdi an effort at the reconciliation of God and Melek Tâoos, or the union of the two eternal principles (according to Zoroaster) of good and evil, in order to secure a reconciliation of man with each, and with both together, through worship at the shrine of one who stood for both?

They believe in six other gods. "El Jilweh" says: "He created six gods from himself and from his light; and their creation was as one lights a light from another light." (Compare the Parsi doctrine of Ahura Mazda and his six gifts.)

They accept of Christ as the "Light of God," and say that He cannot die; also that He is a Saviour and will come again. But all these are evidently accommodations to the Christian sects with whom they are brought into contact. In the same way the Yezidees about Redwan have attempted to accommodate their tenets to the Christian doctrine of the Trinity.

They hold to the Transmigration of Souls, but subject to the caprice of Melek Tâoos, for "El Jilweh" says: "I (Melek Tâoos) will not allow one in this wretched world longer than the time determined by me; and if I desire it I send him a second or a third time into this world, or some other, by the transmigration of souls." When righteous souls return they enter into men, but wicked spirits are sent back to reside in the beasts. Yet along with this they hold to a Resurrection, when Sheikh Hâdi will carry all the Yezidees to paradise on a tray borne upon his head. They hold to a future judgment and punishment for all—except the Yezidees. "El Jilweh" says: "I (Melek Tâoos) punish in other worlds those who do contrary to my laws." They have Islamic notions of paradise as a place of eating and drinking, together with the pleasures of physical love. They claim to receive the Old Testament, the New Testament, and the Koran, but reverence the Old Testament more than either of the others. This acceptance is, however, a qualified one, for "El Jilweh" says: "The books of those who are without I accept in a sense; i.e., those that agree with and conform to my statutes. Whatsoever is contrary to these they have altered."

*Ecclesiastical Polity.*—This has the form of a religious oligarchy, is composed of six orders besides the Emir, which are chiefly hereditary and confined to as many distinct families. These orders are:

(1) The Sheikh.—He is called Sheikh Mengah, which is the name of a district comprising the regions of Mosul, Amadiéh, and Zakho. He is the chief ecclesiastic of the sect, and corresponds to the Sheikh ul Islam. He ranks next to the Emir, who is the religious as well as political head, even as the Sheikh ul Islam to the Sultan, who is also the Caliph. He is the guardian of the tomb of Sheikh Hâdi. The insignia of his office are a kind of girdle which is worn about the body, and a netting of catgut which is carried in the hand. He is supposed to prophesy, and has paradise in his flowing sleeves, sections of which he disposes to purchasers according to the sums received. Whenever the Sheikh appears among the people they submit themselves to him in lowly reverence and humility. The last Sheikh was named Nâsur, but he died recently, and the name of his successor has not yet been ascertained.

(2) Sheikhs.—This order was founded by Sheikh Hâdi. Every Sheikh traces his lineage back through a regular succession to a Patriarch who is regarded not only as the bestower of the office of Sheikh, but also as the assistant and advocate of those in his line who exercise the office, and as the avenger of all injuries inflicted upon them. For this reason no Yezidee dares to return the smiting of an ecclesiastic. Each Sheikh has the privilege of doctoring a special disease. The Sheikhs frighten their followers into giving presents and alms according to their will by threatening to punish them, upon refusal, with pestilence, fever, distress, sickness, and pains, or the control of their enemies over them,—such power being supposed to reside in them.

From this order comes the Mella, who is the instructor of youth, the guardian of "the book," of religious mysteries, and of the interests of the sect. He is also the secretary of the Emir, and in his family alone are reading and writing allowed. The office is hereditary, and the present incumbent is Mella Haider.

(3) Peers.—They are the Nazarites who take vows of celibacy and devote themselves and their property to Sheikh Hâdi. To them appertains the conduct of hair-dressing and of the fasts and feasts. They are also intercessors, and perform their function upon certain heaps of stones in the neighborhood of Sheikh Âdi, where they continually reside.

(4) Koochiks.—The word is Koordish and signifies dancer. These attend to the service of the tambourines, praises and songs. They order and conduct the sacred dance upon the feast-days. They praise the gods Hâdi and Tâoos with tambourine and fife until they swoon in a trance, when they utter strange sounds and language. They declare what is revealed to them in dream, trance, and vision, and are reckoned as prophets. They are said to have the power of life and death,—probably through the influence of magic.

(5) Kowals—"speakers." These are the priests proper, to whom pertain the duties of imparting religious instruction to the people, and of sepulture. All instruction is oral, in which they profess to be guided by an "inner light" to which all, even the Emir, must give

heed. Whenever a Yezidee is about to die he is visited by a Kowal, or his agent, who removes the dying man's sins by transferring them to himself. They divide with the Peers the function of intercessors, and to them belongs the privilege, each year, of bidding for the concession of conducting the "Sanjak Tâoos" (see Worship) among the Yezidee villages. They never use a razor upon their heads.

(6) Fakirs.—These constitute the lowest order of the priesthood. They are entrusted with the assembling of boys and girls and the instruction of them in the tambourine, in dancing and religious evolutions. They are married, have a salary, live in Sheikh Âdi, and are the janitors of that holy place.

*Worship*.—Objects of. Melek Tâoos through his "Sanjak," or symbol, which is a sacred brazen cock one eye of which is marked over by a cross.

Sheikh Hâdi, who is still a god though his body be dead, and who receives divine honors at his tomb in Sheikh Âdi. Forasmuch as he was also sent of Melek Tâoos, the sacred cock stands for him also, so that he is worshipped at the same time with Melek Tâoos; and at his tomb the "Sanjak" of Melek Tâoos is revered equally with the tomb. The two eternal principles have thus equal honor, and by this arrangement no one can worship the one without equally worshipping the other. Here again there seems to be an attempt to accommodate something to their needs from the Parsi religion. In the Vendidad the cock is a sacred bird—the bird of Sraosha, who is Obedience to the law of Mazda and chief of the Yazatas and their leader against the leader of the demon host, Aeshna Dæva. The Yezidees seem to combine the two principles and so make the cock represent both.

These two gods are the chief objects of their worship, and the tomb of one and the sanjak of the other are the symbols employed to bring them before the worshippers.

The sun is regarded as an exalted spirit without whom there would be no stability to the universe, and therefore worthy of respect and worship.

Fire, more especially as lightning and flame, is considered a sacred element, and is worshipped by adoration.

They have also a bronze image of an ox which they worship at a festival in November.

The tombs of departed Sheikhs are regarded as holy, and in religious rites conducted at them the assistance of those entombed therein is specially invoked.

*Forms of Worship*.—The "Sanjak Tâoos" when carried to a village is accompanied by Kowals, who march before it with timbrel and pipe. It must remain in the village over night, and the Yezidees must drink "raki" in its presence. Its worshippers approach it upon their knees, kiss it, mutter prayers, deposit their contributions in a box by its side, rise and walk away with their face toward it. Meanwhile a candle burns on either side of the holy bird.

*Prayer*.—They have no liturgy, nor do they pray audibly, believing that all prayer should be with the heart only.

*Fasts*.—They say God does not require them to fast, save during Ramazan, when they fast three days instead of thirty. This fast must be begun and ended in the presence of either

Sheikh or Peer. It is ended by a participation in holy wine that is considered to be the blood of Christ. The cup containing it is held in both hands, after the sacrificial manner of the East, and if a drop should fall it is gathered with religious care.

*Feasts*.—These are the following: 1. On the first Wednesday in April, which is the beginning of their year. 2. August 1st, and continuing three days, in honor of Melek Fukhr ed Deen. 3. September 22d, and continuing eight days, to Sheikh Hâdi, and called "et towafat"—i.e. the floods. 4. November, called the Nahevi. (This feast is especially observed by the Yezidees of Jebel Toor, at which the sacred ox is worshipped in connection with Babylonian orgies.) 5. January 1st, and lasting three days, in honor of Shems ed Deen. At all these feasts there is much singing in connection with the religious dances. They have a hymn-book called "Zemboor," the hymns of which are in Arabic. They have also songs which are in Koordish and are sung to Koordish tunes.

*RELATION TO MISSIONARY WORK*.—So long as the Turkish Government continues to draft Yezidees into the army it will not allow them to be Christianized. Another formidable obstacle is found in a requisition of their religion that no one shall learn to read or have any dealing with books except the family of Sheikh ul Bussowi, as stated above, the custodians of the sacred book.

An attempt to teach a young man from this sect was frustrated by his relatives. An agha of influence among them in the vicinity of Wevan Sheho has been induced by Protestants to learn to read. He now refuses to worship "Sanjak Tâoos," and asks for a teacher for his village. An English lady has just sent a small sum for a tentative effort among them, and the Mardin station of the Eastern Turkey Mission, in whose field the most of the Yezidees reside, has accordingly sent out a young man for that effort. We have faith that the Yezidees will yet come forth from their darkness and ignorance, and walk in the light and knowledge of Him who is the "Light of the World."

**Yokohama** is one of the most important of the treaty ports of Japan. It is situated on a plain by the side of the Bay of Tokyo, and is shut in by hills. It occupies an area of a square mile, about one fourth of which is a foreign settlement. The climate is variable, the thermometer ranging from 95° to 43° F., and the rainfall is quite great. The population is 119,783, and there are large numbers of Chinese and Europeans. The harbor is a wide and commodious one, well protected by a breakwater. Yokohama is the port of call for the lines of steamers between San Francisco and Hong Kong, and other lines connect it with Shanghai, as well as numerous steamers which run from it to points in Japan and China. A line of steamers from Vancouver to Hong Kong stop there regularly. A railway connects it with Tokyo, and was the first railway opened in Japan (1872). It is also the terminus of a railroad which runs to Kyoto.

Mission station of the Presbyterian Church (North), 1859; 1 missionary and wife, 1 female missionary. A. B. M. U. (1872); 2 missionaries and wives, 2 female missionaries, 3 churches, 327 church-members, 2 schools, 90 pupils,

Methodist Episcopal Church (North); 2 missionaries and wives, 1 female missionary, 178 members, 4 day-schools, 372 scholars. Reformed (Dutch) Church U. S. A.; 2 missionaries and wives, 4 female missionaries, Ferris Seminary, 102 scholars. (For development of mission work, see article Japan.)

**Yonezawa**, a station of the Methodist Episcopal Church (North) in the Tokyo district, in the southeastern part of the island of Nippon, Japan; 1 missionary and his wife, 2 foreign teachers, 2 native workers, 56 church-members, 1 school, 35 scholars.

**Yoruba**, a section of the slave coast, West Africa. See Africa.

**Yoruba Version**.—The Yoruba belongs to the Negro group of the languages of Africa, and is spoken by several Yoruba tribes.—Yoruba proper, Egba, Ijebu, Ijesa, Efon, Ondo,—extending from Dahomey to the tribes on the west bank of the Niger, and said to number 3,000,000. A version was undertaken by the Revs. C. Crowther, T. King, and others, and between the years 1850 and 1878 there were issued at London, besides the New Testament, Genesis to Ruth, Psalms and Daniel. In 1879, at the request of the Church Missionary Society, a new edition of the New Testament and Psalms, slightly revised, especially as to the spelling of certain words agreed upon at a conference of Europeans and natives convened at Lagos, was published under the care of the Rev. Dr. Hinderer, the reviser. During the year 1880 the Yoruba Scriptures, the main part of which was translated by the Rev. (afterwards Bishop) Crowther, were completed at press in London under the care of Dr. Hinderer. In the same year a translating and revising committee, consisting of natives and Europeans, at Lagos, began the revision of the entire work, and a revised edition of the entire Bible was published in 1884, under the care of the Rev. Dr. Hinderer. The first edition of the New Testament being almost exhausted, a revision committee, in which the Wesleyan missionaries joined the Church Missionary Society missionaries, was formed in 1886 to revise the New Testament, with a view to the publication of an edition of 10,000 copies. In 1888 the edition passed through the press under the care of the Rev. N. Johnson. In the same year the British Bible Society also published an edition of 6,000 copies of the revised Old Testament, under the care of the Rev. J. B. Wood. Up to March 31st, 1889, 70,123 portions of the Scriptures in the Yoruba Version were disposed of.

(*Specimen verse.* John 3:16.)

Nitori ti Olorun fe araiye tobo ge, ti o fi Omo bibi re nikansoso fun ni pe, enikeni ti o ba, gba a gbô ki yio segbé, sugbon yio ni lye ti ko nipekun.

**Young Men's Association in Aid of the Baptist Missionary Society**. Headquarters, Baptist Mission House, Fumival Street, London.—The Young Men's Missionary Association was organized in 1848. Its object is to increase in every way possible interest in missions among the young. Many members of the Association have gone as missionaries to one or another of the mission fields of the Baptist

Missionary Society. Ten of the native schools of that society in India are supported by the Association, and in various other ways its influence is felt by the parent society. By means of its "Missionary Journal," published monthly, much interest in missions has been awakened in the Baptist Sunday-schools of Great Britain. Annual income, £193 18s. 10d.

**Young Men's Christian Association**.—Organizations of Christian young men for mutual improvement, and for more or less of religious activity, have probably existed in almost every age of the church. There is historical record of such societies in Great Britain and Ireland as early as the reign of Charles I. They maintained a continuous existence for nearly one hundred years, through the revolutions under Cromwell and King William, attaining their highest prosperity in the reign of the latter. The chief object of these societies was the promotion of personal piety among their members, but they gave rise in 1691 to the "Societies for the Reformation of Manners," which had for their aim the suppression of vice through legal means. These were called into being by the low state of public morals, which, notwithstanding the better attitude of the court of William and Mary, had little mended since the dissolute reign of Charles II. The early efforts of these reform societies were favored by the civil courts, and they flourished for about forty years. They had become extinct, however, in 1757, and an effort to revive them by members of Wesley's and Whitefield's congregations was defeated through the indifference if not actual hostility of the authorities. In the present century, between 1823 and 1838, David Nasmyth, of Glasgow, formed about seventy Young Men's Societies in as many cities of the United Kingdom, France, and America. In Germany, as early as 1832, similar associations of young men were formed, closely connected with the established churches and their pastors. But while all these were societies for young men, with a distinctively Christian purpose and activity, still they were very far from measuring up to the present organization. They did not as individual societies seek broadly to promote the physical, intellectual, and social as well as the spiritual welfare of young men. They did not develop or train a special class of executive officers employed to devote to this comprehensive work their entire time and energies. They did not acquire property in the form of buildings, making themselves permanent institutions in their respective communities. They did not band themselves together in district, national, international, and world's conferences, each with an executive committee employing executive officers for correspondence and visitation. They did not produce a literature stating in periodical and more permanent form the important mission and distinctive features of their Christian institution. It is true that some of these pre-existing organizations, notably those of Germany, are now part of the brotherhood forming the World's Conference of the Associations. The present Glasgow Association traces its origin to a Nasmyth Society formed in 1824, and the Cincinnati Association claims also to have originated, under another name, in 1849, quite independently of suggestion from London. But it seems beyond dispute that it was not until the life of the new

movement, with the fuller conception of work for young men developed along its path, touched and modified these older organizations that they became, or are becoming, in any real sense what are now recognized as Young Men's Christian Associations. The movement which has resulted in the present world-wide brotherhood can be traced to the parent English-speaking Association which was organized in London by George Williams, June 6th, 1844, and of which that gentleman, still in vigorous manhood, is now the honored president.

But while the origin and early growth of the movement took place in London and other cities of Great Britain, the larger development and expansion of the work has been wrought out by the American Associations, which have for many years greatly exceeded any other group of these societies in numbers, strength, and usefulness. A knowledge of the London Association and its work led to the formation of Associations in Montreal (Canada), December 9th, 1851, and in Boston the 29th of the same month, neither city having any knowledge of the other's action. Other cities followed, till some twenty-five similar organizations were known to be in existence at the date of the first convention, which met in Buffalo, June 7th, 1854. By the action of this body a confederation was formed, a central committee appointed, and an annual delegated meeting of the Associations of the United States and British Provinces authorized. The first World's Conference met in Paris August 19th, 1855. Here the following declaration, since known as the Paris Basis, or the Basis of 1855, was adopted: "The Young Men's Christian Associations seek to unite those young men, who, regarding Jesus Christ as their God and Saviour, according to the Holy Scriptures, desire to be His disciples in their doctrine and in their life, and to associate their efforts for the extension of His kingdom among young men." Upon this rests the affiliation of the Associations of all lands, represented since 1855 by a triennial World's Convention, and since 1878 by a Central International Committee, with headquarters at Geneva, Switzerland. This declaration was ratified by the American International Convention at Montreal in 1856, and at Detroit in 1868 was added what is known as the "active membership test," by which in the American Associations only those in full communion with an evangelical church are admitted to voting and office-bearing membership. At the Portland Convention the following year this action was unanimously reaffirmed, the meaning of the term "evangelical" was defined, and representation at the International Convention, from all Associations thereafter organized, made conditional upon this test being embodied in their constitutions.

In April, 1860, the Associations of North America had about 25,000 members. At the breaking out of the civil war large numbers of their young men entered the armies on both sides, and the Associations naturally followed them with efforts for their welfare and that of their comrades. At the instance of the New York Association a special convention was called November 14th, 1861, which resulted in the organization of the United States Christian Commission, the work of which largely absorbed the energies of the Northern Associations during the remainder of the war. With

the return of peace, however, the Associations took up their old work with renewed zeal, advanced ideas, and better methods. From about this time dates the beginning of that unparalleled growth which has marked the past two decades. The formal adoption of the evangelical test secured the active sympathy of the churches; a clearer conception of the work, as distinctively for and by young men, focalized thought and effort, and rapidly developed both methods and men; this called for better facilities, which were readily furnished as the practical character of the work was recognized; the work demanded systematic supervision, and the paid secretaryship was developed; the Associations increased in number, spread over the country, and grew multiplex in their departments of work, and State organization and a comprehensive general supervision became a necessity; broadened methods and appliances in the local work asked for larger, better adapted and permanent quarters, and buildings sprang up by the score; till to-day the Associations are a universally acknowledged force in the religious, educational, and social life of the country.

In government the individual Associations are independent, except as to the single item of the active-membership test, each society conducting its business affairs through a board of directors as the corporate management, and with a paid executive officer styled a general secretary; but they are united in a thorough system of general organization, embracing delegated conventions, executive committees, and visiting agents, the decisions and advice of which, though in the main only advisory, are very generally accepted and followed. With the Associations of the United States and Canada this system embraces:

1. A BIENNIAL CONVENTION (annual previous to 1878), composed of delegates from all the Associations, representation being based upon the active membership. The *ad interim* powers of this convention are vested in an executive board, the members of which are elected by classes at the biennial sessions. Since 1866 the headquarters and a working quorum of this body have been located in New York, and in 1883 it was incorporated as the International Committee, a name by which it had for years been known. The present executive force of the committee consists of a general secretary, with fourteen office and travelling secretaries in the home and two in the foreign field. The scope of the committee's work is broad, including (a) supervision and extension—generally of all the work, in full when there is no State organization, and very largely of such special departments as the college, railroad, German, and foreign work; the State organizations owe their existence and early nurture to the act and care of the International Convention and its committee; (b) securing, training, and recommending general secretaries; (c) advising, and assisting regarding the plans, location, and methods of building and the management of property; (d) securing funds for its own work and aiding State and local Associations in raising money for State work for new buildings, to place secretaries in new fields, and in special financial emergencies; (e) arranging for the International meetings, assisting in planning many State and special conventions, and sending official representatives to all; (f) conducting

an extensive correspondence—200,000 letters and circulars being sent out and received in a year; (g) besides a publication list of nearly one hundred tracts and books, several annuals and other periodicals are issued, including the "Year-Book" of 200 pages, which contains, besides many valuable statistical tables, the reports of the officers and secretaries of the committee, and of its corresponding members located in every State and Province at home and in many foreign lands; (h) through the systematic efforts of the committee, the American Associations have observed annually, since 1866, a day and week of prayer in November, and since 1875, by act of the World's Conference, the Associations of other lands have joined in this observance; (i) in times of overwhelming calamity by fire, flood, fever, or disaster, the Associations have often rendered communities effective help through this committee, as their agent, in gathering and distributing such relief.

2. STATE ORGANIZATIONS, modelled after the international, and doing a like work, so far as needed, in their respective fields. First authorized by the International Convention at Albany in 1866, and first called together in each State and Province by the International Committee, these organizations have increased until in 1890 there were 34, embracing 45 States and Provinces, with 66 travelling and office secretaries. For the year ending March 1st, 1890, there were held 34 State Conventions, with an attendance of 7,295 delegates, and representing 987 Associations. The organization of a State is perfected by a subdivision into districts, of three to six counties each, with an executive committee, containing usually a member from each Association, and with a corresponding member in every non-Association town. A district convention is held at least annually, and a system of inter-visitation maintained among the several Associations. The various delegated gatherings, district, state, national, international, and world's conventions, with the conferences of general secretaries, are very helpful; not only in the social and religious contact of the workers, but the close comparison of views and methods in the various papers and discussions results in a better understanding and a more intelligent preference of the best plans and agencies developed. The instruction and advice of the travelling secretaries, and the teachings of official publications purpose to harmonize with the deliverances of the conventions, and tend to uniformity of aim and action through the organizations at large. The amount expended by the International and State Committees in the work of general supervision and extension for 1889 was \$162,000, being one tenth of the total annual expenditure of the American Associations for that year.

The organization and work of the typical American Association may be thus described: (a) A dual membership: (1) Active—men who are members of evangelical churches, and who constitute its voting, office-bearing, and working force; (2) Associate—young men of good moral character, who join usually for the secular privileges. The total membership of the 1,208 Associations reporting in 1890 is 212,000, more than half being associate members. (b) A business organization, with constitution, legal incorporation, officers, board of management, and well-ordered system of committees. Ordinarily the work is arranged under five or more depart-

ments, namely, business, religious, educational, social, physical, etc. The membership of these boards and committees, through whom the work is largely carried on, aggregates 32,000. The solidarity of the work in the larger cities is promoted by the metropolitan plan, as it is termed, by which the several organizations in a city, each under a board of management, are on an equal footing as branches, while the general control is vested in a central directorship. This body, relieved of detail work, and with its own executive officer, is able to devote its energy to a general supervision of the field and a wise extension of the work. (c) A paid secretary, with such assistants as are needed. The general secretaryship demands a person fitted for its duties by natural tact, love for the work, and more or less of technical training. His province is to supervise and direct, under the local board, and to develop workers, rather than to attempt too much detail work himself; yet his personality should touch for good the largest possible number in the sphere of his daily work. The total number of general secretaries, physical directors, and assistants in the various departments of the local work is 891, with 116 temporary vacancies. A school devoted chiefly to the training of young men as general secretaries and gymnasium instructors was opened in Springfield, Mass., in 1885, since which time it has been in successful operation, having 11 instructors in its general and special courses, with a present enrolment of over 60 students. A school of like character is in process of organization at Chicago, and there are several well-constituted summer schools. (d) A building of its own, adapted to its manifold work. A distinguishing feature in its construction is a central reception or social room, adjoining the business offices, and through which access must ordinarily be had to all other departments. These usually comprise reading-room, library, parlors, recreation-room, offices for secretaries and directors, large and small lecture-rooms, classrooms, gymnasium, including bowling-alley, baths, and dressing-rooms, a kitchen, and janitor's quarters. Two hundred and five associations have buildings, many of which are large and elegant, complete in their appointments. The total value of Association real estate is \$10,149,410—a good index of the estimate put upon the work by Christian business men, and a strong guarantee of its permanency. (e) An organized work: (1) Religious—consisting of Bible-classes, evangelistic and for Christian young men; workers' training-classes; evangelistic and devotional; meetings for young men; special work in the interests of personal purity, temperance, etc.; systematic invitation work; the distribution of religious literature; and a directly personal work, which is specially emphasized. (2) Educational—reading-rooms; circulating and reference libraries; evening classes in practical and liberal branches, book-keeping, penmanship, stenography, mathematics, drawing, languages, history, literature, political science, music, etc.; literary societies, and educational lectures. (3) Social—attractive rooms for resort, with companionable supervision, music, recreative games, and a variety of social gatherings and entertainments. (4) Physical—facilities for artificial exercise of every description, and under instructors competent, from both a scientific and practical training, to make physical examinations and

prescribe safe and helpful work; baths, and often athletic grounds for field-sports, and clubs for boating, swimming, rambling, etc. (5) Economics—employment bureau, boarding-house register, savings-bank, medical club, visitation of the sick, and similar service. (6) Junior department, in which, under special supervision and with separate rooms, a more or less full line of work is carried on for boys, and from which they graduate into the senior departments. The following are some statistics of the local work of the American Associations for 1889, about 90 per cent of the whole number of organizations reporting:

*Religious.*—Three hundred and forty-nine report 487 Bible-classes, 470 with a total average attendance of 6,005; 389 report 544 training-classes for special study of the Bible, 536 with a total average attendance of 4,206; 580 report 798 weekly prayer-meetings, 742 with a total average attendance of 18,030; 628 report 684 gospel meetings, 644 with a total average attendance of 33,000.

*Secular.*—Six hundred and eleven report a total average daily attendance at the rooms of 50,970; 731 report reading-rooms; 511 report libraries, containing 422,912 volumes; 490 libraries are valued at \$426,796; 277 report educational classes, with from 1 to 15 different branches of study, 247 reporting 17,143 different students in attendance; 145 report literary societies, 127 with a total average attendance of 3,377; 592 report 4,949 lectures; 691 report 3,269 sociables; 499 report attention to physical culture, 368 through gymnasiums and 240 through athletics and other means. The amount expended in the local work of the Associations for 1889 was \$1,700,000. Full statistics may be found in the "Year-Book," published by the International Committee, 40 East Twenty-third Street, New York. The financial management of the Associations is in the hands of representative Christian business men in the various communities, and is generally conceded to be exceptionally economical, exhibiting a very large return in labor and results for the amount invested and expended.

As has been clearly shown, a leading feature of the Young Men's Christian Association is its power of adaptation. With the young man as the focal centre, the radius of its helpfulness touches every point in the circle of his needs. Its gymnasium and athletic sports afford recreation and make his body strong; its reading-room, library, classes, lyceum, and lectures train his mind, advance him in social and business position, and broaden his whole life; its pleasant rooms and social companionship take the place of the distant or lost home; its relief agencies come to the stranger, the destitute, and the sick with aid and comfort in time of need; and its religious meetings, Bible study, and personal work win to faith and the Christian life, build up moral character, and train in active work for the best welfare of others; while the spirit and principles of Christianity pervade and vitalize the entire work.

This arm of the church is stretched down into the busy centre of the city, with its hand of shelter and helpfulness open 365 days in the year. But some of the more distinct and isolated classes of young men have been reached by the use of means specially adapted to the sphere of each. There are 302 college associations in as many institutions of learning,

with a total membership of 19,000 students, and knit together by a system of intercollegiate correspondence and visitation. This work has also given rise largely to such offshoots as: (a) the Northfield Summer School, where some 400 students from over 100 colleges spend part of their annual vacation in studying the Bible and methods of Christian work, under the instructions of eminent scholars and workers of this and other lands; (b) the great Student Volunteer Movement, through which several thousand students are pledged to foreign missionary work; (c) the Inter-Seminary Missionary Alliance; (d) the later and important movement of the Young Women's Christian Association; (e) the introduction of the college association into schools of heathen lands; (f) the recent foreign mission work for young men of the International Committee, by which, at the solicitation and with the co-operation of the church missionary boards, experienced men are being placed in the great centres of the foreign mission field to organize associations after American models, and to train native Christian young men as general secretaries and workers. In this interest a travelling agent is now visiting the Asiatic countries; secretaries of the Committee have been located at Tokyo, Japan, and Madras, India, and will follow at other places as soon as the men and means can be obtained. Railroad branches are in operation at 82 terminal points, and so acceptable is their work to both employers and employed, that railroad corporations are appropriating more than \$100,000 annually to their support. Branches exist for German-speaking young men in cities having a large population of this character, and for colored young men, especially in educational and city centres of the South. Some beginning of effort has also been made to reach the commercial traveller on the road and at his hotel, the men on the fire and police departments of the cities, the lumbermen and the miners in their western camps, the soldier and the sailor, and as has already been said, the boys, who are recognized as the young men of to-morrow.

The parent London Society at its beginning sought only the spiritual welfare of young men in a limited sphere and by the simplest means. But like everything destined to life and usefulness, it began to grow, slowly at first, adding one by one the lines of effort that have since been characteristic of the work, especially the reading-room, library, and other means of mental improvement. Through the entire history of the Associations, their methods and agencies have been a development, never forced, but wrought out gradually, and only as clearly demanded. A study of these agencies shows them to be twofold—the directly religious, and the so-called secular. The latter are employed with a double purpose—for the direct mental and physical benefit they confer, and to attract young men within the sphere of the religious influences. Neither of these objects must be lost sight of. The secular agencies are the means of largely augmenting the membership, especially from the fact that because of much generous volunteer labor and the gifts of friends the Association membership fee can be made much smaller than would be charged elsewhere for similar privileges. Aside from these paid-for privileges, however, are the directly moral and religious agencies, whose scope is broader.

Their benefits enumerated reach: (1) the active members, who in connection with their systematic duties receive a practical training in Christian work unexcelled in any other field; (2) the associates, to whose welfare the efforts of the first are specially directed; and (3) non-members who avail themselves of the reading-room, the employment bureau, the boarding-house register, and other hospitalities open to all young men, including the religious meetings. Of this threefold constituency the first and second classes are about equal, while the third largely outnumbers both the others, greatly extending the reach of the Association's influence. The institution has distinct aims as it touches men of various classes and characters. It seeks by aggressive effort to rescue those who have fallen under the power of vice, to shield and restrain those still free from evil habit and association by providing healthful recreation and good companionship, and to instruct and build up in true manliness all with whom it comes in contact; yet it constantly relies upon the gospel of Christ, and expects little permanent result except as young men commit their lives to His keeping. Those Associations are judged the most successful in which the largest percentage of active workers is developed and the greatest number of young men led into church-fellowship.

As peculiarly a lay movement, and in a sense independent of existing ecclesiastical organizations, the Associations were not at once received into favor and confidence; neither were they free from mistakes, especially in the earlier years of the work; but their loyalty and sustained usefulness long since won them recognition as thoroughly legitimate and helpful auxiliaries of the church, and on a par with such interdenominational institutions as the various missionary, Sunday-school, and publication societies. In fact they hold in some respects a closer relation to the evangelical body than some of its organic connections, as each active member must be in communion with and under the disciplinary control of one of its recognized branches, and the moment such relations cease his vital connection with the Association is severed. In compensation for the general secretaries, who are to a considerable degree withdrawn from distinctively denominational effort, the number of lay workers has been largely increased, young men are rendered more efficient through the peculiar training received, and the hearty testimony of pastors is that those most active in the Association are the best workers in the several churches. It is a well-defined principle of the Associations, that the church has paramount claim upon its young men which must in no wise be interfered with, and that success can only be expected as the work is conducted in general harmony with the pastors and general Christian sentiment of a community.

The transatlantic Associations have developed less rapidly than in America, and the work of the individual societies is much narrower in scope, especially along the line of the secular agencies. The most advance has been made in Great Britain and its colonial dependencies. In Great Britain and Ireland there are 600 Associations, with 61,000 members. In England and Ireland 49 own buildings valued at \$1,100,000; 219 report 306 weekly Bible-classes, and 385 weekly devotional meetings;

206 report libraries, 207 reading-rooms, 118 educational classes, 42 gymnasiums.

In Australia, at Melbourne, Sydney, and Adelaide, buildings are owned, as well as at Cape Town, Africa; Honolulu, Hawaii; at Osaka, Japan; and Bombay, India.

Associations have been recently organized on the American plan in Berlin, Geneva, Zurich, Amsterdam, Paris, and other cities of the Continent. In Berlin an admirable Association building has been erected, and the movement promises to spread from these centres. The recent improvements in the methods of general organization and supervision are largely the result of contact with Western ideas through the World's Conferences, at which, beginning with 1878, the American Associations have been very fully represented. At the Geneva Conference in this year 41 American delegates were present, being one fifth of the entire number, and chiefly owing to their influence the Central International Committee was appointed. To the Conferences of 1881, 1884, and 1888 this committee reported a work of visitation and correspondence which has greatly promoted the brotherhood of Associations in all lands. A general organization, with representative conventions and travelling secretaries, has followed in England, Scotland, Ireland, and other countries, in every instance greatly stimulating and advancing the entire work.

The number of Associations in the world is now 4,107; they are grouped as follows: United States, 1,259; Dominion of Canada, 82; Bermuda, 1; Argentine Republic, 1; British Guiana, 1; Chili, 2; West Indies, 5; England and Wales, 278; Ireland, 56; Scotland, 249; France, 61; Germany, 836; Holland, 457; Denmark, 93; Switzerland, 383; Norway, 73; Sweden, 85; Italy, 41; Spain, 8; Belgium, 27; Austria, 5; Hungary, 3; Russia, 9; Bulgaria, 1; European Turkey, 1; India, 15; Ceylon, 10; China, 6; Japan, 10; Asiatic Turkey, 11; Persia, 3; Syria, 1; Madagascar, 2; Africa, 11; Australia, 11; Tasmania, 2; New Zealand, 4; Hawaii, 4.

Widely as the organization has spread, it is evidently but in its infancy. In the larger cities, its earlier and more important field, only a good beginning has yet been made; the demand is immensely greater than the supply of either money or men. The extent and usefulness of the institution when the Christian faith of the world shall be fully roused to the wisdom of its methods, and the gifts of multitudes who have started in life under its helpful influences shall flow back to it, is open only to prophecy.

**Young Men's Foreign Missionary Society.** Headquarters, Y. M. C. A., Needless Alley, Birmingham, England.—This Society was organized by young men belonging to the Y. M. C. A. of Birmingham, England, in 1876, with the following objects: To promote among Christian young men a direct personal interest in foreign mission work by sending out and entirely supporting one or more missionaries chosen by the Society; to receive and circulate regular reports from missionaries who shall be in every way the representatives of the Society. The only mission, so far, of this Society is in Alfred County, Natal, South Africa. The station is named Ikwezi Lamaci, and is 4 miles distant from Harding, a military and postal station. One missionary and his wife are at the station. They went out in 1877,

and now there is a commodious mission house, a church, and a school. In addition, a building has been put up at Harding, where services are held for the police and the Griqua Kafirs. Industrial education is also conducted in the mission school. A preaching station and school has been established at Ithluku, and a mission near the coast has been opened, called Malan Cliff. Several natives have been baptized, and the outlook is most promising.

**Yuh-shan**, a county town in Kiangsi, China, in the northeast part, near the source of the Kung King River. It has an important transit trade. Mission station of the China Inland Mission (1877); 2 female missionaries, 1 native pastor, 65 communicants.

**Yung-Ping**, a town in Chihli, North China, 135 miles due east of Peking. Opened in connection with the Kaiping mines, at the eastern terminus of the railroad from Tientsin. Climate dry, with marked alternations of heat and cold. Population, 120,000. Language, Mandarin. Social condition fairly good. Mission station of the Methodist New Connexion (1884); 1 missionary and wife, 7 native helpers, 4 out-stations, 2 churches, 33 church-members, 1 school, 8 scholars.

**Yunnan**, the capital of the province of Yunnan, China. An important manufacturing and trading place. Mission station of the China Inland Mission (1882); 3 missionaries, 4 female missionaries, 3 associate missionaries, 5 communicants.

## Z.

**Zacatecas**, a city of Mexico, in the inland State of the same name. The place is not attractive in its appearance, owing to its wild, arid surroundings, and the streets are uneven and badly paved. Population, 60,000, pure-blood Indians, mixed Indians, and Spanish. Mission station of the Southern Baptist Convention; 1 missionary and wife, 1 single lady, 1 native unordained preacher, 3 churches, 73 church-members, 1 school, 20 scholars. Mission station of the Presbyterian Church (North); 1 missionary, 17 out-stations, 1,090 communicants, 597 Sabbath-schoolers, 61 day-schools, 2 native pastors, 1 Bible-woman.

**Zafarwal**, a station of the U. P. Church of U. S. A. (1866), in the Punjab, India, near Sialkot. There are 5 native workers, 107 church-members, 3 schools, 95 scholars.

**Zahleh**, a town in Syria, 35 miles northwest of Damascus. Population, 10,000. It was nearly destroyed during the Druse insurrection. Mission station of the Presbyterian Church (North); 1 missionary.

**Zanzibar**.—The territory under this name included the strip of the east coast of Africa between Warsheikh, latitude 3° north, and Delgado Bay, latitude 10° 42' south, with an indefinite extent inland, until in 1886 the extent was limited to 10 miles inland, from Cape Delgado to Kipini on the Ozi River; and that territory, together with the islands of Zanzibar, Pemba, and other small islands, constitutes the dominions of the Sultan. The German East African Association have secured the rights of the mainland, and with the lease of the northern part of the coast to the Imperial British East Africa Company, the Sultan's dominion is limited almost to the islands of Zanzibar and Pemba. Zanzibar island has an area of 625 square miles, with a population of 200,000. The town of Zanzibar has a population estimated at 100,000. Mohammedanism is the religion of the country. Mission work is carried on by the Universities' Mission, with three stations on the island, Mkunazini, Mbweni, and Kiungani, with schools, hospital and dispensary work, industrial school, theological school and home, a printing-press, under the charge of 2 clergy and

8 laity. For additional information in regard to the mainland and mission work, see Zanzibar under Africa.

**Zaragoza**, a most important city of Spain, on the Ebro River, 170 miles northeast of Madrid. It is gloomy and antiquated, with narrow, ill-paved, irregular streets, and, except charitable and religious edifices, few fine buildings. Population, 92,407 (1887). Mission station of the A. B. C. F. M.; 1 native pastor, 5 native helpers, 1 church, 66 school-children.

**Zenana Work**: see Women's Boards.

**Ziegenbalg, Bartholomew**, was born June 24th, 1683, in Pullnitz, Saxony. King Frederick IV. of Denmark, aroused to his duty to give the gospel to those under his sway in India by his chaplain, Dr. Lütken, directed him to seek men suitable for missionary service. Ziegenbalg and Plutschau, then students at Halle, young men of talent, learning, and Christian zeal, were appointed, and embarked at Copenhagen 1705. After a long and dangerous voyage, they arrived, July, 1706, at Tranquebar, a Danish possession on the Coromandel coast of Hindustan. After several days' delay the governor received them with great harshness. Ziegenbalg obtained a room near the heathen and Portuguese quarters, and began his work not only among hostile heathen, but with a government openly opposed, and a European population absorbed in business, addicted to vice, and determined at all hazards to be rid of these earnest men. Ziegenbalg having no grammar or dictionary to help in learning the language, persuaded a native schoolmaster to bring his school to the mission room, and sitting down with the children he imitated them in making the letters in the sand till he had become familiar with their form. He then found a Brahman who knew a little of English, and with his help was able in eight months to speak Tamil intelligibly. The teacher, however, was loaded with irons by the rajah and thrown into prison. Some of the Europeans owning slaves, Ziegenbalg obtained their consent that "these poor outcasts might meet for two hours daily for instruction." In less than a year five slaves were baptized. A native built a church at his own expense,

and at the dedication Ziegenbalg preached in Tamil and Portuguese to a large congregation of Christians, Hindus, and Mohammedans, and in it within a month nine natives were baptized. In the second year he made extensive preaching tours. In 1708 he visited Negapatam, and the Dutch magistrate invited the most learned Brahmaus, sumjasees, etc., to a friendly conference with the missionary on religious subjects. The discussion lasted five days, and much information concerning the origin, history, and doctrines of Christianity was diffused among the native population.

Ziegenbalg had so far mastered the language that in two years after his arrival he began Scripture translation, and a year later could speak Tamil with as much facility as his native German. He soon began the preparation of a grammar and two lexicons—one of prose, the other of poetical words. In 1711 he finished the translation of the New Testament—the first into any language of India—and a large part of the Old Testament. Not only to the Hindus, but to the half-breed Portuguese and to the slaves of Tranquebar he preached the gospel. He had also a German service weekly, which was largely attended.

The European residents, who regarded his enterprise as visionary and absurd; the trading companies, who regarded missions as detrimental to their commercial interests—all did what they could to molest and hinder him. The Danish East India Company had sent secret instructions to their agents in Tranquebar that a missionary was going to India, and that he must be driven from the country. The governor charged him with rebellion, and when Ziegenbalg vindicated his divine commission, he not only in his rage struck him, but had him taken to the fortress, where he was kept in close confinement four months, suffering greatly from the intense heat, and forbidden the use of pen and paper to communicate with his friends. When released he found the converts scattered by persecution and terror. Some were in prison, others banished; some had been violently beaten, some put to death. Though he had regained his liberty he was still persecuted, and nothing but royal authority secured him from violence at the hands of his own countrymen. He was often in straits, money sent from home having failed to reach him.

In 1714 his translation of the New Testament, the Danish Liturgy, and German hymns, with thirty-three Tamil works, including a dictionary which he had prepared, were printed. His health failing, he returned to his native land in 1715. His account of the Hindus and his missionary work created great interest in Germany and England, vast crowds being moved by his glowing appeals, kings, princes, and prelates giving liberally to the cause. He returned to India in 1719, but died soon after, at the early age of thirty-six, having in the brief period of thirteen years as the pioneer of modern missions in India accomplished a remarkable work. Three hundred and fifty converts and a large body of catechumens mourned his death. He was buried in the large mission church opened two years before his death at Tranquebar, and a marble slab in the wall bears an inscription to his memory.

**Zeisberger, David**, b. Zauchtenthal, Moravia, April 11th, 1721. His progenitors be-

longed to the ancient Church of the Bohemian Brethren, founded sixty years before the Reformation, by the followers of John Huss. When David was five years old, his parents fled to Herrnhut in Saxony, which had been founded by a colony of Moravian emigrants on the estate of Count Zinzendorf. In 1736 his parents joined the colony in Georgia, which James Oglethorpe had established three years before, leaving their son at Herrnhut to be educated by the Moravians. From this he went to Holland, and lived in a Moravian settlement called Herrendyk. Thence he went to England, where General Oglethorpe met him, and with his aid he joined his parents in 1738. In 1740 he went North, and with others founded Bethlehem and Nazareth in Pennsylvania. In 1745 he began his work among the Indians, and was soon arrested as a spy of the French by the colonial government of New York, and was imprisoned for seven weeks. Released by Governor Clinton, he labored till 1750 among the Delawares at Shamokin (Sunbury, Pa.) and the Iroquois at Onondaga, where the Six Nations made him a sachem, and "keeper of their archives." In 1750 he visited Europe in behalf of the mission. In 1752 he returned to Onondaga, but was compelled to retire to Bethlehem at the opening of the French and Indian war. Between 1755 and 1762 he visited North Carolina and the New England provinces, labored among the Indians of Canada, and acted as interpreter for Pennsylvania in the treaty with Teedyuseung and his allies. In the time of the Pontiac conspiracy he ministered to the Christian Indians who had found refuge in Philadelphia, and at the close of the war he led the survivors of the converts to Wyalusing, Bradford County, Pa., on the Susquehanna. In 1767 he established a mission among the Monsey Delawares on the Alleghany River, Venango County, and three years later began the station which he called Friedenstadt, on Beaver Creek, in what is now Lawrence County. In 1772 he went to Central Ohio, and commenced a town called Schoenbrunn, on the Tuscarawas, ten miles from the site of Canal Dover, where he was soon joined by all the Moravian converts from Pennsylvania. He built two more towns, other missionaries came, and many converts were added. Early in the Revolution the Delawares were accused of favoring the American side, and the converts were forced to leave their towns and come within the British lines. In 1781 the settlements were destroyed by a band of Wyandotte warriors at the instigation of the commandant of the British post at Detroit, the missionaries were tried as spies, and the Christian Indians removed to Sandusky. The next year ninety-six of them returned from Sandusky to the Tuscarawas to gather their corn, and were massacred at Gnadenhütten by a party of colonial militia. Disheartened by this catastrophe, Zeisberger in 1782 led a small remnant to what is now Michigan, and built an Indian town on the Clinton River; in 1786 he went back to Ohio, and founded New Salem, one mile from Lake Erie. Thence the hostility of other Indians, after four years' rest, compelled them to emigrate to Canada, where they founded Fairfield. In 1798 he returned to the Tuscarawas valley, where Congress had granted to his Indians their former lands, and built a town, calling it Goshen. There he labored for ten years, to the close of his life. He died No-

vember 17th, 1808, aged 87, having been a missionary among the American Indians for sixty years. He established thirteen Christian towns, and though scarcely one remained, yet he had many converts, and his character, motives, and efforts are "an honor to the Moravian Church, and to our common humanity."

Zeisberger was a thorough scholar. He mastered several native tongues, especially the Delaware and Onondaga. He left in manuscript a German and Onondaga Lexicon in seven volumes quarto; a Grammar of the Onondaga language in German and English, a Delaware Grammar and Dictionary, and several vocabularies. All of these are deposited in the Library of Harvard College, and in the Library of the American Philosophical Society in Philadelphia. His Diary, translated by Eugene H. Bliss, was published in two octavo volumes in 1885.

**Zirian or Sirinian Version.**—The Zir or Syrjen belongs to the Finn branch of the Ural-Altai family of languages, and is spoken by a race living in the government of Vologda, Russia, who number about 70,000. For their benefit the Russian Bible Society published the Gospel of Matthew in 1823. The British and Foreign Bible Society published in 1881 an edition of the same Gospel in Russ character, the transcription from the Slavonian character having been made by M. Luitkins, a native teacher, under the direction of the academican Wiedemann.

(Specimen verse. Matt. 5: 16.)

СЫДЗН МЕДЗ ЮГЗАЛАСЗ ТІАНЗ ЮГЫ-  
ДЗ МОРТЗАСЗ ВОДЗИНЗ, МЕДЗ АДЗАСНЫ  
ТІАНАЛЫСЬ ВЪРЪЗ КЕРӨМЗАСЗ. И ОШКА-  
СНЫ БАТЕСЗ ТІАНАЛЫСЬ, КОДЫ НЕБЕ-  
САЛАСЗ ВЫЛЫНЗ.

**Zoar.**—1. A town in Cape Colony, South Africa, southwest of Amalienstein, east of Worcester, north of Riversdale. Mission station of the Berlin Evangelical Missionary Society; 1 ordained missionary, 8 native helpers, 448 church-members, 102 school-children.

2. A settlement in Labrador, on the north-east coast, between Hebron and Ramah: mission station of the Moravian Brethren (1865). It was opened for the benefit of the Eskimo, who come from Nain and elsewhere for the fishing, and spend a large part of the year here. The European settlers as well as the Eskimo have also been benefited. Zoar presents a more pleasing appearance than most of the settlements in Labrador, for trees are numerous, and afford a pleasant change to the eye. One missionary is now in charge of the work.

**Zoroastrianism**, the form of religion supposed to have been inculcated by Zoroaster (Persian, *Zardusht*), long the state religion of Persia, but now professed by a mere handful of followers in two districts in Persia (Kirman and Yezd), and by the Parsis of India, whose name bears witness to their Persian origin. If Zoroaster was a historical character, as seems to have been the case, he probably lived in the east of Iran, in the region known as Bactria, now sometimes called Balk. His date cannot

be ascertained; some Greek writers put him 5,000 years before the siege of Troy! Modern scholars place him some 1,000 years before Christ, and some 1,500; at the best all is conjecture, but he certainly lived before Cyrus. That he was the leader of a schism in the old Aryan race seems to many probable, as the result of which the religion of one branch of the race developed into Vedism and Hinduism in India, and that of the other, which settled in Persia, into the dualistic system which still bears the name of Zoroaster.

According to this system, the world is the battle-field of two contending spirits, eternal in their origin and possessing the power of creation. The one is Ahuro-mazdao (the wise god); who is the source and author of all that is good, the other is Angro-mainyash (the spirit enemy), who, evil in his nature, ever strives to neutralize the beneficent activities of the first. These two names have become corrupted by long use into the shorter forms now common, Ormuzd and Ahriman. But the conflict between these two powers, though now conducted on terms which are apparently pretty nearly equal, is not hopeless, and is not destined to be perpetual. In due time Ormuzd is to summon all his power, and enter upon the last and decisive phase of the struggle. The might of Ahriman is to be broken forever, and the supremacy of the good established; Ahriman with his defeated followers is to be cast into hell, and to remain there, destitute of power to disturb the progress and enjoyment of the good, who are to be rewarded and to prosper, unvexed by evil, as citizens of the good kingdom.

Modern Zoroastrianism recognizes the existence of vast hierarchies of good and evil spirits, doing the will and fulfilling the purposes respectively of Ormuzd and of Ahriman. To what extent these elaborate systems of angelology and demonology influenced Jewish thought, and through them Christian thought, is a question still undetermined. The sacred books of Zoroastrianism are spoken of collectively as the Zend-Avesta. The term is not wholly accurate: the proper designation is *Avesta*, the word *Zend* signifying "interpretation," with reference to the commentaries on the original books. The *Avesta* itself is written in an ancient form of Aryan speech, allied to the Sanskrit, known popularly as the *Zend*, and possessing no other extant literature. The "interpretation" is in Pahlavi, a more modern (though ancient and now dead) language, which prevailed formerly in Persia. The *Avesta*, as at present known, is but a fragment, and not a large fragment, of the original sacred literature of Zoroastrianism. Like the Old Testament, it is not a book, but a collection of books—a literature developing in and with the life of the people. Parts of it may date back to Zoroaster, but much of it consists of the accretions of later ages. A collection of hymns or "Gâthâs" is the oldest part of it, and may be said to form the kernel of the whole; these alone claim to be the *ipsissima verba* of Zoroaster. The remainder consists of liturgical matter, and what is called by some (borrowing a phrase from Old Testament scholarship) the "priestly code" of Zoroastrianism.

The light, the sun, the fire, are considered by the Zoroastrians the symbol of Ormuzd. Therefore in their temples the sacred fire is continually burning, night and day, year after year. For this reason at evening, when they recite the

prayers of the Avesta, the faces of Zoroastrian worshippers are turned westward, towards the setting sun. Hence they are often spoken of as "sun-worshippers" and "fire-worshippers," though they themselves reject the imputation which is thus involved: they do not pray to the sun or to the fire, they say, but to that good and shining one whose presence and character are symbolized by the light, and the sources of it.

The Zoroastrian religion developed and flourished in Persia, through the vicissitudes of declension and revival incident to all religious history, from the time of its origin to the Mohammedan invasion. During that time it saw and survived the political changes and dynastic revolutions to which Persia was subject, but which need not be recounted here. Mohammed died in 632. It was but a few years after his death that Persia was invaded by armies of his followers, who, under the fierce lead of the early caliphs, were just beginning that astonishing career of conquest which within a century carried the crescent over Western Asia, Northern Africa, into Spain, across the Pyrenees, and almost to the shores of the British Channel. The Persian army was ignominiously defeated, the king dethroned, and his realms taken possession of in the name of the Prophet. The people embraced the new religion. The fire went out on the Zoroastrian altars, and the Avesta was dropped for the Koran. A handful merely of the Persians refused to be converted, and sought refuge among the mountains. There for a time they were suffered to remain. But soon after the year 700 they were subjected to such a violence of Moslem persecution that many of them were constrained to abandon Persia, and look for a refuge beyond the sea. The story of the wanderings and sufferings of this company of Zoroastrians forms a pathetic episode in the religious history of the race.

Through all their wanderings and shipwrecks the sacred fire was studiously kept alive. About the year 720 of the Christian era they landed on the western coast of India near the city of Surat, some 150 miles north of where Bombay now stands, and craved permission from the Hindu prince then ruling in that region to settle among his people, and to practise the religion of their fathers. The permission was granted,—so tradition says,—with a few easily observed conditions, among which were these, that they should adopt the dress and language of the country where they were to make their home. These conditions were accepted, and ever since the language of this Indian branch of the race has been the Gujarati, the vernacular of the district where they landed, with such dialectic variations as would naturally arise in the use of a new tongue by foreigners whose customs and religion differed so greatly from those of the land where the language had developed. The Parsis—as these Persian dwellers in India came in course of time to be called—do not appear prominently in Indian history until the English era. They faithfully maintained the practice of their religion, jealously guarded the sacred fire, and preserved inviolate the purity of their race. When, under English rule, the city of Bombay grew from a cluster of fishermen's huts into a great commercial mart, the Parsis appear as keen-eyed men of business, and founded great commercial houses. Much of the

business and of the wealth of the city of Bombay at the present time is in their hands. They have extended their operations not only into other large places in India, so that in most of the chief Indian cities at least a few Parsi merchants will be found, but even throughout the East, as far as China. Yet no large settlement of them exists outside of the Bombay presidency. The total Parsi population of British India in 1881 was 73,760; to this a small number may be added on account of the Parsi residents in native states not included in British India; the entire number being about 83,000. Of this number over 72,000 are found in the presidency of Bombay, and nearly 50,000 of them in Bombay City. Surat has also a large Parsi population (over 5,000), and the town of Nawsari, in the native state of Baroda, about 15 miles from Surat, one still larger. There are said to be about 8,500 Zoroastrians in Persia, in the districts named above.

Thus existing as a community by themselves in the midst of the composite mass of the Indian population, separated from others by their peculiar religion and customs, and with their own social organism, the Parsis are everywhere well-to-do, intelligent, and thrifty. The average degree of wealth is probably higher among them than among any other class in India. A Parsi beggar is never seen; the Parsi community always attends to the wants of its own poor, and suffers no member of its race to become a public burden. Their method of disposing of the dead is their most commonly known peculiarity. According to their belief, a dead body, the result of the working of the powers of evil, is unclean, and must not be allowed to contaminate by its presence any of the elements; it can neither be buried nor burnt nor thrown into the water, for in that way one of the elements would be defiled. It is therefore exposed in a circular structure without a roof, round the interior of which runs a shelf slightly sloping towards an opening at the centre. After being deposited in this place the vultures make swift work with it, and the bones, stripped of flesh, are afterwards swept down through the central aperture into a cavity below. These structures are called "towers of silence." Their outward life and demeanor is always respectable and decorous. It is to be feared that their religion exerts but small influence over them, and that it has deteriorated to the level of a merely perfunctory formalism. Practically they are materialists—or at least secularists, given up to the enjoyment of the good things of this world, and satisfied with the practice of the ordinary secular virtues. The Parsis have contributed the merest handful of converts to the Christian Church. No mission especially for them has ever been undertaken; but many Parsi youths are found in the missionary schools of the Bombay presidency. The few converts that have been gained from among them, however, have become men of mark and influence in the native churches of India; several of them have done and are doing most excellent work as missionaries and pastors in different parts of the Bombay presidency.

They take a prominent part in public as well as in business affairs, in modern India. Their wealthy men are liberal and public-spirited. Besides various charitable institutions supported by them for the benefit of their own race, the Parsis have not been wanting in acts of

general philanthropy. A great hospital in Bombay was founded by and bears the name of Sir Jamsetji Jijibhai, who was the first native of Hindustan to be created a baronet by the sovereign of Great Britain.

**Zoutpansberg**, a town in Transvaal, South Africa. Mission station of the Wesleyan Methodist Missionary Society; 3 missionaries work among several of the neighboring tribes, and among the English colonists in the vicinity.

**Zulus, Missions among the.**—1. *American.*—The Zulus being a part of the Bantu race, their general history, race characteristics, and language are treated of in the article "Bantu." The mission work among them being so identified with the term Zulu, it has been placed under this head.

In 1833 the Rev. Dr. Philip of Cape Town, superintendent of the London Society in South Africa, called the attention of American Christians to the great need and encouragement for Christian effort in behalf of the Zulus. The A. B. C. F. M. took up the appeal, and sent out six men with their wives to labor there. Three of these, Rev. D. Lindley, H. J. Venable, and A. E. Wilson, M.D., with their wives, were to labor for a branch of the Zulu race in what was called the "Interior," the Matabele and others, under the chieftain Umzilikazi, at Mosiga.

The other three missionaries, Rev. Messrs. Aldin Grout, George Champion, and Newton Adams, M.D., appointed to labor among the Zulus, and constituting what was called the "Maritime Mission," were detained for some five months at the Cape by reason of a war then raging in Kaffraria, through which the overland route of the missionaries would take them. Waiting in vain for these hostilities to cease, in July they left the Cape for Port Elizabeth. Here they remained till the 7th of December, then took ship, and in two weeks, December 21st, 1835, they cast anchor in Port Natal. Landing the next day, they purchased a span of oxen for the wagons which they had brought with them from the old colony, and started at once on a trip of a hundred and fifty or sixty miles, to visit the Zulu chieftain Dingana, at his residence in Zululand, and get permission to labor as missionaries among his people. Two weeks brought them to the capital. Here they were received and treated with kindness, though the king was slow to comply with their wishes in respect to the people just about him. He proposed that they take up their abode and open their school in the vicinity of the port, being allowed, however, to spend some time with him, or among the people in his more immediate neighborhood, till he should know more of the character of their labors. They remained six days at the capital, and then Mr. Champion was left in the country to make arrangements; while the other two, Grout and Adams, returned to Algoa Bay for their families and effects. Mrs. Grout, however, died of consumption, at Bethelsdorp, February 24th, 1836, before they were ready to start. The rest of the company soon set off, in ox-wagons, for Natal; and after about two months' travelling, in a new land, without roads, and through many rivers, all without a bridge, on the 21st of May they reached the Umlazi River, where Mr. Champion had prepared a

house for their reception. During the absence of his brethren Mr. Champion explored the country as far southwest as the Illovu, and selected a site for their first station, on the Umlazi, eight miles west of the Bay. Here he set about building a temporary house on the 22d of February. On the 7th of March he opened a school for the natives, using the shade of a large tree for a school-room, and the earth—the letters written in the sand—for an a-b-c book. The first day he had about a dozen scholars, some of them nurses with infants tied, as usual, to their backs. On the 21st of March he began, with about thirty people, to clear a spot for the mission house at that place. Thus commenced the first mission station among the Zulu Kafirs in the region of Natal.

The other members of the mission having returned from Algoa Bay, the brethren now made a second visit to the king, when he gave them permission to commence a station in Zululand. The site chosen was eight or ten miles north of the river Tugela, and about the same distance from the sea, on a stream called—as two others in Natal are called—the Umsunduzi. The name *Ginanzi*, which was given to the station, is composed of three Zulu words, in which it was designed to embody the promise of our Saviour: "Lo, I am with you."

Mr. Champion had now made such proficiency in the language as to be able to tell the people about God in their own tongue. His audience on the Sabbath numbered about two hundred. The king also sent him ten or a dozen pupils, boys and girls, to be taught, which, with others, at the end of eight or nine months made a school of ten boys and twenty girls. The day-school under Dr. Adams' instruction at Umlazi now numbered fifty; and his Sabbath audience amounted to some five or six hundred, most of whom were also gathered into a Sabbath-school. Meantime the printing-press was set up at Umlazi, and a few elementary books printed in the native language for the schools.

The mission to the interior having been broken up by an attack of the Boers upon the natives, in January, 1837, the missionaries left that field to join their brethren in Natal. Their journey thither was long, and they were about six months on the way. Their arrival at Natal, however, was a speedy response to the request which their brethren of the mission had just made to the Board in Boston for a reinforcement.

Mr. Lindley now at Ifumi, and Messrs. Venable and Wilson on the Umlhatuzi in Zululand, more than a hundred miles northeast from the Bay, had hardly more than begun work before they were interrupted again by the incoming of the Boers, by whose attack upon the people for whom they were laboring in the "Interior" they had but recently been moved to leave that field and come to the coast.

Many of the Dutch farmers, Boers, of the Cape Colony, being greatly offended at the small compensation allowed them by the British Government in setting their slaves, "apprentices," free, in 1837 left their homes, went north, crossed the Orange River, and settled here and there among the native tribes. Some of them came into collision with Umzilikazi, chief of the people among whom the missionaries for the Interior had attempted to establish a Boer station. In 1838 great numbers of these

found their way into Natal, and began at once to negotiate with Dingan, king of the Zulus, to whom it belonged, to get possession of it. Claiming to have complied with the king's conditions by recovering the cattle the king required, a deputation was sent to deliver the cattle and have the cession ratified. Before the messengers were allowed to leave the capital the king managed to have them all massacred. Having slain the Dutch, the king sent for Mr. Venable to come with his interpreter and see him, which he did. The king told him of the massacre, but assured him that the missionaries had nothing to fear. Mr. Venable went, with the king's permission, to consult with Mr. Owen of the Church Missionary Society, who was living near the capital, and who, having heard of the fate of the Boers, was now in great distress. The missionaries were not long in deciding to leave that part of the district, assured as they were that the end was not yet. With apparent reluctance the king allowed them to go.

As soon as news of the slaughter at Dingan's kraal had reached Dr. Adams on the Umlazi, well knowing that the circumstances of his brethren in Zululand were anything but desirable, he lost no time in attempting to aid their escape. The swollen rivers and terrified natives rendered the task by no means an easy one, but eventually all were enabled to reach the Bay in safety. In like manner those who were farther away—Venable and Wilson—having complied with the monarch Dingan's request to give him the greater part of their goods, made their preparations quickly, and in due time found themselves in the company of their brethren at Umlazi and the Bay.

Thinking it best to withdraw, at least for the present, the missionaries sailed for Port Elizabeth. It was not long before the Zulus undertook to avenge the attacks that had been not long since made upon them by white residents, and swept the entire region as with the besom of destruction. Mr. Grout had already gone to America. Mr. and Mrs. Champion also returned, and Mr. Champion died of pulmonary consumption at Santa Cruz December 17th, 1841. Dr. Wilson went also to America, and thence, in 1839, to Cape Palmas in West Africa. After two years of faithful service in this field he fell sick, and died October 13th, 1841.

Dingan's power had now been broken by the Boers and his kingdom divided; Zululand was put under the rule of Dingan's brother, Umpande, and Natal was claimed by the Boers. Then the English came in and claimed the Dutch as British subjects, and took possession of Natal. The affairs of the district beginning to betoken peace and safety, Dr. Adams came up from Graham's Town to see what encouragement there might be to resume labor. Carrying back a good report, he soon returned again with Mrs. Adams and Mr. Lindley, reaching Natal in June, 1839. Mr. Lindley now gave himself to labor as teacher and preacher among the Dutch. Dr. Adams returned to his old station at Umlazi, and had, at the end of a year's labor, a Sabbath audience of about 500, a Sabbath-school of 200, a large day-school, and an out-station 6 miles away. Mrs. Adams held meetings for the women, and taught them to read, sew, and do other work in a civilized manner. Soon at least one woman was converted. The printing-press was now set up, and by the end of 1840

more than 50,000 papers had been printed at Umlazi.

Mr. Grout, having now returned from America, recrossed the Tugela, May, 1841, and commenced a new station at Empangeni, an Eastern branch of the Umhlatusi, calling it Inkanyeri, a star. The country around was thickly inhabited, and for a time the station seemed to prosper. The attendance upon Sabbath worship was large, and the day-school well attended. But the new king, Umpande, soon became jealous of the missionary's influence, and sent a force to destroy some of his adherents. Upon this, Mr. Grout and some of his followers fled across the Tugela to the Natal side of the river, where the missionary preached for a time to a large audience on the Umgini.

These reverses, together with the prospect that the field would be cared for by English missionaries, as the district was now becoming a British colony, decided the A. B. C. F. M. to discontinue the mission, and on the 31st of August, 1843, the Board wrote the missionaries to bring it to a close. On the receipt of the orders in the early part of 1844, Mr. Grout went to Cape Town, on his way to America. Dr. Adams resolved to remain at his post, hoping to be able to support himself, if necessary, by his profession. Thus ended the first nine years of the mission. Before the mission was finally closed, the affairs of the country seemed likely to be so peaceful and orderly that the missionaries and the Board agreed to continue the mission and have it reinforced. Dr. Adams's steadfast, hopeful, diligent work had prevented any absolute break in the mission work, and when Mr. Grout arrived at Cape Town he was encouraged to return to Natal, instead of to the United States. Ministers of the gospel, the American consul, the governor of the colony, and others, showed a deep interest in the mission. A public meeting was held, addresses were made, and money was raised to defray Mr. Grout's expenses while he should report the present aspect of the field and wait for further instructions. In the meantime Mr. Grout returned to Natal with an appointment from the governor of the Cape, Sir P. Maitland, as government missionary on a salary of £150, and, resuming his work in June, 1844, began and established a prosperous station on the Umvoti River, some 40 miles from the Port and 6 from the sea-coast, where he labored till 1870, making meantime a visit to America, and finally, at the age of 67 years, he withdrew from active service, returned home, and took up his abode in Springfield, Mass., where he still resides.

Toward the close of the year 1844 Dr. Adams made a visit to the Cape, and received ordination as a minister of the gospel from clergymen there. The offer of an appointment as government missionary was made to Dr. Adams, but he declined to receive it. On his return from the Cape he resumed his labors at Umlazi and throughout the new colony. His Sabbath audiences were large, varying from five hundred to a thousand; their attention to the preaching was good, often earnest and solemn, and their general deportment was quiet and orderly. His Sabbath-school numbered from three hundred to five hundred, and his day-school about a hundred. In the summer season he held services at an out-station six miles away, and made occasional tours among the tribes at

a distance. Here his arrival at a kraal was a signal for the people in that and the neighboring kraals to assemble for worship. Having addressed them for half an hour, more or less, he rode to another settlement; and when night came his hut would be filled with men, women, and children, all glad to hear as long as his strength would allow him to speak.

More than ten years elapsed, after the missionaries first set their feet on the shores of Natal, ere they began to see any very manifest or important results of their labors. But during the year 1846 not only were the Sabbath audiences and day-schools large and flourishing, but a few of their hearers profited by the truths of the gospel and became Christians.

In the early part of the year an old woman, Umlalazi by name, once the wife of a distinguished chief, expressed to the missionary a wish to be baptized, and to make a public profession of her faith in Christ. For many months her life had been such as to induce the belief that she had been born of the Spirit. Accordingly, in June of that year, she was permitted to sit down with the missionary and his wife at the table of the Lord, to commemorate with them His dying love. On the 19th of August, two men, then living at Umlazi, came out from their heathenism and polygamy; and, in presence of a sinful and adulterous generation, took each a wife in accordance with the teachings of the gospel and the forms of a civilized, Christian government. These men having had two wives each, one of them was now married to the woman who was first taken; the other to the one who was taken last, inasmuch as the first was opposed to his embracing the gospel and had no desire to remain with him longer. Near the close of the year, another couple were married in a Christian manner at Umvoti, who also, in a few months, made a profession of the Christian faith.

In 1847 Dr. Adams transferred his station from Umlazi to Amanzimtote, some ten miles further from Durban, the new site being more centrally situated in regard to the people among whom he wished to labor. Here he labored till his death on the 16th of September, 1851. He was a pioneer missionary, whose zeal, faith, and patience never failed. In September, 1847, a new station was commenced by Rev. J. C. Bryant at Ifumi, where Mr. Lindley began labor ten years before. Mr. Bryant remained here for two years, but owing to an affection of the lungs, he, after the arrival of Mr. Ireland in 1849, devoted his strength until his death in 1850, chiefly to the preparing of books for the natives.

In the early part of 1847 Mr. Lindley resumed his connection with the mission, and began a station some twenty miles northwest from the Bay near the mountain of Inanda, from which the station took its name. In 1858 he transferred his station to a new site a few miles nearer the Bay, and remained here till his return to America in 1873. (See biographical sketch.)

In 1847 a new station was started on the Umsunduzi, some thirty miles north of the Port, by Rev. Lewis Grout, who remained here for fifteen years, teaching, preaching, studying the language and preparing a grammar of it, travelling, translating portions of the Bible, and gathering a church, till his health began to decline

and finally made it necessary for him to return to America in 1862, when he closed direct connection with the Board.

During the next two years the mission was much enlarged and encouraged by the incoming of six new missionaries, Rev. Messrs. Marsh and Rood with their wives in 1848, and Rev. Messrs. Ireland, Abraham, and Wilder with their wives in 1849.

Rev. J. L. Dohne, a German in the employ of the Berlin society, joined the mission in 1849, and had charge of a station near Table Mountain for some ten years, where he died, leaving a Zulu-Kafir Dictionary of more than ten thousand words, a monument of his scholarship, industry, and perseverance.

At the annual meeting of the mission held in September, 1850, at Umsunduzi, all the members of the mission, fourteen families, numbering forty-six souls, were present; and though nearly fifteen years had elapsed since the mission was commenced, no member of the mission had died in the field. The first grave for any of the number was dug in the following December, when Mr. Bryant died at Inanda. A nucleus of nine churches had now been formed, containing a hundred and twenty-three members, thirty-six of whom were received during the current year.

The need of competent native helpers was so apparent that a training school was opened in 1853 at Amanzimtote, and put under the care of Mr. Rood till his health failed, when others had it in charge. For want of funds this department of Christian work was eventually given up, though not till it had done much towards furnishing the mission with some of the most efficient native pastors it has ever had.

During the years 1855 and '56 much discussion arose concerning the practice of polygamy, whether it should be tolerated or allowed in converts to the Christian faith, or suffered in the church of Christ. In this Bishop Colenso took an active part in favor of suzerainty and in opposition to the principles by which the American missionaries were governed in their treatment of it. The discussion resulted in confirming the mission more than ever in the importance and rightfulness of their rule. It was now also that Sir George Grey, governor of Cape Colony, High Commissioner, etc., came to Natal, and made arrangements for having five hundred acres of land set apart at each station for mission purposes, and for having a reserve of some eight or ten thousand laid off round each station for the people. Out of these reserves the station people might have a village lot of an acre and a rural allotment of fifteen or twenty acres each, on certain conditions, such as paying survey fees, etc. He also provided for having a first-class sugar-making mill erected at one of the stations at a cost of £9,000 to the government.

In the early part of 1859 the printing-press was set up at Umsunduzi; and in a little more than six months half a sheet of easy lessons, a translation of the Acts of the Apostles, and a grammar of the Zulu language were printed,—the whole number of pages amounting to nearly three hundred thousand, all large octavo; which, considering the size of the pages and other circumstances, was really more than twice as much as had been done on the presses of the colony during the seven previous years. These three works were printed in Dr. Lep-

siaus' "Standard Alphabet," which the mission had resolved to adopt.

Between the years 1855-1870, the mission was reinforced by the incoming of eleven new workers, Rev. Messrs. Pixley, Robbins, Bridgman, Lloyd and their wives, with Miss Hance and Miss Day. Meantime death made many inroads upon the working force already in the field. To aid in meeting the depletion, something was done by a native home missionary society, which was organized in 1860, by setting native workers apart, with a formal license and a small salary, to preach the gospel and do other missionary work. Many of the people began also to take a deeper interest in education, and to unite with the mission in a desire for better educational facilities. This led to the reviving or reorganizing of schools that had been already founded, and to the establishing of new ones. In place of the seminary at Amanzimtote, which had been given up, efforts were now made to start a new one on a broader, better basis. In this the Colonial Secretary of Education took a deep interest, and secured "grants-in-aid" from the local government. Mr. Ireland was appointed in charge of the institution. In 1871 a new building was erected. In 1882 the management of the school came into the hands of Rev. H. D. Goodenough, who is still in charge. In 1869 a prosperous boarding-school for girls was opened, under the care of Mr. Edwards, at Inanda. In 1873 a home for the education of "kraal girls" was opened at Umzumbe. In this way, by these schools and other means, some eight or ten of the more promising young men were selected from those under instruction for ministry among the Zulus. Meantime, between the years 1871-80, other helpers went out from America,—Rev. Messrs. Pinkerton and Kilbon with their wives, also the Misses Pinkerton, Price, and Morris.

Some of the more troublesome native customs—such as polygamy, beer-drinking, and the selling of daughters for cattle, in marriage, against all which the missionaries had from the first found it necessary to contend—began now to reassert themselves, and to find tolerance, if not virtual approval, and sometimes an advocate, among some of the native Christians, and thus called for a firm expression of opinion, together with a decided effort to check and eradicate the evil. At a meeting of the missionaries and delegates of the churches, held at Umsunduzi in 1879, a series of "rules" was adopted, the sum of which was: that polygamy should not be allowed in any church; that no church-member should be allowed to *lobolisa*; nor should any such member be allowed to participate in any way in the making of beer-drinks, or use intoxicating drinks of any kind as a beverage; nor should any such member be allowed to smoke the *isangu*.

From the year 1880 to 1885 the mission was again reinforced by five new missionaries, Rev. Messrs. G. A. Wilder, Richards, Goodenough, Wilcox, Holbrook, and their wives; also Miss Phelps and Miss Gilson. This made the whole number of men from the beginning till 1885 30, of whom 13 had now died and 5 had retired from the mission, leaving 12 in the field. Half a century had now expired since the mission was begun, and the year 1885 was honored as a year of "Jubilee," and the last week of the year given to a series of religious festivities at Amanzimtote, now called the "Adams" station.

The presence of invited guests, among whom were the governor and a goodly number of other officials, clergymen, ladies and gentlemen of the colony, added much to the interest of the occasion.

From that time on to the present the progress, development, and fruitage of mission work have been rapid and gratifying, notwithstanding the repeated removals of one and another from the working force which death or advanced age has caused. A fitting close of this sketch of the Zulu Mission is found in a paper read by one of the secretaries of the Board at their annual meeting in New York, October 15th, 1889, as follows: "The development of Christian work here has been slow, but shows steady gains and substantial results. The entire Bible has been translated into the Zulu language; a hymn and tune book has been provided; text-books for schools and something of a Christian literature are in the hands of the people. The native churches, numbering 1,097 members, some of them served by native pastors, show the deepening hold of the gospel. A theological school and a normal and industrial school for boys at Adams, girls' boarding-schools at Inanda and Umzumbe, besides day-schools on all the stations, provide for the Christian education of the young and for the suitable training of preachers and teachers. The field covered by this mission is fairly reached by Christian teaching; the Christian life is gaining in breadth, intelligence, and reality; temperance principles prevail in these churches; and there is a growing interest in carrying the gospel to the regions beyond. For this missionary activity wide fields are open: Zululand to the north, and all the country from Delagoa Bay northward to the Zambesi, and stretching inland more than a third of the way across the continent. The work in the Zulu Mission was never in a more promising condition, and if the force can be duly maintained this mission may soon be in the way of realizing in good degree its original aim of reaching the peoples inland as well as on the coast."

**Inland or Interior Mission.**—Of the six men and their wives whom the American Board sent out to Africa in December, 1834, one half, namely, Rev. Messrs. D. Lindley, H. J. Venable, and A. E. Wilson, M.D., were appointed to what was called an "Interior" field. Arriving at Cape Town February 5th, 1835, they soon provided themselves with the needful means of travel. Seven months of journey brought them to Griqua Town, six hundred miles on their way to Umzilikazi's country and people. After remaining here for some time, another hundred miles of travel brought them to the missionary Moffat at Kuruman. In the early part of 1836 Messrs. Lindley and Venable went on before the rest of the band, to select a mission site and prepare for the coming of the rest. The site chosen was called Mosiga, near the chief's residence, a hundred miles west of what is now called Pretoria, the capital of the Transvaal Republic, and not far from the Kashan or Kemchane Mountains. The Paris Missionary Society had made an attempt to plant a station here in 1832, but were hindered by the jealousy and strifes of the tribes around them, especially of Umzilikazi, chief of the Matabele, against the Bahurutse, whom the former claimed as tributaries. These Matabele and

their chief were of Zulu origin, having come in not long before from the northwest part of Zululand, or from the sources of the Black Fofosi, where they were called Kwakumulo. Being there harassed by a powerful neighbor, Umzilikazi sought to obtain the aid of Chaka, and so became a subordinate of the great monarch. But when his brother Dingane came to be king, not being satisfied with Umzilikazi's allegiance, he sent an army to chastise him, whereupon Umzilikazi fled with his people to the westward till he reached the vale of Mosiga, where they were called Matabele, or those who hide behind their shields.

These Matabele, then, with their chief Umzilikazi, were the people for whom the missionaries Lindley, Venable, and Wilson, with their wives, went to labor when they commenced operations in the valley of Mosiga, on the 15th of June, 1836. Three months' work, with such native help as they could obtain, enabled the missionaries to prepare a dwelling; but, moving into it while the floors were yet damp, all save Dr. Wilson were soon seized with a most distressing and obstinate fever. After eight days' suffering, one of their number, Mrs. Wilson, yielded to the disease. Her body was laid uncoffined in the ground hard by. The rest recovered, though not until the fever, together with distressing rheumatic affections, had preyed upon them for several months. Indeed, some of them were still confined to the house, some to their beds, when they were startled one morning in January, 1837, by the guns of the Boers, who were now making a sudden attack upon the people by whom the missionaries were surrounded. So unexpected and vigorous was the onslaught, that the greater portion of the dwellers in the vale of Mosiga were shot down on that one bloody morning ere the sun could reach the meridian.

Having destroyed fourteen or fifteen villages, and recovered six or seven thousand head of cattle, together with the wagons which Umzilikazi had taken from them, the Boers prepared to return,—not, however, till they had persuaded the missionaries to go back with them. Fearing that the infuriated Matabele would follow them, neither the Boers nor the missionaries made any halt for twenty-three hours. Nor did the sick seem to suffer from the ride. Such a journey, however, as that was until they judged themselves to be beyond the reach of Umzilikazi's vengeance!

To their fear of being followed by a host of exasperated savages, to the unceasing cry of cattle, and to all the tumult of an irregular, excited soldiery, add the want of proper food, especially for the sick; the absence of a road, save such as the open field affords; the want of a bridge or a boat on the now swollen streams; the want of a dry suit for the women and children, who had to be floated across the Orange on a bundle of reeds, keeping only head and shoulders above water; then, forthwith, out of the river, add a night of Egyptian darkness, through all the hours of which no sleep can be had, save that which comes in spite of torrents of rain, thunder, lightning, and all the noise of the motley group by which they are surrounded,—and you have some idea of what fell to the lot of the missionaries Lindley, Venable, Wilson, and their families,

on this journey. From this place, the banks of the Ky Gariep, a few days' travel brought them to the station of a Wesleyan missionary at Thaba 'Nchu, where they were kindly received. After resting for a time, they passed on to Graham's Town, and thence overland to Natal, where they arrived the last of July, 1837.

Here, in Natal, they joined their brethren of the "Maritime" or Zulu Mission, as described in a sketch of that mission. Umzilikazi and his people eventually went north and settled in the Zambezi region, where they became powerful, and other missionaries are now laboring among them.

**European Missions among the Zulus.**—Of the eight or nine missionary societies doing mission work in Natal and Zululand, all but one, the American Board, are of European origin.

THE ENGLISH WESLEYAN METHODIST SOCIETY is the oldest and largest of these, aside from the Board. It labors for all classes, colored and white, heathen or otherwise. Its work in South Africa was begun in Cape Colony in 1814. Extending its operations by degrees, it has reached Kaffraria, Natal, and the Bechuana regions, and now numbers about forty stations, sixty missionaries, and more than 6,000 church-members. Natal was occupied in 1841. Their first missionary, Rev. Mr. Archbell, was followed by Rev. Mr. Davis. At the end of the first ten years they had among the heathen or colored population of Natal 150 communicants, 4 day-schools, and 300 scholars. At the end of forty years they had 20 missionaries in this field, 63 preaching places, and a membership of 2,496. (See Wesleyan Methodist Missionary Society.)

THE NORWEGIAN MISSIONARY SOCIETY.—The mission of this Society in Natal was commenced by Rev. Mr. Schreuder in 1845. In 1847 he had two preaching places—one on the Umhloti near Verulam, the other on the Umtongati. He then went to China, but soon returned and bought a large farm, with a view of devoting it to mission purposes. But the natives did not like the soil or situation of it, and few accepted the invitation to settle there and come under instruction. In 1850 he sold his farm, and went to labor in the upper part of Mapumulo region, on an inland branch of the Umvoti. From this he soon went to undertake mission work in the Zulu country, being invited there by the king, Umpanda, who was now desirous of his medical aid. The place chosen for the mission was called Echowe, on the Umlazi. His time was now divided between this and his other station at Mapumulo, till the next year, when three co-laborers arrived, two of whom, Larsen and Oftebro, were put in charge of the Natal station, while Mr. Schreuder and the other, Udland, devoted themselves to the Zulu field. The mission continued to grow and prosper till the great English and Zulu war in 1879, when their work was much hindered and some of the stations broken up. But in 1882 the mission had so far recovered from interruption as to be able to report one station in Natal, and no less than seven of its former ten in Zululand, with nine pastors and a church-membership of 270. Since then Mr. Schreuder has died; two or three new men have been sent out from Norway, and their stations in Natal

have come to number four. In Zululand their six or seven stations are occupied by eight or nine men.

THE BERLIN MISSIONARY SOCIETY commenced its work in South Africa in 1834. In 1847 two or three of its missionaries, of whom were Messrs. Dohne and Posselt, were driven by war from their stations in Kafirland, and came and commenced work in Natal. The former, Dohne, labored for a time among the Dutch, and then joined the American Mission. The other founded two stations, one on the sources of the Tugela, called Emmaus, the other near Pine Town, called at first New Germany and then Christianaburg. The mission was reinforced, other stations were planted in Natal, and two men sent to work among the Amaswari, north of Zululand. Not being allowed to remain there, they passed on farther north, and commenced operations at Lydenberg, in the upper part of the Transvaal Republic, where, as in other parts of South Africa, their Society has had great success. In Natal they now number four stations, and have a white missionary at each station.

THE HERMANSBURG MISSION was commenced in 1854, when the attempt to enter Gallaland by way of Mombasa had failed. The first station, called Hermannsburg, was a large farm of 6,000 acres, on the sources of the Inlumbiti, one of the branches of the Umvoti. In 1856, 1857, and 1860 reinforcements arrived, and in 1860 their mission consisted of 120 souls, eighty of whom were colonists, and the rest missionaries, catechists, or teachers. Among the colonists they could reckon men of almost every kind of handicraft—agriculturists, carpenters, joiners, wheelwrights, shoemaker and tailor, mason and miller, tanner and turner, shepherd and dyer.

Their first labor at Hermannsburg was to build a house 130 feet in length, by 40 in width, containing a large dining and sitting room, a large kitchen, 12 dwelling-rooms, and 16 sleeping-rooms, all opening into a common hall through the centre and all looking out upon the verandah by which the building was encompassed. A missionary visitor found that this dwelling was the abode of thirteen families, who took their meals all at one table in one of the central rooms. Here, too, they all met, morning and evening, for family-worship. At a little distance, less than half a mile, was another company of seven families, living in a similar manner in one house; nor was there anything but order and harmony in each house.

Rev. Mr. Hardeland, Doctor of Theology and Philosophy, and at one time missionary among the Dyaks in Borneo, being invited to take charge of the Harms Mission in Natal, consented to do so on condition that the mission should be brought in some measure into connection with the Lutheran Church of Hanover, so far at least as to require that church to examine and ordain all the missionaries who might be sent to this field by the Hanoverian Society. To this Mr. Harms assented.

The baptized natives lived in cottages arranged in a row near the houses and shops of the Germans. Previous to Mr. Hardeland's taking charge of the mission, as he did in 1859, these natives were accustomed to receive much aid of a secular kind from the mission, especially in the building of their houses, the ploughing of their land, the grinding of their meal,

and other things of a like character. No baptized person was allowed to marry a heathen, or one who had not been baptized; and if any who had been baptized should leave the station and church, or give occasion to be dismissed, they were required to leave their children in the care of the mission, that being one of the conditions on which they were baptized and received into the church.

Having established Hermannsburg as a head-station, the mission went on to plant others, some in Natal, some in Zululand, and then some in regions beyond, among the Bechuana, the Bamangwato in the Transvaal, and Sechele's people, not far from Mosiga. In 1870 they reported at their annual Home festival thirty-seven stations, of which seven were in North Zululand, five in South Zululand, eight in Natal, two in Alfred's-land, ten in Bechuana-land, and five in Little Moriko District.

CHURCH OF ENGLAND.—Certain Episcopalian, acting as private individuals, undertook mission work among the Zulus at an early date; though the Church of England Mission can hardly be said to have had a beginning in Natal till the 20th of May, 1855, at which time Bishop Colenso arrived in the colony, on his return from England, having made a visit of ten weeks in the early part of the preceding year.

Previous to this movement of the Church of England, Captain A. F. Gardiner of the Royal Navy visited Natal for the purpose of planting a mission. He reached the district in 1835, a little before the arrival of the American missionaries. Going at once to Dingan to get permission to commence missionary operations in the Zulu country, he succeeded only in part, being allowed to settle in Natal, at the Bay.

The enthusiastic missionary at length succeeded in getting Dingan to make him a grant of all Natal; whereupon he set off for England to have the act approved by the British Government, and also to procure men and means for prosecuting the great work on which his heart was set among this heathen people. In the former he failed; in the latter he succeeded, —in part at least, returning to Natal in May, 1837, accompanied by the Rev. Mr. Owen of the Church Missionary Society.

The captain soon took final leave of the country and returned to England. He afterwards went on a mission to the Patagonians, where he and his followers eventually died of starvation.

Mr. Owen was allowed to take up his residence near Dingan's Great Kraal, Umkungunhlovu, where he commenced his labors October 10th, 1837. Here he remained till the following February, when the troubles between Dingan and the Boers obliged him to leave his work. On his return from England he labored for a time at Mosiga.

In 1850 Bishop Gray of the Cape, regarding Natal as a part of his diocese, made it a visit, and drew up a scheme for mission work by the Church of England among the heathen. Supposing that ten locations were to be formed here for the exclusive use of the natives, each to contain ten thousand souls, he proposed that one or more institutions be founded in each of these, to convert the heathen to the faith of Christ, to educate the young, to form industrial habits, and to relieve the sick and afflicted. Each institution was to be under the care of a clergyman, who should be aided in the industrial and

educational part of the work by teachers. In addition to the ordinary instruction of schools, the pupils were to be taught: the males, gardening, farming, and mechanical arts; the females, sewing, cooking, washing, etc. Each institution was to exhibit a model farm and garden, and to have a guarantee of aid from government to the amount of three hundred pounds sterling per year, so long as such aid should be needed. The whole scheme and all the institutions were to be under the direction of the bishop of the diocese; though their accounts would be open to the inspection of the government, so long as its aid should be continued; and it was hoped that each of these institutions, the cost of which was put at five hundred pounds per annum, would be self-supporting in five years from the time they should be commenced. The school at each place was to consist of fifty Zulu children, who were to be under the charge of four missionaries,—a clergyman, a catechist, a mechanic, and a farmer,—and be content with shelter, food, and raiment.

On Dr. Colenso's arrival in the colony, 1855, he seemed to approve this plan, and to be ready to act upon it, and was himself made Bishop of Natal, when the colony became a separate diocese. But instead of entering at once upon the forming of ten stations, he thought it better to begin with establishing one, as a general centre of operations, a parent and model for others. Upon this he entered, on his return from England, about the middle of 1855, the government having granted him a farm of 6,000 acres for the purpose. These lands were contiguous to another grant of 2,500 acres, an endowment for a bishopric, not far from the capital of the colony. But the bishop evidently found it difficult to carry his plan into successful operation, though he never showed any lack of resolution, zeal, or perseverance in his mission work. In the course of a year, with the aid of the colonial secretary for native affairs, he succeeded in having thirty-three children, all but two of them being sons of chiefs or headmen, brought to his station, *Ekukanyeni*, "in the light," for instruction. In 1860 a girls' school was opened. Meantime half a dozen native houses of an upright fashion were built, also several native huts, and the number of baptized persons under the bishop's charge amounted to about two dozen. In this work he had the aid of three assistants and one native teacher. Other stations were now attempted, one especially at Maritzburg, under the care of Dr. Callaway, where they built a fine stone chapel for the natives, and had a printing-press. Rev. Mr. Robertson labored for a time at Umlari, then went to Zululand. Archdeacon Mackenzie labored for a time in Natal, and then received ordination and was appointed Missionary Bishop for Central Africa, and went to the Zambezi, where he soon died of African fever.

Bishop Colenso was deeply interested in his mission work, a diligent student of the Zulu language, and author of many books in that tongue. Many of the English Church, not pleased with his views on certain points, tried to have him deposed. Failing in this, they had another bishop appointed in the same field, and called Bishop of Maritzburg. Bishop Colenso's station, *Ekukanyeni*, became the prey of a prairie fire; he died, and his work for the most part collapsed, or passed into other hands; though it is understood that Mrs. Colenso and

one of her daughters still reside at the station, keep up a school for the natives, and have a small school in the city. The other bishop, he of Maritzburg, has charge of the two stations which Dr. Callaway established, at each of which he employs a white missionary. He has also two schools in charge—one at the capital and one at the seaport. The Bishop of Zululand, now some five or six years in the field, and a zealous worker, has his head station at Isandhlwana, the site of the famous battle in which the English were defeated and their Twenty-fourth Regiment utterly annihilated. Aside from this they have some six or more other stations in Zululand, with a white missionary resident at each station.

**THE FREE CHURCH OF SCOTLAND MISSION IN NATAL.**—Rev. James Allison, who labored for a time under the auspices of the Wesleyan Methodist Society, began his work in the Griqua country in 1832. He then labored for a time among the Mantatees of Basutoland; then among the Amaswari and Bahurutsi on the sources of the Pongolo. Driven thence by war and famine, he came in 1847, with 400 natives, to Natal, and settled at Indaleni, 25 miles south of Maritzburg. Separating here from the Wesleyan Society, he went with a portion of his church and people, 450 souls, and founded a new station at Edendale, 6 miles west of Maritzburg, where he and his people bought a farm of 6,000 acres. In 1857 the population numbered 600 souls, of whom 170 were church-members. At a later date the station was made over to the Wesleyan Society, and Mr. Allison eventually joined the Free Church of Scotland Mission, and put the work he was doing at Maritzburg and Empolweni into their hands, having his abode at the latter station, Empolweni, near the Umgeni. Aside from these two stations, where the Scotch are doing a prosperous work, they have a "Gordon Memorial Mission" at Umsinga, in the upper part of the colony. Here they combine industry with education. Aside from the missionary in charge, they have a white teacher, a farmer and assistant, and a girls' boarding-school in charge of a lady.

**THE SWEDISH CHURCH** began mission work in Natal not many years since, planting their first and central station on the Natal side of Rorke's Drift, not far from where the Zulus annihilated the English in battle a few years since. They now have two other stations, one in Natal and one in Zululand. They have three missionaries, and promise to do good work.

**THE ROMAN CATHOLICS** have three stations in Natal, one of which is under the Trappists, an order of Jesuits who have recently begun mission work on a large scale in South Africa. In Griqualand they have an estate of 50,000 acres, and in Natal another of 20,000. They are spending much money in buildings and work, and making earnest efforts to get a hold upon the natives. Their plan is to civilize them first, then make Trappists of them. The monks at Marianhill, a monastery near Pine Town, number 170, and the nuns at a convent half a mile away number 120. The station numbers already many large buildings. The church will hold 2,000 people. Another large building is the St. Joseph's Industrial School. Activity abounds in all the shops. They have 300 native boys and girls under instruction,

chiefly industrial. The boys become good tradesmen, masons, carpenters, blacksmiths, printers. The girls are taught to sew, knit, cook. They publish papers in English, Zulu, German, and Polish. But the government is not altogether satisfied with their teaching and influence.

THE DUTCH BOERS (farmers), who have in former years been thought indifferent if not opposed to mission work in behalf of the natives, are, many of them, now showing a warm, substantial interest in their spiritual well-being. The genuineness of the deep religious awakening they experienced some four years since is seen in their efforts to bring the Zulus with and around them into a saving knowledge of the same gospel grace of which they are happy partakers. They have their own way of carrying on the work, taking hold of it, not through any organized missionary society, but as individuals, families, committees, ministers, and laymen. Most of their preaching places are but farm-houses, sometimes the wagon-houses of the Boers, where both they and their native employés and others meet for prayer, praise, and religious instruction. Rev. James Scott speaks of being on a visit among them and "seeing eighty Boers and three or four hundred Zulus gather together for worship. The Zulus came from kraals and villages, both old and young, some clothed, but most of them heathen in their blankets. Over one hundred in Greytown have been formed into a native church in connection with the Dutch church. This work is now being carried forward under the direction

of a committee of Dutch farmers, employing three native evangelists."

**Zulu Version.**—The Zulu belongs to the Bantu family of the languages of Africa, and is spoken in Zululand.

To supply the Zulu Kafirs with the Word of Life various endeavors were made at different periods and from different quarters. In the year 1857 the New Testament, as translated into Zulu by Messrs. Annamm and Greiner of the Basle Missionary Society, was published at Mangalore, at the joint expense of the Württemberg and Basle Missionary Societies. In 1865 the American Bible Society issued likewise a New Testament at Natal, as translated by Mr. Wilder, while parts of the New Testament, translated by Mr. Dohne of the Berlin Missionary Society, had been published the previous year (1864) at Pietermaritzburg. In 1872 the British and Foreign Bible Society published the New Testament as translated by American missionaries; and in 1879 a slightly revised edition was issued by the American Zulu Mission, at the joint expense of the British and American Bible Societies. An edition of the entire Zulu Bible was published by the American Bible Society in 1883. In 1889 the British and American Bible Societies issued a corrected edition of the New Testament, prepared by the Rev. I. Rood.

wa li nika inDodana yaké ezelweyo yodwa,  
ukuba bonke aba kolwa kuyo ba nga kubh  
kodwa ba be nobomi obungapeliyo.

## APPENDIX B.

### *BIBLE VERSIONS.*

---

#### INTRODUCTION.

THE accompanying lists of Bible versions are based upon those compiled by R. N. CUST, LL.D., of London, whose long labors in connection with the Church Missionary Society and British and Foreign Bible Society have placed him in the front rank of writers on missionary subjects. Languages and Bible versions have been his special study, and these tables are the result of many years of patient and careful research. The advance sheets came with the inscription, "To be placed at the disposal of the editor of the *Missionary Encyclopedia*, for any purpose that he may wish," and the editor has felt that the best use that could be made of them was to give them as fully as possible.

The original tables are three in number: 1. Alphabetical, 2. Geographical, 3. Linguistic. Consideration of space compelled the condensation of these into two: 1. Alphabetical, 2. Geographical and Linguistic.

The Alphabetical list is an exact reprint of the original, except that the dialects are introduced into the column of the languages, and the locality is given a little more fully, in accordance with the corresponding column in the original Geographical list.

The Geographical list in the original included the columns Language, Region, Diglott, Dialect, Written Character, and Number in Linguistic List. In this the dialect has been placed with the language, the region has been omitted, as sufficiently given in the first list, and their places have been taken by two columns from the Linguistic list, giving the Family and Branch, and the source of translation. The numbering of the Geographical list has also been made consecutive, instead of being divided into groups as in the original, and the number in the Alphabetical list has taken the place of the number in the Linguistic list.

One difficulty met the editor at the outset: What system of spelling should be adopted? It would require great temerity to criticise Dr. Cust's spelling, and besides there is no common usage. At the same time there were so many instances where the ordinary reader would find it difficult to trace a particular version, that it was decided to make an index giving the common spelling, and indicating by numbers the corresponding names in the lists. There are also quite a number of versions in dialects that are not ordinarily recognized as such, and the index includes all the dialects in alphabetical order with the languages. For assistance in this the editor is greatly indebted to Rev. J. Y. Leonard, of New Haven, Conn., U. S. A., for many years a missionary of the A. B. C. F. M., in Western Turkey.

With this general preface we give below a portion of Dr. Cust's introduction in his own words:

"In 1886 I published a List of Bible Translations actually accomplished, arranged according to the Linguistic Families, and indicating the source of each translation. In 1889 I published a List of Bible Translations actually accomplished, arranged according to the Geographical Distribution of the populations using such translations, and indicating the form of written character used for each translation.

In 1890 I now publish a third List of Bible Translations actually accomplished, arranged:

1. Alphabetically according to the Language, with the Dialects of each, if any exist. The following columns indicate (1) the locality; (2) the amount of population of speakers; (3) probable duration of the language; (4) and amount of translation work done.

The following principles of these lists are brought to special notice:

- (1) The work is actually done, or in course of doing.
- (2) The versions are in actual or approximate circulation.
- (3) Obsolete and useless versions are excluded.
- (4) The object of the version is Evangelization.
- (5) The record includes all Bible Societies.
- (6) No notice is taken of plurality of versions, if they exist.
- (7) All names are entered on one uniform principle of transliteration and terminology, with stress accent to help the pronunciation.

(8) Languages are discriminated scientifically from dialects of the same language on certain understood principles, and no other terms but Language and Dialect are used.

2. The Geographical list shows where the language is spoken, and in what written character it appears.

3. The Linguistic list is to satisfy those who wish to obtain scientific information, not of practical value for purposes of Evangelization, but of surpassing interest to the scholar and student, who is informed in the last column of the name of the society which has published each translation.

Certain appendices are added for further illustration.

a. Table of languages (exclusive of dialects), spoken by populations grouped in classes according to their importance, as possible vehicles of Divine Truth.

b. Table of obsolete translations which are of no evangelizing value.

c. Table of versions in existence before the British and Foreign Bible Society led the way in the glorious career of giving the Bible to the world at large.

My object is to shut out for the future all the vagueness and uncertainty which surrounded Bible work. We ought to know whether a language is worthy of a translation, by how many it would be read, in what part of the world, what is the proper name of that language, whether it is only a dialect of another language or a jargon, whether it is a dead language, or, if a living language, what prospect of vitality it has. The word "jargon" has crept into use; it is something better than an illiterate patois, and something worse than a recognized literary dialect. Bible translations in jargons exist only for the use of the Jews in Europe or Negroes in America. It is a waste of money to spend it on translations into languages which are doomed to extinction in a short period by an inexorable law; in each case, therefore, it is a question of sound judgment whether a translation should be accepted, the work of an unduly sanguine translator: it is also wise to reflect whether the translation of the whole Bible is necessary for a small population in a low state of civilization. Appendix A shows the languages grouped in classes according to their relative importance; a study of these classes will enable an opinion to be formed, whether the translation of the whole Bible should be pressed forward; as a fact the great "conquering" languages of the world have been provided for, and the majority of the second or "permanent" class. Year by year languages will die out, and the translations must be removed from the efficient list and placed away with the honored dead and the worthies who have outlived their usefulness. Some, though dead, like the Ethiopic, Hebrew, Koptic, Latin, Mongol (literary), Pali, Sanskrit, Slavonic, and Syriac Peshito, are still kept on the active list out of deference to the wishes of those who desire to purchase them for educational, exegetical, or liturgical purposes, though on a strict application of my fourth principle above stated they ought to be excluded, and I am almost inclined to exclude them.

The population of the earth is thus distributed roughly: (1) Europe, 312,500,000; (2) Asia, 800,000,000; (3) Africa, 200,000,000; (4) America, 86,000,000; (5) Oceanica, 4,500,000. Total, 1,403,000,000.

The total number of mutually unintelligible forms of speech, whether carelessly called "tongues" or scientifically differentiated as languages, dialects of languages, or jargons, is certainly more than two thousand. No finality has been attained, or is likely in this generation to be attained, as the face of the earth has not yet been fully explored. Many of these languages are not likely to attain the honor of being intrusted with the oracles of God; they will perish before their turn comes.

In filling up the column "Population of Speakers" I became aware how extremely imperfect our data are. Where I could find no entry in an esteemed work which at the same time commended itself to my judgment, I have preferred to enter the word "Unknown." Those who have accurate information can make their own entries, and no doubt attention will be called to the subject. English is unquestionably the great leading language of the world, and deserves the honor, being free from the useless bondage of Gender, Number, Case, and Tense.

In filling up the column "Probable Duration of Language" I have been guided by my own observations, and am quite prepared to reconsider any entry for cause shown.

Many considerations occur. Some populations are bilingual: in which language shall the Bible be supplied to them? It is not a matter in which the prejudices of the priesthood or the blind policy of a ruler should be allowed to interfere; nor is it possible to forejudge the wishes of a people.

Nor should the reader blame the compiler of these lists, or the compiler be vexed, if within a very few years after he has sent forth his work, additions and emendations are required, as the work of translation is yearly progressive, and new names appear; and it is hoped that those into whose hands these lists fall, the result of much labor, will care to keep them corrected up to the mark until the time when a new and revised edition is required.

As regards the Geographical List No. II., the primary division of the five portions of the globe is by "regions," formed for convenience of the subject. The second subdivision is by "languages." From a language is differentiated a dialect by phonetics, word-store, and structure.

Ex. gr., Venetian and Neapolitan are dialects of Italian; Spanish and Portuguese, Swedish and Danish, are separate languages.

A language is entered but once. French appears under France, but the third column tells us that the language called French is the vernacular in part of Belgium, part of Switzerland, part of Italy, part of Great Britain, viz., the Channel Islands, in Canada and Mauritius, and so on. The same column tells us in what countries, and, as far as possible, in what provinces of that country, the language is spoken. This has been a most laborious task, and it cannot be pretended that the inquiry has been exhausted. It has required a very serious amount of labor, an accumulation of general knowledge, and a great deal of leisure to accomplish what has been done, for innumerable references had to be made to geographical and linguistic books. (Note. This column is transferred in these tables to the Alphabetical list.)

As the scope of the work is catholic, translations published by all Bible Societies and other associations are entered. Notice is made of the three forms in which a translation can appear, in addition to the original form in which it left the hand of the translator: (1) as a diglott, (2) in a particular dialect, and (3) a particular form of written character.

A difficulty has occurred in the grouping of some dialects. Take for instance the Lapp language; it has three dialects: the language is entered under Russia, where the main dialect is spoken; two dialects are shown, as Norse and Swedish, necessarily entered under Russia, but in the enumeration they count under Norway and Sweden. The same remark applies to Mongol; one dialect counts under China.

To secure precision the nature of the written character of every version is stated; the following are represented:

I. Ideograms. Some of the translations of languages current in China.

II. Syllabaries. North American, Japan.

III. Alphabets. 1, Roman; 2, Gothic; 3, Irish; 4, Cyril; 5, Greek; 6, Syriac; 7, Arabic; 8,; Hebrew; 9, Armenian; 10, Georgian; 11, Mongol; 12, Manchu; 13, Gurmukhi; 14, Deva-Nāgari; 15, Nāgari; 16, Pahāri; 17, Bangālī; 18, Ūriya; 19, Modhi; 20, Gujarātī; 21, Tamil; 22, Tēlugu; 23, Karnāta; 24, Malayālam; 25, Sinhālī; 26, Pālī; 27, Barmā; 28, Pegu; 29, Siam; 30, Tibet; 31, Java; 32, Batta; 33, Bugi; 34, Macassar; 35, Korēa; 36, Koptīc; 37, Ambāric; 38, Ethiopic.

Care has been taken to get rid of all the adjectival suffixes which have been fastened on to the root-word. For instance, the words Ehst, Rouman, Liv, etc., take the place of Esth-onian, Rouman-ian, Liv-onian. There can be no good reason for adding final syllables to the root-words. The well-known Greek, Swiss, Russ, Dutch, are not long words, but are familiarly used. Why then coin such words as Ruthen-ian, Croat-ian, Wend-ish, Piedmont-ese, Bulgar-ian, Kurd-ish, Sinhal-ese, Assam-ese, Mongol-ian, Bali-nese, Osset-inian, Cheremisi-an, and Lapp-onese? In the Russ language another set of adjectival suffixes are attached to the names in the Russian catalogue. In the German language another set of adjectival suffixes are attached to the names in the German and Austrian catalogues. This creates difficulties, and gives rise to errors, which are avoided by the maintenance of one uniform terminology in scientific catalogues. In the Arian languages of Northern India there is one linguistic suffix, which is used with a few exceptions, and that has been preserved, but there is no reason for adding the Arian suffix to the non-Arian languages, such as Sontal-i, Gond-i, unless the name is an Arian name superimposed, as the Malto or Maler is called geographically Rajmahāl-i, because the tribe resides in that political division, and Pahār-i, because their residence is in the hills.

The use of some terms is out of date, such as Orenburg-Turki for Kirghiz, because the original translator resided at Orenburg; Karass-Turki, for Nogai-Turki, because the translator resided at the obscure village of Karass. The word Tartar should never be used at all. It is a tribal, not a linguistic, term, and is synonymous with Turki. Why, again, should the languages of China be grouped under the general term of "Chinese"? The languages of India are not grouped under the general term of "Indian." The terms "Indian" and "Chinese" have no occasion to be used at all, as each language of those great countries has its own name.

Then, again, the entering of the same language a second time, because an edition has been struck off in a different "written character," is confusing. If the English Bible were printed for the convenience of a class of the English-reading world in an alphabet used by people in India, it would still be English, and an Urdu translation is still Urdu, whether it appears in the Roman, Arabic, or Nāgari alphabet. Judeo-German, long entered as a separate language, is only pure German in the Hebrew alphabet. Such expressions as Armeno-Turki, Judeo-Persian, Judeo-Arabic, suggest something very different from the fact. The uninstructed reader would suppose that they were dialects, when they are only the Osmānli-Turki in the Armenian alphabet, the Persian in the Hebrew alphabet, and the Arabic in the Hebrew alphabet. The use of the word "type," or letters, is objectionable when some form of written character is intended. Obviously the English language can be printed in many different types, such as pica, pearl, etc., but it is the same "alphabet." The use of the word "alphabet" as a general term is inaccurate, as some translations are in ideograms, or syllabaries, which are totally distinct from an alphabet. (This word, thus formed from the first two letters of the Phenician and Greek alphabets, is now applied to all connections of symbols, so organized as to represent accurately the sounds of each language.) An alphabet consists of consonants and vowels separate; a syllabary is composed of syllables necessarily composed of consonants and vowels united. Therefore the general term of the subject is "written character;" the three subdivisions are ideograms, syllabaries, alphabets. The word "letter" is only used when discussing the interior organization of an alphabet; the word "type" is a technical term of the printing-office.

The spelling of names should be on one uniform system, as settled by the Royal Geographical Society, the Ordnance Department of the Admiralty, and the government of British India; and an attempt has been made to introduce an accurate system.

The words "Roman alphabet" cover a great variety of forms of that alphabet, which it would be impossible to express in a statement such as the one now prepared. This alphabet has been adapted to express a great variety of sounds by diacritical marks, additional symbols, new combinations of letters, and new values given to the symbols. The same remark applies to the Arabic alphabet, which has been enlarged to express the sounds of the Persian language, and still further enlarged to express the sounds of the Urdu language. In some cases syllabaries have been devised by translators, and the ideographic symbols proper to the book-language and Mandarin-language in China, have been adapted for expressing the sounds of provincial vernaculars. It is sufficient for my purpose to indicate generally what form of "written character" has been used.

A careful distinction must be made betwixt languages that are "dead" and "extinct." When a language like Latin, Sanskrit, Hebrew, and Slavonic ceases to live on the lips of men as a vernacular, it is "dead," though perfectly intelligible and useful as a medium of oral or written communication. But when the power to read and understand a language has faded away from the knowledge even of scholars, it is "extinct," though possibly it may be resuscitated as a curiosity or for purposes of antiquarian research. Instances of resuscitated "extinct" languages offer themselves in the Egyptian, Babylonian, and Assyrian. Instances of the languages still hopelessly "extinct" are the Etruscan, Cypriot, and Hittite. It is a glad fact that no language to which has been committed the oracles of God has ever become "extinct," or passed away from the reservoir of human knowledge.

As regards the obsolete translations, under principle 3 I have omitted them. It is throwing dust into the eyes to retain them. A certain number of the names entered as dialects of the Hindi language are palpably of no use, and never were. The New England Indian translation in North America is useless, because the speakers of that language have all died out. The Narinyéri translation in Australia is useless, although the tribe exists, for the edition is exhausted, and no second edition has ever been called for. I was unable to secure a copy for my private library.

The third or linguistic list requires some remark. The languages of the world have been provisionally divided into families, or groups, but nothing like finality or exhaustion of the subject has been attained. Every portion of the world is represented on the lists of the Bible Society, except unhappy Australia. It is a marvellous surprise to a scholar who has never left Europe to have a translation of a Gospel handed to him, of the genuineness and the approximate accuracy of which there can be no doubt, in a language unprovided with scientific works or literary helps. From this text the scholar, by a reverse process to the translator, works out the linguistic features of the new language, the phonetics, the word-store, and the structure, discovers affinities with known languages, notes the variation, and makes a provisional classification. Thus the Bible Societies have mightily contributed to the expansion of knowledge. I myself receive constant application for copies or references on certain subjects, standing, as I try to stand, as an intermediary betwixt the translators in the field and the scholars of Europe at home.

## APPENDIX C.

### FOREIGN MISSIONARY SOCIETIES.

A number of efforts have been made to compile an accurate list of the various organizations for foreign mission work of the Protestant churches of England, Europe, and America. The most complete was that prepared by Rev. John Mitchell, B.D., a Presbyterian minister in Chester, England, and which was published in "The Christian" of December 14th, 1888. Another was made by Dr. R. N. Cusi in connection with the Midway Conference, and various modifications of these have appeared at different times and in different places. The number of difficulties to be overcome is greater than one would perhaps imagine, the greatest being that of determining what shall be included. Many societies do foreign work in connection with or supplemental to their home work; there are also many organizations which only in their indirect results have any relation to foreign lands. Again, within the past few years a large number of individual efforts have been inaugurated which certainly deserve mention; where to draw the line it is not easy to determine.

In the preparation of the following list, circulars were sent to every organization of which any trace could be gained which had even a remote connection with foreign missionary work. In almost every case those directly connected with foreign work responded most cordially. Some others replied that they were not foreign societies, while others still gave no answer at all.

Acting upon the basis of these replies, together with whatever of additional information could be gained by indirect means the following list has been prepared. The headings of the different sections will substantially indicate its scope, and those will be found further described in the article "Organization of Missionary Work," vol. ii. pp. 195-201.

That the list is absolutely complete is not claimed; but it is believed that it includes all organizations of prominence and most, if not all, of those that give hope of permanence.

The arrangement adopted has conformed in general to that of Mr. Mitchell's list, such changes having been introduced as seemed to be required by the modifications in his plan.

The numbers on the left correspond to those used in Appendix D, list of mission stations, spaces having been allowed for the introduction of new societies. The dates are those of the organization of the societies. The addresses of secretaries of societies or representatives of individual missionaries have been corrected to date (February, 1891) as carefully as possible. The figures following the addresses indicate the volume and page of the Encyclopædia on which the account of the society is to be found.

#### I.—SOCIETIES ENGAGED DIRECTLY IN GENERAL FOREIGN MISSIONARY WORK.

##### AMERICA.

##### UNITED STATES.

##### NO. DATE. CONGREGATIONAL.

1. 1810. American Board of Commissioners for Foreign Missions. The Secretary, Congregational House, 1 Somerset Street, Boston, Mass. I. 66.

##### BAPTIST.

3. 1814. American Baptist Missionary Union. Secretary, Rev. J. N. Murdock, D.D., U.D., Tremont Temple, Boston, Mass. I. 43.
4. 1836. Free Baptist Foreign Mission Society. Secretary, Rev. Th. H. Stacy, Auburn, Me. I. 378.
5. 1845. Southern Baptist Convention. Secretary, Rev. H. A. Foster, D.D., Richmond, Va. II. 358.

6. 1847. Foreign Mission Society of Seventh-Day Baptists. Secretary, Rev. A. E. Main, D.D., Ashaway, R. I. II. 325.

7. 1881. Home and Foreign Mission Society of the German Baptist Brethren Church. Secretary, Rev. G. B. Royer, Mount Morris, Ill. I. 388.

8. 1884. Consolidated American Baptist Missionary Convention. Secretary, Rev. R. L. Perry, D.D., Ph.D., 999 St. Mark's Avenue, Brooklyn, New York. I. 321.

9. 1886. Board of Foreign Missions, Baptist General Association. Secretary, Rev. R. De Baptiste, D.D., 118 E. S. Street, Galesburg, Ill. I. 133.

10. 1886. Baptist Convention of the United States. Secretary, Rev. J. E. Jones, D.D., 520 S. James Street, Richmond, Va. I. 132.

##### METHODIST.

13. 1819. Missionary Society of the Methodist Episcopal Church (North). The Secretaries, 150 Fifth Avenue, New York, N. Y. II. 66.

14. 1844. Foreign Missionary Society of the African Methodist Episcopal Church. The Secretary, Room 61, Bible House, Astor Place, New York, N. Y. I. 32.
15. 1845. Board of Foreign Missions in the Methodist Episcopal Church (South). Secretary, Rev. I. G. John, D.D., Nashville, Tenn. II. 80.
16. 1880. Board of Foreign Missions of the Methodist Protestant Church. Secretary, Rev. F. T. Tagg, Easton, Md. II. 84.
17. 1880. Wesleyan Methodist Missionary Society of America. Secretary, Rev. A. W. Hall, Syracuse, N. Y. I. 85.
18. 1882. General Missionary Board of the Free Methodist Church. Secretary, Rev. W. W. Kelley, 104 Franklin Street, Chicago, Ill.

EPISCOPALIAN.

20. 1835. The Domestic and Foreign Missionary Society of the Protestant Episcopal Church in the United States of America. Secretary, Rev. William S. Langford, D.D., 21-26 Bible House, Astor Place, New York, N. Y. II. 259.

PRESBYTERIAN.

22. 1836. Reformed Presbyterian General Synod, Board of Missions. President, Rev. D. Steele, D.D., 2102 Spring Garden Street, Philadelphia, Pa. II. 273.
23. 1836. Reformed (German) Church in the United States, Board of Foreign Missions. Secretary, Rev. S. N. Callender, D.D., Mt. Crawford, Rockingham Co., Va. II. 271.
24. 1837. Board of Foreign Missions of the Presbyterian Church (North). The Secretaries, 53 Fifth Avenue, New York, N. Y. II. 243.
25. 1858. Board of Foreign Missions of the Reformed (Dutch) Church in America. Secretary, Rev. Henry N. Cobb, D.D., 26 Reade Street, New York, N. Y. II. 269.
26. 1858. Board of Foreign Missions of the United Presbyterian Church of North America. Secretary, Rev. J. B. Dales, D.D., 136 N. 18th Street, Philadelphia, Pa. II. 431.

 Y. M. C. A. .... Young Men's Christian Association.

## APPENDIX D.

### LIST OF MISSIONARY STATIONS.

The word "station" is used by different societies in widely different ways. In this list it includes any place where there is permanent missionary work carried on either with the residence or under the immediate superintendence of a missionary. It thus includes a number of places that are by some called out-stations.

This list was based upon one prepared by W. E. Blackstone, Esq., of Oak Park, Ill., and kindly furnished by him to the editor, and has been compared with the published reports of the different societies and whatever other sources were available. It is aimed to include every place mentioned in the reports when the accompanying statements seemed to imply a work of permanent value. To include every name mentioned would in not a few cases, be misleading. It will inevitably happen that some names have been omitted which should have been inserted, and some inserted which might well have been omitted. In the European missions of the Baptist and Methodist Societies only those places have been retained where there are foreign missionaries either resident or in immediate charge. The table has been arranged on the following plan: Immediately succeeding the name of the station are indicated the volume and page of the Encyclopedia where there is a special account of the place. (Reference in other articles will be found in the general index.) Then comes the geographical section; then the number of the society at work, as per Appendix C, immediately preceding; and last, the number and section of the Map where the place is located. A star indicates that the location is not exact, but is estimated. Thus: Agra is described in vol. 1, page 33, of the Encyclopedia; is located in Rajputana, India; is occupied by the Methodist Episcopal Church (North), 13; the Church Missionary Society, 72; the Baptist Missionary Society, 77; and the Edinburgh Medical Missionary Society, 391; and will be found on Map No. VIII., section J. 4. Maps I. to XV. are in Vol. I.; XVI. to XXVI. in Vol. II.

Absolute accuracy in such a work is almost impossible, and although great care has been taken mistakes will undoubtedly appear.

# APPENDIX E.

## STATISTICAL TABLES.

### 1. SOCIETIES.

THE preparation of the statistics has been perhaps the most perplexing part of the work of this Encyclopædia. Many times the editor has been upon the point of giving them up. Yet that seemed impossible, and he has done the best he could. If he has failed to fairly represent the work of the societies, he must crave their kindly judgment. When the Encyclopædia was commenced, blanks were sent to every mission station asking for statistics of its work. A large number of answers were received, but the immense majority failed entirely to respond. Then when a comparison was made between these and the published reports of the societies, not a few discrepancies appeared, due chiefly, as was evident, to different dates and methods of statement. The published reports themselves presented difficulties that seemed insuperable. To quote the language of the editor of the "Missionary Herald" (A. B. C. F. M.), in the Almanac for 1891, "Missionary organizations make their statistical reports in a great variety of ways, some of them making no detailed reports at all. For instance, many make no report of the wives of missionaries; some report only ordained men; many count adherents as converts; others make no report of stations occupied; some include in contributions the amount given at mission stations. For these and other reasons no exact summary is possible." Still, aided by the kind replies of the secretaries of the different societies to the questions sent to them, the following tables have been prepared, and are presented as the best that the editor can do under the circumstances.

The tables are arranged in three parts: I. By societies, giving the work in each country. These are derived in almost every case from the published reports. II. By countries, giving the work of the different societies. These are collated from the preceding table. III. A general summary, based chiefly upon blanks filled out in the offices of the societies.
